PUBLISHED BY THE DIRECTOR, PUBLICATIONS DIVISION, OLD SECRETARPAT, DELHI-8, AND PRINTED AT THE NATIONAL PRINTING WORKS (TIMES OF INDIA), 10, DARYAGANJ, DELHI-7

PREFACE

INDIA: A Reference Annual was first brought out by the Publications Division of the Ministry of Information and Broadcasting in 1953, with the object of providing authentic information on the diverse aspects of our national life and activities. The response both within the country and abroad encouraged the publishers to widen the scope of the Annual in successive issues.

Every effort is made to include the latest available information relating to each subject covered in the *Annual*. The present volume incorporates the Annual Financial Statements of the Union and State Governments for 1959-60 and other information available at the time of the presentation of the Budget in Parliament and the State Legislatures.

The Annual contains information compiled from official and other authoritative sources. It does not, however, claim to be exhaustive. Readers requiring additional information are referred to the Government reports and publications, reference works and other books which are listed in the Select Bibliography at the end of the volume.

Chapter		Page
I. T	HE LAND AND THE PEOPLE	1-48
	THE PHYSICAL BACKGROUND (1-12)	
	Physical Features—Geological Structure—River Systems—Climate	
	POWER RESOURCES (13)	
	Coal—Lignite—Oil—Water Power	
	MINERAL RESOURCES (13-14)	
	Iron Ore—Manganese—Chromite—Refractories—Gold—Copper— Bauxite—Mica—Ilmenite—Salt—Miscellaneous Non-Ferrous Minerals	
	THE DEMOGRAPHIC BACKGROUND (14-44) Mid-Year Estimates and Growth of Population—Area and Population of States, Union Territories, Districts, Taluks/Tehsils—Birth and Death Rates—Maternity Pattern—Age Structure and Sex Ratio—Density	
	THE SOCIAL PATTERN (44-47)	
	Religions—Languages—Rural and Urban Population PEOPLE OF INDIAN ORIGIN ABROAD (47-48)	
П.	NATIONAL EMBLEM, FLAG, ANTHEM, SONG AND CALENDAR NATIONAL EMBLEM (49)	4951
	NATIONAL FLAG (49-50)	
	NATIONAL ANTHEM (50)	
	NATIONAL SONG (50-51) NATIONAL CALENDAR (51)	
Ш.		5264
	THE UNION AND ITS TERRITORY (52)	
	CITIZENSHIP AND FRANCHISE (52-53)	
	FUNDAMENTAL RIGHTS (53)	
	DIRECTIVE PRINCIPLES OF STATE POLICY (54) THE UNION EXECUTIVE (54-55)	
	PresidentVice-PresidentCouncil of Ministers	
	Attorney-General	
	THE UNION PARLIAMENT (55-56)	
	Council of States—House of the People	
	THE UNION JUDICIARY (56) COMPTROLLER AND AUDITOR-GENERAL OF INDIA (56-57) THE STATE EXECUTIVE (57)	
	Governor-Council of Ministers-Advocate-General	
	THE STATE LEGISLATURE (57-58)	
	Legislative Council—Legislative Assembly	
	THE STATE JUDICIARY (58) THE UNION AND THE STATES (58-59)	
	Legislative Relations-Administrative Relations	
	FINANCE (59-50) TRADE AND COMMERCE (61)	
	PUBLIC SERVICES (81)	
	ELECTIONS (61)	
	OFFICIAL LANGUAGE (61-62)	
	EMERGENCY AND OTHER SPECIAL PROVISIONS (62-63) Scheduled Castes and Tribes—Tribal Areas in Assam—Special	
	Officers	
	AMENDMENT OF THE CONSTITUTION (63-64)	
IV.	LEGISLATURE	6581
	UNION PARLIAMENT (65-79)	
,	State-wise Allocation of Seats and Party Position in the House of the People—Members of the Council of States—Members of the House of the People—Officers of Parliament—Functions and Powers of Parliament—Procedure—Department of Parliamentary Affairs—Committees of the Houses—Control over Executive	
	tecs of the Houses—Control over Executive	

DISTRIBUTION OF DISPLACED PERSONS (159)

Rehabilitation-Dandakaranya Scheme-Rehabilitation Industries Corporation

DISPLACED PERSONS FROM EAST PAKISTAN (158-160)

OTHER KINDS OF RELIEF (160-161)

Emergency Relief Organisation-Prime Minister's National Relief

XIV. SCHEDULED CASTES, SCHEDULED TRIBES AND OTHER BACKWARD CLASSES

162-170

CONSTITUTIONAL PROVISIONS (162)

POPULATION OF SCHEDULED CASTES AND TRIBES (163)

MEASURES TO ERADICATE UNTOUCHABILITY (163-164)

The Untouchability (Offences) Act, 1955—Campaign against Untouchability

REPRESENTATION IN LEGISLATURES (164-165)

REPRESENTATION IN THE SERVICES (164-166)

ADMINISTRATION OF SCHEDULED AND TRIBAL AREAS (166)
Autonomous Tribal Areas of Assam—Tribes Advisory Councils in Other States

WELFARE AND ADVISORY AGENCIES (166)

Commissioner for the Scheduled Castes and Scheduled Tribes---Central Advisory Boards-Welfare Departments in the States

WELFARE SCHEMES (166-170)

Educational Facilities—Economic Opportunities—Other Welfare Schemes-Tribal Research Institutes-Expenditure on Welfare Schemes-Targets under Second Plan

XV. MASS COMMUNICATION

171 - 186

BROADCASTING (171-176)

Radio Stations—Programme Composition—Vividh Bharati— Special Audience Programmes—Five-Year Plan Publicity— Programme Exchange—Transcription Service—Advisory Committees --- Programme Journals-News Services-External Services-Growth of Listening-Import and Production of Radio Sets-Television

THE PRESS (176-179)

Distribution of Newspapers according to State, Periodicity and Language-Circulation of Newspapers-Newsprint-Press Information Burcau-Freedom of the Press

Output and Thematic Classification of Feature Films-Film Institute—Production Code Bureau—Film Finance Corporation— Children's Film Society-Film Festivals-State Awards for Films-Documentaries and Newsreels-Film Censorship-Import of Cinematographic Film and Equipment-Export of Indian Films PUBLICATIONS (185-186)

ADVERTISING AND VISUAL PUBLICITY (186)

XVI. ECONOMIC STRUCTURE

187---199

NATIONAL AND PER CAPITA INCOMES (187-189)

LIVELIHOOD PATTERN ((189) WORKING FORCE (190)

PRINCIPAL CROPS (190)

PRINCIPAL INDUSTRIES (191)

PROFESSIONS AND THE LIBERAL ARTS ((191)

PER CAPITA OUTPUT (191)

CAPITAL FORMATION (192)

UNEMPLOYMENT (192-193)

PATTERN OF RURAL ECONOMY (193-198)

Expenditure Pattern-Pattern of Land Ownership-Pattern of Land Holding-Consumer Expenditure Patterns in Villages, Towns and Cities

PRICES (198-199)

XVII. PLANNING

200 - 213

BACKGROUND AND OBJECTIVES (200) FIRST FIVE-YEAR PLAN (200-202)

Outlay-Financial Resources-Targets and Achievements

SECOND FIVE-YEAR PLAN (203-213)

Objectives—Outlay and Allocations—Targets—Changes in Economic Structure—Financial Resources—Investment in the Private Sector—Foreign Exchange Position—Core Projects—Reappraisal—Outlay during first three years—Resources during next two years—Deficit Financing

XVIII. COMMUNITY DEVELOPMENT

214-217

BACKGROUND AND OBJECTIVES (214)

FINANCE (214-215)

Resources—People's Contribution—Expenditure under the Plans
—Expenditure in Blocks—External Assistance

ORGANISATION (215-216)

At the Centre—In the States—At the Block—Extension Organisation—Community Organisations—Block Development Committee

TRAINING (216)

ACHIEVEMENTS (217)

XIX. FINANCE

218 - 249

PUBLIC FINANCE (218-220)

Constitutional Provisions—Allocation of Revenue—Second Finance Commission—Budget—Audit

BUDGET ESTIMATES (220-223)

BUDGETARY POSITION (223-236)

Revenue Receipts, Revenue Expenditure, Capital Expenditure, Loan Account, Overall Budgetary Position of the Centre—Combined Revenue Receipts, Revenue Expenditure, Capital Receipts, Capital Expenditure and Overall Budgetary Position of the Centre and the States

PUBLIC DEBT (223 and 237-239)

Interest-Bearing Obligations and Interest-Yielding Assets of the Government of India—Debt Position of the Government of India—Debt Position of the States

MONEY SUPPLY AND CURRENCY (240-241)

Money Supply with the Public—Currency—Decimal Coins— Demonetisation of Certain Denominations of Coins—Conversion Hyderabad Currency into India Government Currency

BANKING (241-243)

Scheduled Banks---Monetary and Credit Policy of the Reserve Bank CORPORATE FINANCE (243-245)

Companies at Work during 1947-58—New Registrations—Government Companies—State-wise Distribution of Companies—Foreign Companies

INSURANCE (245-246)

Public and Private Insurance—State-run Insurance Schemes—Insurance Association of India

GENERAL INSURANCE (246-248)

Insurance Companies—Business Statistics—Premium Income—Assets and Investments

LIFE INSURANCE (248-249)

Life Insurance Corporation-New Business-L.I.C. Investments

XX. AGRICULTURE

251--266

LAND UTILISATION (251-256)

Irrigated Area—Area of Principal Crops—Seasons—Production of Principal Crops—Imports of Foodgrains—Distribution of Foodgrains DEVELOPMENT PROGRAMMES (256-258)

Minor Irrigation—Land Reclamation—Multiplication and Distribution of Improved Seeds—Manures and Fertilizers—Plant Protection and Locust Control—Crop Campaigns

AGRICULTURAL MARKETING (259-260)

Grading and Standardisation—Regulated Markets—Development of the Fruit Preservation Industry—Marketable Surplus—Cooperative Marketing and Processing

FORESTRY (260-263)

Area Under Forests—Production of Timber and Firewood—Value of Minor Forest Produce—Development Schemes—Soil Conservation

ANIMAL HUSBANDRY AND FISHERIES (263-265)

Census of Livestock, Poultry and Agricultural Machinery—Key Village Scheme—Gosadan Scheme—Gaushala Development Scheme—Poultry Development—Dairy Schemes—Development of Fisheries

AGRICULTURAL WORKERS (265-266)

First Agricultural Labour Enquiry—Minimum Wages—Second Agricultural Labour Enquiry—Rural Consumer Price Index Scheme

XXI. LAND REFORM

268---278-

ABOLITION OF INTERMEDIARIES (268-270)

Progress—Area under Intermediaries—Compensation Payable and Paid

TENANCY REFORM (270-273)

Andhra Pradesh-Bihar—Bombay—Jammu and Kashmu— Kerala—Madhya Pradesh—Madras—Mysore—Orissa—Punjab-Rajasthan—Uttar Pradesh—West Bengal—Union Territories

CEILING ON HOLDINGS (273-274)

CONSOLIDATION OF HOLDINGS (274-275)

SUB-DIVISION AND FRAGMENTATION (275-276)

CENSUS OF LAND HOLDINGS (276)

CO-OPERATIVE FARMING (276)

BHOODAN (276-278)

Aims and Objects-Assistance to Bhoodan-Bhoodan Donations and Distribution-Gramdan Donations

XXII. CO-OPERATIVE MOVEMENT

279--288

BACKGROUND (279-281)

CO-OPERATIVE STRUCTURE (281-282)

Co-operative Operations-Profits Earned

FRIMARY SOCIETIES (282-285)

Agricultural Credit Societies—Agricultural Non-Credit Societies—Non-Agricultural Credit Societies—Non-Agricultural Non-Credit Societies—Primary Land Mortgage Banks

CENTRAL SOCIETIES (285-286)

Central Banks and Banking Unions-Central Non-Credit Societies

APEX SOCIETIES (286-287)

State Co-operative Banks—State Non-Credit Societies—Central Land Mortgage Banks

OTHER ASPECTS ((288)

Supervising Unions—State Unions and State Institutes—Insurance Societies—Societies Under Liquidation

XXIII. IRRIGATION AND POWER

289 - 304

IRRIGATION (289) FLOOD CONTROL (290) INLAND NAVIGATION (290) POWER (290-297)

Resources—Progress of Electricity Supply —Organisation for Power Development—Ownership—Consumption—Rural Electrification—Power Schemes under the Plans

RIVER VALLEY PROJECTS (297-301)

Bhakra-Nangal Project—Hirakud Dam Project—Rajasthan Canal Project—Damodar Valley Project—Tungabhadra Project—Kosi Project—Chambal Project—Nagarjunasagar Project—Koyna Project—Rihand Dam Project—Bhadra Reservoir Project— Kakrapara Project—Machkund Project—Mayurakshi Project

DEVELOPMENT PROGRAMME (301-304)

Achievements and Targets under Plans—The National Projects
Construction Corporation Private Ltd.—Principal Irrigation Works
—Principal Irrigation Projects under the Second Plan

XXIV. INDUSTRY

305--336

INDUSTRIAL POLICY (305-306)
REGULATION OF INDUSTRY (306-307)
PRODUCTIVITY (307)

INDUSTRIAL FINANCE (307-308)

Industrial Finance Corporation-Industrial Credit and Investment Corporation—Refinance Corporation—National Industrial Development Corporation—Foreign Capital

DEVELOPMENT OF INDUSTRIES (308-318)

Early Stages-During First Plan-During Second Plan-Industrial Projects in the Public Sector-Outlay on Industries-Progress of Industry: Capacity and Production

INDUSTRIAL PRODUCTION (319)

PRINCIPAL INDUSTRIES (320-331)

Cotton Textiles—Jute—Sugar—Cement—Paper—Iron and Steel—Engineering—Locomotives and Coaches—Ship-building—Aircraft—Chemicals and Drugs—Fertilizers—Oil—Coal and Lignite-Other Minerals

PLANTATION INDUSTRIES (331-332)

Tea, Coffee and Rubber: Area and Production SMALL-SCALE AND COTTAGE INDUSTRIES (333-338)

Background-Expenditure and Outlay-Khadi Industry-Ambar Charkha

XXV. TRADE

341 - 354

EXTERNAL TRADE (341-344)

Foreign Trade of India—Balance of Payments—Imports— Imports on Government Account—Developmental Imports—

TRADE POLICY (344-346)

TRADE AGREEMENTS (346)

TARIFF (346)

DIRECTION OF TRADE (346-347)

Exports to Principal Countries-Imports from Principal Countries PATTERN OF TRADE (348-350)

Imports and Exports of Principal Commodities

TERMS OF TRADE (350-352)

Index Numbers of Exports and Imports-Net Terms of Trade STATE TRADING CORPORATION (352) INTERNAL TRADE (352-354)

Coastal Trade-Inland Trade-Metric Weights and Measures

XXVI. TRANSPORT

356-377

RAILWAYS (356-368)

Progress since 1853—Railway Zones—Railway Finances Development under Plans: New Construction and Works-Rolling

Stock-Workshops, Plant and Machinery-Electrification-Dieselisation-Bridges-Amenities for Railway Users-Staff Welfare

Operating Statistics: Passenger Traffic and Earnings—Ticketless Travel-Accidents and Safety of Passenger Trains-Goods Traffic and Earning -- Punctuality Ratio-Export Traffic-Locomotive Utilisation-Wagon Usage

Fares and Freight

Administration

ROADS (368-370)

Progress-National Highways-Other Roads-Roads in the States' Sector

ROAD TRANSPORT (370-371)

Motor Vehicles-Import of Motor Vehicles and Spare Parts-Administration

INLAND WATERWAYS (371)

SHIPPING (371-373)

Progress under Plans-Merchant Shipping Act-Shipping Corporations -Hindustan Shipyard-Second Shipyard-Training Institutions

PORTS (373-374)

Major Ports-Minor Ports-National Harbour Board TOURIST TRAFFIC (374-376)

Administrative Set-up —Hotel Standards and Rate Structure Committee-Relaxation in Tourist Regulations-Information-Number of Tourists-Tourist Revenue-Development Plans

CIVIL AVIATION (376-377)

Progress since 1947—Air Corporations—Training—Flying Clubs—Aerodromes—Aircraft—Air Transport Agreements

XXVII. COMMUNICATIONS

381-386

POSTAL SERVICES (381-383)

Postal Statistics—Urban Mobile Post Offices—Air Mail and Allup Schemes—Air Parcel Service with Foreign Countries—Postal Savings Bank—Postal Insurance

TELEGRAPH SERVICES (383-384)

Telegraph Statistics—Telegraph Service in Hindi and Other Indian Lanaguages

TELEPHONE SERVICES (384-385)

Telephone Statistics—Own Your Telephone Scheme—Message Rate System—Telephone Industry

OVERSEAS COMMUNICATIONS (385-386)

Radio Telephone Service—Radio Telegraph Service—Radio Photo Service—Other Services

XXVIII. LABOUR

387-398

EMPLOYMENT STATISTICS (387-388)

Employment in Factories, Coal Mines, Cotton Mill Industry PRODUCTIVITY (388-389)

NATIONAL EMPLOYMENT SERVICE (389-390)

Employment Exchange Statistics-Crastsmen Training

WAGES AND EARNINGS (390-393)

Annual Earnings—Real Earnings—Working Class Consumer Price Index—Regulation of Wages—Wage Census Scheme—Steering Group on Wages—Coal Mines Bonus Schemes

INDUSTRIAL RELATIONS (393-395)

Industrial Disputes—Industrial Employment Standing Orders— Discipline in Industry—Works Committees—Tripartite Machinery—Conciliation Machinery—Adjudication Machinery—Workers' Participation in Management—Workers' Education

TRADE UNIONS (395)

Registered Trade Unions and their Membership—Membership of All-India Organisations

SOCIAL SECURITY (396)

Employees' State Insurance Scheme—Employees' Provident Fund—Coal Mines Provident Fund Schemes—Workmen's Compensation—Maternity Benefits

LABOUR WELFARE (396-397)

Coal Mines Labour Welfare Fund-Mica Mines Labour Welfare Fund-Welfare of Plantation Labour-Labour Welfare Funds in Central Government Industrial Undertakings-Labour Welfare Centres

INDUSTRIAL HOUSING (397-398)

Financial Aid for Industrial Housing—Plantation Labour Housing Scheme

XXIX. STATES AND UNION TERRITORIES

400-477

Arca, Population, Capital, Principal Languages, Governor, Council of Ministers, Chief Secretary, Judges of High Court, Advocate General, Members of Public Service Commission, Members of Legislative Assembly and Council and Budget

ANDHRA PRADESH (400-405)

ASSAM (406-408)

BTHAR (409-414)

BOMBAY (415-422)

JAMMU AND KASHMIR (423-425)

KERALA (426-428)

MADHYA PRADESH (429-433)

MADRAS (434-438)

MYSORE (439-443)

ORISSA (444-446)

PUNJAB (447-450)

RAJASTHAN (451-454)

UTTAR PRADESH (455-461) WEST BENGAL (462-467) **DELHI** (468) HIMACHAL PRADESH (469-470) MANIPUR (471-472) TRIPURA (473-474) ANDAMAN AND NICOBAR ISLANDS (475) LACCADIVE, MINICOY AND AMINDIVI ISLANDS (476) NORTH-EAST FRONTIER AGENCY (476) NAGA HILLS-TUENSANG AREA (476) PONDICHERRY (476-477)

XXX. INDIA AND INTERNATIONAL ORGANISATIONS

478-485

UNITED NATIONS ORGANISATION (478-464)

Political: Algeria—Cyprus—Lebanon—Atomic Energy Agency— —Trust and Non-Self-Governing Territories—People of Indian Origin in South Africa-Kashmir-Co-existence-Disarmament-Election to UN Bodies-UN Conference on the Law of the Sea-International Law Commission Economic and Social: Economic Commission for Asia and the Far East-Food and Agriculture Organisation-International Labour Organisation-United Nations Educational, Scientific and Cultural Organisation-World Health Organisation-United Nations International Children's Emergency Fund—General Agreement on Tariffs and Trade—United Nations Technical Assistance Programme-International Bank for Reconstruction and Development-International Finance Corporation-International Monetary Fund-United Nations Special Fund-Other Specialised Agencies of the United Nations

OTHER INTERNATIONAL ORGANISATIONS (484-465)

Commonwealth-Colombo Plan-Commonwealth Parliamentary Association-International Conference of Agricultural Economists-International Commission of Jurists-International Air Transport Association

XXXI. LAWS OF PARLIAMENT DURING 1958 486-490

XXXII. **IMPORTANT EVENTS OF 1958**

491---507

XXXIII. GENERAL INFORMATION

508-524

WARRANT OF PRECEDENCE (508-509) REPUBLIC DAY AWARDS (509-511)

Bharat Ratna-Padma Vibhushan-Padma Bhushan-Padma Shri

GALLANTRY AWARDS (511-513)

Param Vir Chakra—Maha Vir Chakra—Vir Chakra—Ashoka Chakra: Classes I, II and III

AWARDS TO SCHOLARS (513)

DIPLOMATIC REPRESENTATIVES OF INDIA (514-521)

FOREIGN DIPLOMATIC REPRESENTATIVES IN INDIA (522-534)

APPENDICES

525---551

Chapter III Recommendations of the Official Language Commission (525)

VI Supreme Court Decisions (525-528) Recommendations of the Law Commission (528-529)

Chapter VIII Scholarship Schemes: For Studies Abroad and in India (529-532) Engineering and Technological Institutions (532-533)

Chapter IX Organisations Recognised by the Sahitya Akademi (533-535) Institutions Recognised by the Sangeet Natak Akademi (535-538) Institutions Recognised by the Lalit Kala Akademi (538-539) Awards for Outstanding Books (539) Awards for Music, Dance and Drama (539-540) Lalit Kala Akademi Awards (540)

XI Medical Colleges (540-541) Chapter Dental Colleges (541) Ayurvedic Colleges (541-542) Tibbiya Colleges (542)

Chapter XV Film Awards (542-543)

Chapter XIX Tax Payable on Income or Incomes (544-545)
Rates of Estate Duty (546)
Rates of Wealth Tax (546-547)
Rates of Expenditure Tax (547)

Chapter XXVI Aerodromes (547)

Chapter XXVII National Savings Certificates (548)
Current Postal Rates (548)
Foreign Post (549)
Miscellaneous (549)
Air Fee: Foreign (550-551)
Air Parcels (551)

SELECT BIBLIOGRAPHY

552---562

CHAPTER I

THE LAND AND THE PEOPLE

India, also known as Bharat, is well marked off from the rest of Asia by mountains and the sea, which give the country an unmistakable geographical unity. Bounded by the Himalayas in the north, the country stretches southwards and, at the Tropic of Cancer, tapers off into the Indian Ocean between the Bay of Bengal on the east and the Arabian Sea on the west. Lying entirely to the north of the Equator between latitudes 8° and 37°10′ north and longitudes 68° and 97°25′ east, it measures about 2,000 miles from north to south and about 1,850 miles from east to west and covers an area of 12,59,765 sq. miles.* Measured by the extent of its territory, India is the seventh largest country in the world. It has a land frontier 9,425 miles long and a coastline of about 3,535 miles.

THE PHYSICAL BACKGROUND

The formidable Himalayas form India's northern boundary, along which lie Sinkiang, Tibet and Nepal. Sikkim and Bhutan are two States in this region which are attached to India by special treaties. A series of mountain ranges in the east separate India from Burma. To the north-east lies East Pakistan between the States of West Bengal and Assam. In the north-west, West Pakistan borders on India. In the south, the Gulf of Mannar and the Palk Strait separate India from Ceylon. The Andaman and Nicobar Islands in the Bay of Bengal and the Laccadive, Minicoy and Amindivi Islands in the Arabian Sea form part of the Indian Union.

Physical Features

The mainland comprises three well-defined regions: (i) the great mountain zone of the Himalayas, (ii) the Indo-Gangetic Plain and (iii) the southern Peninsula.

The Himalayas comprise three almost parallel ranges interspersed with large plateaus and valleys some of which, like the Kashmir and Kulu valleys, are fertile, extensive and of great scenic beauty. Some of the highest peaks in the world are to be found in these ranges. The high altitudes limit travel only to a few passes, notably the Jelep La and Natu La on the main Indo-Tibet trade route through the Chambi valley, north-east of Darjeeling. The mountain wall extends over a distance of about 1,500 miles with a varying depth of 150 to 200 miles. In the east, between India and Burma and India and Pakistan, the hill ranges are much lower. The Garo, Khasi, Jaintia and Naga hills running almost east-west join the chain of the Lushai and Arakan hills running north-south.

The Indo-Gangetic plain, 1,500 miles long and 150 to 200 miles broad, is formed by the basins of three distinct river systems, the Indus, the Ganga and the Brahmaputra. It is one of the world's greatest stretches of flat alluvium and also one of the most densely populated areas on earth. There is hardly any variation in relief. Between the Yamuna river at Delhi and the Bay of Bengal, nearly 1,000 miles away, there is a drop of only 700 feet in elevation.

^{*} Area figure excludes the State of Pondicherry (186 sq. miles).

The Peninsular plateau is marked off from the Indo-Gangetic plain by a mass of mountain and hill ranges, varying from 1,500 to 4,000 ft. in height. The more prominent among these are the Aravalli, Vindhya, Satpura, Maikal and Ajanta. The Peninsula is flanked on one side by the Eastern Ghats, where the average elevation is about 2,000 ft., and on the other by the Western Ghats where it is from 3,000 ft. to 4,000 ft., rising in places to 8,840 feet. Between the Western Ghats and the Arabian Sea lies a narrow coastal strip, while between the Eastern Ghats and the Bay of Bengal there is a broader coastal area. The southern point of the plateau is formed by the Nilgiri hills where the Eastern and Western Ghats meet. The Cardamom hills lying beyond may be regarded as a continuation of the Western Ghats.

Geological Structure

Geologically also, India consists of the same three distinct units, namely, the ancient block of the Peninsula, the Himalayas and their associated group of young fold-mountains and the Indo-Gangetic plain lying between these two.

The Peninsula is a region of great geological stability and is remarkably immune from seismic disturbances of any intensity. The basal complex of the larger part of the Peninsula consists of highly metamorphosed

rocks of the earliest periods.

The geological sequence in the Himalayas has been almost entirely marine and there is little doubt that the area now occupied by the great mountains was a deep sea till a late period in the geological history of the area. Much of the area is still very imperfectly known geologically, especially in the east, and some aspects of its history are still controversial. The Siwalik formations represent the material derived from the erosion of the mountains themselves and they have filled in the foredeep that formed in front of the rising Himalayas. These deposits are not essentially different from some of those now forming.

The Indo-Gangetic plain is a macro-region of alluvium covering 3,00,000 square miles. The thickness of the alluvial deposits has never been ascertained. Borings to a depth of 1,300 feet have not revealed any rocky bed. The filling is of very unequal depth and varies in character, having been replenished in the east by alluvial deposits brought down from the mountains by the rivers and in the west by windblown materials. Topographically the plains are remarkably homogeneous with little relief

for hundreds of miles.

River Systems

Rivers in India are of four major types, viz. (a) the Himalayan rivers, (b) the Deccan rivers, (c) coastal rivers and (d) rivers of inland drainage basin. The Himalayan rivers are generally snow-fed and have, therefore, continuous flow throughout the year. During the monsoon months the Himalayas receive very heavy precipitation everywhere and the rivers discharge the maximum amount of water during this season, causing frequent floods. The Deccan rivers are generally rain-fed, and therefore, fluctuate very much in volume. A very large number of streams are non-perennial. The coastal streams, specially of the West Coast, are short in length and have limited catchment areas. Most of them are also non-perennial. The streams of the inland drainage basin of western Rajasthan are few and far between. Most of them are of ephemeral character. They drain towards the individual basins or salt lakes like the Sambar or are completely lost in the sands and have no outlet to the sea. The Luni is the only river that drains into the Rann of Kutch.

The Ganga basin is the largest, receiving waters from an area which comprises about one-quarter of the total area of India. Its boundaries are well defined by the Himalayas in the north and the Vindhya mountains in the south. The Ganga has two main headwaters in the Himalayas—the Bhagirathi and the Alakananda, the former rising from the Gangotri glacier at Gaumukh. The Ganga is joined by a number of Himalayan rivers including the Yamuna, Ghagra, Gandak and the Kosi. The westernmost river of the Ganga system is the Yamuna, which rises in the Yamnotri glacier and joins the Ganga at Allahabad. Of the rivers flowing north from central India into the Yamuna or the Ganga, mention may be made of the Chambal, the Betwa and the Sone.

The second largest river basin in India is that of the Godavari. It covers an area which comprises about 10 per cent of the total area of India. The basin of the Brahmaputra in the east and that of the Indus in the west are of about the same size. The Krishna basin is the second largest in Peninsular India. The Mahanadi flows through the third largest basin in the Peninsula. The basin of the Narmada in the uplands of the Deccan and that of the Kaveri in the far south are of about the same size, though

of different character and shape.

The two other river systems, which are small but nevertheless agriculturally very important, are those of the Tapti in the north and the Pennar in the south.

Climate

The climate of India is essentially monsoon-tropical and this description is valid notwithstanding local variations such as the winter rains in the northwest, which are entirely subsidiary to the main summer rainfall regime. The seasonal rhythm can be broadly classified as follows (i) the Cold Weather from October to the end of February; (ii) the Hot Weather from the beginning of March to the beginning or middle of June; and (iii) the Rainy Season from the beginning or middle of June to the end of September. The Indian Meteorological Department recognises four seasons: (i) The Cold Weather Season (December-March); (ii) The Hot Weather Season (April-May); (iii) the Rainy Season (June-September); and (iv) the season of the retreating south-west monsoon (October-November). Tables 1 and 2 show the normal monthly and annual maximum and minimum temperatures in degrees Fahrenheit in shade at nearly 50 selected stations in India.

The south-west monsoon usually breaks about the beginning of June in the West Coast and arrives elsewhere later. With the exception of the Madras Coast, India receives the major share of its rainfall between June and September from the south-west monsoon. As it retreats there is a spell of dry weather in north India and widespread rainfall in the coastal districts of Madras and Orissa where October and November are often the rainiest months of the year. The South-east Coast of India receives

most of its rain during November and December.

The climatic regions of India, based on the dominant factor of rainfall, may be arranged thus: (i) regions with more than 80 inches of annual rainfall such as the West Coast (with a long dry season in the north and a short dry season in the south), Bengal and Assam; (ii) regions with 40 to 80 inches of rainfall such as the north-east plateau and the middle Ganga valley; (iii) regions with 20 to 40 inches of rainfall, such as Madras (in which the wettest months are November and December), southern and north-western Deccan (with mean January temperatures of 65°-75° F) and the upper Ganga Plain (with lower January temperatures and higher July ones). To these may be added the Himalayan regions with very heavy rainfall. Table 3 shows normal monthly and annual rainfalls in about 50 selected places in the country.

POWER RESOURCES

Coal

In India coal occurs mainly in the Gondwana system of Indian Geology, minor deposits occuring in Tertiary rocks of India. The reserves of all types of coal occuring in seams of one foot or more in thickness within a depth of 1,000 ft. are estimated at 6,000 crore tons.

Lignite

Lignite occurs in Madras, Rajasthan, Saurasthra, Kutch and Kashmir. Of these, the deposits covering an area of 100 sq. miles in and around Neyveli in the South Arcot district of Madras State are estimated at 20,000 lakh tons.

Oil

A tentative estimate places the potential oil-bearing areas in India at 4,00,000 sq. miles. However, the country's oil reserves can be estimated only in the light of the extensive programme of oil exploration which is now in progress.

Water Power

The country's estimated firm hydro-electric potential capable of economic development is 410 lakh kw.

MINERAL RESOURCES

Iron Ore

The iron ore reserves in India, assessed at one-fourth of the total world reserves, are estimated at 2,100 crore tons. India's deposits are the largest as compared to any other country in the world. Large deposits of hematite ores are known in Bihar, Orissa, Madhya Pradesh, Mysore and Bombay, magnetite ores occurring in Madras, Mysore, Bihar, Orissa and Himachal Pradesh. Extensive reserves of limonite ores associated with spathic ores are present in West Bengal. The proved and indicated reserves of all types of ores amount to about 679 crore tons.

Manganese

India ranks third in her manganese deposits. About 10 crore tons of a total estimated reserve of 11.2 crore tons are in Madhya Pradesh and Bombay.

Chromite

Chromite comes mainly from Bihar, Orissa and Mysore. The total reserves have been estimated at 13.2 lakh tons.

Refractories

Occurrences of magnesite have been reported from a number of places in Andhra Pradesh, Madras, Mysore, Rajasthan and Uttar Pradesh. The total reserves have been estimated at 1,000 lakh tons. Fire-clays occur in almost all States, those of Bihar and Bengal being the most important. The largest deposits of kyanite in the world occur in Bihar, smaller occurrences being known to exist in Orissa. Other States where kyanite occurs are Bombay, Andhra Pradesh, Mysore and Rajasthan. Deposits of sillimanite of potential commercial importance occur in Assam, Madhya Pradesh, Mysore, and Kerala. Corundum is found in Assam, Madhya Pradesh, Rajasthan and Mysore, the reserves in Madhya Pradesh alone being of the order of 4 lakh tons including 1 lakh tons of high grade mineral.

Gold

The Kolar Gold Fields in the Mysore State hold probable reserves of about 12.6 lakh tons of ore.

Copper

Copper ore is available in a 80-mile belt in Bihar.

Bauxite

The occurrence of bauxite is widespread in India. The chief areas are Bihar, Madhya Pradesh, Bombay, Madras, and Jammu which together hold probable reserves of about 2,500 lakh tons. According to a recent estimate, high grade bauxite reserves are placed at 280 lakh tons, of which roughly one-third is in Bihar.

Mica

Mica is available in three mica belts of about 1,500 sq. miles in Bihar, 1,200 sq. miles in Rajasthan and 600 sq. miles in Andhra Pradesh. The best quality of mica, perhaps the best in the world, comes from Bihar.

Ilmenite

Workable deposits occur in the beach sands of the eastern and western coasts of India, those on the Kerala coast being known for their extensive occurrence. India's reserves of ilmenite in beach sands have been reckoned at 3,500 lakh tons.

Salt

The main sources of supply of salt are the marine salt works along the coastal region, lake or pit brine salt in Rajasthan and Bombay, and rock salt deposits in Himachal Pradesh.

Miscellaneous Non-Ferrous Minerals

Beryl and monazite—two strategic minerals used in atomic fission—are available in Rajasthan and Kerala respectively. Bihar has sites which may prove a workable source of uranium. Minor minerals like alum, apatite, arsenic, asbestos, barytes, feldspar, fuller's earth, garnet, graphite, quartz, saltpetre and steatite, are available on a small scale. Reserves of apatite-bearing rocks are placed at 7 lakh tons in Bihar and 80 lakh tons in Madras, of which 20 lakh tons are economically recoverable. Gypsum is found in Rajasthan, Madras and Bombay. The probable reserves of gypsum have been estimated at about 881 lakh tons.

THE DEMOGRAPHIC BACKGROUND

India is the world's second most populous country. According to the 1951 census, which covered Sikkim but did not cover the State of Jammu and Kashmir and Part B tribal areas of Assam, the country's population is 35,68,79,394. The following table shows the mid-year estimates of population for the years 1952-58, based on the mean growth rate obtained during 1941-50. The figures include the population of Sikkim and Jammu and Kashmir. The 1955-58 figures include also the population of Pondicherry. The growth of population since 1901 is indicated in Table 5.

⁽a) In working out the Density of India the area and population of Sikkim have been taken into account.

⁽b) The State of Jammu and Kashmir and Part B Tribal Areas of Assam were not included in the 1951 census. The 1941 census population of Jammu and Kashmir was 40.2 lakhs and the statutory estimates of the Registrar-General as on March 1, 1950 and 1951 were 43.7 and 44.1 lakhs respectively. A local estimate of the population of Part B Tribal Areas of Assam (32,289 sq. miles) is 5.6 lakhs.

Table 7 gives the area and population of districts, tehsils and taluks.

^{*} Figures are on the basis of the 1951 census. Changes in district boundaries between March 1, 1951 and November 1, 1956 other than those covered by the Andhra State Act, 1953, Chandernagore (Merger) Act, 1954, States Reorganisation Act, 1956, and Bibar and West Bengal (Transfer of Territories) Act, 1956, have not been taken into account. The figures of area of districts are as supplied by the Surveyor General, India. The area figures of taluks/tehsils are as supplied by the State authorities for the 1951 census. Changes in district boundaries carried out in Kerala and Madhya Pradesh since November 1, 1956, have been incorporated.

(a) This is inclusive of three circles which have been included in the district and exclusive of one circle transferred to Bombay.

(b) This is inclusive of Islapur circle which has been transferred to Bombay.

Birth and Death Rates

Since many births and deaths go unregistered, there is a difference in the figures of births and deaths based on the registration data and those provided by the census data. The following table gives India's birth and death rates per thousand for the last fifty years in decennial averages:

TABLE 8
BIRTH AND DEATH RATES (DECENNIAL AVERAGES)

Decade		Re	gistered		ed by Reverse val Method
		Birth rate	Death rate	Birth rate	Death rate
1901—10 1911—20 1921—30 1931—40 1941—50	•	37 37 34 34 28	34 26 23 20	48.1 49.2 46.4 45.2 39.9	42.6 48.6 36.3 31.2 27.4

The following table shows the birth, death and infant mortality rates since 1947 based on the registration data.

TABLE 9
BIRTH, DEATH AND INFANT MORTALITY RATES

Year		!	Per thousand	l of population	Per thousand live births
			Birth rate	Death rate	Infant mortality
1947			26.4	19.7	146
1948			25.2	17.0	130
1949			26.4	15.8	123
1950		[24.5	16.1	127
1951			24.9	14.4	124
1952		!	25.4	13.8	116
1953			24.8	14.4	1118
1954	•		24.4	12.5	113
1955			27.0	11.7	100
1956(a)			27. 4	11.4	108

(a) Provisional

Between 1941 and 1951, births had occurred at an average rate of 40 per thousand per annum, deaths at an average rate of 27 per thousand per annum and the natural increase of population at an average rate of 13 per thousand per annum. The highest birth rate was in Central India (44) and the lowest in South India (36 or 37). The highest death rate was in Central India (34) and the lowest in South India (21 or 22). The highest natural increase rate was in North-West India (16-17) and West India (16) and the lowest in Central India (10).

Maternity Pattern

The following table shows the indices of child birth, child survival and child loss in respect of completed maternity experience for the former States of Travancore-Cochin and Madhya Pradesh based on information collected by the two Governments during the 1951 census.

TABLE 10

CHILD BIRTH, SURVIVAL AND LOSS INDEX

Natural Division/Sta	ate		Child birth index	Child survival index	Child loss index
East Madhya Pradesh North-West Madhya Pradesh South-West Madhya Pradesh Travancore-Cochin	••	4 A	6.1 6.3 6.6 6.6	3.6 3.6 3.6 4.6	2.5 2.7 3.0 2.0

An experimental survey undertaken in 61 districts in 1952-53 subsequent to the Census, and an analysis of registration data of 30 municipal towns in 1951, has shown the following results in respect of first births, second births, third births, fourth births and births of a higher order.

TABLE 11
FREQUENCY OF BIRTHS

Algorithmic and a second secon		Num	ber per 1,00	0 births wh	ich are
		First births	Second births	Third births	Fourth births & births of higher order
South India (27 Districts) West India (7 Districts) Central India (22 Districts) North-West India (5 Districts) 30 Municipal towns of India	0 P 0 d 0 0 0 0 0 0	228 209 210 231 209	215 180 189 206 196	181 167 162 151 167	376 444 439 412 428

Generally speaking, first births account for more than one-fifth of all births, second births for nearly another one-fifth, third births about one-sixth and fourth births and births of a higher order over two-fifths. Treating births occurring to mothers who have already given birth to three or more children as 'improvident maternity', the incidence of such improvident maternity in India compared with other countries as reported in the Census Report of 1951 was as follows:

TABLE 12
INCIDENCE OF IMPROVIDENT MATERNITY

Count	ry		Incidence of improvident maternity
India		 	42.8
USA		 	19.2
UK	* h	 	14.3
France		 	19.7
Germany (Fed	ieral Republic)	 }	12 .3
Japan	• •	 	33.9

Age Structure and Sex Ratio

INDIA	:	:	926	951	946	947	972	696	996	996	847	839	830	860

The number of females for every 1,000 males for the ten largest cities in 1951 were: Greater Calcutta (602), Greater Bombay (596), Madras (921), Delbi (750), Hyderabad (989), Ahmedabad (764), Bangalore (883), Kanpur (699), Poona (833) and Lucknow (783). India's high juvenile proportion (38.3 per cent) is exceeded only by the countries of Africa (39.1 per cent), South and Central America (40.1 per cent), South-West Asia (40.6 per cent) and South East Asia (40.9 per cent), while the proportion for European and North American countries ranges between 21.8 and 27.6 per cent. The proportion of people aged 55 and above is only 8.3 per cent in India as compared to 21.4 per cent in France and 21.1 per cent in the U.K.

Density

The density of population in India and its component States and Union Territories has already been given in Table 6. The variation and density of population between 1921 and 1951 were as follows:—

Languages

The 1951 census enumerated a total of 845 languages or dialects including 720 Indian languages or dialects spoken by less than a lakh

^{*} Exclusive of people living in the State of Jammu and Kashmir and Part B Tribal Areas of Assam where the 1951 census was not taken.

persons each and 63 non-Indian languages. Some 32.4 grore persons or 91 per cent of the population speak one or the other of the fourteen languages* specified in the Constitution. About 1.2 crore persons (3.2 per cent) speak one or the other of the 23 tribal languages or dialects and nearly 1.8 crore persons (5.0 per cent) speak one or the other of the other Indian languages or dialects spoken by a lakh or more persons each. No all-India totals were available in the 1951 census separately for persons speaking Hindi, Urdu, Hindustani or Punjabi. The number of persons speaking the various languages specified in the Constitution and the percentage of each language-group to the total population are shown in Table 18.

TABLE 18

Rural and Urban Population

Of the 35.69 crores who constitute the total population of the areas of the country where census was taken in 1951 only 6.19 crores or 17.3 per cent live in cities and towns, while the remaining 29.50 crores or 82.7 per cent live in villages. There has been, between 1921 and 1951, a slow but steady shift towards urbanisation as shown below:—

TABLE 19
RURAL AND URBAN POPULATION (1921–1951)

		; }	Percentage of	total population
Year			Rural	Urban
1921		 	88.6	11.4
1931	• •	 	87.9	12.1
1941	• •	 	86.1	13.9
1951		- 1	82.7	17.3

^{*} Fourteen languages have been specified in the Constitution. Since some persons preferred to return Hindustani, instead of Hindi or Urdu, the 1951 census enumerated 15 instead of 14 languages.

[†] The number of persons speaking Hindi in India excluding the Punjab, Delhi and Himachal Pradesh was 1,088 lakhs. The corresponding figures for Urdu, Hindustani and Punjabi were 136 lakhs, 82 lakhs and 8 lakhs respectively.

There are 3,018 towns and 5,58,088 villages in the country. 26.5 per cent of the total rural population lives in small villages (under 500 persons), 48.8 per cent in medium-sized villages (between 500 and 2,000 persons), 19.4 per cent in large villages (between 2,000 and 5,000 persons) and 5.3 per cent in very large villages (over 5,000 persons). 38.0 per cent of the urban population lives in cities (population of one lakh and over), 30.1 per cent in major towns (population between 20,000 and one lakh), 28.6 per cent in minor towns (population between 5,000 and 20,000) and 3.3 per cent in townships (population under 5,000).

The figures of towns and villages classified according to their popula-

tion are given below:

	TOTAL				5,61,104

There are in India 71 distinctively urban localities which have a population of one lakh and over as shown in the table below. Of these, 31 are town groups (a group of towns which adjoin one another so closely as to form a single inhabited urban locality for demographic purposes) and 40 isolated towns. The population of these localities according to the 1951 census is as follows:—

TABLE 21

PEOPLE OF INDIAN ORIGIN ABROAD

Emigration of persons of Indian parentage out of India is governed by the Indian Emigration Act 1922 and the Rules made thereunder and the special notifications and executive instructions issued from time to time in that behalf.

The following table* shows the number of outgoing and returning emigrants during the years 1953-57.

TABLE 22

CHAPTER II

NATIONAL EMBLEM, FLAG, ANTHEM, SONG AND CALENDAR

NATIONAL EMBLEM

The National Emblem of India is an adaptation from the Sarnath Lion Capital of Asoka as it is preserved in the Sarnath museum. In the original, raised by the Emperor to mark the hallowed spot where the Buddha first preached to his disciples the eight-fold path of salvation, there are four lions, standing back to back, mounted on an abacus with a frieze carrying sculptures in high relief of an elephant, a galloping horse, a bull and a lion, separated by intervening wheels (Chakras) over a bell-shaped lotus. Carved out of a single block of polished sandstone, the Capital was crowned by the Wheel of the Law (Dharma Chakra).

In the National Emblem adopted by the Government of India on January 26, 1950, only three lions are visible, the fourth being hidden from view. The wheel (Chakra) appears in relief in the centre of the abacus with a bull on the right and a horse on the left and the outlines of the other wheels (Chakras) on the extreme right and left. The bell-shaped lotus has been omitted. The words, "Satyameva jayate", from the Mundaka Upanishad meaning "Truth alone triumphs", are inscribed below the

Emblem in the Devanagari script.

NATIONAL FLAG

The National Flag is a horizontal tricolour of deep saffron on the top, white in the middle and dark green at the bottom in equal proportions. The ratio of the width to the length of the Flag is two to three. In the centre of the white band there is a wheel in navy blue to represent the Charkha. Its design is that of the wheel (Chakra) which appears on the abacus of the Sarnath Lion Capital. Its diameter approximates to the width of the white band and it has 24 spokes.

The National Flag was adopted by the Constituent Assembly of India on July 22, 1947 and was presented to the nation, on behalf of the women of India, at the midnight session of the Assembly on August 14,

1947.

Use of the Flag

Rules and regulations to ensure the proper use and display of the Flag have been drawn up by the Government of India. These prohibit the dipping of the Flag to any person or thing. The regimental colour, the State flag, the organisational or institutional flag will be used for this purpose when necessary.

No other flag or emblem should be placed above the National Flag or to its right. All flags are placed to the left of the National Flag if they are hung in a line. When other flags are raised, the National Flag must be the

highest.

When other flags are flown along with the National Flag on the same halyard, the latter should be at the top. The Flag should not be carried flat or horizontally, but always aloft and free. When carried in a procession it must be borne high on the right shoulder of the standard-bearer and carried in front of the procession.

When the Flag is displayed from a staff projecting horizontally or at an angle from a window sill, balcony, or the front of a building, the

saffron end should be at the top.

Normally, the National Flag should be flown on all important Government buildings such as high courts, secretariats, commissioners' offices, collectorates, jails and the offices of the district boards and municipalities. The frontier areas may fly the National Flag at some special points. The President of the Indian Republic and the Governors of States have their personal flags.

The use of the Flag will, however, be unrestricted on certain special occasions such as Independence Day, Mahatma Gandhi's birthday, during

the National Week and on any other days of national rejoicing.

NATIONAL ANTHEM

Rabindranath Tagore's song Jana-gana-mana was adopted as the National Anthem of India on January 24, 1950. The song was first sung on December 27, 1911, during the Indian National Congress session at Calcutta. The song was first published in January 1912 under the title Bharat Vidhata in the Tattvabodhini Patrika, of which Tagore himself was the editor. The poet translated it into English in 1919 under the title Morning Song of India. The complete song consists of five stanzas. The first stanza, which has been adopted by the Defence Forces and is usually sung on ceremonial occasions, reads as follows:

Jana-gana-mana-adhinayaka jaya he Bharata-bhagya-vidhata.

Punjaba-Sindhu-Gujarata-Maratha-Dravida-Utkala-Banga Vindhya-Himachala-Yamuna-Ganga-Uchchhala-jaladhi-taranga Tava subha name jage Tava subha asisa mage Gahe tava jaya-gatha.

Jana-gana-mangala-dayaka, jaya he Bharata-bhagya-vidhata Jaya he, jaya he, jaya he, Jaya jaya jaya he.

The following is an English rendering of the stanza quoted above:

Thou art the ruler of the minds of all people, Thou Dispenser of India's destiny.

Thy name rouses the hearts of the Punjab, Sind,
Gujarat and Maratha, of Dravid, Orissa and Bengal;
It echoes in the hills of the Vindhyas and Himalayas,
Mingles in the music of Jamuna and Ganga,
And is chanted by the waves of the Indian Sea.

They pray for Thy blessings and sing Thy praise, Thou Dispenser of India's destiny, Victory, Victory, Victory to Thee.

NATIONAL SONG

At the same time as the National Anthem was adopted, it was decided that Bankim Chandra Chatterjee's Vande Mataram, which was a source of inspiration to the people in their struggle for freedom, shall have an equal status with Jana-gana-mana. Vande Mataram occurs in Bankim Chandra Chatterjee's novel Ananda Math, published in 1882. The first political

सत्यमेव जयते

occasion on which it was sung was the 1896 session of the Indian National Congress. The following is the text of its first stanza:

Vande Mataram!

Sujalam, suphalam, malayaja-shitalam, Shasyashyamalam, Mataram! Shubhrajyotsna-pulakitayaminim, Phullakusumita-drumadala-shobhinim Suhasinim, sumadhura-bhashinim, Sukhadam, yaradam, Mataram!

The following English translation of the stanza is by Sri Aurobindo:

I bow to thee, Mother, Richly watered, richly fruited, Cool with the winds of the south, Dark with the crops of the harvests, The Mother!

Her nights rejoicing in the glory of the moonlight, Her lands clothed beautifully with her trees in flowering bloom, Sweet of laughter, sweet of speech,

The Mother, giver of boons, giver of bliss!

NATIONAL CALENDAR

In November 1952, a Committee was appointed to examine the different calendars in use in the country and to submit proposals for an accurate and uniform calendar for the whole of India. The Committee submitted its report in 1955. As a result of the decision taken by the Government of India in consultation with the State Governments, the Gregorian Calendar continues to be used as hitherto for official and like purposes, the uniform National Calendar being adopted with effect from March 22, 1957 along with the Gregorian Calendar, for the following official purposes:

- (i) The Gazette of India
- (ii) News broadcasts by the All India Radio
- (iii) Calendars issued by the Government of India
- (iv) Communications issued by the Government of India and addressed to members of the public.

The State Governments have also been requested to use progressively the uniform National Calendar along with the Gregorian Calendar.

CHAPTER III

CONSTITUTION

The Constituent Assembly of India first met on December 9, 1946. It adopted a resolution on objectives on January 22, 1947, and appointed a number of committees to report on the various aspects of the proposed Constitution. On the basis of their reports, the Drafting Committee of the Assembly prepared a Draft Constitution which was published in February 1948. This was presented for general discussion on November 4, 1948. Meanwhile, the passing of the Indian Independence Act and the transfer of power on August 15, 1947, had freed the Constituent Assembly from all the limitations under which it had been born and enabled it to proceed with the task of framing the Constitution as a sovereign body. The Constitution, comprising 395 Articles and eight Schedules, was finalised and adopted by the Assembly on November 26, 1949.* It came into force on January 26, 1950.

The preamble to the Constitution embodies the resolve of the people of India to secure for all citizens: "Justice, social, economic and political; Liberty of thought, expression, belief, faith and worship; Equality of status and of opportunity; and to promote among them all Fraternity assuring the dignity of the individual and the unity of the Nation".

THE UNION AND ITS TERRITORY

India is a Union of States and its territory comprises the territories of the States of Andhra Pradesh, Assam, Bihar, Bombay, Kerala, Madhya Pradesh, Madras, Mysore, Orissa, Punjab, Rajasthan, Uttar Pradesh, West Bengal and Jammu and Kashmir; the Union Territories of Delhi, Himachal Pradesh, Manipur, Tripura, the Andaman and Nicobar Islands and the Laccadive, Minicoy and Amindiví Islands; and such other territories as may be acquired.**

CITIZENSHIP AND FRANCHISE

The Constitution provides† for a single and uniform citizenship for the whole of India. Birth within the territory of the Indian Union, descent from Indian parents, or residence for a period of five years at the commencement of the Constitution entitles one to be a citizen of India. Articles 6 and 7 enable displaced migrants from Pakistan who fulfil certain conditions to become citizens. Persons of Indian origin residing abroad can also become citizens by registering themselves as such with Indian diplomatic

^{*} For broad details about the amendments to the Constitution, see under 'Amendment of the Constitution' at the end of this Chapter.

^{**}Before the adoption of the Constitution (Seventh Amendment) Act, 1956, there were 10 States specified in the First Schedule to the Constitution as Part A States, 8 as Part B States, 9 as Part C States and one Part D Territory. Chapter XXX in 'INDIA 1957' may be consulted for details about the reorganisation of States.

[†] These provisions of the Constitution deal only with broad qualifications for citizenship at the time of its commencement, leaving details to be filled in by Parliamentary legislation. This has since been done by the Citizenship Act, 1955, which provides for the acquisition of citizenship after the commencement of the Constitution by birth, descent, registration, naturalisation and as a result of incorporation of territory. The Act provides for the termination and deprivation of citizenship under certain circumstances. It empowers the Union Government to extend, on a reciprocal basis, all or any of the rights of an Indian citizen to the citizens of other Commonwealth countries and the Republic of Ireland.

or consular representatives in the countries of their residence. No such person who voluntarily acquires the citizenship of any foreign State is

entitled to this right.

Article 326 of the Constitution confers the right of vote on every person who is a citizen of India and who is not less than twenty-one years of age on a fixed date and is not otherwise disqualified under the Constitution or any law of the appropriate Legislature on the ground of non-residence, unsoundness of mind, crime or corrupt or illegal practice.

FUNDAMENTAL RIGHTS

Part III of the Constitution enumerates seven broad categories of "Fundamental Rights". The right to equality (Articles 14 to 18) includes equality before the law, prohibition of discrimination on grounds of religion, race, caste, sex or place of birth, and equality of opportunity in matters of public employment. "Untouchability" has been abolished, and Parliament has enacted a law making the practice of untouchability a punishable offence.

Article 19 guarantees to the citizen his right to freedom of speech and expression, assembly, association or union, movement, residence, acquisition, holding and disposal of property and the right to practise any profession or to carry on any occupation, trade or business. The Constitution does not. however, bar the State from making laws prescribing reasonable restrictions on the exercise of these rights in the interest of the security of the State, friendly relations with foreign States, public order, decency or morality or in relation to contempt of court, defamation or incitement to an offence or in the interest of the general public or for the protection of the interests of any Scheduled Tribe. The conferment of these rights does not affect the operation of any existing law or prevent the State from making any new law relating to the professional or technical qualifications necessary for practising any profession or carrying on any occupation, trade or business or the carrying on by the State, or by a corporation owned or controlled by the State, of any trade, business, industry or service whether to the exclusion, complete or partial, of citizens or otherwise.

Three other basic principles of common law which the Constitution has recognised in Articles 20-21 as fundamental rights are: (i) No person shall be prosecuted and punished for the same offence more than once; (ii) No person accused of any offence shall be compelled to be a witness against himself; and (iii) No person shall be deprived of his life or personal liberty except according to procedure established by law. The right against exploitation (Articles 23 and 24) prohibits all forms of forced labour, child

labour and traffic in human beings.

Freedom of conscience and free profession, practice and propagation of religion for all (Articles 25 to 28) and the right of minorities to conserve their own culture, language and script and to receive education and establish and administer educational institutions of their choice (Articles 29 and

30) are guaranteed by the Constitution.

The right to property is protected by Article 31 which provides that "no person shall be deprived of his property save by authority of law." This does not, however, deprive the State of its right to compulsory acquisition of private property for a public purpose, after payment of compensation. The Article was amended in 1955 so as to keep outside the purview of law courts the question whether the compensation provided by a specific law is adequate or not.

The right to constitutional remedies (Article 32) provides that the fundamental rights are justiciable and any citizen can move the Supreme

Court for their enforcement.

DIRECTIVE PRINCIPLES OF STATE POLICY*

The Directive Principles of State Policy, though not enforceable through courts of law, are regarded as "fundamental in the governance of the country". These lay down that the State shall strive "to promote the welfare of the people by securing and protecting, as effectively as it may, a social order in which justice—social, economic and political—shall inform all the institutions of the national life." These principles further require the State to direct its policy in such a manner as to secure the right of all men and women to an adequate means of livelihood, equal pay for equal work, and, within the limits of its economic capacity and development, to make effective provision for securing the right to work, education and public assistance in the event of unemployment, old age, sickness and disablement or other cases of undeserved want. The State is also required to secure to workers humane conditions of work, a decent standard of life, and full enjoyment of leisure and social and cultural opportunities.

In the economic sphere, the State is to direct its policy in a manner as to secure the distribution of ownership and control of the material resources of the community to subserve the common good and to ensure that the operation of the economic system does not result in the concentration of wealth and means of production to common detriment. The State is also enjoined to guard against the abuse of workers' health and strength and to protect childhood and youth from being forced by economic necessity to enter avocations unsuited to their age or strength, against exploitation and

against moral and material abandonment.

Among the other directives of State Policy are the organisation of agriculture and animal husbandry on modern and scientific lines; promotion of cottage industries in rural areas; raising the level of nutrition and improvement in the standards of living and public health; prohibition of intoxicating drinks and drugs; provision for free and compulsory education for all children up to the age of fourteen; organisation of village panchayats; separation of judiciary from the executive; promulgation of a uniform civil code for the whole country; protection of national monuments; promotion of educational and economic interests of Scheduled Castes, Scheduled Tribes and other weaker sections; and the promotion of international peace and security, just and honourable relations between nations, respect for international law and treaty obligations, and settlement of international disputes by arbitration.

THE UNION[†]

EXECUTIVE

According to the provisions contained in Part V of the Constitution, the Union Executive consists of the President, the Vice-President and the Council of Ministers with the Prime Minister at its head.

President

The President is elected by an electoral college consisting of the elected members of both Houses of Parliament and of the Legislative Assemblies (Vidhan Sabhas) of the States in accordance with the system of proportional representation by the single transferable vote. The President must be a citizen of India, not less than 35 years of age, and eligible for election as a

^{*} The extent to which these directives have been implemented after the inauguration of the Constitution can be seen from some of the succeeding chapters, particularly those dealing with executive, judiciary, education, health, social welfare, Scheduled Castes and Tribes, land reform, co-operative movement, community development, labour and others.

† For details about the functioning of the Union Government, see Chapters IV and V.

member of the House of the People (Lok Sabha). His term of office is five years and he is eligible for re-election. The President may be removed from office by impeachment for any violation of the Constitution, which under Article 60 it is his duty to preserve, protect and defend. In his capacity as the head of the State, the President is empowered to make appointments; summon, prorogue, address, send messages to Parliament and dissolve the House of the People; issue ordinances during recess of Parliament, make recommendations for introducing or moving money bills and give assent to bills; and grant pardons, reprieves, respites or remissions of punishment or to suspend, remit or commute sentences in certain cases. The executive power of the Union vested in him is exercised by him either directly or through officers of the Government in accordance with the Constitution.

Vice-President

The Vice-President is elected by the members of both Houses of Parliament assembled at a joint sitting on the basis of proportional representation by means of the single transferable vote. He must be a citizen of India, not less than 35 years of age and eligible for election as a member of the Council of States (Rajva Sabha). His term of office is also five years. The Vice-President acts as the ex-officio Chairman of the Council of States and acts as President when the latter is unable to discharge his functions due to illness, absence or any other cause, or till the election of a new President when a vacancy is caused by the death, resignation or removal of the President. While so acting he exercises all the powers and discharges all the functions vested in the President. He, however, ceases to perform the functions of the Chairman of the Council during this period.

Council of Ministers

Article 74 of the Constitution provides for a Council of Ministers headed by the Prime Minister to aid and advise the President in the exercise of his functions. The Prime Minister is appointed by the President who also appoints the other Ministers on the advice of the Prime Minister. Although the Council holds office during the pleasure of the President, it is collectively responsible to the House of the People. It is the duty of the Prime Minister to communicate to the President all decisions of the Council of Ministers relating to the administration of the affairs of the Union and proposals for legislation and information relating to them and, if the President so requires, submit for the consideration of the Council of Ministers any matter on which a decision has been taken by a Minister but which has not been considered by the Council.

Attorney-General

The Attorney-General, appointed by the President, advises the Government of India on legal matters and performs such other duties of a legal character as may be referred or assigned to him by the President. He also discharges the other functions entrusted to him by or under the Constitution. He holds office at the pleasure of the President and has the right of audience in all courts in the country.

PARLIAMENT

The Legislature of the Union, which is called "Parliament", consists of the President and the two Houses known as the Council of States (Rajya Sabha) and the House of the People (Lok Sabha).

Council of States (Rajya Sabha)

The Council of States consists of not more than 250 members, of whom 12 are nominated by the President and the rest elected. The Council of

States is not subject to dissolution, one-third of its members retiring on the expiration of every second year. The elections to the Council are indirect, the alloted quota of the representatives of each State, as provided in the Fourth Schedule to the Constitution, being elected by the elected members of the Legislative Assembly of that State in accordance with the system of representation by means of the single transferable vote. The representatives of the Union Territories are chosen in such manner as Parliament by law prescribes. The nominated members are persons having special knowledge or practical experience in literature, science, art and social service. To fill a seat in the Council, the candidate must be a citizen of India and not less that 30 years of age.

House of the People (Lok Sabha)

The House of the People consists of not more than 500 members directly elected from territorial constituencies in the States (the representatives of the State of Jammu and Kashmir being appointed by the President on the recommendation of the Legislature of the State), and not more than 20 members to represent the Union Territories chosen in such manner as Parliament by law provides. The number of seats to each State is so allotted that the ratio between the number and the population of the State is, as far as practicable, the same for all States. During a period of ten years from the commencement of the Constitution, the President can nominate two members to the House of the People to represent the Anglo-Indian community if in his opinion it is not adequately represented.

The House of the People, unless sooner dissolved, has a maximum duration of five years from the date appointed for its first meeting. This may be extended by a maximum of one year by a Parliamentay law while a Procla-

mation of Emergency is in operation.

JUDICIARY*

The Supreme Court of India consists of a Chief Justice and not more than ten judges appointed by the President.† The Judges hold office till the age of 65. For appointment as a judge of the Supreme Court, a person must be a citizen of India and must have been for at least five years a judge of a High Court or of two or more such courts in succession; or an advocate of a High Court or of two or more such courts in succession for at least ten years; or, he must be, in the opinion of the President, a distinguished jurist. Provision has also been made for the appointment of a judge of a High Court as an ad hoc judge of the Supreme Court and for retired judges of the Supreme Court to sit and act as judges of that Court. The Constitution debars a retired judge of the Supreme Court from practising in any court of law or before any other authority in India.

A judge of the Supreme Court cannot be removed from office except by an order of the President passed after an address by each House of Parliament, supported by a majority of not less than two-thirds of the members present and voting, has been presented to the President for such removal on the ground of proved misbehaviour or incapacity.

COMPTROLLER AND AUDITOR-GENERAL OF INDIA Articles 148-151 provide for the appointment of a Comptroller and Auditor-General of India by the President to keep watch on the accounts of the Union and the States. His duties and powers are prescribed by or under law made by Parliament. His reports, submitted to the President

^{*} For details about the organisation, functions and powers etc., of the Judiciary, see Chapter VI.

[†] The number originally prescribed by the Constitution was seven. It was later raised to ten by the Supreme Court (Number of Judges) Act, 1956.

and the Governors of States, are laid before each House of Parliament and the Legislatures of States.

THE STATES*

The system of Government in the States, as embodied in Part VI of the Constitution, closely resembles that of the Union.

EXECUTIVE

The State Executive consists of the Governor and a Council of Ministers with a Chief Minister at its head.

Governor

The Governor of a State is appointed by the President of India for a term of five years and holds office during his pleasure. Only Indian citizens above 35 years of age are eligible for appointment to this office. The Governor is debarred from being a member of either House of Parliament or of a House of the State Legislature and from holding any other office of profit.

Council of Ministers

The Constitution provides for a Council of Ministers with a Chief Minister at the head to aid and advise the Governor in the exercise of his functions except in so far as he is, by or under the Constitution, required to exercise his functions in his discretion. The Chief Minister is appointed by the Governor who also appoints other Ministers on the advice of the Chief Minister. The Council of Ministers, which holds office during the pleasure of the Governor, is collectively responsible to the Legislative Assembly of the State.

Advocate-General

The Advocate-General, who advises the Government of the State on such legal matters and performs such other legal duties as are referred or assigned to him by the Governor or entrusted to him by the Constitution or any other law, is appointed by the Governor and holds office during his pleasure.

LEGISLATURE

For every State there is a Legislature which consists of the Governor and the two Houses (except in the case of Assam, Kerala, Orissa and Rajasthan which have only one House—the Legislative Assembly). Parliament can, by law, provide for the abolition of an existing Legislative Council or for the creation of one where one does not exist if the proposal is supported by a resolution of the concerned Legislative Assembly passed in the manner prescribed in the Constitution.

Legislative Council (Vidhan Parishad)

The Legislative Council of a State comprises not more than one-third of the total number of members in the Legislative Assembly of that State, and in no case less than 40 members. Nearly one-third of the members of the Council are elected by the members of the Legislative Assembly of the State from amongst persons who are not members of the Assembly, one-third by electorates consisting of members of municipalities, district boards and other local authorities, one-twelfth by registered teachers in educational institutions not lower than secondary schools and a further one-twelfth

^{*} For details about the functioning of the State Governments, See Chapters IV and V.

by registered graduates of more than three years' standing. The remaining members nominated by the Governor are chosen from among those who have distinguished themselves in the fields of literature, science, art, co-operative movement and social service. Like their counterpart at the Centre, the Legislative Councils are permanent, one-third of their members retiring on the expiration of every second year.

Legislative Assembly (Vidhan Sabha)

According to Article 170, the Legislative Assembly of a State consists of not more than 500, and not less than 60 members chosen by direct election from territorial constituencies in the State. The demarcation of territorial constituencies is to be done in such a manner that the ratio between the population of each constituency and the number of seats allotted to it is, as far as practicable, the same throughout the State. The normal term of an Assembly is five years unless it is dissolved earlier.

JUDICIARY*

There is a High Court in each State which stands at the head of the State's judicial administration. Each High Court consists of a Chief Justice and such other judges as the President may, from time to time, deem necessary to appoint. The Chief Justice of a High Court is appointed by the President in consultation with the Chief Justice of India and the Governor of the State, and in the event of appointment of a judge other than the Chief Justice, the Chief Justice of the High Court concerned. They hold office until they attain the age of 60 and are removable in the same manner as a judge of the Supreme Court of India. To be eligible for appointment as a judge, one must have held a judicial office in India for ten years or must have practised as an advocate of a High Court or of two or more such courts in succession for a similar period. The Constitution also provides for the establishment of subordinate courts.

THE UNION AND THE STATES

Relations—legislative and administrative—between the Union and the States are described in Part XI of the Constitution. The power of establishing new States or altering the area, boundaries or names of any existing State is vested in the Union Parliament. It can do so by passing an appropriate law for the purpose on the recommendation of the President, who, in his turn, is required to refer the matter to the legislatures of the States concerned for the expression of their views within a period specified in the reference or within such further period as the President may allow. Any such law shall be deemed to be an amendment of the Constitution for purposes of Article 368.

Legislative Relations

The distribution of legislative powers between the Union and the States is governed by the provisions of the Seventh Schedule consisting of three Lists—the Union List, the State List and the Concurrent List—under which the known sphere of legislative activity has been mapped out by enumerating, as exhaustively as possible, the various categories or subject-matters of legislation. The Union List contains 97 entries pertaining to subjects of all-India importance such as defence, foreign affairs, communications, currency and coinage, banking and insurance, customs duties, etc., in regard to which Parliament has exclusive power to make laws. The State Legislatures have exclusive authority to make laws in regard to the 66 entries in the State List which includes such subjects as maintenance of law and order,

^{*} For details about the 'udicial system in the States, see Chapter VI.

administration of justice, local government, public health and sanitation, education, agriculture, forests and fisheries, trade and industry, etc. The third or the Concurrent List which consists of 47 entries deals with subjects of common interest to the Union and the States, such as the legal system, economic planning and social security, trade and industry, electricity, newspapers, books, etc., in regard to which both Parliament and the State Legislatures can make laws.

Territorially, the legislative jurisdiction of Parliament extends to the whole or any part of the territory of India, while that of the legislature of a State to the whole or any part of that State. Parliament also legislates for any part of the territory of India which is not in a State on matters which

fall under the exclusive purview of State Legislatures.

The Constitution provides that if any law made by the legislature of a State is repugnant to any provision of a law made by Parliament or to any provision of an existing law with respect to any of the matters enumerated in the Concurrent List, then the law made by Parliament shall prevail and the law made by the legislature of that State, shall, to the extent of the repugnancy, be void. As regards powers of legislation on subjects which have not been enumerated in either of the three Lists, usually known as 'residuary powers,' they have been exclusively vested in the Union Parliament.

The Constitution further provides that if the Council of States declares by a resolution supported by two-thirds of the members present and voting that Parliament should make laws in respect of any matters contained in the State List, Parliament can make laws for these also and such laws will remain in force for a period not exceeding one year unless continued under a fresh resolution and shall cease to have effect on the expiration of a period of six months after the resolution has ceased to be in force. Parliament exercises such a right if a proclamation of emergency is in operation and a law made thereunder shall have effect for six months.

Administrative Relations

Although the executive authority of the Union and the States is coordinate with their respective legislative powers, the Constitution envisages the Union Government entrusting the administration of some of its functions to State Governments or to officers thereof and issuing directions there-To this end, the Constitution places the States under the constitutional obligation of so exercising their executive power as (i) to secure compliance with laws passed by Parliament and earlier Central laws applicable to them, and (ii) not to impede or prejudice the exercise by the Union of its executive power, the Government of India having the power to give directions for this purpose. The President may, with the consent of a State, entrust the Union's executive functions to the State Government or to officers thereof. The Union Government has also the right to construct and maintain highways or other means of communication of national or military importance within the territory of a State and may also direct a State Government to take measures for the protection of railways within its borders. The adjudication of disputes regarding the use, distribution or control of the waters of, or in, any inter-State river or river valley may also be provided by law by Parliament. The President can, in the public interest, establish inter-State Councils for enquiring and advising on inter-State disputes, investigating and discussing subjects of common interest and making recommendations for better co-ordination of policy and action.

FINANCE

Part XII of the Constitution deals with provisions relating to finance, property, contracts and suits. It lays down a broad scheme for distribution of revenues between the Union and the States.

The Union Government has powers to raise money by taxes and duties mentioned in items 82 to 92A in the Union List and to collect fees in respect of any of the matters in the Union List excluding court fees. The State Governments have similar powers with respect to items 45 to 63 in the State List and to collect fees in respect of any of the matters in the State List excluding court fees. Apart from these, the Constitution mentions the following specific categories of taxes in which the Union and the States have a common interest and whose proceeds accrue to them in different proportions:

(i) Duties which are levied by the Union, but are collected and wholly appropriated by the States, viz., non-judicial stamp duties and excise duties on medicinal and toilet preparations

(Article 268).

(ii) Taxes which are levied and collected by the Union but whose net proceeds are wholly assigned to the States. These include succession and estate duties on property other than agricultural land, terminal taxes on goods and passengers carried by rail, sea or air, taxes on railway fares and freights, taxes other than stamp duties on transactions in stock exchanges and futures markets, on the sale or purchase of newspapers and on advertisements published therein and taxes on the sale and purchase of goods in the course of inter-State trade or commerce (Article 269).

(iii) Taxes which are levied and collected by the Union but whose net proceeds are shared between the Union and the States.

Taxes on income other than agricultural income come under

this category (Article 270).

(iv) Taxes which are levied and collected by the Union but whose proceeds may be shared with the States as provided by Parliament by law, e.g., Union excise duties other than those on medicinal and toilet preparations (Article 272).

The Constitution empowers the Union Government to borrow on the security of the Consolidated Fund within limits prescribed by Parliament. The Union can also grant loans to State Governments and guarantee loans raised by them. The States have powers to raise their own loans on the security of their respective Consolidated Funds.

The Constitution provides for the appointment of a Finance Commission by the President, at stated intervals, to make recommendations to him in regard to the distribution of the net proceeds of taxes which are, or may be, divided between the Union and the States and in regard to the

principles which govern the grants-in-aid to the States*.

There is also provision for an independent authority to audit the accounts of both the Union and the States. Exemption of Union property from State taxation and State property from Union taxation, adjustment in respect of certain expenses and pensions, privy purses of the rulers of former princely States and restrictions as to imposition of taxes on the sale or purchase of goods in the course of inter-State trade or import and export transactions with foreign countries form the subject matter of some of the other financial provisions. The rest of the provisions in this Part deal with property, contracts, rights, liabilities, obligations and suits involving the Union and the States.

^{*} The first Finance Commission under this provision was set up in November 1951, and submitted its report in February 1953. The second Commission with Shri K. Santhanam as Chairman was appointed on April 2, 1956. It submitted its report to the President on September 30, 1957. Later the report was laid on the table of the Lok Sabha on November 14 along with a memorandum on the Government's acceptance of the Commission's unanimous recommendations. For details, see Chapter XIX.

TRADE AND COMMERCE

Part XIII of the Constitution embodies the general principles of freedom of trade, commerce and intercourse throughout the territory of the Union. Although Article 302 empowers the Union Parliament to impose certain restrictions on this freedom in the public interest, neither Parliament nor any State Legislature has power to make any law which authorises any preference or discriminates between one State and another. Such discrimination is, however, possible under parliamentary law to deal with scarcity of goods in any part of the country. Subject to these restrictions, the State legislatures are empowered to impose reasonable restrictions on the freedom of trade, commerce or intercourse as may be required in the public interest. Parliament also has the power to appoint any authority it considers appropriate to enforce the foregoing provisions.

PUBLIC SERVICES†

Part XIV deals with recruitment, conditions of service, tenure of office and dismissal, removal or reduction in rank of persons serving the Union or a State It also provides for the appointment of a Public Service Commission for the Union and for each of the States.

ELECTIONS

The superintendence and control of all elections to Parliament and to the legislatures of the States, and of the President and Vice-President of the Union, are vested in an Election Commission consisting of a Chief Election Commissioner and such other Commissioners as necessary appointed by the President. The President also appoints Regional Commissioners in consultation with the Election Commission. The conditions of tenure and service of the Commissioners are determined by the President. The procedure for the removal from office of the Chief Election Commissioner is the same as in the case of a judge of the Supreme Court.

Parliament, in respect of elections to its two Houses, and the State legislatures in respect of elections to the State legislatures are empowered to make provisions by law in regard to all matters relating to them. The validity of any such law cannot be called in question in any court.

OFFICIAL LANGUAGE

Article 343 of the Constitution provides that the official language of the Union shall be Hindi in the Devanagari script and the form of numerals for official purposes shall be the international form of Indian numerals. English will, however, continue to be the official language for a period of not more than 15 years from the commencement of the Constitution. The President is authorised under Article 344 to constitute, after the expiration of five years from the commencement of the Constitution and thereafter at the expiration of ten years from such commencement, a special Commission to examine the growth and development of Hindi and make recommendations as to its progressive use for all or any of the official purposes of the Union with a view to replacing English completely at the end of the stipulated period.* The Constitution also provides that the recommendations of the Commission will be examined by a Parliamentary Committee of 30 members (20 members from the House of the People and 10 from the Council of States) elected by the respective Houses in accordance with the system of proportional representation.

[†] For details, see Chapter V.

^{*} For a brief summary of the recommendations of the Official Language Commission, see Appendices.

The Constitution further lays down that the legislature of a State may, by law, adopt any one or more of the regional languages † in use in that State or Hindi as the language to be used for all or any of the official purposes. For communication between one State and another and between a State and the Union, the language for the time being authorised for use in the Union shall be used. The need for the use of the English language in the proceedings of the Supreme Court and the High Courts and in bills, enactments and other laws has been recognised. Article 348 makes special provisions on the subject. The proviso to Article 343 also empowers the President to authorise the use of Hindi in addition to English for any of the official purposes of the Union even during the stipulated period of 15 years.

EMERGENCY AND OTHER SPECIAL PROVISIONS

According to Article 352, if at any time the President of India is satisfied that there has arisen a grave emergency created by war or internal disturbance which threatens the security of India or any part of its territory, he can by declaration (a) give directions to the constituent States as to how their authority is to be exercised and (b) suspend from operation several Articles (268 to 280) of the Constitution under which it is obligatory on the Union Government to make certain contributions to the States. It is, however, necessary that the President's Proclamation is laid before each House of Parliament for approval within a period of two months. During the period of such an emergency, Parliament has the power to legislate with respect to any of the matters enumerated in the State List.

Another occasion on which the President can by proclamation assume to himself all or any of the functions of the Government of a State is in the event of failure of the State's constitutional machinery. This he does either on receipt of a report from the Governor or when he is otherwise satisfied that a situation has arisen in which the government of the State cannot be carried on in accordance with the provisions of the Constitution (Article 356).

Scheduled Castes and Tribes

Besides the general provisions which guarantee equal civil and political rights to all citizens, the Constitution contains special provisions to safeguard the interests of, and assist, minorities such as the Anglo-Indian community and certain weaker and backward sections like the Scheduled Castes and the Scheduled Tribes to progress more rapidly. These provisions include reservation of seats in Parliament and the State legislalatures for an initial period of ten years, preferential treatment in the matter of public employment and extended educational facilities.* A special responsibility has been placed on the Union Government to promote the welfare of the Scheduled Castes and Scheduled Tribes and it has been vested with adequate powers to carry out its obligations in this respect. Article 224(1) read along with the Fifth Schedule details provisions as to the administration and control of Scheduled Areas and Scheduled Tribes in the States other than Assam,

Tribal Areas in Assam

Another special provision which the Constitution makes is with regard to the administration of the tribal areas of Assam. Article 244(2) read along with the Sixth Schedule to the Constitution provides for the consti-

* See Chapter XIV for the implementation of these safeguards and a review of the administration of the tribal areas.

[†] The Eighth Schedule to the Constitution recognises the following fourteen as the languages of India: Assamese, Bengali, Gujarati, Hindi, Kannada, Kashmiri, Malayalam, Marathi, Oriya, Punjabi, Sanskrit, Tamil, Telugu and Urdu.

tution of certain autonomous districts and autonomous regions in these areas. The Governor of Assam who is specially entrusted with the task of administering these areas on behalf of the President is empowered to constitute councils for these districts and regions. These councils are empowered to make their own rules for the administration of their respective areas. They have powers of legislation with respect to disposition of land, administration of villages, inheritance of property, marriage and social customs, etc. They can constitute village councils or courts for the trial of suits and disputes, administer district and regional funds and establish and manage schools, dispensaries, markets and fisheries. Certain powers of assessment and collection of taxes on land, professions, trades and employment, vehicles and boats are also vested in the councils. The Governor of Assam is empowered to appoint a Commission to enquire into and report on the administration of the autonomous districts and regions. If necessary, the Governor may also place one of his Ministers in special charge of their welfare. The areas specified in Part B of the Sixth Schedule (the North East Frontier Agency and the Naga Hills District-Tuensang Area) are administered by the President acting through the Governor of Assam as his agent; to these areas the provisions of Article 249 (dealing with the President's regulation-making power for the peace, progress and good government of the Union Territories of the Andaman and Nicobar Islands and the Laccadive, Minicoy and Amindivi Islands) apply.

Special Officers

Article 338 provides for the appointment of a Special Officer by the President for the Scheduled Castes and Scheduled Tribes. It is the duty of this officer to investigate all matters relating to the safeguards provided for these sections under the Constitution and to report to the President on their working. The President is further required to place these reports before both the Houses of Parliament. The appointment of another Special Officer is envisaged under Article 350B. He is required to perform similar duties with regard to constitutional safeguards provided for linguistic minorities.

AMENDMENT OF THE CONSTITUTION

Article 368 provides that an amendment to the Constitution may be initiated only by the introduct on of a Bill for the purpose in either House of Parliament; and when the Bill is passed in each House by a majority of not less than two-thirds of the members of that House present and voting, it shall be presented to the President for his assent and upon such assent being given to the Bill, the Constitution shall stand amended in accordance with the terms of the Bill. The only provisions, for the amendment of which ratification by the legislatures of not less than one-half of the States has been prescribed in addition, relate to the election of the President, the Supreme Court and the High Courts, the distribution of legislative powers between the Centre and the States, the representation of the States in Parliament and the procedure for amendment of the Constitution.

Since its inauguration on January 26, 1950, there have been seven amendments to the Constitution. The Constitution (First Amendment) Act, 1951, besides making minor changes in Articles 15, 19, 85, 87, 174, 176, 341, 342, 372 and 375, added two new Articles 31A and 31B and a Ninth Schedule after the Eighth. Among the more notable features of this Act are: (i) the addition of a saving clause to Article 15 (prohibition of discrimination) enabling the State to make special provisions for the advancement of socially and educationally backward classes; and (ii) the substitution of clause (2) in Article 19 by a new clause broadening the State's power to

impose "reasonable restrictions" on the citizens' right to freedom of speech and expression, in the interest of "friendly relations with foreign States" and in relation to "defamation or incitement to an offence," besides security of State, public order, decency and morality, etc., which were included in the original clause as well. The two new Articles added after Article 31 (right to property) provided for the saving of laws relating to acquisition of estates and the validation of certain land reform Acts and Regulations passed by the States and specified in the Ninth Schedule.

The Constitution (Second Amendment) Act, 1952, sought to amend Article 81 with a view to readjusting the scale of representation in the House of the People, necessitated by the completion of the 1951 census. The Constitution (Third Amendment) Act passed in 1954 substituted entry 33 of the Concurrent List in the Seventh Schedule by a new one, including food-stuffs, cattle fodder and raw cotton and jute as additional items whose production and supply can be controlled by the Centre, if expedient in the

public interest.

The Constitution (Fourth Amendment) Act, 1955, amended Articles 31, 31A, 305 and added a few more entries to the Ninth Schedule. The amendment to Article 31(2) provided that when the State compulsorily acquires private property for a public purpose, the scale of compensation prescribed by the authorising legislation would not be called in question in a court of law. Article 31A was amended so as to exclude the temporary taking over of a property by the State either in public interest or to secure its better management from the compensation clause. The amendment to Article 305 was in the nature of a saving clause for laws providing for State monopolies. Seven new entries were also added to the Ninth Schedule.

The Constitution (Fifth Amendment) Act, 1955, substituted the proviso to Article 3 by a new one empowering the President to fix a time limit for State Legislatures to express their views on proposed Central laws affecting the area and boundaries, etc., of their respective States. The Constitution (Sixth Amendment) Act passed in 1956 added a new entry, i.e., 92A, to the Union List of the Seventh Schedule relating to taxes on the sale and purchase of goods in the course of inter-State transactions and the relevant

clauses under Articles 269 and 286 on the same subject.

The Constitution (Seventh Ameniment) Act, 1956, necessitated by the reorganisation of States, involved not only the establishment of new States and alterations in State boundaries but also the abolition of the three categories of the States and the classification of certain areas as "Union Territories." This led to the amendment of Article 1 and the First Schedule to the Constitution. Among the other important Articles which were affected by this amendment were Article 80 (composition of the Council of States) and the Fourth Schedule dealing with the allocation of seats in the Council to the States; Articles 81 and 82 which were substituted by new ones; Article 131 on the original jurisdiction of the Supreme Court; Article 168 providing for bicameral legislatures in certain States; and Articles 216, 217, 220, 222 and 224 dealing with the High Courts. Two new Articles, 350 A and 350B, were added with a view to implementing the recommendations of the States Reorganisation Commission regarding constitutional safeguards for linguistic minorities.

CHAPTER IV

LEGISLATURE

India is a Sovereign Democratic Republic with a parliamentary form of government based on universal adult franchise. Sovereignty rests with the people. The executive authority is ultimately accountable for all its decisions and actions to the people through their elected representatives in the legislature.

UNION PARLIAMENT

The total number of members in the Council of States, as constituted at present, is 232, of whom 220 are the elected representatives of the States and the Union Territories and 12 are nominated by the President. The present strength of the House of the People is 506, consisting of 500 members directly elected from the fourteen States (including six from Jammu and Kashmir appointed by the President on the recommendation of the Legislature of the State) and the four Union Territories of Delhi, Himachal Pradesh, Manipur and Tripura, and six members nominated by the President to represent Anglo-Indians, the Part B Territories of the Sixth Schedule and the Union Territories of the Andaman and Nicobar Islands and the Laccadive, Minicoy and Amindivi Islands.

The State-wise allocation of seats in the two Houses and the strength of political parties in the House of the People, as on March 1, 1959, is

shown in the following table:

Officers of Parliament

The principal officers of Parliament are the Chairman and the Deputy Chairman of the Council of States and the Speaker and the Deputy Speaker of the House of the People. Besides presiding over the deliberations of the respective Houses, they act as the guardians of their privileges. They interpret rules of the Houses and are the final authority on the procedure to be followed in any matter in their respective. Houses or in any of their committees. The power to certify a Money Bill vests in the Speaker of the House of the People, who also presides over joint sittings of the two Houses.

The incumbents of these offices are:

Council of States

Chairman .. S. Radhakrishnan

Deputy Chairman .. S. V. Krishnamoorthy Rao

House of the People

Speaker .. M. Ananthasayanam Ayyangar Deputy Speaker .. Hukam Singh

Functions and Powers of Parliament

The main functions of Parliament are to make laws for the country, to make finances available for the needs of the Government and appropriate funds necessary for the services of the State. The two Houses form part of the Electoral College for the election of the President and constitute the Electoral College for the choice of the Vice-President. The Council of Ministers is collectively responsible to the House of the People which also votes the salaries and allowances of Ministers and can force the resignation of the Council of Ministers by refusing to pass the budget or any other major legislative measure or by adopting a vote of no-confidence.

All legislation requires the consent of both Houses of Parliament. Delegated legislation is also subject to review and control by Parliament. Although all financial legislation must be recommended by the President, the House of the People alone can sanction grants, appropriations and proposals for taxation. Parliament's power to debate public questions and to review the work of the different departments of the Government is unfettered by any limitations except those imposed by the Constitution or by its own rules of procedure. In times of emergency, the legislative authority of Parliament also extends to the matters enumerated in the State List. Besides these, amendments of the Constitution, impeachment of the President, the removal of judges of the Supreme Court and High Courts, and the removal of the Chief Election Commissioner and the Comptroller and Auditor-General are among the powers which are exclusively vested in the Union Parliament.

Procedure

The proceedings of the two Houses are governed by their respective rules of procedure and conduct of business, made under Article 118 of the Constitution.

Subject to the provisions relating to Money and other financial bills, a bill may originate in either House of Parliament. All legislation requires the consent of both Houses of Parliament which decide every issue by a simple majority of the members present and voting except where a special majority is required by the Constitution. Until Parliament by law otherwise provides, the quorum to constitute a meeting of either House of Parliament is one-tenth of its total membership.

The procedure governing the actual passage of bills in the two Houses is identical. Every bill has to pass through the following stages,

i.e., (i) introduction and publication; (ii) general debate on principles; (iii) clause by clause consideration; and (iv) the passing of the bill by the House.* After its passage in the two Houses, the bill is presented to the President for his assent and becomes law only after the President has given such assent. In cases of disagreement between the two Houses, the President is empowered to call a joint sitting to deliberate and vote upon the measure. At joint sittings decisions are taken by a simple majority of the members present and voting.

There is a special procedure for Money Bills which can be introduced only in the House of the People. When a Money Bill has been passed by the House of the People, it is transmitted to the Council of States for its recommendations, and the Council, within a period of fourteen days from the date of the receipt of the bill, returns it to the House with its recommendations and the House thereupon either accepts or rejects all or any of the

recommendations of the Council.†

Department of Parliamentary Affairs

The framing and working of the programme of business of Parliament is done by the Department of Parliamentary Affairs. It chalks out the programme for every session, determines the priorities for different items and the amount of time to be alloted to each. This is done in close liaison with the Parliamentary and Legal Affairs Committee of the Cabinet on the Government's side and the Business Advisory Committee for each House on Parliament's side.

The Department also lays on the table of Parliament periodical Statements regarding implementation of undertakings and assurances given on behalf of the Government on the floor of the House. These are scrutinised by the Lok Sabha Committee on Government Assurances. Cases of unsatisfactory implementation are referred back to the Ministries concerned by the Department of Parliamentary Affairs and a final report is made to the House.

Committees of the Houses

Parliamentary Committees are appointed either on a motion adopted by the House itself or by the Speaker. One-third of the members of a Committee constitute the quorum for a meeting. The sittings of the Committees are private and they are empowered to summon witnesses to appear before them and to require production of any papers or records. Among the important committees of each House are the Business Advisory Committee and the Committee on Privileges.

Control Over Executive

Apart from general financial control, the House of the People also keeps on reviewing the financial administration of the Government through its Committees on Public Accounts and on Estimates. The Committees are elected by the House from among its members by the single transferable vote. Ministers are debarred from being members of these Committees. The Public Accounts Committee ensures that public money is spent in accordance with Parliament's decisions and calls attention to cases of waste, extravagance, loss, nugatory expenditure or lack of financial integrity in public services. The Estimates Committee reports on "what economies, improvements in organisation, efficiency and administrative reform consistent with the policy underlying the estimates may be effected." It also examines whether the money provided in the estimates is well laid out and suggests the form in which estimates shall be presented to Parliament.

Important and controversial bills are referred to a Select/Joint Committee for further scrutiny before they are passed by the House.
 † For procedure relating to the budget, see Chapter XIX.

Other opportunities of raising debates and eliciting information on the policies of the Government and other public questions and of ventilating grievances against the administration include resolutions, 'questions' by members and 'half-an-hour discussions' on matters arising out of questions; debates on the President's addresses, and emergency adjournment and 'No-Day-Yet-Named' motions.

The debate on the address of the President to a joint sitting of the two Houses, outlining the policy of the Government on matters of vital concern to the people and the programme of the Government for the session, provides a major occasion for the discussion of governmental policies.

On urgent public questions, any member may bring forward a motion for the adjournment of the House to discuss that matter. There is provision for short discussion and 'calling attention' to less important matters. After giving notice of 15 days, a member may move a resolution on any matter of general public interest, which if adopted, is communicated by the Speaker to the Minister concerned for necessary action. In extreme cases there is provision for a motion of want of confidence in the Council of Ministers which can be moved under a prescribed procedure.

STATE LEGISLATURES

Of the fourteen States of the Indian Union, ten have a bicameral and four a unicameral legislature.* The strength of the Legislative Councils (Vidhan Parishad) and Legislative Assemblies (Vidhan Sabha) in the States and the position of various parties in the latter, as on December 31, 1958, is given in Table 25 on the next page.

Officers of the Legislature

The State Legislatures have their presiding officers known as the Chairman and the Deputy Chairman of the Legislative Council and the Speaker and the Deputy Speaker of the Legislative Assembly. The Chairman of the Council and the Speaker of the Assembly enjoy powers and privileges and perform functions similar to those of their counterparts in the Union Parliament.

Functions

The State Legislature has exclusive powers over subjects enumerated in List II of the Seventh Schedule to the Constitution and concurrent powers over those enumerated in List III. Ordinances promulgated by the Governor are subject to the approval of the Legislature. The financial powers of the Legislature include statutory authorisation of all expenditure, taxation and borrowing by the State Government. The Council of Ministers is responsible to the Legislative Assembly of the State.

Procedure

Articles 188 to 213 of the Constitution of India describe the more important rules for the conduct of business, disqualification of members, powers, privileges and immunities of State Legislatures and their members and the legislature procedure for ordinary and financial bills. In addition, the State Legislatures are empowered by the Constitution to frame their own rules of procedure. The quorum for a meeting of the Legislature is one-tenth of its membership or ten, whichever is higher. A simple majority of the members present and voting, except where a special majority is required by the Constitution, decides all questions before either House of the Legislature. In the discharge of their duties the members and officers of the State Legislatures are immune from the jurisdiction of law courts.

^{*}For the names of the members of State Legislative Councils and Assemblies, see Chapter XXIX.

Freedom of speech and discussion in the Legislatures is guaranteed by the Constitution. Legislatures cannot, however, discuss the conduct of any judge of the Supreme Court or of any High Court in the discharge of his duties. In their proceedings, the State Legislatures use either the official language or languages of the State, Hindi or English.

The detailed procedure governing the passage of ordinary bills and financial bills is almost the same as for the Union Parliament. Ordinary bills may originate in either House, and in order to become law they must be passed by both the Houses without amendments or with only such amendments as are agreed to by both. In case of disagreement between the two Houses, there is no provision for a joint sitting as in the Union Parliament. If a disputed bill is given a second passage by the Legislative

^{*}The strength of Legislative Councils is in accordance with the Legislative Councils Act, 1957.

[†]Figures in brackets indicate the number of vacant seats.

[‡]Vide the Naga Hills Tuensang Area Act, 1957.

^{\$}This excludes 25 seats for the Pakistan-occupied areas of the State which are kept in abeyance pending the return of those areas to the Indian Union.

Assembly after an interval of three months from the date of its transmission to the Legislative Council, it automatically becomes law after one month of such passage, irrespective of the action of the Legislative Council.

The Legislative Assembly alone has the power to originate Money Bills. The Legislative Council can make only recommendations in respect of changes it considers necessary within a period of fourteen days of the receipt of the bill from the Assembly. This in no way affects the freedom of the Assembly to accept or reject the recommendations of the Council.

The State Legislatures also have their system of Committees to

facilitate proper transaction of business.

Reservation of Bills

Besides possessing the power to give or withhold his assent to bills passed by the Legislature, the Governor of a State may reserve certain bills for the consideration of the Union President. Such bills relate to subjects like compulsory acquisition of property, estates and jagirs, measures affecting the powers and the position of High Courts, and imposition of taxes on the storage, distribution and sale of water or electricity in inter-State river or river valley development projects. No bill seeking to impose restrictions on inter-State trade can be introduced in a State Legislature without the previous sanction of the President.

Control Over Executive

Besides exercising the usual powers of financial control, the State Legislatures use all the normal parliamentary devices like questions, discussions, debates, adjournment and no-confidence motions and resolutions, etc., to keep a watch over the day-to-day work of the Executive. They also have their Committees on Estimates and Public Accounts to ensure that grants sanctioned by the Legislature are properly utilised.

CHAPTER V

EXECUTIVE

UNION

The head of the Indian Union is the President. All executive authority of the Union, including the supreme command of the Defence Forces, formally vests in the President and all executive actions of the Government are taken in his name. In the exercise of his functions, the President is aided and advised by a Council of Ministers with the Prime Minister at the head.

The Council of Ministers, as at present constituted, comprises (i) Ministers who are members of the Cabinet, (ii) Ministers of State who are not members of the Cabinet but hold Cabinet rank, and (iii) Deputy Ministers. The Cabinet finally determines and lays down the policy of the Government.

The personnel of the Union Government, as on April 1, 1959, was as follows:

President:

Vice-President:

Members of the Cabinet

- 1. Jawaharlal Nehru
- Govind Ballabh Pant
- Morarji Ranchodji Desai
- 4.
- Jagjivan Ram Gulzarilal Nanda
- 6. Lal Bahadur Shastri Swaran Singh
- 7. 8.

ADMINISTRATIVE ORGANISATION

In order to regulate the allocation of Government business and its convenient transaction, Rules of Business have been framed under Article 77(3) of the Constitution. The allocation is made by the President on the advice of the Prime Minister by specifying the items of business allotted to each Minister and by assigning a Ministry or a part of a Ministry or more than one Ministry to the charge of a Minister. The Minister is sometimes assisted by a Deputy Minister, who performs such functions as may be assigned to him.

A Secretary to Government is the administrative Head of a Ministry and the principal adviser of the Minister on all matters of policy and administration within his Ministry. When the volume of work in a Ministry exceeds the manageable charge of a Secretary, one or more wings may be established under a Joint Secretary. A Ministry is divided into Divisions, Branches and Sections functioning under Deputy Secretaries, Under Secretaries and Section Officers respectively.

The following is the list of Secretaries to the Government of India, as on April 1, 1959:

Cabinet
 Commerce and Industry

3. Community Development and Cooperation

4. Defence

5. Education 6. External Affairs

Vishnu Sahav S. Ranganathan

Organisation and Methods Division

The main task of the Organisation and Methods Division, which was set up in March 1954 on the recommendations* of Dr. Paul H. Appleby, is to supply leadership and drive, and to build up a common fund of information, experience and competence in organisation and methods work by co-operative effort. The three-fold plan with which the Division started its activities was: (i) to create a consciousness of the prevailing inefficiency and of the need and scope for improvement; (ii) to find out facts and to see what actually was wrong and where, and to locate causes which adversely affect the speed and quality of work; and (iii) to devise and apply appropriate remedies. The work of the Division is carried on through the O and M Cells set up in each Ministry or department under the charge of a selected officer generally of the grade of Deputy Secretary. Inspections, case studies, arrear statements, standing guard files, recording and indexing, delegation of enhanced authority to the Section Officers, personal discussion among officers, and procedural reforms are some of the methods by which the O and M Division tries to achieve speedy and efficient disposal of cases.

A 'quality-control' drive to spread efficiency-consciousness, among officers of all ranks, 'level-jumping' to avoid cases passing through too many stages, training in the technique of work-study and starting of 'pilotsections' manned by Section Officers submitting cases direct to the appropriate decision-taking level, these are some of the reforms attempted by the Division in the recent past.

Pay Commission

The Government of India announced the appointment of a Commission of Enquiry to examine the structure of emoluments and conditions of service of Central Government employees on August 21, 1957. The members of the Commission are:

Chairman:

B. Jagannadhadas (Judge, Supreme Court)

Members:

V.B. Gandhi; N.K. Siddhanta;

M.L. Dantwala; Smt. M. Chandrasekhar; L.P. Singh (Member-Secretary); and

H.F.B. Pais (Associate Secretary)

^{*}For a brief summary of the recommendations of Dr. Appleby, see 'INDIA 1958' page 70. Dr. Appleby was invited again in 1956 to study the administrative system with special reference to Government's industrial and commercial enterprises.

In an interim report dated December 14, 1957, the Commission recommended and the Government accepted the grant, with effect from July 1, 1957, of an increase of Rs. 5 per month in the dearness allowance of all Central Government servants (with a few specified exceptions) whose basic pay does not exceed Rs. 250 per month.

STATES

The States, like the Centre, have a parliamentary system of responsible government. The Governor, the constitutional head in each State, is a common constituent of both the State Legislature and the Executive. All executive actions of the State are expressed to be taken in his name. His oath of office makes it his solemn duty to "preserve, protect and defend the Constitution and the law" to the best of his ability and to devote himself

to the service and well-being of the people.

Among the more important powers of the Governor are the appointment of State Ministers, the allocation of Government business among them, the summoning and proroguing of the State Legislature, dissolution of the Legislative Assembly and the granting of pardons and remissions, etc., of sentences of persons convicted for offences under the State laws. Bills passed by the State Legislature, except under certain conditions, require the assent of the Governor to become law. The discretionary powers of the Governor relate to the making of reports to the Union President about (i) the administration of Scheduled Areas and Tribes, if any, in his State and (ii) the breakdown of the constitutional machinery. In the latter case he administers the State as an agent of the President. In the case of Assam, the Governor also enjoys discretionary powers in relation to the administration of tribal areas.

ORGANISATIONAL PATTERN

Although all executive actions of the State are expressed to be taken in the name of the Governor, the real Executive of the State is the Council of Ministers headed by the Chief Minister. It is, however, the duty of the Chief Minister to communicate to the Governor all decisions of the Council of Ministers relating to the administration of the affairs of the State and proposals for legislation, and to furnish all such information to him as he might desire. The Council works on the principle of collective ministerial responsibility and is accountable to the Legislative Assembly of the State. The number of Ministers, who in some States are assisted by Deputy Ministers and Parliamentary Secretaries, varies from State to State.*

Conduct of Government Business

Similar to the practice at the Centre, the State Ministers also work on the portfolio system, each Minister being the final authority in regard to the day-to-day administration of subjects allotted to his Ministry by the Governor under Article 166(3) of the Constitution. Only matters of policy along with subjects in which more than one Ministry is concerned or on which there is difference of opinion between them are referred to the Cabinet or the Council of Ministers. Like the Ministries in the Union Government, the State Ministries are headed by Secretaries as their administrative heads. In addition, the States also have Chief Secretaries, who besides acting as Secretaries to the State Cabinets, deal with all matters connected with public services and such other miscellaneous subjects as are not allotted to other departments, and generally co-ordinate

^{*}For the personnel of the State Councils of Ministers, see Chapter XXIX.
†For the names of Chief Secretaries to State Governments, see Chapter XXIX.

the work of all the Government departments. The State Secretariats are

patterned more or less like their counterpart at the Centre.

Besides Secretaries, who advise the Ministers on all matters of policy, there are heads of departments whose number depends on the number of the important subjects administered by a State. They carry out the policy and programme of the Government at the headquarters as well as in the districts through a field staff.

ADMINISTRATIVE UNITS†

The principal unit of administration is the district under a Collector and District Magistrate. As Collector, he is responsible to the Commissioner who heads a Division or to the Board of Revenue (depending upon the practice obtaining in a particular State), and through that agency to the Government, for the proper collection of revenue and for the administration of all matters connected with land other than irrigation, agriculture and forestry in their technical aspects and registration. As District Magistrate, he is responsible for the maintenance of law and order and the criminal administration of the District. For this purpose, the police force in the District with the Superintendent of Police as its immediate head is under his control and direction, although for purposes of disciplinary control and technical supervision, the Superintendent is responsible to the Inspector-General of Police. Besides a number of Assistant or Deputy Collectors and Magistrates who help him in the discharge of his duties, the Collector has also at his disposal the assistance and professional advice of a number of other district officers such as the Executive Engineer, the Deputy Commissioner of Excise, the Civil Supplies Officer and the Forest Officer, etc.

In some States the District is divided into a number of Sub-Divisions, usually three to five. The Sub-Divisional Magistrate, who is in charge of the Sub-Division, is the principal assistant of the District Magistrate and is responsible to him for the maintenance of law and order, collection of Government dues and other connected matters in the Sub-Division. In other States, the District is divided into Taluks or Tehsils under the charge

of a Tahsildar or a Mamlatdar.

Among other district officials are those belonging to the departments of Education, Medical, Public Health, Agriculture, Veterinary, Cooperative, Industries, Labour, Jails, Local Fund Audit, etc., who carry out their respective duties under the direction and orders of their heads of depart-

ments at the State headquarters.

Co-ordination for purposes of development programmes at State headquarters is achieved through an inter-departmental Committee of Secretaries in charge of various development departments with the Chief Secretary or the Secretary in charge of planning as the Chairman. Generally, the functions of co-ordination for planning and for the implementation of programmes in the districts are combined in a single officer commonly described as the Development Commissioner. As a rule, a Committee of the State Cabinet under the Chief Minister provides overall guidance and direction. State Planning Boards which include leading non-officials have also been constituted in most of the States.

The Collector, who is the Chief Development Officer of the District, is assisted in many States by additional Collectors and District Development or Planning Officers. District Development or Planning Committees, on which members of the State Legislature and Parliament from the District, representatives of District and Municipal Boards and leading non-official workers are represented, ensure popular association with the formulation

and implementation of development programmes.

[†]A complete list of districts and their taluks/tehsils, along with the area and population of each, is given in Table 7 of Chapter I.

LOCAL GOVERNMENT*

Local self-governing institutions are broadly classified into two categories—urban and rural. In the big cities they are known as Corporations, and in medium and small towns as Municipal Committees or Boards. The civic needs of rural areas are looked after by District or Taluk Boards and Gram Panchayats, their territorial jurisdictions coinciding with their administrative boundaries.

Corporations

The corporations, established under specific Acts of the State Legislatures, are headed by elected Mayors. The administration of a city under a corporation is entrusted to three authorities: (i) the General Council of the Corporation; (ii) the Standing Committees of the Council; and (iii) the Commissioner or Executive Officer. The General Council appoints all the officers of the corporation except the Commissioner who is usually appointed by the State Government. The Standing Committees elected by the Council carry out the main work of the administration covering taxation and finance, engineering works, health and education. The executive power of the corporation vests in the Commissioner, who prescribes the duties of the various establishments and supervises their work. In addition to matters connected with the safety, health, education and other conveniences of the citizens, the jurisdiction of the corporation also extends to the maintenance of streets and bridges, avenues and parks, recreation grounds and markets.

Municipal Boards and Committees

Municipalities with elected Presidents also function through committees. All the members of a municipality constitute its general body which discusses and decides all questions of policy and important details of municipal administration. The powers of passing the budget, imposing taxation, voting expenditure and making rules and regulations vest in the general body. The day-to-day work of the municipality is carried on by an executive officer, drawn either from the State cadre of

municipal executive officers or from the State Civil Service.

In general, the obligatory functions of a municipality are: scavenging and sanitary measures to keep public streets clean and healthy; regulation of places for the disposal of the dead and registration of births and deaths; construction, maintenance and improvement of public streets, latrines, drains etc; maintenance of public hospitals and provision of medical relief; primary education; regulation of offensive or dangerous trades and practices; lighting of public streets; and provision of adequate water supply. At their own discretion, municipalities may, however, also take up the construction and maintenance of libraries, museums, rest houses and other public buildings, and the laying out of public gardens, parks, public streets and any other measures likely to promote the welfare of citizens.

In recent years, a number of bigger cities have established Improvement Trusts and Town Planning bodies to improve the existing conditions of cities and to regulate their future expansion. In 1956, the Slum Areas

(Improvement and Clearance) Act was passed by Parliament.

District Boards

The principal function of a district board is to provide for primary and secondary education, to construct and maintain roads other than highways, and to manage public health and charitable institutions in rural areas. Like municipalities, district boards are elected on the basis of adult

^{*}For a brief history of local self-governing institutions, see Chapter XXXII of 'INDIA 1957'.

franchise. They have their Presidents and Vice-Presidents who are elected by and from among the members of the board. For the day-to-day execution of their work, district boards have a permanent Secretary or Commisssioner who works under the direction of the elected President. The rest of the executive staff of the board consists of engineers, health officers and

inspectors, etc. The board also works through committees.

In view of the accepted policy of covering the entire rural area with village panchayats and the proposed setting of a second tier of Panchayat Samitis at the Sub-Divisional or Block level, the current trend is towards the abolition of district boards in their present form. These have already been abolished in Uttar Pradesh and, pending new legislation on the subject, have been replaced by interim district councils (Zila Parishads). In Bihar and Madras, the State Governments have taken over all the district boards and placed them under Special Officers.

Village Panchayats

One of the directive principles of State policy in the Constitution of India is that the State shall take steps to organise village panchayats and endow them with such powers and authority as may be necessary to enable them to work as units of self-government (Article 40). In pursuance of this directive, most of the States have enacted the requisite legislation so that the network of village panchayats now covers more than half the total number the villages in the country. Their number on March 31, 1958, was 1,64,358.

Panchayats are elected by gaon sabhas consisting of the entire adult population of the village. Elected from among the villagers, they are responsible for providing civic and other amenities to residents. Medical relief, maternity and child welfare, the management of common grazing grounds, the maintenance of village roads, streets, tanks and wells and provision of sanitation, drainage, etc., are some of the other functions which are usually undertaken by them. In some places panchayats also look after primary education, the maintenance of village records and the realisation of land revenue. For building up funds they levy taxes on houses and lands, fairs and festivals, sale of goods and impose octroi duties, etc.

The National Conference on Community Development held at Mt. Abu in May 1958 recommended an organic integration of the panchayat administration with the Development Commissioner's organisation from the State headquarters down to the village level. It also recommended that at least one panchayat in each Gram Sevak's circle should be made responsible for planning and implementing the community development programme.

Besides their administrative and civic functions, panchayats also have a judicial wing called tha nyaya panchayat. Elected from among the members of the village panchayat, they are competent to try minor offences under the Indian Penal Code and other special and local laws. Their powers of punishment are limited to the imposition of moderate fines. Their civil jurisdiction extends to suits upto the money value of Rs. 200. The nyaya panchayat employs a simple and summary procedure for the disposal of cases. Legal practitioners are not permitted to appear before it.

Finances

The sources of local finance at present are: (i) taxes levied by local bodies; (ii) taxes levied by local bodies but collected by the State Governments on their behalf; (iii) share in the taxes levied and collected by the State Governments; (iv) grants-in-aid given by the State Governments; and (v)revenue from non-tax sources.

The Local Finance Enquiry Committee appointed in 1949 recommended that terminal taxes on goods or passengers carried by the railways, sea or air and taxes on railway fares and freights listed under item 89 of the

Union List should be reserved for local bodies. It further recommended the reservation of some ten or twelve other taxes such as those on lands and buildings, mineral rights, entry of goods into local areas, consumption and sale of electricity, advertisements other than those published in newspapers, goods and passengers carried by road or inland waterways, vehicles, animals and pets, professions and luxuries, and tolls and capitation taxes listed in the State List of the Seventh Schedule to the Constitution for utilisation by local bodies.

The Taxation Enquiry Commission appointed early in 1953 held the view that a sound system of local finance can rest only on local and direct taxation. They prescribed a two-fold criteria for the devolution of powers of taxation to local bodies: (i) stability of the taxes; and (ii) capacity to levy and administer the taxes equitably and adequately. The Commission also recommended financial assistance by the State Governments in the shape of

loans and subsidies.

PUBLIC SERVICES

UNION PUBLIC SERVICE COMMISSION

The Union Public Service Commission is an independent statutory body constituted under Article 315 (1) of the Constitution of India. The Chairman and members of the Commission are appointed by the President. The Constitution provides that as nearly as may be one-half of the members must be persons who at the time of their appointments have held office for at least ten years either under the Government of India or a State Government. A member of the Commission holds office for a term of six years or until he attains the age of 65. The Chairman or a member of the Commission can be removed only by the President on the ground of misbehaviour, after he has received a report from the Supreme Court to which a reference is made for an inquiry.

In order to emphasise and ensure the independence of the Commission, the Constitution debars its Chairman from further employment either under the Government of India or the Government of a State. A member, other than the Chairman of the Commission is, however, eligible for appointment as Chairman of that Commission or of a State Public Service Commission,

but for no other Government employment.

The personnel of the Union Public Service Commission, as on April 1, 1959, was as follows:

Chairman: V. S. Hejmadi

Members: J. Sivashunmugam Pillai

C. V. Mahajan P. L. Varma S. H. Zaheer G. S. Mahajani A. T. Sen.

Functions

The functions of the Commission as prescribed in Article 320 of the Constitution are: (1) recruitment to all civil services and posts under the Union Government by written examinations, by interview and by promotion and (ii) advising the Government on all matters relating to methods of recruitment, principles to be followed in making appointments to civil services and posts and making promotions and transfers from one service to another. All disciplinary matters affecting Government servants, any claim by or in respect of persons who are serving or have served under the Government of India in a civil capacity for re-imbursement of any

expenses incurred by them in defending legal proceedings instituted against them in respect of their official acts and any claims for the award of compensations in respect of injuries sustained by Government servants while on duty etc., also fall within its sphere of responsibility. It is obligatory for the Government to consult the Commission on all these matters. The President can, however, make regulations specifying the matters in which either generally or in any particular circumstances or class of cases it shall not be necessary for the Government to consult the Commission. Such regulations have to be placed before Parliament. Article 321 of the Constitution lays down that an act made by Parliament may provide for the exercise of additional functions by the Union Public Service Commission in respect of the services of the Union and also in respect of the services of any local authority or other body-corporate constituted by law or any public institution.

The Union Public Service Commission submits an annual report of its work to the President who causes it to be laid before each House of Parliament. If there are any cases where the Government is unable to accept the advice of the Commission, a memorandum explaining the reasons for such

non-acceptance has to be placed before Parliament.

The standards and syllabi of competitive examinations for recruitment to the all-India and Central Services are laid down by the Commission in consultation with the Ministries of the Government of India and educationists of standing. In addition to qualifying in the written tests, candidates competing for these services have also to appear at a viva voce test for assessment of their personality. The Chairman or a member of the Commission presides over the Board which includes one more Member of the Commission; the Commission is assisted at these tests by senior administrators and others of high academic standing.

The Commission has to make direct recruitment to quite a large number of specialised posts, which cannot be filled by promoting persons belonging to duly constituted services. At interviews for such posts, a representative of the Ministry concerned invariably joins the selection board and helps the Commission to assess the suitability of the candidates. In addition, it is usual to associate with the board a specialist or two not connected with the Ministry concerned. Whenever necessary practical or written tests are also held. The Commission explores possibilities of securing suitable personnel through direct contact with experts in different fields, whenever it is unable to recruit candidates otherwise.

A new field of recruitment to Civil Services has come into being as a result of the decision taken by Government in consultation with the Commission that officers of the Defence Services who have retired recently or are about to retire may be absorbed in civil posts for which they may be found suitable by the Commission.

ALL INDIA SERVICES

Recruitment to the two all-India Services (i.e. the Indian Administrative Service and the Indian Police Service) and other Central Services* is made by the Union Public Service Commission on the basis of a competitive

^{*}These are: Indian Foreign Service, Indian Audit and Accounts Service, Indian Defence Accounts Service, Indian Railway Accounts Service, Indian Customs and Excise Service, Indian Income-Tax Service (Class I), Transportation (Traffic) and Commercial Departments of the Superior Revenue Establishment of Indian Railways, Indian Postal Service (Class I), Military Lands and Cantonments Service (Class I and II), Central Secretariat Service, Grade III, Central Engineering Service (Class I and II), Indian Railway Service of Engineers, Signal Engineering Department of the Superior Revenue Establishment of Indian Railways, Electrical Engineering Department of the Superior Revenue Establishment of Indian Railways, Mechanical Engineering and Transportation (Power) Department of the Superior Revenue Establishment of Engineering Railways, Mechanical Engineering and Transportation (Power) Department of the Superior Revenue Establishment of Engineering Railways, Mechanical Engineering and Transportation (Power)

examination supplemented by a viva voca test. The conditions of service of persons appointed to the public services under the Union are regulated by Acts of Parliament. The All-India Services Act was passed by Parliament in October 1951 and detailed rules and regulations under the Act have since

been promulgated.

Under Article 311, no member of a civil or an all-India service under the Union or a State can be dismissed or removed by an authority subordinate to that by which he was appointed. Further, before they are dismissed or reduced in rank, the delinquent officers must be given a reasonable opportunity to defend themselves. This privilege is, however, denied (i) to those convicted on a criminal charge; (ii) where the dismissing authority is satisfied that it is not practicable to give the offender an opportunity to defend himself; and (iii) where the President or a Governor is satisfied that from the point of view of the security of the State, it is inexpedient to allow an opportunity for defence to the offender.

Training of Services

The two all-India Services have their own training schools (i) the Indian Administrative Service Training School at Delhi and (ii) the Central Police Training College at Abu. The curriculum of the IAS Training School lays stress on fostering correct attitudes to questions of personal and public conduct. Among the principal subjects taught are: Indian history and constitution; elements of criminal and civil laws; the theory and practice of public administration with special reference to the social, cultural and economic developments in the country and the language of the State to which trainees are allotted.

Refresher training at the Indian Administrative Service Staff College, Simla, for officers of the Indian Administrative Service with 6 to 10 years service, consists of study of administration in specialised branches, discussions on administrative difficulties and pooling of experience gathered by

officers in the field in different States.

The course at the Central Police Training College, Mt. Abu, includes a period of military training in addition to thorough instruction in the duties and responsibilities of a police officer. A new feature of the training programme, both for IAS and the IPS is an educational and cultural tour to Army and Police training institutions, development project areas, and community project and national extension blocks.

CENTRAL SECRETARIAT SERVICE

The Central Secretariat Service, for manning posts in the Central Secretariat and the attached offices, was created in 1950. The Service was originally organised into four grades viz. Grade I (Under Secretary or equivalent), Grade II (Superintendent), Grade III (Assistant Superintendent) and Grade IV (Assistant). Subsequently a new grade called the Selection Grade, comprising officers of the Service appointed to posts of Deputy Secretary and equivalent rank under the Government of India, was added. Appointments from Grade I (Under Secretary) to the Selection Grade and from Grade II (Superintendent) to Grade I of the Central Secretariat Service are made entirely by selection on the basis of merit. Recruitment to Grade II is also made entirely by promotion on the basis of merit from Grade III (Assistant Superintendent). Half the number of vacancies in Grade III is filled by direct recruitment on the results of the combined competitive examination held for recruitment to the Indian Administrative Service and allied Central Services, and the remaining half by promotion

lishment of the Indian Railways, Telegraph Engineering Service (Class I), Telegraph Traffic Service (Class II), Military Engineering Service (Class I), Survey of India (Class I and II) Services, and Central Secretariat Stenographers' Service.

from Grade IV (Assistant): Half the number of vacancies in the grade of Assistant (Grade IV) is filled by direct recruitment on the results of open competitive examinations held by the Union Public Service Commission and the remaining half by promotion from the Clerical Grades.

CENTRAL ADMINISTRATIVE POOL

An Administrative Pool for staffing senior posts at the Centre was constituted by the Government of India in October 1957 in consultation with the State Governments. The purpose is to build up a reserve of officers with special training and experience for economic administration and for maintaining continuity of knowledge and experience in the field of general administration.

INDUSTRIAL MANAGEMENT POOL

For staffing senior managerial posts in the public enterprises operating under the Union Ministries, the Government of India also constituted in November 1957 an Industrial Management Pool. For the present, the Ministries of Steel, Mines and Fuel, Transport and Communications and Commerce and Industry will participate in the scheme, which will be under the administrative control of the Union Ministry of Home Affairs. Any other Ministry concerned with the running of industrial undertakings may later join the scheme.

STATE SERVICES

Although the two all-India services are organised on the basis of State cadres and a majority of the principal administrative posts both at the State and district headquarters is manned by members of these services, the States have their own civil services to administer the subjects falling within the sphere of their autonomy. To recruit personnel to their civil services, the States also have Public Service Commissions on the model of the Union Commission.

The executive branch of the State Civil Service is the most important among the public services of the State. Most of the sub-divisional appointments are held by the members of this service. The two other important branches are the State Police and Judicial Services. Apart from these, there are a good number of other State cadres to man the technical branches of governmental administration like public works, irrigation, forests, agriculture, public health, education, veterinary, registration, cooperation, community and national extension services and so on.

Besides enjoying the usual safeguards provided for civil services in the Constitution, the members of these services are governed by detailed rules and regulations made by the respective States. Almost all the States have their own arrangements for giving requisite training to fresh entrants.

CHAPTER VI

JUDICIARY

The adoption of a federal Constitution by India in 1950 did not disturb the continuity of existing laws and the unified structure of courts evolved through more than a century of British rule. Article 372 provides that all laws which were in force immediately before the commencement of the Constitution, with the exception of the Government of India Act, 1935, and the Indian Independence Act, 1947, shall continue to be in force until altered, repealed or amended by a competent legislature or authority. Article 375 provides that "all courts of civil, criminal and revenue jurisdiction, all authorities and all officers, judicial, executive and ministerial, throughout the territory of India, shall continue to exercise their respective functions," subject to the provisions of the Constitution. The unity of the judicial structure was preserved by placing such basic branches of law as criminal law and procedure, civil procedure, marriage and divorce, adoptions, wills, intestacy and succession, transfer of property, contracts, evidence, etc., on the Concurrent List.

SUPREME COURT OF INDIA

The Supreme Court of India stands at the apex of a single, unified judicial system for the whole country.* The Constitution has invested it with wide appellate powers over all other courts and tribunals; and its position as the highest judicial body in the country has been strengthened by making High Courts, including the appointment and removal of their judges, a Union subject. As the guardian and interpreter of the Constitution, the Court has not only to hold the scales even between the Union and the States, but also to act as the custodian of the liberties of the citizen.

The membership of the Court, as on April 1, 1959, was as follows:

Chief Justice:

S.R. Das

Judges:

N.H. Bhagwati B.P. Sinha J. Imam S.K. Das

J.L. Kapur

P.B. Gajendragadkar

A.K. Sarkar K. Subba Rao K.N. Wanchoo M. Hidayatullah

The following are the Law Officers of the Union Government:

Attorney-General of India:

M.C. Setalvad

Solicitor-General of India:

C.K. Daphtary

Additional Solicitor-General of India:

H.N. Sanyal

^{*}For constitutional provisions governing the composition of the Court and the appointment of judges etc., see Chapter III.

Powers of Interpretation

As regards the precise powers of the Supreme Court to interpret the Constitution, the Court has defined the position in a number of its own judgments given during the last eight years. The Judiciary in India cannot alter or amend the law under the cover of 'liberal interpretation'. It has no powers to review legislative policy or to nullify the Act of the legislature with reference to general principles of jurisprudence. To put it in the words of the Court itself: "Where the fundamental law has not limited, either in terms or by necessary implication, the general powers conferred upon the legislature, we cannot declare a limitation under the notion of having discovered something in the spirit of the Constitution which is not even mentioned in the instrument. It is difficult, upon any general principles, to limit the omnipotence of the soveriegn legislative power by judicial interposition, except so far as the express words of a written Constitution give that authority."*

Subject to these limitations, it is the duty of the Supreme Court to see that the laws in the country are fairly administered and no citizen is denied justice by any court or tribunal. Article 140 provides that "the law declared by the Supreme Court shall be binding on all courts within the territory of India." Further, in exercise of its jurisdiction, the Supreme Court is authorised to pass such decree or order as is necessary for securing complete justice in any case or matter pending before it; and any decree or order so passed is enforceable throughout the territory of India. All civil and judicial authorities in the country are specifically enjoined by the Constitu-

tion to act in aid of the Supreme Court.

Jurisdiction

The Supreme Court has both original and appellate jurisdiction. Its exclusive original jurisdiction extends to all disputes between the Union and one or more States or between two or more States inter se. In addition to this, Article 32 of the Constitution gives an extensive original jurisdiction to the Supreme Court in regard to the enforcement of fundamental rights guaranteed under Part III of the Constitution. It is empowered to issue directions or orders or writs including those in the nature of writs of habeas corpus, mandamus, prohibition, quo warranto and certiorari, whichever may be appropriate, to enforce these rights. Any person who complains of any infringement of fundamental rights is at liberty to move the Supreme Court, whose powers on this subject are not confined only to issuing these writs as they are known in the English law. It can also improve upon them so as to avoid any technical deficiency or to adapt them to Indian circumstances.

The appellate jurisdiction of the Supreme Court can be invoked by leave from the High Court concerned in respect of any judgment, decree or final order from such court in a case involving a substantial question of law as to the interpretation of the Constitution, or in civil matters where the amount or value of the subject matter of the dispute was not less than 20 thousand rupees or where the judgment, decree or final order involves claims respecting property of the like amount or where the High Court concerned certifies that the case is a fit one for appeal to the Supreme Court. In criminal cases, the right to appeal to the Supreme Court has been provided for, "if the High Court (a) has on appeal reversed an order of acquittal of an accused person and sentenced him to death; (b) has withdrawn for trial before itself any case from any court subordinate to its authority and has in such trial convicted the accused person and sentenced him to death; or (c) certifies that the case is a fit one for appeal to the

A.K. Gopalan v. the State of Madras, 1950,

Supreme Court." Parliament is authorised to confer on the Supreme Court any further powers to hear and entertain appeals from any judgment, final order or sentence in a criminal proceeding of a High Court in Indian

territory.

Besides this the Supreme Court has a very wide appellate jurisdiction over all courts and tribunals in India inasmuch as it can grant special leave to appeal from any judgment, decree, determination, sentence or order in any case or matter passed or made by any court or tribunal in the territory of India. It has also a special advisory jurisdiction in matters which may specifically be referred to it by the President under Article 143 of the Constitution.

Working of the Court

The Supreme Court is a court of record and has all the powers of such a court, including the power to punish for contempt of itself. It has the power to frame its own rules of procedure. In the exercise of these powers, it made the Supreme Court Rules, 1950, which, as amended from time to time, govern the day-to-day working of the Court. Under Article 145 of the Constitution, the Supreme Court can fix the minimum number of judges who are to sit for any purpose and may provide for the powers of single judges and Division Courts, subject to the condition that all cases involving a substantial question of law as to the interpretation of the Constitution are heard by a Bench consisting of not less than five judges. Judgments of the Supreme Court, which must always be delivered in open Court, are arrived at with the concurrence of the majority of the judges present at the hearing. A judge who does not agree with the majority may give a dissenting judgment.

The cases in the Supreme Court can be filed by the parties personally or through advocates, specially registered as "Advocates on Record". If it is an appeal case, copies of the judgments of lower courts along with all relevant evidence, oral as well as documentary, have to be printed before the

case is filed.

The Roll of Advocates of the Supreme Court is kept in two parts, the first containing the names of senior advocates and the second those of other advocates. At the end of 1958, 2,455 lawyers were registered with the

Supreme Court Bar.

During the Year-1958, the Supreme Court disposed of 301 petitions under Article 32 of the Constitution for the enforcement of fundamental rights and 239 appeals involving questions concerning the interpretation of the provisions of the Constitution. The Court also dealt with one Special Reference made to it under Article 143 of the Constitution.*

LAW COMMISSION

In response to suggestions made from time to time in Parliament and outside, the Government of India announced in the Lok Sabha on August 5, 1955, the appointment of a Law Commission with M.C. Setalvad,

Attorney-General of India, as Chairman.

The terms of reference to the Commission required it (i) to review the system of judicial administration in all its aspects and suggest ways and means of improving it and making it speedy and less expensive; and (ii) to examine the Central Acts of general application and importance, and recommend lines on which these should be amended, revised, consolidated or otherwise brought up to date.

After its inaugural meeting on September 16, 1955, the Commission

^{*}Brief summaries of some of the important constitutional cases disposed of by the Supreme Court, including its opinion on the Special Reference under Article 143, are given as an Appendix, under the heading 'Supreme Court Decisions's

commenced working in two sections. One Section took up the problem of reform of the judicial administration. It first collected statistical and other details relating to the judicial set-up in the various States and then prepared and circulated a comprehensive questionnaire to the High Courts, Bar Associations, individual lawyers, commercial organisations and public men interested in judicial reform. The Commission examined the replies and arrived at tentative conclusions which formed the basis for local enquiries. Thereafter, they toured the headquarters of the High Courts for examining witnesses. The report of the Commission on the Reform of Judicial Administration was submitted to the Government on September 30, 1958, and presented to the Lok Sabha on February 25, 1959.*

During the same period, the other Section of the Law Commission concerned with the revision of Statute Law, submitted thirteen reports to the Government on: (i) the liability of the State in tort; (ii) parliamentary legislation relating to sales-tax; (iii) Limitation Act, 1908; (iv) the proposal that High Courts should sit in Benches at different places in a State; (v) British Statutes applicable to India; (vi) Registration Act, 1908; (vii) Partnership Act, 1932; (viii) Sale of Goods Act, 1930; (ix) Specific Relief Act, 1877; (x) Land Acquisition Act. 1894; (xi) Negotiable Instruments Act, 1881; (xii) Income-tax Act, 1922; and (xiii) Contract Act, 1872.

With the submission of its report on the reform of judicial administration, the Commission as constituted in 1955, ceased to function. It was reconstituted with effect from December 20, 1958, with T. L. Venkatarama Iyer, a retired judge of the Supreme Court, as its chairman in order to enable it to continue the work of statute law revision.

HIGH COURTS

The judicial administration of every State is headed by a High Court. As shown below, there are fourteen High Courts India:

TABLE 26

Scrial No.	Name	Year of estab- lishment	Territorial jurisdiction	Seat of the Court
1.	Allahabad	1919	Uttar Pradesh	Allahabad (Bench at
2. 3.	Andhra Pradesh Assam	1954 1948	Andhra Pradesh Assam, Manipur and Tripura	Lucknow) Hyderabad Gauhati
4.	Bombay	1861	Bombay	Bomhay (Benches at
5.	Calcutta	1861	West Bengal, Anda- man and Nicobar Islands	Nagpur and Rajkot) Calcutta
6.	Jammu & Kashmir	1928	Jammu & Kashmir	Srinagar
7.	Kerala	1956	Kerala, Laccadive, Minicoy and Am- indivi Islands	Ernakulam (Bench at Trivandrum)
8.	Madhya Pradesh	1956	Madhya Pradesh	Jabalpur (Benches at Indore and Gwalice)
9.	Madras	1861	Madras	Madras
10.	Mysore	1884	Mysore	Bangalore
11.	Orissa	1948	Orissa	Cuttack
12.	Patna	1916	Bihar	Patna
13.	Punjab	1947	Punjab, Himachal	Chandigarh (Bench
		1	Pradesh and Delhi	at Delhi)
14.	Rajasthan	1949	Rajasthan	Jodhpur

^{*}A brief summary of the recommendations of the Law Commission on judicial reform is given in the Appendices,

For three-quarters of a century, till the establishment of the Federal Court of India in 1937, some of these courts were virtually the highest courts in the country. The Judicial Committee of the Privy Council which exercised an appellate jurisdiction in certain categories of cases, had no administrative control over the High Courts. Under the new Constitution, however, the power of the High Courts has been affected to the extent that the Supreme Court, with a slightly wider appellate jurisdiction, has now been established in the country. The Constitution does not, however, vest the Supreme Court with any administrative control over the High Courts, although some administrative link has been provided by Article 217 which requires the President to consult the Chief Justice of India while appointing judges to the High Courts.

Ordinarily, a High Court is identified with the State where it exercises its jurisdiction, but the State Legislature has no power to alter the constitution or the organisation of the High Court. This power vests in the Union Parliament. Similarly, the power to remove High Court judges also vests in Parliament. The special procedure to be followed in this matter is the same as prescribed for the removal of Supreme Court judges

(Article 124, Clauses 4 and 5).

Powers and Functions

No substantial change in the powers and duties of the High Courts has been made by the Constitution. These are more or less the same as those prescribed in the Royal Letters Patent and the subsequent enactments which vested in them original or appellate jurisdiction in certain specified matters. The Letters Patent constituting the three Presidency High Courts in 1861 classified their jurisdiction as original and appellate, the original jurisdiction in civil as well as in criminal matters being confined to the city limits. The other High Courts did not ordinarily possess original jurisdiction but had the power to try cases for special reasons. This was a kind of extraordinary original jurisdiction. The High Courts were expressly authorised by the Government of India Act, 1935, to transfer suits to themselves when these involved interpretation of the Constitution. Article 228 of the new Constitution makes the transfer obligatory in all such cases.

The High Courts have powers of superintendence over all courts and tribunals within their jurisdiction (Article 225). They can call for returns from such courts, make and issue general rules and prescribe forms to regulate their practices and proceedings and determine the manner and form in which

books, entries and accounts shall be kept.

Under Article 226, every High Court has the power to issue to any person or authority, including any Government within its jurisdiction, directions, orders or writs, including writs which are in the nature of habeas corpus, mandamus, prohibition, quo warranto and certiorari, or any of them for the enforcement of any of the rights conferred by Part III of the Constitution and for any other purpose.

SUBORDINATE COURTS

The district judges, who preside over the principal civil courts of original jurisdiction, are appointed by the Governor of a State in consultation with the High Court. Appointments of persons, other than district judges, to the judicial service of a State are also made by the Governor in consultation with the State Public Service Commission and the High Court, and the power of posting, promotion and granting leave to persons belonging to the judicial service and holding posts inferior to those of district judges vests in the High Court.

Structure and Functions

Subject to minor local variations, the structure and functions of the subordinate or mofussil courts are more or less uniform throughout the country. Each State is divided into a number of districts, each under the jurisdiction of the principal civil court presided over by a district judge. Subordinate to him is a hierarchy of different grades of civil judicial authorities.

Besides hearing suits, properly so-called, the civil courts exercise jurisdiction over several other matters, such as guardianship, marriage and divorce, testamentary and intestate representation and admiralty jurisdiction. In another category of cases, such as those pertaining to the Land Acquisition Act and the Forest Act, questions affecting civil rights are, in the first instance, dealt with by administrative officers or tribunals, but their decisions are subject to the appellate authority of the appropriate civil courts. There is a third group of cases affecting civil rights which are tried by administrative or quasi-judicial tribunals or other statutory bodies. In such cases, there is no express provision for appeal to civil courts and the parties frequently invoke the intervention of the High Court for writs.

Criminal Justice

The Code of Criminal Procedure, as amended and revised from time to time, regulates the administration of criminal justice and the constitution of criminal courts. The officer presiding over the district court in civil suits is the judge of the Sessions Division for criminal cases in that district. The Sessions Judge is sometimes assisted by additional or assistant sessions judges. These officers are subordinate only to the High Court and are comparatively independent of the executive. They, however, deal only with the more serious crimes and take cognisance of cases only when they have been committed to them by a magistrate after a preliminary enquiry.

The exercise of preventive jurisdiction in certain matters and the trial of crimes listed as not triable by a Sessions Court are entrusted to magistrates of various classes under the general supervision and control of the District Magistrate. In respect of nearly all judicial acts, the magistracy, including the District Magistrate, is subject to the control of the High Court. Some categories of cases involving minor crimes are tried by honorary magistrates, generally retired officers or other responsible citizens, and by benches of magistrates.

Separation of Judiciary from Executive

In pursuance of the directive principle regarding the separation of the judiciary from the executive (Article 50), the States in which separation is now in force are Madras, Andhra Pradesh, Kerala, Mysore, Bombay excluding Vidarbha, the Madhya Bharat and Vindhya Pradesh areas of Madhya Pradesh, the PEPSU region of the Punjab and twelve districts of Bihar. The reform, as it has come into operation in the State of Madras has been designed within the frame-work of the Criminal Procedure Code and has been implemented by an executive order. Broadly speaking, it divides all the powers and functions of a magistrate under two heads (i) judicial and (ii) non-judicial. The officers discharging judicial functions have been placed under the High Court. Another important feature of the reform is that, for purely judicial work, only those qualified in law are eligible to become magistrates. Similar schemes, with modifications to suit local conditions, have been introduced in other States.

CHAPTER VII

DEFENCE

The supreme command of the Armed Forces is vested in the President of India, the responsibility for their administrative and operational control resting with the Ministry of Defence and the three Services Headquarters. The main function of the Ministry is to ensure that (i) the development and activities of the three Services are properly co-ordinated, (ii) decisions on policy matters are obtained from the Government, transmitted to the three Services Headquarters and implemented, and (iii) necessary financial sanction for defence expenditure is obtained from Parliament.

ORGANISATION

Although the overall control of the three Services vests in the Ministry of Defence, they normally function directly under their respective Chiefs of Staff. The occupants of these offices, as on April 1, 1959, were:

Chief of the Army Staff: General K.S. Thimayya
Chief of the Naval Staff: Vice-Admiral R.D. Katari
Chief of the Air Staff: Air Marshal S. Mukerjee

Army

The Army is organised into three commands—Southern, Eastern and Western—each under a General Officer Commanding-in-Chief of the rank of Lieutenant-General. Each of the Commands is divided into Areas under a General Officer Commanding of the rank of Major-General. The Areas are sub-divided into Sub-Areas, each under a Brigadier.

The Army Headquarters, located in Delhi, functions under the Chief of the Army Staff. Its four main branches, each under a Principal Staff Officer of the rank of Lieutenant-General, are: General Staff Branch, Adjutant-General's Branch, Quartermaster-General's Branch, Master-General of Ordnance's Branch. The other two branches are the Engineer-in-Chief's Branch and the Military Secretary's Branch, each under a Major-General.

The General Staff Branch consists of the Directorates of Military Operations, Military Intelligence, Military Training, Staff Duties, Weapons and Equipment, Armoured Corps, Artillery, Infantry, Signals and Territorial Army.

The Adjutant-General's Branch is divided into three Directorates, namely those of Organisation, Personal Services and Judge Advocate-General. The Medical Directorate, though separate under a Major-

General, is technically placed under this Branch.

The Quartermaster-General has two Directorates, one to organise all rail, sea and air movements of personnel and stores within and outside the country, and the second to provide accommodation for the personnel. The Directorates of Supply and Transport and of Remounts, Veterinary and Farms are also under the overall supervision of the Quartermaster-General.

The two departments under the Master-General of the Ordnance are the Directorate of Ordnance Services and the Directorate of Electrical and Mechanical Engineers. The Ordnance Services Directorate is responsible for procuring, stocking and supplying all kinds of defence equipment required for the troops. The Electrical and Mechanical Engineers' Directorate is charged with the responsibility of inspection, repair and maintenance of all types of mechanical and electrical equipment used by the Army.

The Engineer-in-Chief is the head of the Corps of Engineers and of the Military Engineering Service. He advises the Chiefs of the Staff of the three Services on all engineering works, including their planning and

construction.

The Military Secretary maintains personal records of officers and is responsible for their postings and transfers, promotions and retirement as well as for the grant of honorary ranks.

Navy

At the Naval Headquarters in Delhi, the Chief of the Naval Staff is assisted by four Principal Staff Officers, namely the Deputy Chief of the Naval Staff, the Chief of Personnel, the Chief of Material and the Chief of Naval Aviation. He functions through four Operational and Administrative Commands, one afloat and three ashore. These are: (i) Flag Officer Commanding, Indian Fleet, (ii) Flag Officer, Bombay, (iii) Commodore-in-Charge, Cochin, and (iv) Commodore, East Coast, Visakhapatnam.

The Indian Fleet today consists of the new flagship INS Mysore—an 8,700-ton Colony-class cruiser, formerly known as HMS Nigeria, INS Delhi—a 7,030-ton Leander-class cruiser, and a number of destroyers,

frigates, mine-sweepers and other ships.

The Naval Aviation Wing, started in 1953 with a squadron of 10 Sealand amphibious aircraft, acquired some Firefly target-towing aircraft in 1955. An aircraft-carrier, HMS Hercules, was acquired in 1957 and is now being refitted in the U.K. The Hydrographic Office, set up for the Marine Survey of India, has started its main work of surveying the seas and producing charts.

Air Force

The Chief of the Air Staff is assisted by three Principal Staff Officers controlling the three main branches of the Air Headquarters, viz. the Deputy Chief of the Air Staff, the Air Officer-in-Charge, Administration and the Air-Officer-in-Charge, Maintenance. Each of these three branches controls a group of Directorates.

Under the Air Headquarters come three major Air Force formations, namely the Operational, Training and Maintenance Commands, located at

Palam, Bangalore and Kanpur respectively.

In pursuance of the Reserve and Auxiliary Air Forces Act, passed by Parliament in 1952, five Auxiliary Air Force Squadrons, namely No. 51 (Delhi), No. 52 (Bombay), No. 53 (Madras), No. 54 (U.P.), and No. 55 (Bengal) have been formed.

TRAINING INSTITUTIONS

National Defence Academy

Admissions to the National Defence Academy at Khadakvasla, near Poona, are made on the basis of a qualifying biannual written examination conducted by the Union Public Service Commission at different centres in the country, followed by an interview before a Services Selection Board. Boys who have passed the Matriculation or an equivalent examination and are between 15 and 17½ years of age on the first day of the month on which the course starts at the Academy are eligible for admission. Cadets must be unmarried and cannot marry during the period of their stay at the Academy.

All the expenses of cadets while at the Academy (except the pocket expense of Rs. 30 per month) are borne by the Government. Where the monthly income of parents is less than Rs. 300, even this expense is borne by the Government.

The course at Khadakvasla is of three years' duration, after which the cadets receive specialised training at their respective Service colleges or

establishments.

Defence Services Staff College

Training is imparted to serving officers on an inter-Service basis at the Defence Services Staff College at Wellington in South India. It trains officers up to the standard required for second-grade staff appointments and also equips them for command and higher staff appointments. About 100 officers of all the three Services are trained every year, the duration of the course being 10 months.

Armed Forces Medical College

The Armed Forces Medical College at Poona, besides imparting training to newly-commissioned medical officers, runs refresher courses for medical officers of the Armed Forces to keep them up-to-date in their profession. Specialist courses are run in hygiene, X-ray, blood-transfusion and pathology.

Army Colleges and Schools

The Military College at Dehra Dun is the premier centre for training officers of the Army. The main source of entry into the College is the National Defence Academy. Cadets passing out of the Academy receive one year's training at Dehra Dun before being commissioned. The other categories of entrants in higher age-groups are those who have qualified in the competitive entrance examination of the Union Public Service Commission and the Services Selection Board for two years' training, graduate cadets of the NCC for a year and a half, other graduates selected for specialised commissions in the technical arms for a year and serving Regular or Territorial Army personnel—JCOs and NCOs—for two years. At the Military College, cadets undergo strenuous training designed mostly to equip them with the basic military knowledge necessary for all Army officers whatever their corps, arm or service.

The Armoured Corps Centre and School at Ahmednagar undertakes the training of regimental instructors, squadron commanders and regimental commanders of the Corps. The College of Military Engineering at Kirkee imparts training to officers and other ranks in all aspects of military engineering. Longer courses of over two years' duration are also conducted

there to train officers up to the degree standard.

The School of Signals at Mhow imparts basic and advanced technical training in telecommunication and signal tactics. The School of Artillery at Deolali provides training in field, anti-tank, and anti-aircraft artillery, while its branch at Bombay provides training in coastal artillery. The Infantry School at Mhow conducts courses in the tactical and administrative handling of units and sub-units for senior officers and junior commanders of all corps in the Army. The Ordnance School at Jabalpur imparts specialised corps training in the identification, handling, storage, care, custody and preservation of all items, including ammunition and explosives, stocked by ordnance depots.

The other Army training centres and schools are: the Service Corps School, Bareilly; the Remounts Veterinary and Farms Centre and School, Meerut; the School of Physical Training, Poona; the Army and Air Transport Support School, Agra; the School of Mechanical Transport, Faizabad;

the Corps of Military Police Centre and School, Faizabad; the Education Centre and School, Pachmarhi; the Military School of Music, Pachmarhi; and the Electrical and Mechanical Engineering School, Trimulgherry.

Naval Training Centres

Except for specialised technical courses, training of all officers and men of the Navy is undertaken at the main Naval training centres located at Cochin, Bombay and Visakhapatnam. Advanced courses in subjects like gunnery, torpedo and anti-submarine and communications have already been started.

The principal training centres of the Navy are INS Venduruthy and the Naval Air Station Garuda, both situated at Cochin. INS Venduruthy is the premier training establishment, comprising technical schools for gunnery, navigation and torpedo and anti-submarine. INS Garuda has the training aircraft of the Navy and some technical schools.

At INS Shivaji, situated at Lonavla (Bombay State), mechanical engineers and artificiers are trained. A new Engineering College was started there to train junior engineer and electrical officers of the Service.

INS Valsura, the Electrical School of the Navy at Jamnagar, trains officers and men of the Electrical Branch of the Service. With most of the ships now acquired being fitted with complicated electronic equipment, training at this School has been geared to the present requirements of the Service.

New recruits coming into the Navy are trained at *INS Circars* at Visakhapatnam and, on completion of their courses, become ratings. Officers and men of the Supply and Secretariat Branch are trained at *INS Hamla* in Bombay. *INS Kistna* is the junior officers' training ship. Sea training is imparted by the Fleet.

Air Force Colleges and Schools

The basic flying training of a year's duration for pupil pilots is imparted at the Air Force Flying College, Jodhpur. Advanced flying and conversion training on jets and multi-engined aircraft is conducted for a year at the Air Force Station, Hyderabad. Pupil navigators also have their initial training at Jodhpur and advanced training at Hyderabad before graduating as full-fledged aircrew.

Flying instructors are trained in a separate school at Tambaram. The Air Force Administrative College at Coimbatore trains officers in various ground duties, and medical officers receive training at the School

of Aviation Medicine recently established at Bangalore.

The Air Force Technical College at Jalahalli trains officers in engineering, signals, and armament and electrical engineering. A school at Jalahalli trains airmen in accounting, equipment, general office duties, medical assistance, telephone operating, drill instruction, police duties, music, motor driving and catering. Another school, also located at Jalahalli, trains airmen in higher signal trades.

DEFENCE PRODUCTION

With a view to evolving a co-ordinated policy in regard to the production of military stores and equipment and the inspection, research, design and development activities of the three Services, the Government of India set up a Defence Production Board three years ago. With the Defence Minister as its Chairman, the Board is responsible for the proper running of all the ordnance factories. Attached to it are the Scientific Adviser to the Minister and the Controller-General of Defence Production, their respective departments being the Research and Development Organisation and the Production and Inspection Organisation.

The Research and Development Organisation was brought into being in January 1958 by the amalgamation of the Technical Development Establishments of the three Services and the Defence Science Organisation to promote and apply scientific research for production. It is closely associated with the Production and Inspection Organisation and includes technical establishments dealing with weapons, ammunition, military explosives, metallurgy, electronics and optical instruments. It has under it research installations like the Defence Science Laboratory, New Delhi, the Stores Laboratory, Kanpur, the Naval Physical Laboratories at Bombay and Cochin and research-cum-training installations like the Institute of Armament Studies, Kirkee.

The principal function of the Production and Inspection Organisation is to achieve self-sufficiency in respect of stores required by the three Services.

Ordnance Factories

The ordnance factories, which until recently catered primarily for the Army, have now started producing stores for the Navy and the Air Force also. The Service items produced by them include artillery guns, heavy mortars, naval guns, barrels and recoil system of guns, mountings, carriages and buffers for heavy and medium-calibre guns, light machine-guns and other small arms, bombs, shells and various types of ammunition and high explosives, sea mines, depth-charges, parachutes, Service clothing and mountaineering equipment.

As part of their peace-time functions, the ordnance factories are also using their utilizable spare capacity to cater to civilian needs. Their civil trade activities cover the five broad categories of ferrous, non-ferrous, leather and textile, chemical and general engineering. The last category includes scientific, optical and mathematical instruments, sporting arms and ammunition, metal castings and forgings and other miscellaneous articles.

Machine-tool Proto-type Factory

The Machine-tool Proto-type Factory, Ambarnath (Bombay), has fulfilled three important functions, namely the design of new armament and machine-tools; manufacture and proofing of proto-types of both, together with the manufacture of small arms; and creation of necessary design and craft skill. The surplus capacity in this factory is being utilised to produce various types of machine-tools required by the ordnance factories and other defence establishments. The factory first designed and made simpler types of machine-tools like tool grinders, polishing machines and dressing devices, and then switched over to advanced types. It has so far manufactured, among others, hydraulic surface-grinders and precision tool-room lathes.

Hindustan Aircraft

The Hindustan Aircraft Ltd., Bangalore, undertakes the repair, overhaul and manufacture of aircraft for the Indian Air Force. Since 1952, the HAL has been manufacturing the HT-2 trainer aircraft on a large scale for the IAF, the Navy and the flying clubs. The factory has also been building Vampire jet fighters, which form part of the fleet of the IAF. It is also producing jet trainers.

Recently the Government concluded an agreement with the Bristol Aeroplane Company to make the full range of Bristol Orpheus turbo-jet engines at the HAL. Another licence agreement has been reached with the Folland Aircraft Company for the manufacture by the HAL of Britain's latest jet fighter, the Gnat.

The ancillary activities of HAL include the building of all-metal broad

gauge coaches with modern amenities for the Railways and bus-bodies for State and private transport authorities.

Bharat Electronics

The Bharat Electronics Ltd., Jalahalli (near Bangalore), went into initial production in December 1955, and started manufacturing tools and

jigs required for receivers and transmitters.

The value of electronic equipment produced at the BEL during the period January 1956 and March 1958 was Rs. 33.95 lakhs. The production programme of the Company for this period included the manufacture of general-purpose receivers and medium-power transmitters for the Civil Aviation Department and equipment for All India Radio, Railways, Meteorological Department, States Police and Fire Services, etc.

Some other important items under production at the BEL are generalpurpose communication receivers, medium-power transmitters, mobile

trans-receivers and portable man-pack sets.

SPECIAL ASSIGNMENTS

In addition to their normal duty of defending the country, the Armed Forces, from time to time, perform certain emergency duties, such as (i) rendering of help in areas affected by natural calamities like floods, earthquakes and famines, (ii) carrying out of photographic surveys which are of use in the planning and development of hydro-electric and other schemes and (iii) reclamation of wasteland. Since independence, India's Defence Forces also assisted in implementing the Korean Truce Agreement and the recommendations of the International Commissions for Supervision and Control in Viet-Nam, Laos and Cambodia set up under the Cease-fire Agreement concluded at Geneva on July 20, 1954. Several officers and other ranks, including some from the Navy and the Air Force, were deputed in September 1954 for the second assignment which still continues. The Army embarked on yet another mission of peace when on November 16, 1956, a contingent was sent to Egypt to join the United Nations Emergency Force. In a mercy mission to the flood-affected areas of Ceylon, the Air Force dropped over half a million pounds of supplies and medical aids. Nearly 70 service officers recently served with the U.N. Observation Group in the Lebanon.

DEFENCE FINANCE

The following table shows the defence expenditure during the last nine years on revenue and capital accounts:—

TABLE 27 **DEFENCE EXPENDITURE***

(In crores of rupecs)

Year		Revenue Account	Capital Account	Total
1951-52 (Actuals)		186.28	10.17	196.45
1952-53		192.38	5.96	198.34
1953-54		198.06	10.16	208.22
1954-55 ,,		201.34	8,47	209.81
1955-56		188.37	17.59	205.96
956-57 ,,	1	211.85	19.70	231.55
1957-58 "		256.72	22.93	279.65
958-59 (Revised Estimates)		266.87	27.90	294.77
1959-60 (Budget Estimates)		242.68	32.74	275.42

^{*} For a comparative statement of Defence expenditure to total national expenditure, see Chapter XIX.

TERRITORIAL ARMY

The Territorial Army, which was raised in October 1949, is designed to give the youth of the country an opportunity of receiving military training in their spare time and to serve the country in times of emergency by providing units to the regular Army and taking over the responsibility for internal security. Membership of the Territorial Army does not involve service outside India except under a special order of the Union Government. The T.A. is composed of units of Artillery, Infantry, the Corps of Engineers (including Railways, Ports, Docks and Inland Waterways), the Corps of Signals (including Posts and Telegraphs), the Medical Corps and the Corps of Electrical and Mechanical Engineers.

Any able-bodied national of India between the ages of 18 and 35 (with relaxation in the upper age-limit for entry into certain technical units) and possessing the requisite qualifications is eligible to join the Terri-

torial Army as an officer or other rank.

The Territorial Army has two types of units—provincial and urban. Training for recruits in the provincial units lasts 30 days. In the urban units training is given for 32 days, in the evenings after working hours, at week-ends or on holidays. Every member of the Territorial Army who has undergone recruit training is liable to undergo annual training for two calendar months in the provincial units and for a period varying from a minimum of 120 hours to a maximum of 240 hours in the urban units.

While under training or otherwise employed, officers and other ranks of the Territorial Army are entitled practically to the same pay and allowances, rations and medical facilities as are admissible to the corresponding ranks of the regular Army. They are also entitled to terminal gratuity and

disability and family pension under certain conditions.

A limited number of appointments on the permanent staff, with a tenure of three to five years, is offered to all ranks of the Territorial Army provided they possess the necessary experience and qualifications. Territorial Army personnel are also entitled to the award of decorations and medals.

LOK SAHAYAK SENA

The Auxiliary Territorial Army, which was reorganised as the National Volunteer Force in 1954, is now designated as "Lok Sahayak Sena". Its aim is to give elementary military training to about 5,00,000 men in five years.

All able-bodied men, except ex-Servicemen and ex-NCC cadets, between the ages of 18 and 40 can join the Lok Sahayak Sena. Membership of the force carries no liability to military service. Under the new scheme, special attention is given to the training of people in border areas.

Recruits are given 30 days' training, which includes a literacy course for those who are illiterate. A record of the trainees is maintained and the outstanding trainee in each camp is given a Certificate of Merit. Others receive certificates in token of their completing the full period of training successfully. During the training period every trainee is provided with free accommodation, clothing and food and an out-of-pocket allowance of Rs. 15 on the conclusion of the camp.

NATIONAL CADET CORPS

The National Cadet Corps consists of three Divisions, namely Senior, Junior and Girls. The Senior and Junior Divisions are composed of three Wings—Army, Navy and Air Force. The Army Wing has units of the Armoured Corps, Artillery, the Corps of Engineers, the Signals Corps, Infantry, the Corps of Electrical and Mechanical Engineers and the Medical Corps.

In addition to normal basic training, cadets of the technical units receive specialised training. Naval Wing units are, of necessity, raised in the coastal towns where facilities for naval training are available. In the Air Wing units, theoretical and practical training is given in flying and, with the help of the flying clubs, cadets obtain 'A' flying licences at Government expense. Gliding has also been introduced as part of the training of air cadets. The special needs of girl cadets have been fully kept in view and their training has also now been made more instructive, interesting and useful. Aero-modelling and gliding have also been introduced in the Senior Wing of the Girls' Division.

The progressive increase in the strength of the Corps since its incep-

tion is shown in the following table:

TABLE 28
STRENGTH OF NATIONAL CADET CORPS

		Во	ys	Gir	ls	Total

AUXILIARY CADET CORPS

The Auxiliary Cadet Corps has been started to cope with the demand for military training for boys and girls in schools who cannot get admission to the National Cadet Corps. The Corps has made rapid progress; its strength at the end of 1958 was 8,57,947.

The Auxiliary Cadet Corps trains the youth of the country in team spirit, discipline and patriotism. Its instructors selected from schools are trained by regular Army staff of the various NCC untis.

WELFARE OF EX-SERVICEMEN

Special attention is given to the resettlement of ex-Servicemen in Government and private services, vocational and technical trades, land colonies and transport services. Training in basic agriculture is given to facilitate their absorption in the community projects as *Gram Sevaks*. In

matters of employment, preference is given to ex-Servicemen in filling up appointments in the police, watch and ward, excise and other departments where military training is a qualification. In addition, relaxation in agelimits to the extent of the military service rendered has been permitted. Through the concerted efforts of the Central and State Governments as well as private organisations employment has been found for 1,12,628 ex-Service-

men including 957 officers during the last eight years or so.

One of the most important non-official organisations which renders useful assistance to ex-Servicemen and their families, in close liaison with the local administrations, is the Soldiers', Sailors' and Airmens' Board. The Board, which has its headquarters in New Delhi, co-ordinates the activities of State boards. These, in their turn, control a network of district boards, having in some cases tehsil or taluka committees. There are at present 204 such boards. In addition to the funds of the Board which are primarily used for payment of special pensions to blinded ex-Servicemen and to meet expenditure on other miscellaneous items, there are a number of other Central funds like the Flag Day Fund, the Armed Forces Benevolent Fund and the Armed Forces Reconstruction Fund, which also render valuable assistance for the welfare of ex-Servicemen.

CHAPTER VIII

EDUCATION

Education is the responsibility of the State Governments, the Union Government confining its activities to the co-ordination of facilities and determination of standards in respect of higher education (through the University Grants Commission), research and scientific and technical education. Co-ordination in regard to elementary and secondary education is secured through All-India Councils. The Union Government is also responsible for the running of four universities (Aligarh, Banaras, Delhi and Visva-Bharati) and such other institutions of national importance as Parliament may by law declare. It also administers the award of scholarships and fellowships in pursuance of the policy of promoting cultural relations with other countries and co-operating with international organisations like the UNESCO.

Literacy

The state of literacy in the country according to the 1951 census is as shown below:

TABLE 29
LITERACY IN INDIA (1951)*

State/Union Territory	1	Literates		Percentage of Literacy			
	Persons	Males	Females	Persons	Males	Females	
INDIA	5,92,51,001	4,56,01,184	1,36,49,817	16.61	24.87	7.87	
States					ı		
Andhra Pradesh	41,02,721	30,97,020	10,05,701	13.12	19.67	6.48

Madras	62,37,133	47,32,520	15,04,613	20.81	31.69	10.00	
Mysore	37,43,457	28,69,650	8,73,807	19.29	29.08	9.16	
Orissa	23,13,431	19,78,705	3,34,726	15.80	27.32	4.52	

^{*}Figures of literates for the taluks transferred from one State to another on the reorganisation of States have been compiled from village statistics published tract-wise in the District Census Handbooks. For Bihar and West Bengal, literacy figures have been estimated for the transferred areas on the assumption that they bear to the literacy figures of the tracts concerned, the same proportion as their total population.

ELEMENTARY AND BASIC EDUCATION

Basic education being the accepted pattern of the educational system, the system of elementary education is gradually being brought in line with it. The basic system sets out an activity curriculum in which learning is correlated with the physical and social environment of the children and also with productive activities like spinning and weaving, gardening, carpentry, leather work, book craft and domestic crafts including cooking, sewing, house management, etc. The programme for the conversion of the existing elementary schools into basic ones, the opening of new basic schools, the introduction of crafts in non-basic schools, the production of literature

^{*}Includes 630 pre-primary and 31,898 basic primary schools in Uttar Pradesh.

on basic education and training of basic school teachers is progressively being carried out. The recommendations of the Assessment Committee appointed in 1955 have generally been accepted and are being implemented.

An All-India Council for Elementary Education has been set up to advise the Central and State Governments on all matters relating to elementary education and to prepare programmes for the early implementation of compulsory and free elementary education.

The progress of primary and basic education is indicated in the fol-

lowing table:

TABLE 36 BASIC AND NON-BASIC PRIMARY EDUCATION

Year	Number o	Number of schools		students s (in nds)	Direct expenditure (in crores of rupees)	
	 Primary (a)	Basic	Primary (a)	Basic	Primary (a)	Basic

SECONDARY EDUCATION

Significant among the reforms carried out on the recommendations of the Secondary Education Commission (which reported in August 1953) with the aim of making secondary education a self-contained and complete stage up to the age of 17, are:

(1) Substitution of the present system in which the secondary stage serves as a terminal stage entirely subservient to university education by a diversified system through conversion of existing schools into multipurpose types.†

(2) Provision of facilities for improvements in teaching science. libraries, introduction of craft in middle schools, training of teachers and career masters, etc.

(3) The establishment of the All-India Council for Seconday Education to advise the Central and State Governments.

(4) The compulsory study of three languages at the secondary stage.

⁽a) Inclusive of pre-primary schools.

[·] Provisional.

[†] Multipurpose schools offer instruction in languages, social studies, general science, and a compulsory craft in addition to a course in either science, technology, commerce, agriculture, fine arts, home science or humanities.

The table below provides at a glance the development and financing of secondary education:

TABLE 37
SECONDARY EDUCATION

Year		Number of schools	Number of stu- dents on rolls (in thousands)	Total direct expenditure (in crores of rupees)

1956-57*		35,828	93,30	57 47

HIGHER AND UNIVERSITY EDUCATION

Post-secondary education in India is imparted through (1) arts and science colleges, (2) professional colleges, (3) special educational colleges, (4) research institutions and (5) universities. In States having Boards of Higher Secondary and Intermediate Education, the post-intermediate stage is conducted under the direction and control of universities in respect of courses of study, examinations and award of degrees and diplomas.

Universities are of three different types. Aftiliating universities do not themselves undertake any teaching but merely prescribe courses of study, conduct examinations and award degrees and diplomas in respect of colleges affiliated to them. The affiliating and teaching universities, in addition to carrying out functions of the affiliating type, offer teaching and research facilities generally at the post-graduate level and in some cases from the post-intermediate level onwards. The Residential and Teaching universities are unitary organisations controlling all colleges under their jurisdiction in all respects and undertaking teaching at all levels. A number of the younger universities in India belong to the last category.

A forum for the discussion of university problems and for the mutual recognition of degrees and diplomas awarded by the universities in India is provided by the Inter-University Board founded in 1925. The functions of this Board are advisory in character.

Besides the universities, there are a large number of institutions which impart higher learning. The Jamia Millia at Delhi, the Gurukul at Hardwar and the Indian Institute of Science, Bangalore, have the same standing as other universities, although they were not officially established as universities under Central or State Acts. Many of the research laboratories and institutions mentioned in the chapter on Scientific Research are recognised by the Inter-University Board as centres of higher research. Some of them undertake teaching as well.

In Table 38 is shown the State/Territory-wise distribution of the various

^{*}Provisional

types of institutions catering to higher education in 1956-57 and in Table 39 relevant data in respect of the Universities is given for 1958.

General Education in Universities

Two schemes of general education have been drawn up by a study team which reported in January 1957. In the main scheme, general education covering basic studies in the fields of natural sciences, social sciences and the humanities together with training in communication skills are to be made compulsory for all under-graduate non-professional faculties. In the alternative scheme, six periods a week in the first and

^{*}Figures relate to 1955-56.

second years of the degree course are to be devoted to general education. The introduction of general education courses has been accepted in principle by almost all universities in India, many of them having actually introduced them in one form or another.

University Grants Commission

In pursuance of the recommendation of the University Education Commission appointed by the Government in 1948, the University Grants Commission was constituted in 1953. It was given an autonomous statutory status by an Act of Parliament in 1956. Most of the matters connected with university education including the determination and co-ordination of standards and facilities for study and research have been committed to the care of this body. The Commission has the authority to make appropriate grants to different universities and implement development schemes.

The composition of the Commission as on March 1, 1959 was as

follows:

Chairman: C.D. Deshmukh

Members: H.N. Kunzru

K.S. Krishnan

A.L. Mudaliar

Dewan Anand Kumar

G.C. Chatterjee

N.K. Siddhanta

K.G. Saiyidain

N.N. Wanchoo

Secretary: Samuel Mathai

TECHNICAL EDUCATION

The following table indicates the expansion of facilities for technical education (engineering and technology) between 1947 and 1957.

TABLE 40 TECHNICAL EDUCATION

		Insti	tutions	Sanction	ed Intake	Out-	it-turn	
		Degree Engg. & Tech.	Diploma Engg. & Tech.	Degree Engg. & Tech,	Diploma Engg. & Tech.	Degree Engg. & Tech.	Diploma Engg. & Tech.	
1947		38	53	2,940	3,670	1,270	1,440	
1950		49	86	4,119	5,903	2,198	2,478	
1951		53	89	4,788	6,216	2,693	2,626	
1952		56	90	5,184	6,499	2,956	2,654	
1953	, .	58	92	5,450	7,213	2,880	2,747	
1954	•	59	95	5,468	8,313	3,207	3,397	
1955		64	102	5,937	9,397	4,070	4,072	
1956		70	109	6,367	9,899	4,293	4,075	
1957		7-1	129	9,778	15,995	4,290	5,034	

By the end of the Second Plan period it is estimated that technical institutions will be in a position to admit every year about 13,000 students for degree courses and 24,000 students for diploma courses.

The All-India Council for Technical Education, which advises Government on technical education, has carried out a study of the position of each technical institution in the country and has drawn up schemes for their improvement and for the establishment of new institutions. The total cost of schemes approved till March 1958 was of the order of Rs. 29:18 crores of which the Central Government will provide Rs. 18:56 crores.

On the recommendations of a Special Committee appointed by it, the Council has approved the introduction of post-graduate courses in 33 sub-

jects at 20 selected institutions.

The Indian Institute of Technology, Kharagpur, the first of four higher technological institutes, started functioning in 1951. The Indian Institute of Technology, Bombay, admitted the first batch of students in 1958 and the remaining two institutes, one at Madras and another at Kanpur are in the process of establishment. Each Institute when completed will provide for the education of over 1,500 students at the under-graduate level and 500 at the post-graduate level.

Courses in Management Studies have started at the Indian Institute of Technology, Kharagpur; the Delhi School of Economics, Delhi; the Department of Economics, Madras University, Madras; the School of Economics and Sociology, Bombay; the Indian Institute of Science, Bangalore; the Institute of Social Welfare and Business Management, Calcutta, and the Victoria Jubilee Technical Institute, Bombay. The Administrative Staff College at Hyderabad, which started functioning in December 1957, is a joint enterprise of the Central Government, private industry and commerce and

conducts three courses in a year.

Four Regional Schools of Printing, jointly sponsored by the Central and the State Governments at Madras, Bombay, Calcutta and Allahabad, each designed to train 20 candidates every year, have also started functioning.

In addition to grants-in-aid to individual research workers, about 680 scholarships, have been allotted to different science and technological de-

partments of universities and other institutions.

Eighty fellowships, each of the value of Rs. 400 per mensem and a grant of Rs. 1,000 per year for apparatus and equipment under the National Research Fellowship Scheme (initiated in 1955-56) are available. For engineering and technical students two categories of stipends have been introduced in selected government establishments and individual concerns for post-institutional practical training in industrial management.

RURAL HIGHER EDUCATION

On the recommendation of the Rural Higher Education Committee, a National Council for Higher Education in Rural Areas has been established to advise the Government on all matters relating to the development of rural higher education. The Council selected 10 institutions for development into rural institutes and these have started functioning at Sriniketan, Madurai, Jamianagar (New Delhi), Udaipur, Sundarnagar Birauli (Bihar), Agra, Sanosara (Bombay), Coimbatore, Amravati, Gargoti (Bombay). The courses as approved by the Council and adopted by the rural institutes are: (i) a three-year diploma course in rural sciences, (ii) a two-year certificate course in agricultural science, (iii) a three-year certificate course in civil and rural engineering and (iv) a one-year preparatory course to initiate matriculates into the three-year diploma course. Recognition of the Diploma in Rural Sciences as equivalent to a first degree of a University has been secured.

SOCIAL EDUCATION

Social education embodies a five-point programme to promote (i) literacy, (ii) knowledge of the rules of health and hygiene, (iii) improvement of the adults' economic status, (iv) sense of citizenship with an adequate consciousness of rights and duties, and (v) healthy recreations suited to the needs of the community and the individual. The States execute the schemes, while the Centre provides guidance, financial assistance and coordination.

A National Centre for Fundamental Education has been established in New Delhi to train higher grade personnel for social education work, develop suitable techniques, carry out research on selected problems and serve as a clearing house of information. To encourage the production of literature suitable for children and adults prizes are offered to authors of the best books in all regional languages.

Audio-Visual Aids

The Central Film Library has a stock of 3,476 films and 1,498 film strips on educational and cultural subjects. These are lent free of charge to educational and other insitutions which become members of the Library. It has 1,045 educational institutions and social organisations scattered throughout the country as its members. A quarterly journal 'Audio-Visual Education' has been started to foster interest in the use of audio-visual techniques among teachers and social education workers.

Seminars for the training of audio-visual workers have been organised by the Centre as also by the States. A Central Audio-Visual Education

Institute has started functioning.

EDUCATION OF THE HANDICAPPED

A National Advisory Council advises the Government on all problems concerning education, training and employment of the physically and mentally handicapped. Scholarships are awarded to blind, deaf and orthopaedically handicapped students for higher education or for technical or professionl training. Grants are provided to institutions and organisations for the handicapped chiefly for undertaking developmental work for the handicapped.

The training centre for the Adult Blind at Dehra Dun imparts training in handicrafts to about 150 blind men from all parts of the country. A women's section with a capacity of 20 has been recently added to the centre. Attached to this centre is a sheltered workshop, set up in 1954 employing ten blind workers. An employment office for the blind has been functioning in Madras since July 1954 and has so far placed 94 adult blind persons in-

cluding 2 blind women in various industries.

The Central Braille Press, established at Dehra Dun in October 1950, produces braille literature in Indian languages, publishes a Hindi quarterly

digest and manufactures braille appliances.

A Model School for blind children established in January 1959 at Dehra Dun provides kindergarten and primary education. Eventually it will be a full-fledged secondary school.

DEVELOPMENT OF HINDI

Steps so far taken for the propagation and development of Hindi are as follows:

(i) 1,37,590 technical terms have been evolved by twenty-three expert committees appointed by the Board of Scientific Terminology and lists of technical terms in 14 subjects have so far been published.

(ii) Comments of State Governments and Universities have been in-

vited on an English version of the basic grammar of modern Hindi.

(iii) A Reviewing Committee has submitted a report on the recommendations of the Hindi Examination Reorganisation Committee and the report will be considered by the Hindi Shiksha Samiti.

(iv) The publication of the report of the Hindi Typewriter and Teleprinter Committee has been withheld pending Government decision on the

question of reform of the Devanagari script.

(v) Work in evolving a standard system of Hindi shorthand has been

started and is expected to be completed by 1960.

(vi) Hindi teachers' training colleges are to be organised on a zonal basis in the non-Hindi speaking areas and the Akhil Bharatiya Hindi Mahavidyalaya, Agra, will be organised for research in Hindi and training of teachers.

(vii) School libraries in non-Hindi speaking States have been provided

with Hindi books.

(viii) An exhibition of scientific and technical literature in Hindi

was organised at Bombay, Indore, Patna and Lucknow in 1958.

(ix) Progress has been made in the compilation of the Hindi encyclopaedia in ten volumes by the Nagari Pracharini Sabha, and the first volume is to go to press soon.

(x) Standard manuals relating to Botany and Chemistry are under

print; manuals on other subjects are under preparation.

- (xi) Action has been initiated on preparation of terminological indices of 14 standard Hindi works and publication of omnibus volumes of works of 16 eminent writers.
- (xii) In consultation with the State Governments concerned material will be collected for preparation of technical vocabularies on textiles, fisheries and metal works.

(xiii) Lecture tours by scholars from Hindi speaking areas to non-Hindi speaking areas and vice versa have been arranged. A seminar of Hindi teachers from the non-Hindi speaking States was held at Patna in 1958.

(xiv) Grants have been given to State Governments in non-Hindi speaking areas and to voluntary organisations for the promotion of Hindi

and for appointment of Hindi teachers.

(xv) Suggestions and comments have been invited from universities regarding seven lists containing words common to Hindi and other regional languages.

YOUTH WELFARE

The highlights of the endeavour in the field of youth welfare have been as follows:

- (i) Organisation of annual inter-university youth festivals since 1954 and assistance to universities for the organisation of intercollegiate festivals.
- (ii) Holding of youth leadership training camps, where short-term training is imparted to selected teachers in the promotion of extra-curricular activities.
- (iii) Travel concessions and financial assistance for organising youth tours to places of historic, scenic and cultural interest and to development project areas.
- (iv) The establishment of the Youth Hostels Association of India and the setting up of youth hostels all over the country.
- (v) Assistance to universities and State Governments in the promotion of youth welfare boards and committees for the successful implementation and co-ordination of youth welfare activities.
- (vi) Pilot surveys of the living conditions of students at selected university centres.
- (vii) The setting up of non-student youth clubs and centres.
- (viii) The Labour and Social Service Scheme to inculcate the sense of dignity of manual labour in students and to bring them into contact with villages.
 - (ix) Campus Work Projects Scheme to provide amenities such as gymnasia, swimming pools, open air theatres-cum-auditoria, etc. to universities and other educational centres.

PHYSICAL EDUCATION AND SPORTS

Physical Education

A 'National Plan of Physical Education and Recreation' has been prepared for strengthening institutions and colleges of physical education. The Plan aims at implementing the syllabi of physical education, popularising norms of physical fitness tests, conducting seminars, awarding fellowships and scholarships for higher studies in physical education, granting assistance to Vyayamshalas and Akhadas, holding of physical efficiency weeks and festivals and producing of documentary and feature films on physical education. All these schemes are being carried out.

The first National College of Physical Education, named after Rani Lakshmi Bai of Jhansi, was set up at Gwalior in 1957. The college offers training facilities for a three-year degree course in physical education.

A Central Advisory Board of Physical Education and Recreation has been set up to advise Government on co-ordination of programmes and activities.

Sports

Encouragement offered to the organisation of sports has been in the following directions:

- (i) The establishment of the All-India Council of Sports.
- (ii) The setting up of State Sports Councils in Andhra Pradesh, Assam, Bihar, Bombay, Delhi, Himachal Pradesh, Kerala, Madras, Mysore, Orissa, Rajasthan, Tripura and U.P.
- (iii) Under the Rajkumari Sports Coaching Scheme coaching centres have been established under the guidance of expert Indian and foreign coaches since 1953 and assistance is given to sports federations and universities to modernise sports equipment and to enable them to participate in international sports tournaments.

National Discipline Scheme

In order to bring up the younger generation under a proper code of discipline and to instil in them ideals of good citizenship and comradeship, a scheme for the physical and general social training of displaced children was introduced in July 1954. A start was made in the training of the children in Kasturba Niketan at Delhi. The scheme has since been extended to a large number of schools in and around Delhi, Punjab, U.P., Bombay, Madhya Pradesh, Jammu and Kashmir and West Bengal. Over 1,00,000 children are under training in various States.

CHAPTER IX

CULTURAL ACTIVITIES

The National Culture Trust was set up to promote art and culture and foster the consciousness of art among the people. These objectives are secured through the agency of the Lalit Kala Akademi (Academy of Art), Sangeet Natak Akademi (Academy of Dance, Drama and Music) and Sahitya Akademi (Academy of Letters). The facilities for mass communication at the disposal of the State have also been utilised to make the people conscious of their cultural heritage. A number of institutions have collaborated in the task of popularising traditional arts and crafts.*

ART

Lalit Kala Akademi

The Lalit Kala Akademi, set up in 1954, promotes the development of fine arts and evolves a programme of work for the growth and nourishment of painting, sculpture and other graphic arts. It also co-ordinates the activities of the regional or State academies, encourages exchange of ideas among various schools of art, publishes literature and fosters inter-regional and international contacts through exhibitions, exchange of personnel and of art objects.

The Akademi holds a National Exhibition of Art every year at New Delhi, which also visits different State capitals by rotation. Five such national exhibitions have been held so far. In 1956 the Akademi organised in New Delhi an exhibition of Buddhist Art as part of the 2500th Anniversary of the Parinirvana of Lord Buddha. It later visited Banaras, Patna, Cal-

cutta, Madras and Bombay.

Exhibitions of Canadian paintings, Hungarian folk arts, Chinese handicrafts, Polish arts, contemporary German art and reproductions of art (UNESCO) have so far been organised. An exhibition of Rembrandt's life and work is being shown in different cities. An Indian exhibition, comprising samples of contemporary art and classical museum pieces, toured Czechoslovakia, Hungary, Bulgaria, Rumania, Russia and Poland. About a thousand representative samples of Indian art are being sent to Villa Huegel (West Germany).

The Akademi has initiated a survey of the arts and crafts of different regions of the country with particular reference to details of work and living conditions of indigenous craftsmen, painters and sculptors. The

survey has covered West Bengal and is to cover Gujarat next.

The maintenance of a photographic record of ancient monuments, sculptures and paintings and reproduction of works of art that have decayed are among its other important activities. A beginning has been made in this direction by copying the paintings in Kulu, Badami, Sittanavasal, Amber and Jaipur.

The Akademi makes annual awards to outstanding artists.†

Publications

Among the art publications brought out by the Akademi are Mughal Miniatures, a Portfolio of Contemporary Paintings, a set of 12 picture postcards of Indian miniatures, Krishna Legend in Pahari Paintings and two Portfolios of

^{*} For lists of these recognised institutions see Appendices.

[†] For a list of 1959 awards see Appendices.

Ajanta and Mewar Paintings. The forthcoming publications will be devoted to Kishangarh paintings, Bundi paintings and Indian painting in relation to Indian poetry. The Akademi also brings out a bi-annual art journal, "The Lalit Kala."

The Publications Division of the Ministry of Information and Broadcasting has also brought out a number of important art publications. These include Kangra Valley Painting, Indian Art Through the Ages, Architecture and

Sculpture of India and The Way of the Buddha.

National Gallery of Art

The National Gallery of Modern Art, established in 1954, now possesses 1,748 works of nearly 140 artists, including Rabindranath Tagore, Nandalal Bose, Abanindranath Tagore, Jamini Roy, D.P. Roy Chaudhury, Amrita Sher Gill, Sudhir Khastagir and many other modern painters and sculptors.

DANCE AND DRAMA

Sangeet Natak Akademi

The main task which the Sangeet Natak Akademi, inaugurated in 1953, has set for itself is the survey of and research in the different art forms of the country, to record and film them and to encourage publications about them.

The National Festival of classical, traditional and modern ballet dances, excluding folk dances, was organised in Delhi in 1955. A seminar on Dance Arts of India was organised in 1958. The Folk Dance Festival has become an integral part of the annual Republic Day celebrations. To keep a record of the different styles, folk dances are being filmed and recorded by the national and regional academies of dance and drama. Similarly, recitals by leading classical dancers are being filmed in order to preserve all the important styles of dancing. Books on Indian dance are also being collected to build up an up-to-date reference library. The Manipur College of Dance at Imphal is to be developed as the main centre of training in Manipuri style of dancing.

A National Drama Festival was sponsored by the Akademi in 1954, when plays in all the major Indian languages, as well as in Sanskrit, English and Manipuri were staged. The Asian Theatre Institute, sponsored by Government with financial assistance from UNESCO, is now run by it. A

seminar on Drama was organised in 1956.

A research and reference library, publications and organisation of cultural delegations are among other activities of the Akademi. The Akademi makes annual awards for music, dance, drama and film.*

Radio Drama

The National Programme of Plays, broadcast simultaneously from different stations of All India Radio in the languages of the regions, makes available to listeners all over India some of the best known plays in Indian dramatic literature of the past 75 years.

MUSIC

Music Festival

The first National Music Festival was held in Delhi in 1954 and the second in Patna in 1956 under the auspices of the Sangeet Natak Akademi. These festivals will soon be organised in different parts of the country.

Library of Music

Select renderings by the leading classical musicians are to be recorded and old gramaphone records collected by the Akademi to build up a library

For a list of the 1958-59 awards see Appendices.

of Indian music. Classified catalogues of manuscripts on Indian music are to be published. A library of books on Indian music is being built up to facilitate research. Folk music is being filmed and recorded by the regional academies.

Seminar on Indian Music

At a seminar on Indian music held in 1957, leading exponents of the Karnatak and Hindustani systems discussed such topics as music education and its future growth and problems of popular music, relationship and affinity between folk and classical music, problems of orchestration in Indian music and group singing etc. A committee appointed in 1955 has finalised a national system of standardised musical notation.

Radio Sangeet Sammelan

This regular annual musical event of All India Radio aims at stimulating appreciation of the principal forms of classical music and presenting a variety of ragas and raginis by exponents of Hindustani and Karnatak music. An annual music competition confined to young artists (which preceeds the Sammelan) aims at discovering new talent. Symposia to discuss development of music and possibilities of giving it a new direction are also a feature of the Sammelan.

National Programme of Music

Started in 1952, this AIR Programme featuring top-ranking artists aims at fostering a better mutual appreciation between the two systems of music—Hindustani and Karnatak. Folk music and operas are also broadcast periodically.

Light Music

Based on classical and folk melodies and making use of old and new lyrics, light music is prepared and presented by a number of AIR stations.

Folk Music

Fully equipped units for 'on-the-spot' recording of folk music and for their editing and presentation are being set up at a number of AIR stations. Selected folk music now forms an important part of both national and local programmes.

Vadya Vrinda

The AIR Vadya Vrinda (National Orchestra), set up in 1952, has built up a sizeable repertoire of compositions based on traditional ragas and folk tunes. It has attempted thematic compositions such as Meghadootam, Kalingavijayam, Jyotirmaya and Shakuntalam.

LITERATURE

Sahitya Akademi

The Sahitya Akademi, inaugurated in 1954, "is a national organisation to work actively for the development of Indian letters and to set high literary standards, to foster and co-ordinate literary activities in all the Indian languages and to promote through them all the cultural unity of the country."

The publication of a National Bibliography of Indian Literature covering all books of literary merit published in the twentieth century in the 14 major languages specified in the Constitution, as well as books in English published in India or written by Indian authors, is one of the important activities of the Akademi.

Under the auspices of the Akademi, Kalidasa's Meghadoota (edited by S.K. Dey) has already been published. H.D. Velankar's critical edition of

Vikramorvasiya is in press.

A history of Malayalam literature by P.K. Parameswaran Nair has been published; this is under translation in some other Indian languages. A history of Bengali literature by Sukumar Sen is in press; histories of Assamese and Oriya literatures by Birinchi Kumar Barua and Mayadhar Mansinha

are also ready for press.

The first volume of an Anthology of Sanskrit Literature covering the Epics and the Puranas, edited by S.K. Dey and R.C. Hazra, is in press while the volume covering Buddhist literature in Sanskrit, edited by Nalinaksha Dutta, is ready for publication. Anthologies of Punjabi poetry, Vaisnava lyrics of Bengal, one act plays in Gujarati, selection of Bharati's poems in Tamil and of Rajwade's prose in Marathi have been published.

Bharatiya Kavita, 1953, an anthology of poems selected from each of the fourteen languages along with their Hindi translations, has been published. The second and third volumes covering the years 1954-55 and 1956-57 are

in progress.

(53

A large number of Indian and several foreign classics have been translated and published in several Indian languages. The first of eight volumes of Rabindranath Tagore's works (original in Bengali in Devanagari script) covering 101 poems, entitled *Ekottarsati* has been published. These volumes are to be translated in major Indian languages.

Other publications already brought out include a Russian-Hindi Dictionary and a symposium on Contemporary Indian Literature. A 'Who's Who'

of Indian writers is also under preparation.

The Akademi also makes annual awards to outstanding books published in Indian languages.*

Gandhian Literature

Early in 1956, a scheme was launched by the Ministry of Information and Broadcasting to publish a complete collection of Mahatma Gandhi's writings, speeches, and letters in chronological order in a series of volumes. The first two volumes covering the period 1884 to 1897 have been released. Material relating to the period ending with 1914 has been collected, and that relating to subsequent periods is in the process of survey and collection.

Literary Broadcasts

A National Symposium of Poets, first organised in 1956, by AIR is now a regular annual feature in which leading poets of the country

participate.

An all-India gathering of writers representing different branches of creative writing was convened in 1956. At that Sahitya Samaroh, trends in contemporary Indian poetry were reviewed and vital problems concerning Indian literature were discussed. The second Sahitya Samaroh which met in 1957 devoted itself to contemporary Indian fiction and short stories as also to a discussion on the use of language for mass communication. The third Sahitya Samaroh held in 1958 discussed problems connected with contemporary dramatic literature.

National Book Trust

The National Book Trust was set up in 1957 with C.D. Deshmukh as Chairman to encourage the production of good literature and to make such works available at moderate prices to libraries, educational institutions and the public.

The Trust will also publish standard works on education, science,

^{*} For a list of the 1958 awards see Appendices.

culture and the humanities. Classical Indian literature, the translation of foreign classics and the translation of Indian classics from one regional language to another will receive special attention. Universities and other learned bodies can seek the assistance of the Trust for the publication of approved books. The Publications Division of the Ministry of Information and Broadcasting will be the principal publisher of the Trust.

Development of Modern Indian Languages

A scheme costing Rs. 20 lakhs has been drawn up by the Government of India for the development of modern Indian languages during the years 1958-61. It is intended to prepare and publish encyclopaedias, books of knowledge as well as bilingual dictionaries of Indian languages under this scheme. Publication of old MSS or rare books, of catalogues and bibliographies, preparation and publication of popular books on science and culture and books bringing out similarities amongst the different languages in points of grammar, syntax etc. are also likely to be covered.

CULTURAL RELATIONS WITH OTHER COUNTRIES

External Relations Division

An External Relations Division has been established in the Ministry of Scientific Research and Cultural Affairs to promote better understanding and goodwill by means of exchange of delegations of artists, students, scholars, publications, exhibitions and art objects with other countries, as also through presentation of books, selection of Indian teachers for service abroad, participation in international congresses and conferences, cultural agreements, construction and maintenance of international students' houses and hostels, creation of chairs of Indology abroad and assistance for the publication of foreign translations of Indian classics.

Delegations

Among the Indian delegations sponsored during 1958-59 were a womens' delegation and an Indologists' delegation to USSR, a one-man delegation to the Congress for the History of Religions in Tokyo, a party of musicians and dancers to Nepal and a thirty-six-man delegation of hockey and football players and musicians to Afghanistan.

The foreign groups which visited India were: a fifteen-member student delegation and two batches of journalists, Government servants and others from Nepal, an eminent music critic from Canada, two Japanese students of Hindi and Sanskrit, and the Director of the Commonwealth Institute, London.

Cultural Agreements

A Cultural Agreement between India and the United Arab Republic was signed at Cairo in 1958.

Grants

Financial assistance in the form of ad hoc grants was given to more than twenty societies and institutions abroad engaged in fostering closer cultural relations with foreign countries.

Indian Council for Cultural Relations

The Indian Council for Cultural Relations was established in November 1949 with the object of establishing, revising and strengthening cultural relations between India and other countries. Although financed entirely by the Government of India, the Council functions as an autonomous body.

Amongst the many activities of the ICCR, the following are worth mentioning: (1) Exchange of eminent scholars, savants and students; (2)

Maintenance of chairs of Indology in foreign universities; (3) Appointment abroad of lecturers in Indian culture; (4) Presentation of books and films about India; (5) Welfare of foreign students in India; (6) Reception and entertainment of distinguished foreigners in India; and (7) Organisation of summer camps, seminars and social gatherings for the benefit of foreign students in India.

The Council publishes two quarterly journals, namely, Indo-Asian Culture in English and Thaqafat-Ul-Hind in Arabic. Besides, it subsidises a journal in Persian and English entitled Indo-Iranica. The Council also sponsors the publication of rare manuscripts and valuable books on India. It undertakes publication of books and brochures relating to different aspects of India's culture, and of translation of Indian publications in foreign languages.

CHAPTER X

SCIENTIFIC RESEARCH

The policy of the Government of India with regard to science and scientific research was announced on March 13, 1958 in a resolution placed before both Houses of Parliament.

The aims of this policy are:

(i) To foster, promote, and sustain, by all appropriate means, the cultivation of science, and scientific research in all its aspects—pure, applied, and educational;

(ii) To ensure an adequate supply, within the country, of research scientists of the highest quality, and to recognise their work as an important component of the strength of the nation;

(iii) To encourage and initiate, with all possible speed, programmes for the training of scientific and technical personnel, on a scale adequate to fulfil the country's needs in science and education, agriculture and industry, and defence;

(iv) To ensure that the creative talent of men and women is encouraged and finds full scope in scientific activity;

(v) To encourage individual initiative for the acquisition and dissemination of knowledge, and for the discovery of new knowledge, in an atmosphere of academic freedom;

(vi) And, in general, to secure for the people of the country all the benefits that can accrue from the acquisition and application of scientific knowledge.

COUNCIL OF SCIENTIFIC AND INDUSTRIAL RESEARCH

Scientific research under State auspices in India is carried out mainly through the Council of Scientific and Industrial Research and the various national laboratories or research institutes set up under its control. The Council also awards grants-in-aid to scientists in research institutions and university laboratories in the country, grants fellowships to qualified persons who wish to pursue science as a career, and disseminates scientific knowledge and information. It has also the responsibility of administering the "Pool for temporary placement of well qualified Indian scientists and technologists returning from abroad." It maintains a National Register of Scientific and Technical Personnel in the country. In general, the Council is the chief vehicle of Government's policy for the promotion and coordination of scientific and industrial research in India.

Finance

The activities of the Council are financed mainly by the Union Government. Besides other sources of income such as income from royalties and premia on processes leased out, sale of publications, fees and charges levied for consultation, testing, etc., the Council receives gifts of land, buildings and finances from State Governments and others and donations from industrialists. The recurring expenditure of the Council stood at Rs. 3.31 crores during the year 1958-59 and the estimated capital expenditure for the same year stood at Rs. 1.78 crores.

National Laboratories

Since the advent of Independence, a number of national laboratories

and institutes have been set up by the Council at various centres in the country. A list of these is given in Table 41.

Sponsored Research

Through a liberal system of grants-in-aid, scientists in other research laboratories and universities are enabled to pursue fundamental and applied research and develop their own special fields. There are, at present, more than 310 such schemes in progress in over 38 research centres in the country. Apart from the practical results achieved, the schemes provide opportunities of training for young research workers and the development of active centres of independent research work.

Pilot Plant

Lately, there has been greater emphasis in the national laboratories on pilot plant investigations, leading up to actual production. Sixteen such pilot plants were set up during the first nine months of 1958.

Liaison

Close liaison between the national laboratories and industries is being established on an increasing scale through chambers of commerce, industrial associations and industrialists. Case studies of industries have been initiated. A beginning has been made with the chemical industry.

Vigyan Mandirs

Twenty-one rural scientific centres known as 'Vigyan Mandirs' have been set up at sites generally covered by Community Development projects. Equipped with a laboratory and manned by suitably qualified and trained personnel, these centres disseminate scientific knowledge among the rural populace and educate them on the potentialities of the methods of science as applied to their day-to-day life.

NUCLEAR RESEARCH AND ATOMIC ENERGY

The Atomic Energy Commission is responsible for formulating and implementing policies in all matters concerning atomic energy. The scientific and technical work of the Commission is carried out by the Atomic Minerals Division and the Atomic Energy Establishment. The industrial aspects of its work are conducted by the Indian Rare Earths (Private) Ltd. and the Travancore Minerals (Private) Ltd.

Some of the important functions of the Atomic Minerals Division include: (i) geological survey and development of atomic minerals, including terrestrial, aerial and marine surveys, prospecting and planning for development; (ii) geophysical survey, including radiometric survey, radiometric logging of bore holes, radiometric assay and mine face survey; (iii) geochemical survey; (iv) mineral technology; (v) drilling; (vi) mining and (vii) conservation of atomic minerals.

The Atomic Energy Establishment, Trombay, is India's centre for research and development work in the field of atomic energy. Over 950 scientists and technical personnel are working in this Establishment and, to ensure a steady supply of trained personnel, a Training School has been set

The Trombay Establishment consists of three main groups covering physics, chemistry and engineering, in addition to the biology and medical and health divisions. Besides the laboratories of the various divisions in each group, the facilities of the Establishment include "Apsara", India's first reactor which was entirely designed and constructed, with the exception of fuel elements obtained from the U.K. Atomic Energy Authority, by personnel of the Establishment; a radiochemistry laboratory which is training

NATIONAL LABORATORIES / INSTITUTES

. 366.	Name of Laboratory	Location	Fenctions	
-2	National Chemical Laboratory	Poons	Fundamental and applied research covering the whole field of chemistry for which other specialised institutes have not been set up. The National Collection of Type Cultures is housed in the Laboratory.	
ci	National Physical Laboratory	New Delhi	Recearch in problems relating to physics, both fundamental and applied. Maintenance of Standards. Testing facilities are also available.	
eń	Central Fuel Research Institute	Jealgora (Bihar)	Fundamental and applied research on fuels—solid, liquid and gaseous. Physical and chemical surveys of Indian coals are conducted through six coal survey stations under the Institute.	
.	Central Glass and Ceramic Research Institute	Jadavpur	Research on different aspects of glass and ceramics, pottery, porcelain, refractories and enamels, development of processes for the manufacture of glass and ceramic articles; standardisation of raw materials used in the ceramic industry.	132
ะดำ	Central Food Technological Research Institute	Муюте	Food processing and conservation of foods, food engineering and all aspects of fruit technology.

<u>6</u>	Regional Research Laboratory	Jammu-Tawi (Jammu & Kashmir)	Research in problems specially relating to the industries and raw materials of the area and research specially directed to medicinal plants of the Himalayas (Kashmir Region).
20.	Central Mechanical Engineering Research Institute	Durgapur (W. Bengal)	Research in mechanical engineering in all its aspects.
	Central Public Health Engineering Research Nagpur Institute	Nagpur	Research in all aspects of public health engineering and coordination of work of all interested agencies in this field in the country.

chemists in the handling of highly radioactive substances, especially the separation of plutonium from irradiated uranium and radioactive fission products; a development and production unit which provides many of the electronic instruments needed in atomic energy work; a film badge and health survey service, available to all institutions in India handling radioactive materials, which ensures that personnel handling such materials do not receive more than the permissible dose; and a plant producing nuclear-grade uranium which will be converted into fuel elements at a special plant now under construction. Also under construction are "Zerlina," a zero energy reactor for lattice investigations, which will prove useful in the study and design of new reactors, and the Canada-India-Reactor, a joint Indo-Canadian project under the Colombo Plan, which will provide advanced experimental facilities in addition to being one of the largest isotope producers. "Zerlina" is scheduled to be in operation during

1959 and the Canada-India-Reactor in early 1960.

The Commission's industrial activities include Travancore Minerals (Private) Ltd. set up in October 1956 jointly with the Governments of Kerala and Madras. Its main products are ilmenite and monazite; the former has proved to be a valuable foreign exchange earner and the latter is sent to the Indian Rare Earths (Private) Ltd. plant at Alwaye, which is owned jointly by the Commission and the Government of Kerala. At Alwaye the monazite is processed, producing rare earth chlorides and carbonates as main products and trisodium phosphate as a by-product. The residue, which is left after the rare earths have been removed, is sent to the Commission's thorium plant at Trombay operated on its behalf by Indian Rare Earths (Private) Ltd., where the thorium nitrate is extracted; the residual uranium fluoride is sent for processing to the uranium metal plant. The Commission has also a pilot plant in operation at Ghatsila, Bihar, for the extraction of uranium from copper tailings. Heavy water will be produced in quantity as a by-product at the fertilizer plant which is being built at Nangal.

The Commission's activities are directed to the development of a nuclear power programme to suit India's requirements. This will involve the design and development of reactors meeting these special requirements. In the meantime, however, it will be necessary to purchase atomic power stations and provision for a minimum of 2,50,000 k.w. of nuclear power has been included in the power programme for the Third Five-Year

Plan.

To further the development of nuclear science the Commission provides grants-in-aid to various universities, laboratories and research institutions. Considerable research work is being conducted at some 15 universities and research institutions. In this connection, mention may be made of the Tata Institute of Fundamental Research, which has done pioneering work in this field in India. The Institute was established in 1945, before the Commission was established, for the promotion of fundamental research in physics, mathematics and allied sciences and has since been recognised by the Government of India as the national centre for advanced study and fundamental research in nuclear physics and mathematics. The Institute is the most important centre for cosmic ray and elementary particle physics and has made outstanding contributions in this field. Other main centres of nuclear and cosmic ray research include the Physical Research Laboratory, Ahmedabad; the Bose Institute, Calcutta; the Indian Institute of Science, Bangalore; and the Saha Institute of Nuclear Physics, Calcutta, which was founded by the late Dr. M.N. Saha, F.R.S. In making its grants-in-aid, the Commission is assisted by a Board of Research in Nuclear Science and Advision Commission of Proceedings of the Commission of Procedure Commission is assisted by a Board of Research in Nuclear Science and Advisor Commission of Procedure Commission of Procedu Nuclear Science and Advisory Committees for Physics, Chemistry, Cosmic Rays, Biology and Medicine, and Food and Agriculture.

OTHER DEPARTMENTAL RESEARCH ACTIVITIES

There are eleven Hydraulic Research Stations under the Central Board of Irrigation and Power. The Central Water, Power and Irrigation Research Centre, Khadakvasla (near Poona), is the pioneer hydraulic research station in India.

A Research and Development Directorate has been set up under the Ministry of Communications (Directorate-General of Civil Aviation). It is concerned with type certification, manufacture of aircraft and development of specifications for aircraft materials.

The Forest Research Institute, Dehra Dun, conducts research in

the utilisation of timber for constructional purposes.

The All India Radio maintains a research unit in New Delhi to investigate problems relating to the propagation and reception of radio waves

and the design and performance of radio receivers.

The Railway Board has established a research centre at Lucknow with sub-stations at Lonavla and Chittaranjan to investigate problems referred to them by the railway workshops and the Central Standards Office (Railways).

The problems of road development and road materials, highways and bridge engineering, ports and harbours, etc., are dealt with by the Roads

Organisation functioning under the Ministry of Transport.

The Indian Standards Institution, functioning under the Ministry of Industries, lays down standard specifications for materials and products.

OTHER INSTITUTIONS

A number of research organisations financed by private endowments and Governmental assistance are engaged in the field of scientific research. The more important of these are dealt with in the following paragraphs.

The Bose Institute, Calcutta, is engaged on research in physics, chemistry, plant physiology, plant breeding, cytogenetics, micro-biology

and zoology.

The Birbal Sahni Institute for Palaeobotany, Lucknow, carries on

research in the fossil flora of India and related problems.

The Indian Association for the Cultivation of Science, Calcutta, one of the oldest research organisations in the country, conducts post-graduate research in fundamental and applied aspects of physics and chemistry.

The Indian Institute of Science, Bangalore, founded in 1909, provides for advanced instruction and conducts original investigations in all branches

of scientific knowledge.

The Physics Research Laboratory, Ahmedabad, is a centre for research in atmospheric physics, cosmic rays, electronics and theoretical physics.

Co-operative research associations for the investigation of problems pertaining specifically to industry have been brought into existence. Associations of this type have already been formed by the Ahmedabad textile industry, the silk and art silk mills of Bombay and the jute mills of Calcutta. An association for the rubber industry is likely to be set up soon.

The Shri Ram Institute for Industrial Research in Delhi renders

research service to industrial concerns.

Several colleges, universities and research institutions provide courses of study and research facilities in the various branches of science.

MEDICAL RESEARCH

The Indian Council of Medical Research, founded in 1912, has contributed greatly to the fostering and co-ordination of medical research in India.

Apart from medical colleges and attached hospitals each specialising in some branch of research, the country has a number of specialised institutions. The All-India Institute of Hygiene and Public Health, Calcutta, provides training in the use of preventive and social medicine for diseases peculiar to India and ascertains how the results of pure and applied research can be utilised for promoting medical protection and positive health. The School of Tropical Medicine, Calcutta, carries out research in diseases peculiar to tropical areas.

The King Institute of Preventive Medicine, Guindy, Madras, conducts research in and prepares bacterial vaccines, sterile solutions and therapeu-

tic sera

Research in tuberculosis and other chest diseases is in progress at the Vallabhbhai Patel Chest Institute, Delhi. Studies of the morphology of the tubercle bacilli and the effect on them of the different drugs constitute a special feature of its investigations.

The Lady Willingdon Leprosy Sanatorium at Chingleput and the Silver Jubilee Children's Clinic at Saidapet have been taken over from the Madras Government and converted into the Central Leprosy Research Institute.

The Haffkine Institute, Bombay, undertakes large scale manufacture of vaccines, sera and other biological products and carries out investigations involved in their manufacture. It has been functioning as the chief centre for investigations connected with the prevention and treatment of plague. The scope of the Institute's work has been enlarged to cover, among others, the problems of nutrition, malaria and virus diseases.

Investigations on cancer are carried out at the Indian Cancer Research Centre, Bombay. Statistical surveys of the incidence of cancer in

India have also been undertaken by it.

Investigations in the Central Research Institute, Kasauli, relate to problems of microbiology, serology and biochemistry. The Institute maintains a pathological museum.

The Pasteur Institute located at Coonoor is engaged on research in rabies, influenza, anti-venom serum, tropical eosinophilia and serological

reactions.

The activities of the Central Drugs Laboratory, Calcutta, centre round biological and chemical assays of drugs. The Laboratory maintains a herbarium and tenders technical advice to concerns manufacturing drugs.

AGRICULTURAL RESEARCH

The Indian Council of Agricultural Research, established in 1929, sponsors research in both agriculture and animal husbandry in institutions belonging to the Central and State Governments, the universities and other institutions.

The Indian Agricultural Research Institute, New Delhi, is the oldest institution devoted to research in all aspects of agriculture. It has well-equipped laboratories and extensive farms for carrying out large-scale

cultural investigations on food crops.

The Indian Veterinary Research Institute, Izatnagar, deals with veterinary diseases and their cure, while the National Dairy Research Institute is being developed at Karnal. The Central Rice Institute and the Central Potato Research Institute devote themselves to problems of research relating to lice and potatoes, respectively.

There are seven commodity committees which devote themselves to research in specific commodities such as cotton, jute, coconut, tobacco, oilseeds, arecanut and lac. These committees have their own laboratories

and research institutions.

Although it does not undertake research, the activities of the Directo-

rate of Plant Protection and Plant Quarantine under the Ministry of Agri-

culture, help research in many ways.

The Central Marine Fisheries Research Station, Mandapam, carries out biological investigations in edible fish found in the coastal waters of the country. These include the mackerel, the sardine and marine prawns. Research stations have been set up in Bombay, the Gulf of Kutch, Visakha-

patnam and the Andamans.

The Central Inland Fisheries Research Station, Calcutta, deals with inland fish—estuarine, riverine and lacustrine and pond fish. The work of the Institute has so far been confined to fish and fisheries of the Ganga and the Mahanadi basins, but the scope is to be enlarged to include the edible fish of ponds, lakes and reservoirs. Problems of water pollution and their effect on fish are also to be investigated.

CHAPTER XI

HEALTH

The expectation of life in India was estimated during the period 1941-50 at 32.45 years for males and 31.66 years for females. The following figures based on data available in registers of births and deaths, reflect the general health of the people since 1947:

TABLE 42
VITAL HEALTH STATISTICS

		1947	1956*	1957*
General death rate per thousand of population .		19.7	11.4	12.1
Infant mortality rate		146	108	ph-1-11

(a) Description and discription	- 1	0.8	0.9	0.5
(m) Disminstant discount		1.5	0.9	1.1
	. }			

Health programmes are the responsibility of State Governments, but certain programmes relating to malaria control, filaria control, family planning, water supply and sanitation, control of communicable diseases and expansion of training facilities have been initiated and supported by the Centre under the Plans. The general aim of health programmes under the Second Plan is to expand existing health services, to bring them within the reach of all people and to promote a progressive improvement in the level of national health.

PREVENTION AND CONTROL OF DISEASES

Malaria

The National Malaria Control Programme, launched in 1953, was converted into the National Malaria Eradication Programme from April 1, 1958. The Programme is being implemented with the participation of the State Governments as well as with the assistance of the US Technical Cooperation Mission and the World Health Organisation.

The Malaria Institute of India, which coordinates the implementation of the programme and distributes supplies, is responsible for research and for the training of staff in methods of malaria control. Six regional co-ordinating organisations are being established and these will work under the Director of the Programme in the Institute.

About 16.35 crores of people were given protection and 190 malaria units out of an allotted 230 units were formed and functioning by March 31, 1958.

Filaria

The National Filaria Control Programme, launched in 1954-55, consists of (i) mass administration of drugs in filarious communities, and (ii) anti-

mosquito measures. Out of forty-six control units allotted to the States, thirty-nine are functioning. Random sample surveys covering a population of about 208 lakhs were completed by the end of October 1958. They have revealed that population requiring protection is likely to exceed the originally estimated figure of 250 lakh persons. Mass therapy has been administered to about 20.04 lakh persons and houses inhabited by about 70 lakh persons have been sprayed with Dieldrin. A centre for practical demonstration and field training has been established at Ernakulam. Seventy medical officers and 109 inspectors have so far received training.

Tuberculosis

It has been estimated that nearly 25 lakhs of people suffer from tuberculosis and about 5 lakhs die of it annually. About 90 to 100 crore man-

days are lost every year owing to the incidence of this disease.

The BCG vaccination programme, started in 1948 with the help of the International Tuberculosis Campaign and later of the WHO and the UNICEF, is meant to extend protection to a susceptible population of 17 crores, especially those below 20 years of age. One hundred and sixty-two technical teams, each consisting of a doctor and six technicians, are engaged in field work. By the end of October 1958, 11.62 crore persons were tested and about 4.07 crores of them vaccinated.

Six demonstration and training centres have been established at Hyderabad, Madras, Nagpur, New Delhi, Patna and Trivandrum. Training is also imparted at other institutions such as the Vallabhbhai Patel Chest Institute at Delhi. A National Training Centre is to be established with the assistance of UNICEF and WHO.

The number of TB hospitals, sanatoria and clinics and of beds therein during the period 1950 to 1957 is as shown below:

TABLE 43

TB HOSPITALS, SANATORIA AND CLINICS

	1950	1957
Sanatoria TB hospitals	49 35	71 76
Clinics		235
TB wards	. 114	209
Beds	10,371	18,147

The number of health personnel working in TB institutions in 1956 was 1,301 doctors; 862 nurses; 155 health visitors; 15 social workers; 142 X-Ray technicians; 98 laboratory technicians; and 2,966 general personnel.

There are 15 after-care colonies in India where ex-patients are rehabilitated after they are cured. Nine such colonies will be set up during the

Second Plan period.

A countrywide survey in selected areas on a sampling basis, started in September 1955 under the auspices of the Indian Council of Medical Research, was completed in May 1958. The tentative findings based on the analysis of data collected till June 30, 1956 are that (i) there is no marked difference in regard to the prevalence of the disease in relation to the size of the population; (ii) the morbidity rate varies from 7 to 30 per thousand persons and is lower for females than for males; (iii) prevalence is higher in the age group 35 years and above than in the lower age groups; and (iv) the rate of bacteriologically positive cases varies from 1 to 11 per thousand persons.

The Tuberculosis Association of India is the largest voluntary organisation in the country. Since its establishment in 1939, it has been engaged in stimulating anti-tuberculosis activities in a scientific and co-ordinated manner. It assists the authorities to combat the disease and provides, assistance through the Tuberculosis Workers' Conferences, the Secretaries' Conferences, the technical committees and forums which bring together State officials and voluntary workers. It also runs several institutions which provide training facilities for TB personnel and demonstrate advanced methods for the treatment of TB cases.

Leprosy

The number of leprosy cases in India was estimated in 1953 at about 15 lakhs. Andhra Pradesh, Assam, Bihar, Madhya Pradesh, Madras, Kerala and certain parts of Uttar Pradesh and Bombay are areas of high

incidence.

Under the Leprosy Control Scheme, started during the First Plan period, four treatment and study centres (one each in Madras, Madhya Pradesh, West Bengal and Uttar Pradesh) and 63 subsidiary centres (in ten States and 2 Union Territories) have been established. The subsidiary centres provide for mass treatment of all cases, detection of cases in the early stages of infection and their treatment and health education of the public. In addition, the treatment and subsidiary centres carry out a detailed survey to study its epidemiology and assess the results of sulphone therapy. An advisory committee to review the working of the scheme and suggest measures for improvement was set up in February 1958.

The Central Leprosy Teaching and Research Institute at Chingleput provides treatment to indoor and outdoor patients at its two hospitals—the Lady Willingdon Leprosy Sanatorium, Chingleput, and the Silver Jubilee

Children's Clinic at Saidapet.

The Mission to Lepers which was started as early as 1875 is a voluntary organisation engaged in anti-leprosy work. The Hind Kusht Nivaran Sangh and the Gandhi Memorial Trust are also doing work in this field.

Venereal Diseases

It has been estimated that five to seven per cent of the population suffer from syphilis in the States of Bombay, Madras and West Bengal. The hilly tracts extending from Kashmir to Assam also show a high incidence. Yaws is prevalent in a few districts of Andhra Pradesh, Orissa, Madhya Pradesh and Madras.

A scheme which provides for the establishment of 8 VD clinics at State headquarters and 75 at the district level and for the training of medical and auxiliary personnel has been included in the Second Plan. Three headquarters and 35 district clinics have been established in Andhra Pradesh, Assam, Bihar, Himachal Pradesh, Madras, Mysore and Uttar Pradesh, Yaws teams, operating in Andhra Pradesh, Madhya Pradesh and Orissa, fested 6,07,153 cases and treated 8,144 cases by the end of 1957.

Influenza

An influenza centre was opened in 1950 at the Pasteur Institute, Coonoor. A pilot plant for the production of influenza virus vaccine has been set up there.

Cancer

Problems relating to cancer are under investigation at the Indian Cancer Research Centre, Bombay, and the Chittaranjan National Cancer Research Centre, Calcutta. Clinical facilities are available at the Tata Memorial Hospital, Bombay. The establishment of new cancer wards or units in the existing hospitals in the country is under consideration.

NUTRITION AND PREVENTION OF FOOD ADULTERATION AND PREVENTION OF FOOD ADULTERATION

Surveys conducted in India since 1935 have revealed quantitative as well as qualitative deficiency in the diet of the Indian people. An average Indian diet, according to Dr. Aykroyd (formerly Director of the Nutrition Research Laboratories, Coonoor) contains only 1,750 calories as against an estimated requirement of 2,400 to 3,000 calories for an adult person. It also lacks essential food elements like proteins, fats, minerals and vitamins.

The general raising of dietary standards is largely an economic problem and is linked up with the development of Indian economy. In the meantime, however, several measures have been taken to meet nutritional deficiency of certain vulnerable sections of the Indian population, such as expectant and nursing mothers, school children, and industrial workers. The measures taken include school feeding programmes, distribution of skimmed milk, supply of food yeast as a supplement to the Indian diet and manufacture and popularisation of cheap but nutritious food.

Consumer trials to assess acceptability of food yeast as a supplement to Indian diets have been conducted in labour colonies in Delhi and certain rural and urban areas in the States of Madras, Uttar Pradesh and West. Bengal. The results indicate that food yeast at the rate of $\frac{1}{4}$ oz. per head per day is acceptable to some people and results in marked improvement in their health. The Central Food Technological Research Institute, Mysore, has succeeded in producing a cheap but nutritious multi-purpose food.

Nutrition Policy

4

The Nutrition Advisory Committee's recommendations for a nutrition policy during the Second Plan period fall into the following broad categories:

(i) Protection of vulnerable groups of the population;

(ii) Control of specific nutritional diseases;

(iii) Organisation of nutrition work as an integral part of the work of the State Health Departments; and

(iv) Nutrition education as part of general health education.

Nutrition Research

Regional dietary and nutrition surveys are undertaken by the States. Research is undertaken by the Indian Council of Medical Research which runs the National Research Laboratories at Coonoor* and promotes special schemes at universities and other institutions. The functions of the Laboratories established in 1929 are:

- (i) to carry out research in all aspects of human nutrition and allied sciences;
- (ii) to train workers in nutrition, both for public and clinical nutrition work and for a career of research in nutrition;
- (iii) to prepare suitable educative literature for the public; and
- (iv) to advise public organisations and State and Central Governments on matters pertaining to nutrition whenever called upon to do so.

The Laboratories have prepared a brochure containing menus for low-cost balanced diets and school lunch programmes suitable for South India. Nutrition sections exist in the Medical Directorate at the General Headquarters, Ministry of Defence and in the Ministry of Food. In November 1947, the Ministry of Health appointed an adviser on nutrition. Nutrition centres are also in existence in some of the States such as Andhra Pradesh, Bihar, Bombay, Kerala, Madhya Pradesh, Madras, Mysore, Uttar Pradesh and West Bengal.

^{*}The Laboratories will shift to Hyderabad in the near-future

Prevention of Food Adulteration

The Prevention of Food Adulteration Act, 1954, and the Rules made thereunder are in force throughout the country, except Jammu and Kashmir. It provides for deterrent punishment to offenders and prohibits the manufacture, import or sale of adulterated food articles. The Central Committee for Food Standards and the Central Food Laboratory, envisaged in the Act, have been set up to advise the Central and State Governments on matters arising out of the administration of the Act.

WATER SUPPLY AND SANITATION

At the beginning of the First Plan, 128 towns with a population of 50,000 and over, 60 towns with populations between 30,000 and 50,000 and 210 towns with smaller populations had protected water supply. It was estimated that only about 25 per cent of the urban population was served by protected water supply. About 450 lakhs people in towns lacked such supply and over 500 lakhs people were without sewage facilities.

National Water Supply and Sanitation Scheme

Two hundred and seventy-five water supply and drainage schemes for urban areas and two hundred and six for rural areas have been executed till the end of March 1958 under the Scheme launched by the Union Government on a national basis in 1954. Rs. 28 crores have been provided in the States' Second Five-Year Plans for rural schemes. For the urban areas, the Plan provides for an expenditure of Rs. 30 crores by the Centre and Rs. 23 crores by the States. A sum of 6.425 million dollars has been made available by the U.S. Government for the execution of the Scheme.

The Plan also envisages training of public health engineering personnel for implementing the programme. The Central Public Health Engineering Organisation has been set up for helping State Governments in the preparation and execution of their schemes and for giving technical advice and guidance. Some foreign experts, provided by the TCM, are associated with the Organisation.

MEDICAL RELIEF AND SERVICE

Medical relief and service is primarily the responsibility of the States. Certain charitable institutions also participate in giving medical relief. Table 44 shows the position in regard to the number of hospitals and dispensaries, the number of patients treated by them and the expenditure involved in their maintenance for the years 1947 to 1956.

TABLE 44
HOSPITALS AND DISPENSARIES: PATIENTS TREATED AND EXPENDITURE

Year	Number of hospitals and dispensaries	Number of patients treated	Expenditure (in rupees)
1947	3,825	4,30,19,772	4,63,84,083
1948	4,383	5,47,68,123	7,61,41,243
1949(a)	5,509	8,53,53,125	10,86,08,937
1950(a)	4,319	6,66,71,549	10,85,39,506
1951(a)	5,564	8,24,90,434	12,25,71,610
1952`´	9,497	11,01,98,788	21,80 07,223
1953(a)	9,600	11,68,69,535	21,59,07,595
1954	9,806	11,34,70,494	22,75,87,835
1955(a)	9,833	12,67,60,302	30,63,45,533
1956(a)	9,635	13,44,03,903	23,26,72,827

(a) Incomplete information

The following table shows the number of registered medical practitioners and other health personnel at the end of the year 1957:

TABLE 45
HEALTH PERSONNEL

Group	Number (b)
Registered medical practitioners Vaids, Hakims and other unregistered practitioners Compounders Nurses Midwives Vaccinators Dentists	76,716 87,768 32,731 26,740 31,412 4,071 3,676

Contributory Health Service Scheme

The Contributory Health Service Scheme, which came into operation on July 1, 1954, is confined to Delhi and New Delhi and serves over 4 lakh Central Government employees and their families. The staffs of certain autonomous and semi-Government organisations and their families have also been admitted into the scheme. The contributions are based on a gradual scale varying from 50 np. to Rs. 12 according to emoluments. There are now 181 full-time medical officers including 30 specialists. The number of dispensaries is 29, including 3 mobile dispensaries to serve beneficiaries residing in outlying areas. The total attendance during 1958 was 31,35,444 up to the end of October.

Health Insurance

The health insurance scheme which provides inter alia medical benefits to industrial workers under the Employees' State Insurance Act, 1948, now covers 13 lakh workers in the country. Under the scheme, an insured worker and his family are entitled to receive medical help at the State dispensaries, in their residences and in hospitals.

Colliery and mica workers receive medical help at institutions maintained by the Coal Mines Labour Welfare Fund and the Mica Mines Labour Welfare Fund. Private employers as well as the States provides medical relief to their employees.

Primary Health Centres for Rural Areas

Sixty-eight primary health centres were established in National Extension Blocks during the First Plan period under a scheme launched in 1954. Each centre serves the Block area with an average population of 66,000. From the centre a team of health workers goes round the surrounding areas and looks after the curative and preventive health needs of the area. About 2,000 such centres are being established under the Second Plan in addition to about 1,000 in the Community Development Blocks. 284 such centres were opened during 1957-58, 261 in 1958-59 and 262 are expected to be set up in 1959-60.

INDIGENOUS AND HOMOEOPATHIC SYSTEMS OF MEDICINE

It is the accepted policy of the Government to give all possible encouragement to the indigenous and homoeopathic systems of medicine and incorporate from them contributions of approved value in the modern system of medicine. Several measures have been taken by the Union and State Governments in this matter.

Dave Committee

A Committee under the chairmanship of D.T. Dave, recommended in 1956 a uniform five-year degree course in Ayurveda and Unani and a five-and-a-half-year degree course in homoeopathy. Other recommendations of the Committee related to the upgrading of existing educational institutions, the provision of facilities for post-graduate research, the preparation of text books and the creation of separate faculties for Ayurvedic and Unani systems of medicine.

Regarding regulation of practice, the Committee recommended the creation of separate Central Councils for Ayurvedic, Unani and Homoeopathic systems of medicine on the pattern of the Indian Medical Council. The Committee also recommended the creation of two separate Directorates for Ayurvedic, Unani and Homoeopathic systems of medicine at the Centre and as far as practicable in the States. The Central Council of Health, holding the view that under existing conditions it is not possible to lay down a uniform policy, recommended to the State Governments to take such steps as are practicable and desirable for the development of Ayurveda and other indigenous systems of medicine.

Central Institute of Research in Indigenous Systems of Medicine

The Central Institute of Research in Indigenous Systems of Medicine has been functioning since August 24, 1953 at Jamnagar. There is a 50-bed hospital and an outpatient department, besides a pharmacy, a museum and a pathological research laboratory in the Institute. Research programmes under investigation at the Institute, among others, are: (1) the study of Pandu Roga, Grahani, Jalodar, Amavata, Krimiroga, Tamakshwasa and Kalanja Padai and (ii) identification of crude Ayurvedic drugs, plants and herbs; cultivation of medicinal herbs, etc. A new 'Siddha' unit was started in the year 1956-57. A modern section investigates and studies diagnosis and treatment in Ayurvedic and Siddha systems from the point of view of modern medicine.

Ad hoc schemes of research in Ayurveda and Unani are also being promoted by grants to States, educational institutions and non-Governmental research organisations.

Uniform Standards in Education

There are more than 50 colleges* and schools for the teaching of the Ayurvedic and Unani systems of medicine in the country; but the methods of teaching, the courses of studies and the standards of examination differ from institution to institution. The Central Health Council recommended in 1954 a five-year degree course and the prescription of minimum standards in the matter of admissions and curricula. A post-graduate training centre in Ayurveda with a pharmacy, library, museum and a hospital was started at Jamnagar in July 1956.

Regulation of Practice

State Boards have been set up in almost all States for regulation of practice in indigenous systems.

Homoeopathy

In 1955, the Government of India approved a five-year degree course in homoeopathy. Under the Second Plan, it is proposed to upgrade five existing teaching institutions, prepare a homoeopathic pharmacopoeia and

^{*}For a list of Ayurvedic and Unani Colleges, see Appendices.

encourage schemes of research. In some States, Boards for the regulation of practice in homoeopathy have also been set up.

DRUG MANUFACTURE AND CONTROL

Drug Control

The Drugs Act and the Drugs Rules are operative in all the States except Jammu and Kashmir. The Union Government have powers to keep a check on the quality of imported drugs. The State Governments are responsible for controlling the quality of drugs which are manufactured, sold and distributed in the country. The provisions of the Act were made more stringent by the Drugs (Amendment) Act passed in March 1955.

The Drugs Technical Advisory Board to advise on technical matters arising out of the administration of the Act and the Drugs Consultative Committee to advise the Central and State Governments for securing uniformity throughout India in the administration of the Act, have been formed.

The first Indian Pharmacopoeia was published in 1955 and a Committee is engaged in bringing out an addendum to it. The report of the National Formula: Committee is under point

al Formulary Committee is under print.

The Central Drugs Laboratory, Calcutta, serving as a statutory institution under the Drugs Act, analyses and tests samples of drugs as are sent to it and performs such other functions as are entrusted to it by the Central and State Governments.

Drugs and Magic Remedies (Objectionable Advertisements) Act

This Act, which came into force on April 1, 1955, prohibits the publication of objectionable advertisements relating to sexual stimulants, alleged magic cures for venereal diseases and diseases peculiar to women. Import and export of objectionable advertisements are controlled in close liaison with the Customs and Postal authorities who can, under Section 6 of the Act, intercept articles suspected to contain objectionable advertisements. Liaison is also maintained with Indian Embassies, High Commissions, Legations and Consulates abroad. Advertisements of contraceptives are, however, permitted in view of the importance of family planning. Since the enforcement of the Act, 67 prosecutions were instituted for infringement.

Drug Manufacture

The BCG Vaccine Laboratory was established at Guindy in Madras, in 1948. It supplied 39,02,240 ccs. of Tuberculin and 17,42,051 ccs. of BCG vaccine to indentors in India till the end of November in 1958, and 19,04,300 ccs. of Tuberculin and 7,01,870 ccs. of BCG vaccine to Malaya, Singapore, Burma, Ceylon, Pakistan and Afghanistan.

The Central Research Institute at Kasauli (established in 1906) supplies India's entire needs of vaccine for TAB, cholera, rabies, anti-venom sera, tetanus toxoid, diphtheria anti-toxin and curative and influenza vaccines. Influenza vaccines are manufactured at the Influenza Centre, Coo-

noor.

The Hindustan Antibiotics Ltd., Pimpri, and the DDT factory at

Delhi have already gone into production.*

Measures have been taken for stabilising cinchona cultivation in India, such as effecting substantial reduction in the import of synthetic anti-malarial drugs, exploring markets for Indian quinine in foreign countries and evolving a uniform price for quinine. The Council of Scientific and Industrial Research and the Indian Council of Medical Research are investigating the possibilities of using quinine produced in India for purposes other than anti-malarial.

^{*}See Chapter XXIV for details of production.

The Haffkine Institute at Bombay manufactures sulpha drugs which rank among the best in the world market. The Imperial Chemical Industries (India) Ltd. and the Tatas manufacture BHC (benzene hexachloride).

Medical Depots and Factories

The Medical Stores Organisation, having four depots at Madras, Bombay, Calcutta and Karnal, is maintained primarily for ensuring supply of medical stores of proper quality and approved patterns to Government, semi-Government and certain non-Governmental institutions. 10,654 regular and a large number of casual indentors drew supplies from these depots during 1957-58 of the value of Rs. 1.62 crores.

At the factories of the Organisation, a large number of drugs and dressings are manufactured to meet the requirements of both civil and military medical stores depots. There is also a repair workshop at the Madras depot

for repairing surgical instruments and appliances.

EDUCATION AND TRAINING

Medical education in general is the responsibility of the States. The Government of India's interest is limited to the promotion of higher studies

and specific schemes of research and specialised training.

There are at present 50 medical colleges,* 9 dental colleges and other institutions for training in the allopathic system of medicine. Establishment of new medical colleges at Bhopal, Bikaner, Hubli, Jabalpur, Jamnagar, Kanpur, Kurnool, New Delhi, Pondicherry, Kozhikode and Ranchi was sanctioned during the Second Plan period. Expansion of 13 medical colleges so as to admit 100 additional students was also sanctioned. For providing post-graduate training to select doctors in different branches of medicine and surgery, twelve institutions have been upgraded with Central assistance. Financial aid has also been provided for the establishment of full-time teaching units in the clinical and non-clinical departments of medical colleges. Departments of Social and Preventive Medicine were started in eight medical colleges during the First Plan period; sanction for their establishment in six other colleges during the Second Plan period has been given.

All-India Institute of Medical Sciences

An All-India Institute of Medical Sciences, which aims at self-sufficiency in post-graduate medical education in India, was set up in 1956 under an Act of Parliament. An under-graduate medical college with 170 students and a post-graduate course in the Department of Orthopaedics have already started work. Besides the medical college, the Institute will have a dental college, a nursing college, a post-graduate teaching centre and a 250-bed hospital.

Specialised Training

Facilities for the training of nurses exist in practically all major hospitals in the country and in the nursing colleges at Vellore and New Delhi. Besides, many State and non-official organisations like the Andhra Mahila Sabha, Madras, have organised short-term courses with the help of grants from the Centre. Provision has been made under the Second Plan to assist the State Governments in the training of 30,000 dais. There are also schemes under the Second Plan to train 1,700 health visitors as against a target of 600 under the First Plan. The Malaria Institute of India is conducting a training course for health personnel working under the schemes to control malaria and filaria. A training scheme for maternity and child

^{*}See Appendices for a list of colleges.

welfare workers is in operation under the auspices of the All-India Institute of Hygiene and Public Health, Calcutta.

Training of Auxiliary Medical Workers

A scheme to train auxiliary medical workers (approved in 1954) envisages a two-year course in elementary curative and preventive medicine, minor surgery, sanitation and hygiene, laboratory techniques, health education and, in the case of women workers, also midwifery. Those trained under the scheme are expected to work as aides to doctors and serve the Government for at least five years.

FAMILY PLANNING

The objects of the family planning programme, as laid down by the Planning Commission, are: (i) to obtain an accurate knowledge of factors contributing to the rapid increase of population in India; (ii) to discover suitable techniques of family planning and devise methods by which knowledge of these techniques can be widely disseminated; and (iii) to make advice on family planning an integral part of service in Government hospitals and public health agencies. The family planning policy aims at reducing birth rates to stabilise the population at "a level consistent with requirements of national economy".

During the First Plan period 147 clinics—21 in rural and 126 in urban areas—were opened. During the same period 205 clinics were maintained by State Governments. About 2,500 clinics—2,000 in rural and 500 in urban areas—will be opened during the Second Plan period. Out of Rs. 497 lakhs (Rs. 400 lakhs in the Central sector and Rs. 97 lakhs in the States' sector) provided for family planning in the Second Plan, Rs. 373.25 lakhs are for family planning clinics, Rs. 15.75 lakhs for training, Rs. 50 lakhs for education, Rs. 50 lakhs for research and Rs. 8 lakhs for Central organisations.

As against the target of 150 urban and 600 rural clinics for 1956-59, 201 urban and 467 rural clinics have already been opened. Of these 580 were opened by State Governments, 20 by local bodies and 68 by voluntary organisations.

A high-power Family Planning Board has been constituted at the Centre to formulate family planning programmes. Family Planning Boards are also functioning in all the States except Jammu and Kashmir. The States of Andhra Pradesh, Bombay, Kerala, Madras, Mysore, Punjab, Rajasthan, Uttar Pradesh and West Bengal have appointed full-time Family Planning Officers. Training in the technique of family planning is imparted at the Family Planning and Research Centre at Bombay; the Family Planning, Training, Demonstration and Experimental Centre at Ramanagaram (Mysore); and the All-India Institute of Hygiene and Public Health at Calcutta. Grants to open regional training centres have been given to State Governments. Efforts are being made to educate public opinion with the help of pamphlets, posters, films, exhibitions, children's days, etc.

Research

A demographic, training and research centre has been established at Bombay. Investigations on contraceptives are being carried out at the Indian Cancer Research Centre, Bombay; the All-India Institute of Hygiene and Public Health, Calcutta; Lucknow University, Lucknow; Central Drug Research Institute, Lucknow; Bacteriological Institute, Calcutta; and the Institute of Post-graduate Medical Education and Research, Calcutta.

He's never colour blind about vitamins!

YES, vitamins do produce colours! And this expert can tell the exact strength of a vitamin by the colour reading on his photoelectric equipment.

Why all this precision? Because we know that you expect unvarying high quality when you buy Hindustan Lever products.

To ensure that these standards are maintained, we test at every stage. From the buying of raw materials, to the manufacturing process, to the performance of the finished product...experts.

technicians, scientists are checking and double-checking. This quality control also helps conserve precious national resources and vital production time.

In this way, we are providing you with quality products you can irust, at economical prices.

HINDUSTAN LEVER SERVES THE HOME

SHRI RAMTIRTH

Yogashram Silver Jubilee Year 1959

Lectures

On every Saturday in the evening and Sunday in the morning, Lectures by Shri Yogiraj Umeshchandraji and other-learned dignitaries are delivered on various subjects like Yoga, Vedanta, Devotion, Spiritual Strength etc. at Shri Ramtirth Yogashram.

UMESH YOGA DARSHAN (First Part)

In Four Languages: English, Hindi, Gujarati & Marathi.

(Author: Shri Yogiraj Umeshchandraji)

An excellent and highly readable book written by Shri Yogiraj Umeshchandraji is one of the best known treatise on the true meaning of Yoga. A best guide to methods of intestinal exercise and control, the book contains over 100 descriptive photographs of various Asanas explained according to the Age, Season, Country & Time. It is one of the excellent volume published so far depicting different aspects of Yoga, and containing different photographs of Asanas and Neti Dhoti Functions. It also contains Yoga Therapy, Diet Therapy, Chromo-

pathy, Psycho Therapy and many other Therapies. The book is best of its kind and useful for all men and women; healthy and unhealthy and hence should be preserved in all libraries and homes.

PRICE: Rs. 15/- Plus Postage Rs. 2 extra. No. V.P.P. sent.

YOGASANA CHART

A Chart printed on Art glazed paper and fully illustrated with attractive pictures is also available from here. You can perform the Asanas shown therein at your home, which will keep you fit and healthy. Price Rs. 2/50 including Postage to be sent by M.O. only.

YOGIC CLASSES

are also regularly conducted in the morning and evening at Shri Ramtirth Yogashram. Special classes for Ladies are also conducted. Lady teachers are available for Ladies.

RAMTIRTH BRAHMI OIL

Special No. I Registered.

An invaluable hair tonic for the prevention of dandruff and falling hair RAMTIRTH BRAHMI OIL is manufactured scientifically with many precious ingredients, which cool brain, improve system, and let sleep sound. Most ideal for body massage. It is useful to every one in all seasons. Prices: Rs. 4/- for big bottle and Rs. 2/- for small. Available everywhere.

SHRI RAMTIRTH YOGASHRAM,

Dadar, Central Rly., Bombay—14 Telephone: 62899

CHAPTER XII

SOCIAL WELFARE

PROHIBITION

The Constitution enjoins on the State to endeavour to bring about prohibition of the consumption of intoxicating drinks and drugs throughout the country. In December 1954, the Prohibition Enquiry Committee was appointed to suggest a programme and a machinery for the implementation of the directive in the light of the experience of the States in implementing their prohibition policies in the past. The Committee's main recommendation that schemes of prohibition be integrated with the country's developmental plans was affirmed by a resolution of the Lok Sabha on March 31, 1956. The resolution recommended the formulation of a programme to bring about nation-wide prohibition speedily and effectively.

At the end of 1957-58, the area under prohibition covered 32.3 per cent of the total area and 42.3 per cent of the country's population. The following table gives the State-wise breakdown of the area and population under prohibition:

TABLE 46

AREA AND POPULATION UNDER PROHIBITION

States/Territories	Total area (sq. miles)	Area under prohibi- tion (sq. miles)	Percentage of Col. 3 to Col. 2	Total Popu- lation (in lakhs)	Popula- tion of dry areas (in lakhs)	Percent- age of Col. 6 to 5

Programme

An interim programme has been formulated by the Planning Commission. While stressing the importance of evolving a common approach, the Commission have left it to each State to fix a target date and to formulate its policy in accordance with local conditions and circumstances. The Commission have, however, recommended the adoption of certain measures like discontinuance of advertisements and other inducements, stoppage of drinking in public premises, setting up of technical committees to draw up phased programmes, promotion of the production of

cheap and health giving soft drinks and introduction of prohibition as a major item of constructive work in community development blocks.

Progress

All the States of the Indian Union, except Bihar, Jammu and Kashmir and West Bengal, have taken steps to enforce a phased programme of prohibition, and Prohibition Boards have been constituted in most of the States.

In Andhra Pradesh the enforcement of prohibition has been entrusted to the police, and prohibition has been included in the work schedules of community development officers. In the Telangana area toddy and liquor shops are to be shifted from populous areas and all opium addicts are to be licensed. The entire district of Kamrup in Assam is now a dry area. In other districts measures such as reduction in the sale of liquor, provision of soft drinks in the heavy consuming areas, removal of country shops outside the tea garden areas and restriction in the grant of licences to clubs have been adopted. In Bombay the existing wet areas—Aurangabad (except East Khandesh district) and Nagpur Divisions—went dry from April 1, 1959. In Kerala, nine taluks of the former Travancore-Cochin State area and the entire Malabar district have been declared dry.

Total prohibition has been declared throughout Madras, where a considerable fall in the number of prohibition cases has taken place as a result of the amendment to the Prohibition Act for enhancing penalties and summary trial for prohibition crimes. In Orissa, the districts of Cuttack, Balasore, Puri, Ganjam and Koraput are under prohibition. In other areas the number of liquor and drug shops is being progressively reduced and dry days have been increased. The passage of a Prohibition Bill has strengthened the law regarding prohibition. In the Punjab, total prohibition has been declared in the Rohtak district and steps taken to discourage drinking in other districts. In Rajasthan the Legislature is going to take up the Rajasthan Prohibition Bill for enactment. There is total prohibition in eleven districts and three pilgrim centres of Uttar Pradesh.

A policy of gradual prohibition is in operation in the Union Territories. All toddy shops in the Andaman and Nicobar Islands have been closed, import of foreign liquor banned and liquor shops closed for five days in a week. In Delhi restriction has been imposed on advertisements and the sale of liquor to persons below twenty-five has been banned. Number of dry days has been increased and serving of liquor in clubs has been restricted. There is total prohibition in certain areas of Himachal Pradesh while a policy of gradual prohibition is being followed in other areas of the Pradesh.

as well as in Tripura.

The campaign in favour of prohibition through posters, films, journals, etc. and the observance of prohibition weeks has been intensified.

Total prohibition of the non-medical oral consumption of opium, except for medical reasons and in respect of habitual addicts and registered patients, came into force on April 1, 1959. There has been complete prohibition of charas in India since 1946. The sale of ganja has been prohibited throughout Uttar Pradesh from April 1, 1956. The Government ganja store-house in Madras was closed in 1949-50. All licenced selling of ganja and bhang has been discontinued in the Kutch, and Saurashtra areas of Bombay State, which has imposed a permit system for ganja and bhang in other parts of the State. The cultivation of ganja and its sale and import have been prohibited in Mysore. Ganja is totally prohibited in Punjab and Delhi. In other States, the issue price as well as the retail price of ganja and bhang have been enhanced to discourage their consumption.

WELFARE MEASURES FOR CERTAIN MALADJUSTED GROUPS

Immoral Traffic in Women and Girls

The Indian Penal Code provides for imprisonment up to 10 years and fines (Sec. 366 A, 372 and 373) for the procurement, buying and selling of girls under 18 years for prostitution. Similar penalties have also been prescribed for importing into India girls below 21 years for this purpose. In addition, special measures against immoral traffic are in force in the States.

All the provisions of the Suppression of Immoral Traffic in Women and Girls Act, 1956, came into force throughout India on May 1, 1958. The Act prescribes punishment for brothel-keeping, for living on the earnings of prostitutes, for procuring, inducing, or taking a woman or girl for the purpose of prostitution, for detaining a woman or girl in premises where prostitution is carried on, for prostitution in or in the vicinity of public places and for seducing or soliciting for purpose of prostitution. The setting up of an adequate number of Protective Homes for the rehabilitation and the educational and vocational training of women and girls recovered and detained under the Act is also envisaged.

Rescue homes and reception centres established under the Aftercare Programme can also be utilised as protective homes. In addition, there are several other institutions in the States, which aim at making good citizens out of fallen women. These are: Stri Sadans maintained by the Government of Madras, the Shradhanand Anath Mahilashram of Bombay, Good Shepherd Home in Madras, Crispin's Home in Poona, Kushalbagh Mission Orphanage at Gorakhpur, Fendall Home and All-Bengal Women's Union Home in West Bengal, etc.

Juvenile Delinquents

Children Acts are in force in the States of Andhra Pradesh, Bombay, Kerala, Madhya Pradesh, Madras, Mysore, Punjab, Uttar Pradesh and West Bengal and the Territory of Delhi. The Borstal Schools Acts, which are slightly different in scope, are in operation in the States of Andhra Pradesh, Bombay, Kerala, Madras, Mysore, Punjab, Uttar Pradesh and West Bengal. The Reformatory Schools Act of 1897 has also been enforced in all the bigger States and some Union Territories.

The problem of juvenile delinquency is mainly the concern of State Governments. The Central Government, however, have sponsored a Care Programme under which the States are given assistance. Under this programme 1 borstal school and 2 probation hostels in Bihar, 1 certified school, 1 remand home and 2 probation hostels in Madhya Pradesh, 1 certified school and 1 remand home in Madras, 3 certified schools, 5 remand homes and 1 probation hostel in Mysore and 1 children's home in Tripura have already been approved. Probation Officers are also to be appointed in Bihar, Bombay, Kerala, Madhya Pradesh, Madras, Mysore and Orissa.

Besides formal education, vocational training in a number of trades is imparted to the inmates of the certified, reformatory and borstal schools. Some of these institutions also provide juvenile delinquents, on their release, with implements and money to enable them to settle down in trades learnt by them in school. Other institutions provide follow-up services. The inmates of the certified schools are given training in citizenship and democratic living and are encouraged to take part in extra-curricular activities, such as sports, debates, dramas, music and scouting.

Beggars

The Criminal Procedure Code treats vagrants and vagabonds alike and provides penalties under Sections 55 (i) (b) and 109 (b). Beggars may

be proceeded against under Section 133 as those committing public nuisance. Beggary within railway premises was prohibited by law on February 15, 1941. Special Acts have been passed by some of the States to prohibit begging in public places. In others, the municipal and police acts provide

measures against begging.

There are institutions in the States for the custody, care and assistance of beggars in their rehabilitation. Eighteen certified institutions with a total capacity for 2,000 beggars exist in Bombay. West Bengal has 8 beggar homes with accommodation for 2,050. There are 7 similar institutions in Madras, 8 including 3 relief settlements in Kerala and 2 in Delhi. There is a beggar home each in the States of Uttar Pradesh, Madhya Pradesh and Mysore. A novel type of vagrant home-cum-training centre is in existence in New Delhi in which the inmates take part in the management of the home. Under the Central Care Programme assistance is available for the setting up of beggar homes.

CENTRAL SOCIAL WELFARE BOARD

The Central Social Welfare Board, set up in August 1953, under the chairmanship of Smt. Durgabai Deshmukh, is an autonomous body. Funds made available under the Plan by the Government* are distributed through this body to voluntary social service organisations for "strengthening, improving and extending" the existing activities in the field of social welfare and for developing new programmes and carrying out pilot projects. It is also charged with the task of exploring the need for and the possibility of implementing new welfare activities. Welfare Boards, consisting mainly of women social workers and representatives of the State Governments, have also been constituted and are functioning in all the States. Since its inception the Board has sanctioned Rs. 136.34 lakhs by way of yearly grants-in-aid to 4,500 institutions and Rs. 111.63 lakhs as long-term grants to 649 institutions.

Welfare Extension Projects

A scheme of rural welfare, known as Welfare Extension Projects, was launched on August 15, 1954. Each of these projects covers a group of about 25 villages and a population of about 20,000. The programme and activities of these projects comprise balwadis (community creches and prebasic schools), maternity and infant health services (including those for the handicapped and the delinquents), literacy and social education for women, arts and crafts centres and recreational activities. The coverage of these projects between August 1954 and December 1958 is indicated in Table 47.

The Project Implementing Committee is responsible for the formulation and execution of the programme in each project area which is generally divided into 4 or 5 centres of 5 villages each, each centre being under the charge of a trained gram sevika, who is assisted by a midwife or a dai and a craft assistant.

From April 1, 1957, the Board has undertaken all work relating to the welfare of women and children in the community development blocks and most of the welfare extension projects will be established in community development block areas.

For the execution of this programme, 2,274 gram sevikas, and 216 midwives had received training up to the end of December 1958 and 666 gram

sevikas and 60 midwives were under training.

Urban Family Welfare Scheme

A scheme called the Urban Family Welfare Scheme has been sponsored for promoting the welfare of women. Under this, industrial co-operatives

^{*} Rs. 4 crores under the First Plan and Rs. 14 crores under the Second Plan.

are being formed for starting small-scale industries in selected urban areas. Each of these industries will provide employment (mainly at their homes) to about 500 women of lower middle class families. According to an estimate, a woman employed in this way earns between Re. 1 and Rs. 1.50 per day. Five such units benefiting 2,500 families have already gone into production at Delhi, Hyderabad, Vijayawada and Poona. The aim is to set up 20 such units by the end of the Second Plan period for the benefit of 10,000 families.

Other Programmes

On the basis of the recommendations of the Advisory Committee on After-care Programmes and of the Social and Moral Advisory Committee, a comprehensive programme for starting 80 after-care homes, at the rate of 5 for each State, and nearly 330 shelters, at the rate of one in each district, has been formulated. The homes will provide appopriate training and meet other needs of persons discharged from correctional and non-correctional institutions and to rescued women and girls and render necessary assistance for their economic renabilitation. The shelters will receive discharged and rescued persons and send them to the homes. They will assist

^{*} Exclusive of expenditure met from local contributions.

[†] This includes both old and new types of projects.

in their rehabilitation in certain cases. The following table indicates the progress made in this direction:

TABLE 48
AFTER-CARE HOMES AND SHELTERS

	Number of State Homes	Number of District Shelters	Number of Production Units	Number of benefi- ciaries
From April 1956 to December 1958	41	122	41	13,000
As estimated at the end of the Second Plan period	80	330	80	40,000

Several new programmes of social welfare to be implemented during the rest of the Second Plan period have also been formulated. They include opening of 100 pilot Welfare Extension Projects in urban areas; provision of facilities to enable women in the age group 25 to 30 years to attain the minimum educational qualifications prescribed for recruitment as welfare workers like gram sevikas, midwives, primary school teachers etc.; financial assistance for starting 100 night-shelters in important industrial towns for shelterless workers; running holiday homes for poor children, assisting financially the small production units and making provision for basic welfare services in gramdan villages. All these programmes are to be worked through voluntary welfare organisations, to which grants-in-aid will be given by the Board.

CHAPTER XIII

RELIEF AND REHABILITATION

Of the 88.57 lakh displaced persons from Pakistan who had migrated to India till the end of 1958, 47.40 lakhs came from West Pakistan and the rest from East Pakistan. The task of rehabilitating displaced persons from West Pakistan will be completed by the end of 1959-60 and that relating to displaced persons from East Pakistan will be substantially completed by the end of the Second Plan period. The assistance provided by Government towards the relief and rehabilitation of these persons till the end of March 1959 and the State-wise distribution of the displaced population are shown in Tables 49 and 50.

DISPLACED PERSONS FROM EAST PAKISTAN

Of the 41.17 lakh persons who migrated from East Pakistan till March 31, 1958, 2.07 lakh persons were still being maintained at the end of 1958 in 140 camps in West Bengal, Bihar, Orissa and Tripura. 58,000 unattached women and children and old and infirm displaced persons were being cared for in homes and infirmaries in the eastern zone. The camps in West Bengal will be closed by the end of July 1959.

About 47,100 displaced families have been dispersed from camps in Bihar, 4,573 families from camps in Orissa and 931 families from camps in West Bengal to rehabilitation sites. 2,959 families have so far been rehabilitated in Madhya Pradesh, Rajasthan and Uttar Pradesh. Uttar Pradesh and Manipur have practically completed their rehabilitation programme. About 75,000 families in Assam and 53,000 families in Tripura have been provided with rehabilitation assistance. West Bengal has already provided assistance to 28,99 lakh persons towards their rehabilitation.

Till the end of 1958, a sum of Rs. 143.14 lakhs had been sanctioned as house building loans to the displaced persons in urban areas. Business loans amounting to Rs. 46.88 lakhs and housing colonies assistance of Rs. 4.36 lakhs (in Assam) were provided during 1958.

^{*} Exclusive of compensation.

[†] Does not include Rs. 29.99 crores debited against Revenue up to 1958-59 and Rs. 8.65 crores written back from Capital to Revenue.

**Net amount of sanctions.

As many as 140 squatters' colonies have been selected for regularisation; of these colonies accommodating 8,540 families have already been regularised. A sum of Rs. 315.42 lakhs has been sanctioned for development of urban and rural colonies.

Up to the end of June 1958, about 36,000 persons received training in various arts and crafts and about 6,000 were undergoing training. More than a hundred training schemes involving an expenditure of Rs. 228 lakhs were implemented. To provide employment to displaced persons in development schemes, Contracts Divisions have been set up, the one in West Bengal employing about 5,300 displaced persons daily. About 2.13 lakh displaced persons have so far been placed in employment through the medium of employment exchanges. Twenty-three schemes have been sanctioned for the setting up or expansion of medium industries. These cost about Rs. 296 lakhs and provide employment to about 12,000 persons. Up to January 1959, 126 schemes of small-scale or cottage industries were sanctioned. These will offer employment to 14,000 displaced persons.

For the education of displaced students in the eastern region, 1,567 primary schools, 22 secondary schools and 21 colleges have been opened.

Dandakaranya Scheme

An area of 80,000 sq. miles north of river Godavari and covering parts of Andhra Pradesh, Orissa, Madhya Pradesh and Bombay is being developed under the Dandakaranya Scheme for resettling a sizable displaced population from East Pakistan. The Dandakaranya Development Authority has been established. Work is in progress on the reclamation of about 45,000 acres of land, construction of 5,000 village houses, and setting up of technical and vocational training centres, co-operative societies and multi-purpose farms during 1959-60. About 20,000 families from camps in West Bengal are expected to be settled here by July 1959.

Rehabilitation Industries Corporation

A Rehabilitation Industries Corporation with a Rs. 5 crore assistance from the Centre will be set up to establish industries in the public sector

in partnership with private enterprise and to provide loans to private entrepreneurs for providing employment to displaced persons from East Pakistan.

DISPLACED PERSONS FROM WEST PAKISTAN

Evacuce lands in the Punjab were allotted on a quasi-permanent basis to 4.77 lakh families and a further 33,000 families were settled as tenants at-will. Till the end of 1958, permanent rights were transferred to 2,60,091 allottees, covering an area of 19,11,718 standard acres worth Rs. 85.32 crores. Proprietary rights in 82,424 houses were also transferred. Of the new townships set up in the western region, the Central Government were directly associated with the construction and administration of four townships of Faridabad, Rajpura, Nilokheri and Hastinapur. The housing programme for displaced persons from West Pakistan has been nearly completed.

About 2.02 lakh displaced persons were provided with gainful

About 2.02 lakh displaced persons were provided with gainful employment in services and trades till the end of 1958, and about 90,000 were given vocational and technical training. An aggregate of Rs. 22.85 crores has been advanced as loans through the State Governments and the Rehabilitation Finance Administration to enable the urban displaced persons to set up trades and industries. In addition, 95 schemes for medium and small-scale industries have been sanctioned, involving an expenditure of Rs. 207 lakhs. These schemes are expected to open up employment opportunities for 10,000 persons.

À sum of Rs. 1.80 crores was advanced to educational, medical and cultural institutions as grants-in-aid for providing facilities to displaced students. In addition, a sum of Rs. 36.58 lakhs was paid as grants to the State Governments for providing financial assistance to displaced students.

Up to January 31, 1959, a sum of Rs. 100.56 crores (Rs. 51.56 crores in cash, Rs. 32.47 crores by transfer of properties and Rs. 16.53 crores by way of adjustment of public dues) was paid as compensation to 3.60 lakh claimants. As many as 51,159 certificates of admissibility of compensation have also been issued.

OTHER KINDS OF RELIEF

Emergency Relief Organisation

A country-wide organisation known as the Emergency Relief Organisation to provide relief in times of floods, famines, earthquakes, etc., has been set up in almost all the States and Union Territories. The Organisation will ensure that:

- (i) relief operations are conducted according to plans drawn up ahead of an emergency and, as far as possible, by personnel well-trained in conducting such operations;
- (ii) emphasis is laid on the principle of self-help so that assistance from outside the affected area is reduced to the minimum;
- (iii) each of the interested social welfare agencies is allotted a definite role to play; and
- (iv) the district and local authorities, the State Governments and the Government of India take upon themselves the responsibility for proper integration of activities within their respective spheres.

The Organisation, when fully established, will function at the Central, State and district levels. The Central organisation will implement the emergency relief policy of the Government, co-ordinate the efforts of the States and provide such relief services and supplies as can be arranged only by the Government of India.

As part of the Central Emergency Relief Organisation, a training

institute known as the Central Emergency Relief Training Institute has been set up at Nagpur. The Institute is intended to lay down a basic pattern of training in emergency relief operations for the country as a whole and provides a source of supply of trained personnel in adequate numbers not only for instructional purposes but also for manning the various relief services envisaged under the Scheme.

Prime Minister's National Relief Fund

Since November 1947, when the Prime Minister's National Relief Fund was founded, a sum of about Rs. 1.82 crores has been used in providing relief to people affected by national calamities such as earthquakes, floods, cyclones, draught, famine and fire. Relief was also given in the early stages to displaced persons from Pakistan.

CHAPTER XIV

SCHEDULED CASTES, SCHEDULED TRIBES AND OTHER BACKWARD CLASSES

The Constitution prescribes protection and safeguards for Scheduled Castes, Scheduled Tribes and other Backward Classes, either specifically or by way of general rights of citizens with the object of promoting their educational and economic interests and of removing certain social disabilities the Scheduled Castes were subject to. These are:

- (i) the abolition of "Untouchability" and the forbidding of its practice in any form (Art. 17);
- (ii) the promotion of their educational and economic interests and their protection from social injustice and all forms of exploitation (Art. 46);
- (iii) the throwing open of Hindu religious institutions of a public character to all classes and sections of Hindus (Art. 25);
- (iv) the removal of any disability, liability, restriction or condition with regard to access to shops, public restaurants, hotels and places of public entertainment, the use of wells, tanks, bathing ghats, roads and places of public resort maintained wholly or partly out of State funds or dedicated to the use of the general public (Art. 15);
- (v) the right to practise any profession or carry on any occupation, trade or business (Art. 19);
- (vi) the forbidding of any denial of admission to educational institutions maintained by the State or receiving aid out of State funds (Art. 29);
- (vii) the obligation of the State to consider their claims in the making of appointments to public services and reservation for them in case of inadequate representation (Arts. 16 and 335);
- (viii) special representation in Parliament and State Legislatures for a period of ten years (Arts. 330, 332 and 334);
 - (ix) the setting up of advisory councils and separate departments in the States and the appointment of a Special Officer at the Centre to promote their welfare and safeguard their interests (Arts. 164, 338 and Fifth Schedule); and
 - (x) special provision for the administration and control of scheduled and tribal areas (Arts. 244 and Fifth and Sixth Schedules).

The population of the Scheduled Castes is now estimated at 5.53 crores and that of Scheduled Tribes 2.25 crores as a result of the issue of revised lists under the Scheduled Castes and Scheduled Tribes Lists (Modification) Order, 1956. Denotified Tribes number about 40 lakhs. A list of backward classes other than Scheduled Castes and Scheduled Tribes is under preparation on the basis of the results of the ad hoc surveys conducted by the Office of the Registrar-General of India.

The State-wise distribution of the Scheduled Castes and Tribes according to the Scheduled Castes and Scheduled Tribes Lists (Modification) Order, 1956, is shown in the following table:

TABLE 51

MEASURES TO ERADICATE UNTOUCHABILITY

The Untouchability (Offences) Act, 1955

This Act, which came into force on June 1, 1955, provides penalties for preventing a, person, on the ground of untouchability, from entering a place of public worship, offering prayers therein or taking water from a sacred tank, well or spring. Penalties are also provided for enforcing all kinds of social disabilities, such as denying access to any shop, public restaurant, public hospital or educational institution, hotel or any place of public entertainment; the use of any road, river, well, tank, water tap, bathing ghat, cremation ground, sanitary convenience, dharamshala, sarai or musafirkhana or utensils kept in such institutions and hotels and restaurants. The Act also prescribes penalties for enforcing occupational, professional or trade disabilities or disabilities in the matter of enjoyment of any benefit under a charitable trust, in the construction or occupation of any residential premises in any locality or the observance of any social or religious usage or ceremony.

The Act similarly lays down penalties for refusing to sell goods or render services to a Harijan becasue he is a Harijan; for molesting, injuring or annoying a person or organising a boycott of, or taking any part in the excommunication of a person who has exercised the rights accruing to him as a result of the abolition of untouchability.

Higher penalties have been prescribed for subsequent offences. For the purposes of awarding punishments, incitement, or abetment of the offence has been treated in the same manner as the commission of the offence. The

^{*} President's order declaring the Scheduled Tribes in the Islands is yet to be issued.

onus of proving innocence has been thrown on the accused. The offences under this Act are cognisable and compoundable.

Campaign Against Untouchability

Since 1954 the Government of India have been giving financial backing to the movement to eradicate untouchability. Both official and non-official agencies are being utilised for this purpose. The State Governments have instructed their district officers and other officials, who deal with the public, to stress the need for and urgency of doing away with this evil. "Harijan Days" and "Harijan Weeks" are observed in almost all the States to focus public attention and enlist the people's cooperation in the eradication of untouchability. Most of the States have appointed small committees to enforce, where necessary, the provisions of the Untouchability (Offences) Act, 1955. Publicity media, such as books, pamphlets, handbills, and audio-visual aids have also been pressed into service.

The assistance and co-operation of voluntary organisations, such as the Harijan Sevak Sangh, the Bharatiya Depressed Classes League and the Harijan Ashram of Allahabad have also been obtained. A sum of Rs. 61,50,746, of which Rs. 14,77,200 came from the Centre, was given as grants-in-aid to these organisations during the First Plan period. The Second Five-Year Plan envisages an expenditure of about Rs. 208 lakhs as aid to non-official agencies for this programme of which Rs. 138 lakhs have been provided under the States' sector and Rs. 70 lakhs under the Central sector of the Plan.

During the first two years of the Second Plan the Central Government made a grant of Rs. 12,98,300 to the all-India voluntary agencies, working in the various States for the removal of untouchability.

REPRESENTATION IN LEGISLATURES

Under Articles 330, 332 and 334 of the Constitution, seats, proportionate as far as possible to their population in the States, have been reserved for the Scheduled Castes and Tribes in the Lok Sabha and the State Vidhan Sabhas for a period of ten years after the inauguration of the Constitution. Table 52 gives details of the representation in Parliament and the State Legislatures.

REPRESENTATION IN THE SERVICES

The manner in which the State carries out its obligation to reserve posts for Scheduled Castes and Tribes in the public services in case of inadequate representation and to consider their claims consistent with the maintenance of efficiency of administration, has been left outside the purview of obligatory consultation with Public Service Commissions [Art. 320 (4)].

On January 26, 1950, the Union Government decided that 12½ per cent of the vacancies for which recruitment is made by open competition on an all-India basis and 16½ per cent of the vacancies to which recruitment is made otherwise, be reserved for the Scheduled Castes. For the Scheduled

Tribes, the reservation was fixed at 5 per cent in both cases.

To facilitate their adequate representation concessions such as (i) exemption in age-limits, (ii) relaxation in the standard of suitability and of qualifications, (iii) selection subject to fulfilling the minimum standard of efficiency and (iv) inclusion at least in the lower category for purposes of promotion where promotion is otherwise than through qualifying examination, have been provided for. The principle of reservation has been extended to scrvices filled by promotion through competitive examinations limited to departmental candidates, statutory and semi-autonomous bodies and government limited

companies. If no suitable Scheduled Caste candidates are available for the reserved posts, they are to be treated as reserved for Scheduled Tribes and vice versa. It is only when suitable candidates are not available from either that a post is treated as unreserved. In such cases, an equal number of vacancies are carried forward to two recruitment years.

To give proper effect to the reservation decided upon, model rosters of 40 posts each have been prescribed for recruitment by open competition and otherwise. If the vacancies in a Service or Cadre are too few for the purpose, all corresponding posts are to be grouped together. Annual reports are required to be submitted by the employing authorities for scrutiny by the Government. Some of the State Governments have also drawn up rules for the reservation of posts for these classes, and steps have been taken to increase their representation in State services.

Two lakes and five thousand persons belonging to the Scheduled Castes and Scheduled Tribes are employed in the Government of India. Statistics collected through Employment Exchanges reveal that 32,760 such

^{*} One seat reserved for the Autonomous Districts in Assam.

[†] Excludes 25 seats for Pakistan-occupied areas of the State which are kept in abeyance pending the return of those areas to the Indian Union.

persons were employed during 1957 by the Central Government, State Governments and other employers.

ADMINISTRATION OF SCHEDULED AND TRIBAL AREAS

Autonomous Tribal Areas of Assam

In pursuance of the provisions of the Sixth Schedule, one Regional Council and 5 District Councils have been set up in the districts of the United Khasi-Jaintia Hills, Garo Hills, Mizo Hills, North Cachar Hills and Mikir Hills. Each of these District Councils consists of not more than 24 members, three-fourths of them being elected by adult suffrage. The Councils possess wide legislative and rule making powers as well as certain financial and taxation powers.

Tribes Advisory Councils in Other States

The Fifth Schedule to the Constitution provides for the setting up of a Tribes Advisory Council in each of the States having Scheduled Areas and, if the President so directs, for constituting such Councils in States which have Scheduled Tribes but no Scheduled Areas. Tribes Advisory Councils have been set up so far in the States of Andhra Pradesh, Bihar, Bombay, Madhya Pradesh, Madras, Orissa, Punjab, Rajasthan and West Bengal. These Councils advise the Governors on such matters concerning the welfare of the Scheduled Tribes and development of the Scheduled Areas as may be referred to them.

WELFARE AND ADVISORY AGENCIES

Commissioner for the Scheduled Castes and Scheduled Tribes

A Special Officer has been appointed by the President under Article 338 of the Constitution to (i) investigate all matters relating to the safeguards for the Scheduled Castes and Scheduled Tribes provided under the Constitution, and (ii) report to the President on the working of these safeguards. There are ten Assistant Commissioners to assist the Commissioner.

Central Advisory Boards

To associate members of Parliament and public workers with matters pertaining to the development of Tribal areas and the well-being of the Scheduled Tribes and Scheduled Castes, two Central Advisory Boards—one for Tribal Welfare and another for Harijan Welfare—have been constituted. These Boards advise the Government of India on all matters relating to the welfare of these classes. They are also expected to assess the requirements of the tribal people in Scheduled and other Tribal Areas, formulate schemes for their welfare, periodically review the working of sanctioned schemes and evaluate the benefits derived from them with a view to suggesting improvements.

Welfare Departments in the States

The proviso to Article 164 (1) of the Constitution requires that in the States of Bihar, Madhya Pradesh and Orissa, Welfare Departments in charge of a Minister be set up. Welfare Departments have been set up in these States as well as in Andhra Pradesh, Assam, Bombay, Kerala, Madras, Mysore, Punjab, Rajasthan, Uttar Pradesh, West Bengal, Himachal Pradesh, Manipur and Tripura.

WELFARE SCHEMES

Under Article 339 (2) of the Constitution the Union Government can give directions to States in the formulation and execution of schemes for

the welfare of the Scheduled Tribes in the States. Under Article 275 (1) the Centre is required to give grants-in-aid to the States for approved schemes of welfare and for improving the tone of administration in Scheduled Areas.

Educational Facilities

Measures to provide increased educational facilities have been taken, the emphasis being on vocational and technical training. The concessions include free tuition, stipends, scholarships and the provision of books, stationery and other equipment. Mid-day meals are also supplied in many places.

The Government of India instituted a scheme for grant of scholarships to the Scheduled Castes in 1944-45. This benefit was extended to the Scheduled Tribes in 1948-49 and other Backward Classes in 1949-50.

The following table shows the amounts spent on this account.

TABLE 53
SCHOLARSHIP GRANTS

(In lakks of rupees)

Year		Scheduled Castes	Scheduled Tribes	Other Back- ward Classes	Total
1951-52		8.18	2.82	4.41	15.41

1953-54		26.36	8.19	26.51	61.56
954-55		45.80	12.38	49.71	107.89
1955-56	* * *	63.78	13.05	73.70	150.53
956-57	., i	87.99	15.78	83.52	187.29
1957-58		100.37	18.97	82.19	201.53

The Central Government's scheme to award scholarships to deserving students from these classes for studies in foreign countries came into force in 1953-54. From 1955-56 the number of such scholarships was increased to 12—4 for each of the three groups. Tourist class sea passages are also given to students who receive foreign scholarships without travel grants. Overseas scholarships to students belonging to backward communities are also awarded by the State Governments of Assam and Bihar.

Seventeen and a half per cent of the merit scholarships granted by the Centre to deserving students of the lower income groups for studies in institutions which are members of the Indian Public Schools Conference, are reserved for backward communities. Some of the State Governments offer similar scholarships. Some public schools also award scholarships to deserving backward class students. Reservation of seats, lowering of minimum qualifying marks and raising of the maximum age limit for admission of members of these classes in all technical and educational insitutions are among other steps recommended by the Union Government to all educational authorities; these have been acted upon by different institutions all over the country.

Economic Opportunities

Of a tribal population of 225 lakhs, about 26 lakh persons practise shifting cultivation annually over an area of 22,55,816 acres, the total area used so far for shifting cultivation being five times this figure. The problem is in its acute form in the States of Andhra Pradesh, Assam, Bihar, Madhya Pradesh and Orissa and the Union Territories of Manipur and Tripura. A scheme to control shifting cultivation was started during the First Plan period. Sixteen pilot project centres have so far been established in Assam, 4 colonisation schemes have been started in Andhra

Pradesh and nearly 460 families in Bihar, 366 in Madhya Pradesh, 2,496 in Orissa and 5,339 in Tripura have been settled under the scheme.

Andhra Pradesh, Bihar, Bombay, Madras, Orissa and Uttar Pradesh have launched schemes to improve irrigation facilities, to reclaim waste land and to distribute it among members of the Scheduled Castes and Scheduled Tribes. In addition, facilities for the purchase of livestock, fertilisers, agricultural implements, better seeds, etc., are also being extended to them. Some States have set up demonstration farms for training them in methods of scientific cultivation. Cattle breeding and poultry farming

are being encouraged among these people.

The Governments of Andhra Pradesh, Assam, Bihar, Bombay, Uttar Pradesh and West Bengal are encouraging the development of cottage industries through loans, subsidies and training centres. Multi-purpose co-operative societies which provide credit in cash and in kind to the Scheduled Castes and Tribes have also been established in Andhra Pradesh, Bihar, Madras, Mysore, Orissa, Uttar Pradesh and West Bengal. In some States, such as Bombay and Andhra Pradesh, contracts for exploiting forest produce are being given to the Scheduled Tribes through labour co-operative societies.

Legislation exists in almost all the States to extend relief to the indebted, including those belonging to the Scheduled Castes and Scheduled Tribes. Measures for the abolition of their debt bondage have been taken in Orissa and Bihar. Andhra Pradesh, Assam, Bihar, Madhya Pradesh, Orissa and West Bengal have enacted tenancy laws to ensure security of land tenure

to the Scheduled Tribes.

Other Welfare Schemes

Other welfare schemes include the grant of house sites free or at nominal cost, assistance by way of loans, subsidies and grants-in-aid to local bodies for the construction of houses for their Harijan employees and monetary assistance to co-operative building societies specially started for the benefit of the Scheduled Castes and Scheduled Tribes. A scheme of legal aid to Scheduled Castes is now in operation in many States.

Tribal Research Institutes

Tribal research institutes, which undertake intensive studies of tribal arts, culture and customs, have been set up in Bihar, Madhya Pradesh, Orissa, Rajasthan and West Bengal. The Gauhati University has started the study of the social and cultural life of the tribes in Assam. In Bombay, tribal research is being conducted by the Anthropological Society of Bombay, the Gujarat Research Society and the University of Bombay. In West Bengal, the Cultural Research Institute has produced reports on several aspects of tribal life in the State. The Department of Anthropology, Government of India, has completed intensive research studies on important tribes of Assam and West Bengal, while studies in respect of tribals in other States are in progress. Studies in the culture and languages of the people of NEFA are being undertaken by the research department of NEFA. The Tribal Research Bureau in Orissa has also undertaken investigation on several important tribal problems. The Institute in Madhya Pradesh has completed studies of tribal problems in three districts. The Bihar Institute has also completed studies on a tribe in Santhal Parganas. The Bharatiya Lok Kala Mandal, Udaipur, is a pioneer non-official organisation which has conducted cultural survey of tribes in the former Madhya Bharat State and in Rajasthan.

Targets Under Second Plan

It is proposed to open 3,187 schools and hostels and 200 community and cultural centres in tribal areas and also to give stipends and other

concessions to 3 lakh tribal students during the Second Plan period. The corresponding educational facilities contemplated for the Scheduled Castes are the establishment of 6,000 schools and hostels and scholarships and freeships for 30 lakh students. For Denotified Tribes, the Plan provides 1.16 lakh scholarships and other educational concessions. Besides the States' plans to construct 10,200 miles of bridle and hill paths and 450 bridges in tribal areas, there is a Central plan to build 450 miles of motorable roads and 720 miles of bridle and hill paths involving an expenditure of Rs. 4 crores. The health schemes comprise the opening of dispensaries, mobile health units, the training of health personnel, the construction of 41,000 wells and 2 reservoirs in the tribal areas, 23,400 wells for the Scheduled Castes and over 394 wells for Denotified Tribes. The housing programme comprises the provision of 1,29,300 houses or house sites for the Scheduled Castes at a cost of Rs. 5,25 crores and 45,800 houses for the tribals.

The Plan includes colonisation schemes for the settlement of 12,000 tribal families in 186 colonies and rehabilitation of 15,246 families of Denotified Tribes. There is also provision for the conversion of the 350 existing grain-golas into full fledged co-operatives and for starting 800 additional forest multi-purpose co-operative societies. Table 54 shows the details of expenditure under various heads for the First and Second Plan periods.

CHAPTER XV

MASS COMMUNICATION

BROADCASTING

There are today 28 radio stations covering all the important linguistic areas of the country as against only six in 1947. The stations are grouped into four regions as follows:

North . . Delhi, Lucknow, Allahabad, Patna, Jullundur, Jaipur-Ajmer, Simla, Bhopal, Indore and Ranchi.

West .. Bombay, Nagpur, Ahmedabad-Baroda, Poona and

Rajkot.

South .. Madras, Tiruchirapalli, Vijayawada, Trivandrum, Kozhikode, Hyderabad, Bangalore and Dharwar.

East .. Calcutta, Cuttack and Gauhati.

In addition, Radio Kashmir has two stations at Srinagar and Jammu. The number of radio centres, transmitters and receiving centres on March 1, 1959, was 32, 55 and 28 respectively.

Programme Composition

Music programmes* comprise nearly a half of all the programmes. Talks, features and discussions cover a wide range of subjects. A National Programme of Talks given by well-known personalities in arts, sciences and literatures is broadcast every Wednesday and is relayed by all stations. Documentary features, group discussions, interviews, etc., are also broadcast.

Table 55 shows the composition and the time approximately taken by

the Home Services and Vividh Bharati programmes during 1958:

TABLE 55

COMPOSITION OF HOME PROGRAMMES (1958)

Vividh Bharati

This all-India Variety Programme completed its first year in October 1958. With the addition of a Karnataka session of 90 minutes a day, the programme is now on the air for 6½ hours on week days and 9½ hours on Sundays and holidays.

The programme, broadcast from two powerful transmitters from Bombay and Madras, can be heard all over the country. Some stations are relaying parts of the programme. Occasional relay of parts of the programme from Bombay, Madras, and Delhi which can be received on single-band cheap receiving sets is under consideration.

In addition to items of music and entertainment, Vividh Bharati includes short quiz and competition programmes on various development and national reconstruction activities.

Special Audience Programmes

Rural broadcasts deal with all aspects of rural life and provide useful information to villagers through dialogues, discussions, plays, news, talks, weather reports, etc. Problems concerning agriculture, health and hygiene are dealt with by experts. Under the Central Government Subsidy Scheme, 46,642 community sets were supplied till March 14, 1959 to various State Governments for installation in rural areas.

A beginning has been made with a scheme for setting up Radio Rural Forums which are to be listening-cum-discussion-cum-action programmes in which a two-way contact between the broadcaster and the listener is established. These are organised in villages which regularly discuss the broadcasts and send their criticisms and suggestions to the radio station. Such forums now function in the Bombay State and their introduction in other States and Union territories is under consideration.

Educational programmes for schools are at present broadcast from 21 stations. Arrangements are being completed for extending school broadcasts to four more stations. School Listening Clubs are being formed to bring about closer and more continuous contact of the radio station with the schools concerned. The number of schools with radio receivers as on August 31, 1958 was 10,741.

Special programmes for women and children are broadcast by each station in which information on housekeeping, child care, nutrition, mental health and their place in the community and the nation is given. Talks, discussions, short stories, choruses, plays, features and quiz programmes are broadcast in programmes meant for children.

Programmes for industrial workers are broadcast from Madras, Bombay, Calcutta, Ahmedabad, Lucknow, Allahabad, Trivandrum and Kozhikode. They are meant to provide information and entertainment to industrial workers and their timings are fixed in consultation with the Labour Department of each State Government. A programme for tea garden workers and their families in Assam is also being broadcast.

Programmes for the armed forces are broadcast from Delhi, Srinagar and Jammu.

Five-Year Plan Publicity

Publicity for the Plan aims at bringing home to listeners the theme of helping themselves to help the Plan. In addition to the general programmes in which the message of the Plan is carried, special audience programmes emphasize the various aspects of planned progress. Songs specially composed on various 'Help the Plan Schemes' are set to popular tunes and included in rural programmes. The various folk parties, which come to Delhi for the Republic Day Celebrations, are invited to present special songs on development activities in a programme called 'Songs of the National Builders'.

During 1958, 2,017 talks, 485 dialogues, 191 interviews, 79 poems, 33 symposia, 57 plays and skits, 506 feature programmes and 760 discussions in various languages were broadcast.

Programme Exchange

The Internal Exchange Unit helps stations to exchange their best programmes, either directly, as in the case of music, or through translations in Hindi. During 1958, about 1,500 separate items of programmes were thus exchanged between the stations. The External Programme Exchange Unit receives contributions from foreign radio organisations and in return sends them contributions of Indian items. Fifty-three foreign broadcasting organisations were the recipients of such items during 1958. A central library of recordings on tapes and discs is also maintained at Delhi. It serves both as a reference library and an archives of radio programmes.

Transcription Service

In addition to the processing of speeches of important personalities, the Transcription Service produced over 250 stampers and printed about 9,000 discs of music and spoken-word items for use by AIR stations.

Advisory Committees

The Central Programme Advisory Committee advises AIR on general principles to be kept in view in planning and presentation of programmes and suggests how they can be made more useful and interesting. The Central Advisory Board for Music lays down in general terms the music policy for the guidance of AIR. At stations, public opinion is associated with the planning and presentation of programmes through (i) the Programme Advisory Committee (attached to all stations), (ii) the Rural Advisory Committee (attached to all stations) and (iii) the Consultative Panels for Educational Broadcasts (attached to stations broadcasting school programmes) and Panels for University Programmes.

Programme Journals

The programmes planned by the different stations are announced in advance in the following journals:

Name of the Journal	Published from	Language	Periodicity
Akashvani (formerly Indian Listener)	Delhi	English	Weekly
Awaz	37	Urdu	Fortnightly
Sarang	27	Hindi	п
Betar Jagat	Calcutta	Bengali	,,
Vanoli	Madras	Tamil	37
Vani	, 29	Telugu	37
Nabhovani	Ahmedabad	Gujarati	,,

News Services

News bulletins in the Home Services of AIR are broadcast in English and Hindi four times a day; in Bengali, Oriya, Tamil, Telugu, Kannada, Malayalam, Punjabi, Marathi, Gujarati, Assamese and Urdu three times a day; in Kashmiri and Dogri twice a day; and in Gorkhali once a day. A bulletin is also broadcast for troops in the Armed Forces Programme in Hindi once a day. Daily commentaries are also broadcast in Kashmiri, Urdu and Bengali.

Seventy-six bulletins—46 in the Home Services and 30 in the External Services—are broadcast daily. The Lucknow and Bhopal stations broadcast a regional news bulletin in Hindi, Bombay in Marathi and Gujarati, Madras in Tamil, Calcutta in Bengali, Hyderabad in Telugu, Bangalore in Kannada, Trivandrum in Malayalam, Gauhati in Assamese, Cuttack in Oriya and Srinagar in Kashmiri, Dogri, Urdu and Pushtu. Radio newsreel programmes—two in English and one in Hindi—are broadcast every week, besides a series of special newsreel bulletins on important occasions.

External Services

The External Services programmes are broadcast in 16 languages for over 20 hours a day for Indian and foreign listeners in Australia, Africa and Europe. A third 100 kw. short-wave transmitter was installed in 1958 at Delhi, which would enable wider coverage and the extension of the duration of some external services programmes. The two 10 kw. short-wave transmitters at Bombay and Madras also carry programmes in Gujarati and Tamil respectively for listeners in Africa and South-East Asia. Broadcasts for people of Indian origin abroad are directed to South-East Asia and East and Central Africa, Aden and Mauritius and are in four languages, viz., Gujarati, Hindi, Konkani and Tamil. The broadcasts to non-Indian listeners abroad are in 12 languages, viz., Arabic, Burmese, Cantonese, English, French, Indonesian, Kuoyu, Persian, Portuguese, Pushtu, Swahili and Tibetan.

Growth of Listening

The number of radio set owners has shown a steady increase since the inauguration of broadcasting in 1927, as shown in the following tables:

TABLE 57

Television

The Second Five-Year Plan for the development of broadcasting in India includes the project of an experimental Television Unit at Delhi for assessing the value of this medium for mass communication, for carrying out certain technical investigations and for training the personnel of AIR. Though no regular television service is contemplated, experimental programmes of an educational and instructional type with an extremely limited frequency will be conducted.

THE PRESS

According to the second report of the Registrar of Newspapers for India, released on April 30, 1958, there were 5,932 newspapers in existence on December 31, 1957. The highest number (1,197) of newspapers was published in the State of Bombay, followed by West Bengal (829), Uttar Pradesh (732), Delhi (617) and Madras (577).

The periodicity-wise distribution of newspapers shows that there are 446 dailies, 1,589 weeklies, 517 fortnightlies and 2,351 monthlies.

The State-wise breakdown according to periodicity is given in the following table:

TABLE 61

An analysis of the language-wise distribution of newspapers shows that the largest number of newspapers was published in English (20.0 per cent), followed by Hindi (19.0 per cent), Urdu (8.7 per cent), Bengali (6.9 per cent), Gujarati (6.3 per cent), Marathi (5.4 per cent) and Tamil (4.5 per cent). The share of newspapers in other languages was below 4 per cent each. The following table shows the language-wise distribution of newspapers:

Circulation of Newspapers*

Out of a total of 5,932 newspapers and periodicals in 1957, full particulars of circulation were available about 2,843. An analysis of this data shows that the dailies commanded a circulation of 31.49 lakhs or 27.9 per cent of the total circulation. The percentages for monthlies and weeklies were 28 and 27 respectively. The table below shows the circulation of newspapers according to periodicity for 1956 and 1957:

TABLE 63

PERIODICITY-WISE CIRCULATION OF NEWSPAPERS
(1956 and 1957)

Total	••		3,050	2,843	1,09,52	1,12,60	

^{*}Circulation figures comprise copies sold and copies distributed free.

According to languages, newspapers in English had the largest circulation, i.e., 24.97 lakhs or 22.3 per cent of the total. Next in importance were Hindi newspapers with a circulation of 20.25 lakhs or 18.0 per cent. Others in order of importance were Tamil (9.1 per cent); Urdu (7.0 per cent); Gujarati (6.5 per cent); Bengali (6.1 per cent); Marathi (5.9 per cent); and Telugu (5.0 per cent).

The table below gives the language-wise circulation of newspapers

of all periodicities in each language:

Newsprint

For the major part of its requirements of newsprint, India depends on foreign countries. The only Indian concern, the National Newsprint and Paper Mills Ltd. at Chandani in Madhya Pradesh, went into production in January 1955 and has an annual installed capacity of about 30,000 tons. The rest of India's newsprint comes mainly from Canada, Finland, Norway and Austria. The quantity and value of the newsprint imported are given in the following table:

TABLE 65
IMPORT OF NEWSPRINT

Year			1	Quantity (in cwt.)	Value (in rupees)

1958 (till N	vember)			10,52,411	4,55,81,746

^{*}Circulation figures comprise copies sold and copies distributed free.

[†] Since 1957, the accounts of foreign trade are kept according to the calendar year.

Press Information Bureau

Information regarding the policy, plans, achievements and other activities of the Government of India is made available to the Press in English and 12 Indian languages by the Press Information Bureau. During 1958-59, textual services were received by about 3,605 Indian newspapers and periodicals, photographic services by 538 and photographs in the form of ebonoid blocks by 700. Indian and foreign correspondents accredited to the Government of India at headquarters numbered 165 in 1958.

The Bureau's Information Services in Hindi and Urdu are issued from the head office in New Delhi and those in other Indian languages from the regional offices at Calcutta (Bengali), Gauhati (Assamese), Cuttack (Oriya), Bombay (Marathi and Gujarati), Madras (Tamil and Telugu), Bangalore (Kannada), Ernakulam (Malayalam) and Jullundur (Punjabi). The Bureau's regional and branch offices are linked with headquarters by teleprinter lines. Distribution offices at Lucknow, Varanasi, Patna and Jaipur provide similar service to Hindi newspapers and another at Nagpur to Marathi newspapers.

Information Centres have been opened at New Delhi, Jullundur, Srinagar, Madras, Lucknow, Patna, Hyderabad, Trivandrum, Rajkot, Nagpur and Jaipur as part of a scheme to open Information Centres at State capitals and other important places. For the benefit of the villagers, Information Centres have been set up at Hirakud and Bhakra-Nangal.

Preedom of the Press

Article 19(1) of the Constitution guarantees "the right to freedom of speech and expression" to all citizens. This freedom has been interpreted by the courts to include freedom of the Press. Under the Constitution (First Amendment) Act of 1951, Parliament can enact legislation reasonably restricting the exercise of this right "in the interests of the security of the State, friendly relations with foreign States, public order, decency or morality, or in relation to contempt of court, defamation or incitement to an offence". The words "reasonable restrictions" occurring in clause (2) of Article 19 make such legislation justiciable.

There are five main Central laws relating to the Press: (i) The Press and Registration of Books Act, 1867; (ii) The Working Journalists (Conditions of Service) and Miscellaneous Provisions Act, 1955; (iii) The Newspaper (Price and Page) Act, 1956; (iv) The Delivery of Books and Newspapers (Public Libraries) Act, 1954; and (v) The Parliamentary Proceedings (Protection of Publication) Act, 1956*.

FILMS

The output of feature films for the year 1958 was 295. Table 66 shows the number of feature films produced in various languages and certified for public exhibition during the years 1931, 1941, 1947 and from

In addition, the Central Board of Film Censors certified a total of 564 short films for public exhibition during the calendar year 1958. These consisted of: 25 ----

30 mm.			
(i) Short films over 2,000 ft. in length		19

Film Institute

The establishment of the Film Institute has been sanctioned by Government and it is expected to start functioning in 1959. The Institute will impart training in various aspects of film production such as cinematography, sound engineering, direction, art direction, make-up and costumes, audience research etc., besides conducting research in these fields. It will co-ordinate the activities of film societies in the country.

Production Code Bureau

Steps have already been taken to establish the nucleus of a Production Code Bureau for the film industry. The Bureau is expected to start functioning by the middle of 1959.

Film Finance Corporation

The Government have also decided to set up a Film Finance Corporation with an initial capital of Rs. 20 to 25 lakhs. It is also expected to start functioning in 1959.

Children's Film Society

The Society was registered under the Societies Registration Act in May 1955. The principal aim of the Society is to undertake, aid, sponsor, promote and co-ordinate the production, distribution and exhibition of films specially suited or of special interest to children and adolescents. The Society is in receipt of a grant-in-aid from the Central Government for the production of films suitable for children. The Society has so far produced four feature films "Char Dost", "Jaldeep", "Scout Camp" and "Haria" and three short films "Ganga Ki Lahren", "Bachon Se Baaten" and "Gulab Ka Phool," besides two adaptations from Indian feature films, viz., "Ram Shastri Ka Nyaya" and "Bal Ramayan". It has also adapted and dubbed some British and Russian films for exhibition to children. The production of two more films, "Panchatantra" and "Travel", is on hand.

The Society has been asked to set up and run a National Centre of Entertainment Films for Children and Adolescents which will be affiliated to the International Centre, already set up at Brussels, under the sponsorship of UNESCO.

^{*} Figures do not include one documentary feature film in 1955, two in 1956 and one in 1957.

Film Festivals

During 1958, Indian films participated in a number of international

film festivals and won the following awards:

Pather Panchali won the first prize for feature films at the International Film Festival held in Vancouver (Canada). It also won the Film Critic's Award as the Best Film of the Year at the Stratford Film Festival, Stratford (Canada).

Do Ankhen Barah Haath received a Special Award of Silver Bear at the VIII International Film Festival, Berlin, for "its impressive treatment of a social problem." It also received a special prize from the seven-nation jury of the International Catholic Cinematographic Bureau "for its deep

and poetic symbolism".

Mother India was one of the entries at the VIII International Film Festival, Karlovy Vary (Czechoslovakia). The chief actress in the film, Shrimati Nargis, was awarded a prize "for her stirring and pursuasive performance in the leading role".

Aparajito was one of the Indian entries at the International Film Festival in San Franscisco. Its director, Satyajit Ray, was awarded a

plaque and a certificate for the best direction of the film.

Operation Khedda, a Films Division's documentary film, was awarded a cup "for its artistic qualities" at the XIV International Competition

of Sports Motion Pictures held in Cortina D'Ampezzo (Italy).

Stars Man Has Made, another documentary film produced by the Films Division, received a cup "for its technical and artistic qualities" at the Fifth International Seminar on Electronics and Nuclear Problems, Rome.

State Awards for Films

State Awards for Films of high aesthetic and technical standard and of an educative and cultural value have been a regular annual feature since 1954. The Awards are given separately for feature, documentary and children's films.*

Regional Committees at Bombay, Madras and Calcutta consisting of distinguished persons in public life as well as persons from the industry qualified to judge technical standard of films make a preliminary selection of feature films. The final selection is made by the Central Committee which also selects the documentary and children's films for the Awards. As from 1959, preliminary selection of documentary films will be made by a Documentary Committee.

Documentaries and Newsreels

Documentary films and newsreels are produced mainly by the Films Division of the Union Ministry of Information and Broadcasting. Till the end of 1958, the Division had produced 533 newsreels and released 397 documentaries for exhibition. The documentaries are produced in 13 languages, namely English, Hindi, Bengali, Tamil, Telugu, Gujarati, Punjabi, Assamese, Kannada, Kashmiri, Otiya, Marathi and Malayalam. The newsreels are produced in five languages, namely, English, Hindi, Bengali, Tamil and Telugu. The newsreels and documentaries are made in 35 mm. standard size and are of an everage length of 1,000 ft. Those used in mobile vans are in 16 mm. size and 400 feet in length. Some of the documentaries are made in colour.

While the bulk of documentaries is produced by the Films Division, private producers are also entrusted with the production of films on selected subjects. In 1958, 14 such films were produced by private pro-

See Appendices for awards for films produced in 1958.

ducers, out of which 9 have been released on commercial circuits and the remaining will be released on mobile circuits. In addition, two readymade films from the private producers and two from the State Governments were purchased by the Films Division. Production of one short cartoon film is nearing completion. The Cartoon Films Unit has produced one film in animation on the 'Metric System' and another such film on the 'Second Five Year Plan' is under production.

Interesting events within and outside India are included in the newsreels. Items from foreign countries are received from various newsreel organisations as part of an arrangement for free exchange of newreels. Happenings within the country are covered by 14 cameramen of the Films Division. In addition, events covered by the film units of the State

Governments are also utilised.

Every cinema is required under the terms of its licence to exhibit at each performance not more than 2,000 feet of films approved by the authorities specified in the conditions governing the grant of licence. Under contracts with the cinemas, the Films Division supplies them with approved films on payment of rental not exceeding one per cent of the average weekly net collections. One newsreel and one documentary a week are released to all cinema houses alternatively. Films are supplied free of charge to schools, colleges, charitable institutions, hospitals, semi-

Government and non-profit making bodies, etc.

Documentary films approved for external publicity are supplied to 68 Missions abroad. A special monthly overseas edition of newsreels is compiled and supplied to 24 external posts. These are utilised by the Indian Missions for exhibition in their premises and outside and are also lent to social and educational institutions and to local Indian residents, etc. Besides, the Films Division has regular arrangements for the commercial distribution of its documentaries in many foreign countries. There are arrangements for television of documentaries and newsreels with the B.B.C., London, and NHK Television Company, Japan. Similar arrangements for the supply of newsreel material for television in the U.S.S.R. and Canada are also under consideration. Selected documentaries are also being televised by the Tourist Division of the Ministry of Transport in the U.S.A., the U.K., Europe and Australia.

Film Censorship

The Central Board of Film Censors was constituted in January 1951 for certification of films for the whole of India. The Board has seven members, including the Chairman, all of whom are appointed by the Government of India. The head office of the Board is at Bombay and there are regional offices at Bombay, Calcutta and Madras. The Regional Officers are assisted in the examination of films by Advisory Panels, who are also appointed by the Government of India. They include educationists,

doctors, lawyers, social workers, etc.

Every film, in respect of which an application for certification is received, is viewed by an Examining Committee. On the recommendations of the Examining Committee, the Board may refuse a certificate of public exhibition or grant it with or without cuts or modifications in respect of a Where this decision is not acceptable to an applicant, he may ask for the recommendation of the film by a Revising Committee which is presided over by the Chairman. A film may also be referred to a Revising Committee by the Chairman on his own initiative. The applicant for certification is given an opportunity to put forward his point of view both before the Examining and Revising Committees. Finally, an appeal against the decision of the Board may be made to the Government of India.

Certificates for unrestricted public exhibition are called "Universal" certificates and bear a 'U' mark. Films restricted to adults, i.e., to persons above the age of 18 years, are given "Adult" certificates and bear an 'A' mark on them. If any portion of a film is excised, a triangular mark is put at the left-hand bottom corner of the certificate, and a description of the deleted portion is endorsed on the reverse of the certificate. The decision of the Board in respect of each film examined by it is published in the Gazette of India

A directive has been issued by the Board for the guidance of members of the Examining and Revising Committees. It contains broad principles and detailed rules which aim at discouraging crime, vice, immorality, indecency, incitement to disorder, violence, breach of law, disrespect to a

foreign country or people, etc.

Between 1951 and 1958, the Board certified 6,463 Indian films and 17,389 foreign films. During 1958, the Board examined 3,161 films, of which 90*, including 65† foreign films, were refused certification, and 2,964 were given 'U' and 133 'A' certificates. The certified films consisted of 2,238 foreign films and 859 Indian films. The excisions from the films totalled 71,758 feet.

Import of Cinematographic Film and Equipment

Export of Indian Films

An Export Promotion Committee for Films, with headquarters at New Delhi, has been constituted under the chairmanship of the Minister for Information and Broadcasting. Its object is to suggest ways and means of promoting exports. The Committee includes representatives of

^{*} Features 60, trailers 27 and shorts 3.

PUBLICATIONS

The Publications Division in the Ministry of Information and Broadcasting is responsible for the compilation, production, distribution and sale of popular pamphlets, books, journals, albums, etc., for providing authentic information about the country's cultural heritage, the activities of the Government, the progress of development programmes and places of tourist interest. It also advises the various Ministries and Departments of the Government on the preparation and production of publicity literature relating to their specific activities. Publications are brought out in English, Hindi and regional languages. A similar role is performed in the States by the Departments of Information and Publicity.

The Division publishes 18 magazines, including general and cultural magazines, such as March of India and Ajkal (in Hindi and Urdu), a children's magazine Bal Bharati (in Hindi), journals devoted to community development (Kurukshetra and Gram Sevak in English and Hindi) and the Plan (Yojana in English and Hindi), besides the programme journals of All India Radio.

Four journals, namely, Indian Information, Bharativa Samachar, Metric Measures and Metric Maap Tol, were started during 1958. The first two journals are fortnightlies in English and Hindi respectively providing a condensed record of policy announcements and main activities of the Government, including development activities in the country. Story books for children in Hindi and regional languages are also being brought out.

During 1958, the Division released a total of 212 books, pamphlets, etc., for general, tourist and Five-Year Plan publicity in the various languages. Some of the important publications were: Women of India, Nuclear Explosions and their Effects (Revised), Maulana Azad—A Homage, Indian Birds (Hindi), Jawaharlal Nehru's Speeches, Volume III, Speeches of President Rajendra Prasad, 1952-56 (Second Series), Community Development in India and India—A Souvenir.

The Photo Unit of the Division helps in getting up exhibitions on the activities of the various Ministries. During 1958, the Unit assisted in the display of photographic enlargements in various pavilions of the 'India 1958' Exhibition. Black-and-white coloured enlargements on the development activities of the Plan are also supplied to exhibitions in India and

abroad.

ADVERTISING AND VISUAL PUBLICITY

While in the States advertising and visual publicity is undertaken by the Departments of Information and Publicity, at the Centre this responsibility rests with the Directorate of Advertising and Visual Publicity in the Ministry of Information and Broadcasting. The Directorate handles

campaigns for all the Ministries (excepting Railways).

In 1958, the Directorate placed 552 display and 4,552 classified advertisements totalling 39,603 insertions. Major press advertising campaigns released during the year were for the Five Year Plan, the Metric System of Weights and Measures, Small Savings Schemes, Tourism, Handloom Fabrics, Handicrafts, Food and Agricultural development and recruitment to Defence Services. The Five Year Plan publicity campaign aimed at bringing about greater public participation through a series of exhortations to the individual citizen with the slogan "Help the Plan—Help Yourself".

With the growing accent on visual publicity more intensive use is being made of posters, broadsheets, folders brochures, handbills and pictorial calendars as well as out-door media, such as hoardings, neon signs, display panels, advertising films and cinema slides. In 1958, the Directorate produced 24.8 million copies of posters, folders, broadsheets and other printed material for extensive distribution right down to the village level. The material covered campaigns mentioned under Press advertising and

also the family planning and the anti-untouchability campaigns.

The Exhibition Wing of the Directorate and its 7 Regional Units organised 91 exhibitions in 1958 in the urban and rural areas all over the country. It also put up the 'Indian Panorama' pavilion in the 'Indian P

1958' Exhibition.

Annual State Awards for Excellence in Printing and Designing of Books and other Publications have been instituted. These Awards are meant to recognise the progress made in the techniques of printing and designing and to encourage higher standards in this field.

CHAPTER XVI

ECONOMIC STRUCTURE

India is a country with a developing economy, rich in natural resources and man-power. Her resources, human as well as material, are capable of fuller exploitation and more intensive utilisation. Despite an 11 per cent rise since 1948-49, the per capita income remains low (Rs. 261 in 1955-56*). The Indian economy is still predominantly agricultural; nearly half of the country's national income is derived from agriculture and allied activities which absorb nearly three-fourths of its working force (about 15.2 crores in 1956 inclusive of earning dependents). Since independence it has been the aim of national planning to accelerate the pace of industrial development and at the same time to increase productivity in agriculture. Net investment in the economy has been rising in recent years. Yet in 1954-55 it amounted to only 7.5 per cent† of the national income.

According to the National Sample Survey (April-September 1952)** results, over three-fifths (61.3 per cent) of the consumer expenditure was on food articles. In the rural areas this percentage was even higher (64.1 per cent). Other important items of expenditure were clothing (7.7 per cent), fuel and lighting (5.5 per cent), ceremonials (5.6 per cent) and services (5.6 per cent). Education, conveyance, amusements, furniture and footwear accounted for only small fractions of consumer expenditure.

NATIONAL AND PER CAPITA INCOMES

The national income of India for 1955-56 was computed at Rs. 9,990 crores compared to Rs. 8,650 crores in 1948-49. The per capita income in 1955-56 was reckoned at Rs. 260.8 compared to Rs. 246.9 in 1948-49. The national income in 1955-56 was 15.5 per cent higher than in 1948-49 at current prices, while in real terms, that is, assuming a constant price level, the rise in national income during this period (1948-49 to 1955-56) was 21.2 per cent. The per capita income in 1955-56 was nominally 5.6 per cent higher than in 1948-49, while, at 1948-49 prices, the rise in per capita income amounted to 10.8 per cent. Table 70 shows the national and per capita incomes at current and constant prices between 1948-49 and 1956-57. The figures for 1956-57 are preliminary estimates and subject to revision.

TABLE 70

Year		Nationa (in crores	income of rupees)		a income upes)

1956-57 (prelimi		11,410	11,010	294.3	284.0

^{*} The per capita income in 1955-56, though nominally lower than in 1953-54 (Rs. 281), was higher in real terms, as shown in table 70.

[†] On the basis of the revised figures of investment given later in this chapter.

** The details of the consumer expenditure patterns in villages, towns and cities, according to the third round of the National Sample Survey (August-November 1951), are given later in this chapter. The results of the first round regarding rural households only are also given.

The index numbers of national and per capita incomes for 1950-51, 1955-56 and 1956-57 (preliminary), with 1948-49 as base, are given below:

TABLE 71

LIVELIHOOD PATTERN

Out of the total population of 3,566 lakhs*, according to the 1951 Census, 2,143 lakh persons (or 60.1 per cent) were classified as 'non-earning dependents', consisting mainly of women and children who did not take part in procuring their own livelihood. Of the rest, 'earning dependents' accounted for 379 lakh persons (10.6 per cent) and the balance of 1,044 lakh persons (29.3 per cent) were self-supporting persons. Of the last category of persons, about 710 lakhs (68.1 per cent) were 'agriculturists' and 334 lakhs (31.9 per cent) 'non-agriculturists'.

Out of every 100 Indians (including their dependents), 47 were mainly peasant-proprietors, 9 mainly tenants, 13 landless labourers, 1 a landlord or rentier (agricultural), while 10 were engaged in industries or other non-agricultural production, 6 in commerce, 2 in transport and 12 in the services and miscellaneous professions. Table 74 shows the non-earning dependents and earning dependents among the two major categories and eight subcategories of the livelihood pattern.

TABLE 74

^{*} Records containing information for about 3 lakh people in the Punjab were destroyed by fire. The State of Jammu and Kashmir and the Part B Tribal areas of Assam were also not covered by the Census (See Chapter I).

WORKING FORCE

Of the country's population estimated in 1950-51 at 35.93 crores, 14.32 crores made up its working force. The distribution of the working force among the various occupations is given in the following table.

TABLE 75

DISTRIBUTION OF WORKING FORCE BY OCCUPATIONS (1950-51)*

PRINCIPAL CROPS

In 1950-51, the gross value of all agricultural commodities produced in the country was Rs. 4,866 crores, and the net value Rs. 4,112 crores. The values of the principal crops were as follows.

TABLE 76

VALUE OF OUTPUT OF PRINCIPAL AGRICULTURAL COMMODITIES (1950-51)

(In crores of rupees) 1.199 Arhar Rice 83 Wheat 334 Bajra 81 Barley Sugarcane 305 80 216 Groundnut Coconut 76 Fowar 194 Tobacco 71 147 Gram Rape and mustard 69 Cotton 113 Straw 591 Chillies 68

Data given in this and the following sections are derived from the Final Report of the National Income Committee, (Delhi, 1954). Corresponding set of figures for a later year is not yet available.

PRINCIPAL INDUSTRIES

The net contribution of the manufacturing industries to the national income was computed at Rs. 513.4 crores for 1950. It consisted mainly of the following:

TABLE 77

NET VALUE OF OUTPUT OF MANUFACTURING INDUSTRIES (1950)

(In crores of rupees)

Cotton textiles	107.9	Vegetable oils	11.7
Tea manufacturing	69 3	Tobacco products	10.5
Jute textiles	46 6	Rubber and rubber manufacturing	10.1
Sugar	35.8	Cement	8.5
General and electrical engineering Iron and steel	29 4 26.9	Automobiles and coach building	7.4
Chemicals	14.0	Paper and paper board	6.6

Of the sum of Rs. 65.12 crores, which represented the income from banking and insurance during 1950, Rs. 36.29 crores were from banks, Rs. 22.85 crores from insurance and the remaining Rs. 5.98 crores from cooperative societies.

PROFESSIONS AND THE LIBERAL ARTS

Out of Rs. 468 crores, which were contributed to the total national income in 1950-51 by the professions and liberal arts, Rs. 116 crores were derived from medical and health services, Rs. 69 crores from educational services, Rs. 66 crores from the letters, arts and science, etc., Rs. 32 crores from legal services, Rs. 47 crores from religious and charitable services, and Rs. 37 crores from sanitary services, etc. Of the sum of Rs. 130 crores, which represented the income from domestic service, Rs. 114 crores were earned by cooks, gardeners and other domestic servants and Rs. 16 crores by motor drivers and cleaners.

Out of the income of Rs. 408.3 crores from house property in 1950-51, Rs. 212.8 crores were from houses in urban areas and the remaining Rs. 195.5 crores from those in rural areas.

PER CAPITA OUTPUT

In 1950-51, the net output per employed person was valued at Rs. 670 for the whole of the national economy. The output per person in each sector of the economy was as follows:

TABLE 78
NET OUTPUT PER EMPLOYED PERSON (1950-51)

	Net output (in crores of rupees)	Number of persons engaged (in crores)	Net output per employ- ed person (in rupees)
Agriculture	4,890	10 36	500

Domestic service	130	0.29	400
Net domestic product at factor cost	9,550	14.32	670

CAPITAL FORMATION

According to a provisional estimate, the amount of fixed capital formation in India during 1955-56 was Rs. 880 crores or about 8.8 per cent of the national income. Of this, Rs. 416 crores were in the private sector and Rs. 464 crores in the government sector. The table below gives an analysis of the domestic fixed capital formation in India between 1948-49 and 1955-56.

TABLE 79
ESTIMATES OF DOMESTIC FIXED CAPITAL FORMATION

(in crores of rupees)

UNEMPLOYMENT

A precise estimate of the number of the unemployed in the country as a whole is still to be made. Employment exchange statistics cover mainly urban areas, and as yet only a portion of the unemployed actually register themselves with the exchanges even where these exist.

According to a National Sample Survey conducted in 1953, 7.10 per cent of the population of the city of Calcutta were unemployed. According to another sample survey conducted in that year, 2.59 per cent of the population or 7.44 per cent of the labour force were unemployed in towns with a population of 50,000 and above, excluding the four big cities of Calcutta, Bombay, Madras and Delhi. The latter survey also revealed that 8.48 per cent of the population in these towns were underemployed, including 3.17 per cent "severely underemployed." The total number of the severely underemployed in the urban areas for the country as a whole, on this basis, works out at 27.4 lakhs. According to the Agricultural Labour Enquiry, the number of the rural unemployed in 1950-51 was about 28 lakhs.

On the basis of the available data, the Planning Commission estimated that early in 1956 there were, roughly speaking, 53 lakh unemployed persons in the country, 25 lakhs in the urban areas and 28 lakhs in the rural areas.

A study, by the National Employment Service of the Ministry of Labour and Employment, of trends in the number and types of employment seekers during 1953-57, shows that of the seven occupational groups of applicants on the Live Register of the Employment Exchanges, the 'unskilled services' category was the largest single group, constituting about 50 per cent of the

^{*} Preliminary.

total number, and the 'clerical services' group was the second largest. The other categories, in order of magnitude, were: skilled and semi-skilled services, educational services (teaching), domestic services (manual work in public institutions such as hospitals), and industrial supervisory services. During 1953-57, the rate of increase in placements was the greatest in regard to the educational services group, followed by the clerical group. There was practically no increase in the level of placements of skilled and semi-skilled personnel. There was a slight fall in the number of unskilled persons placed every month. On the other hand, applicants belonging to the industrial supervisory group were absorbed in employment fairly readily; the percentage of vacancies cancelled due to non-availability of suitable applicants in this category in 1957 was as high as 40 as against 12 in the case of all the other categories together. In the same year the percentage of vacancies in the skilled and semi-skilled categories cancelled due to shortage was 19. The following table gives the occupational distribution of applicants on the Live Register of the Employment Exchanges as at the end of December 1958.*

TABLE 80
OCCUPATIONAL CATEGORIES AMONG APPLICANTS ON THE LIVE
REGISTER OF THE EMPLOYMENT EXCHANGES (DECEMBER 1958)

	Number	Percentage to total
Industrial supervisory services Skilled and semi-skilled services Clerical services Educational services Domestic services Unskilled services Others	8,923 88,665 3,08,203 56,157 43,823 6,20,249 57,279	0.8 7.5 26.1 4.8 3.7 52 4 4.8
Total	11,83,299	100.0

A study undertaken by the Manpower Division of the Directorate of Employment Exchanges, Ministry of Labour and Employment, of the pattern of unemployment among graduates as on May 15, 1957, showed that graduate unemployment was more widespread in West Bengal, U.P., Bombay and Delhi than in the other States. The highest incidence of unemployment among women graduates was in Kerala. About 93 per cent of the unemployed graduates seeking employment were men and about 7 per cent women. 48.5 per cent of the unemployed graduates were B.A.s, 22.7 per cent B.Sc.s and 12.8 per cent B.Com.s. Unemployment was relatively higher among the holders of commerce degrees than among the holders of arts and science degrees.

PATTERN OF RURAL ECONOMY

According to the first round of the National Sample Survey, conducted between October 1950 and March 1951, a rural household in India consisted, on an average, of 5.21 persons. A little over a fourth of these (28.1 per cent) were earner s, about a sixth (16.6 per cent) were earning dependents and more than half (55.3 per cent) non-earning dependents. According to the 1951 census, however, the rural household was made up, on an average, of 4.91 persons. The annual consumer ex-

^{*} For the number on the Live Register at the end of each year, please see the chapter on 'Labour'.

penditure in the rural areas was, according to the sample survey, about Rs. 220 per person during 1949-50. As against this, the per capita income for the country as a whole was computed at Rs. 253.9 in the Final Report of the National Income Committee. The average consumer expenditure per person was the highest in North-West India (Rs. 314) and the lowest in Central India (Rs. 198).

Expenditure Pattern

Two-thirds (66.3 per cent) of the expenditure of an average household in the rural areas, taking the country as a whole, was on food, about a tenth (9.7 per cent) on clothing and the remaining one-fourth (24.0 per cent) was distributed under other heads of expenditure. The expenditure on education, newspapers and books was Rs. 1.6 per person per year (constituting 0.7 per cent of the per capita expenditure) and that on medical services and medicines Rs. 2.8 per person per year (1.27 per cent). Together, education and health services accounted for just over 2 per cent of the per capita expenditure. Fuel and lighting absorbed 3.25 per cent, ceremonials 7.21 per cent and the remaining one-eighth of the total expenditure was on other amenities.

The average expenditure on clothing in the rural areas was about Rs. 21 per person for the whole of India. Mill-made products accounted for as much as 74 per cent of the expenditure on clothing, handloom products for 20.4 per cent, khaddar for 2.81 per cent and woollen and other products for 2.74 per cent. Expenditure on ceremonials was Rs. 15.8 per person per year for the whole of India, and this formed 7.2 per cent of the total expenditure.

On the basis of the second round of the National Sample Survey, conducted between April and June 1951, households in the rural areas were classified according to their monthly expenditure. The proportion of each class to the total number of households is indicated in the following table:

TABLE 81

PERCENTAGE DISTRIBUTION OF RURAL HOUSEHOLDS BY SIZE OF MONTHLY EXPENDITURE (APRIL-JUNE 1951)

penditure per month (in rupees)	Proportion of total number of households (percentage)
Up to Rs. 50	20.4
51-100	31.2
101—150	21.1
151200	10.4
201-300	9 5
301-400	3.6
401500	1.5
501600	0.6
601800	1.0
8011,000	0.3
Over 1,000	0.4
Total	100.0

The approximate value of rural investment for the year June 1950-May 1951, according to the same Survey, was Rs. 27.74 per household, about half of which was spent on the construction or improvement of houses, wells, tanks, bunds, etc., and about a third on the improvement of land. The annual capital formation in rural areas was estimated at Rs. 166 crores.

Pattern of Land Ownership

According to the eighth round of the National Sample Survey (July 1954—March 1955), there were about 6.5 crore households residing in the rural areas of India. The estimated area owned by rural households was about 31 crore acres which formed about 38 per cent of the geographical area and 61 per cent of the topographically usable area of India. What remained belonged to Government, urban households, and non-household bodies.

A little over one-fifth, that is, about one and a half crores of households did not own any land. About a quarter of all rural households had land less than one acre in area. A little less than half of the rural households had thus either no land or owned less than one acre, their share being only a little more than one per cent of the land owned by all rural households. About three-fourths of all the households had either no land or less than 5 acres and their share was about one-sixth of the area. At the other end, about one-eighth of the households had more than 10 acres each with a total share of about two-thirds of the whole area, and about one per cent of the households owned more than 40 acres each and together accounted for one-fifth of the area.

The estimated average area owned, for all households, was about 4.7 acres; if those who had no land are excluded, the average would rise to about 6 acres. Out of about 6.5 crores of households about one lake households had more than 100 acres each; but the number owning more than 250 acres would probably be a few thousands only.

Most of the land was held under proprietary rights with only about 2 per cent of tenure holders and 14 per cent of occupancy tenants. The total area leased out was about 14 per cent of the area owned.

Table 82 shows the percentage distribution of total land owned under different ownership rights in the whole of rural India and in rural areas of each zone.

TABLE 82

PATTERN OF LAND OWNERSHIP (July 1954-March 1955)

		Percentage of total area owned by

Table 83 shows the average area owned by a rural household in India and in each of the population zones. Households owning land below the average size (including those with no land) are shown as a percentage of the total rural households. Also, the area owned by such households is shown as a percentage of the total area under rural ownership.

TABLE 83

AVERAGE AREA OWNED BY A HOUSEHOLD

(Figures in brackets have been obtained by omitting the households ewning no land or owning less than 0.005 zere)

Zone		Average area owned (acres)	Percentage of households owning land below the average	Percentage of area owned by households owning land below the average
North India		3.5	68	19
		(3 8)	(67)	(21)

TOTAL TOOL AIRCON	••	(9.3)	(72)	(21)
All India	••	4.7	73	16
		(6.1)	(72)	(21)

Among all households in rural India 63.5 per cent did not lease out any land, 12.5 per cent leased out partly their own land and 2 per cent leased out fully their own land. The remaining 22 per cent of households were landless.

Ninety per cent of households in rural India were operating individually and in some population zones the percentage of households operating individually was even more than 90. In the whole of India 10 per cent of the households possessed land jointly with others, 6 per cent were operating purely jointly and the remaining 4 per cent were operating both jointly and individually. Only 8 per cent of the total area was under joint management. For East, South and West India the percentage for joint management was about 6, whereas for the remaining zones it was about 10.

Pattern of Land Holding

In the second round of the National Sample Survey, households in the rural areas were also classified according to the size of land under their occupation. (See table below.) Here a holding does not refer only to land actually owned; it stands for the net area of land owned and land leased in minus land leased out.

TABLE 84

PATTERN OF LAND HOLDING (April-June 1951)

Size of holding (acres)	Percentage of total number of households for which full records were available	Percentage of total cropped area managed by the households for which full records were available					
Nii 0.01 — 2.49 2.50 — 4.99 5.00 — 7.49 7.50 — 9.99 10 00 — 14.99	5.9 49 2 14.3 9.5 4.8 6.1	7 6 11 1 11 4 7.2 13 1

Table 85 shows the pattern of land holding according to the eighth round of the National Sample Survey (July 1954-March 1955).

TABLE 85
PATTERN OF LAND HOLDING (July 1954-March 1955)

Size of holding (acres)	Percentage of total number of households	Percentage of total	
Nil	6.3		
0.01 — 2.49 2.50 — 4.99	48.5 15.9	5.9 10.9	
5.00 - 7.49	9.3	10.5	
7.50 — 9.99	5.6	9.1	
10.00 - 14.99	5.5	12 6	
15.00 — 24.99	4.9	17.7	
25.00 and above	4.0	33.3	
Total	100.0	100.0	

According to the eighth round of NSS, the average size of a household operational holding was 5.34 acres in the whole of rural India, and it lay between 8 and 10 acres in West India, Central India and North-West India, and between 3½ and 3½ acres in North India, East India and South India. More than 65 per cent of households in each of the population zones had household operational holdings below the average size and their total share of the entire operated area ranged from 14 to 21 per cent.

Consumer Expenditure Patterns in Villages, Towns and Cities

According to the third round of the National Sample Survey, the consumption expenditure per person per month in the villages (including the imputed value of supplies obtained in kind) was Rs. 24.22 during August-November 1951; in the towns it was Rs. 31.55 and the average for Calcutta, Bombay, Madras and Delhi Rs. 54.82. The average expenditure per person for the country as a whole was Rs. 25.70 per month.

The patterns of consumption in the villages, towns and cities were also different. While about 40 per cent of the expenditure in the villages was on foodgrains, the proportion for the towns was 22 per cent and for the cities 11 per cent. The expenditure on all food items was 66 per cent of the total expenditure in the villages compared to 55 per cent in the towns and 46 per cent in the cities. The actual expenditure on food in absolute terms was, however, higher in the cities than in the towns and villages. The expenditure on fuel and lighting was the lowest in the villages and the highest in the cities, although their proportion to the total expenditure was more or less the same for all the three categories.

The proportion of expenditure on clothing to total expenditure was also nearly the same (just above 6 per cent) for the three categories, whereas the expenditure on clothing, in absolute terms, was the highest in the cities.

The expenditure on the rest of the items, particularly on education, services, land and taxes, showed a gradual rise as one proceeded from the villages through the towns to the cities. The pattern of expenditure for the country as a whole approximates to that in the villages because of the preponderance of villages in the country.

About 43 per cent of the total consumption in rural areas was obtained in kind and 57 per cent purchased in cash. The proportion of the part obtained in kind was high for articles such as foodgrains, pulses, milk and milk products and fuel and light, and varied between 61 per cent and 78 per cent. The proportion for all food items taken together was about 56 per

cent. Against this, only 11 per cent of the total value of consumption in the urban areas was obtained in kind, while the remaining 89 per cent was against cash. Here again, the proportions for non-cash consumption were relatively high in the case of foodgrains, pulses, milk and milk products and fuel and lighting. For the country as a whole, during August-November 1951, nearly 40 per cent of the value of consumption was obtained in kind.

PRICES

The movement of prices in India over recent years may be seen from the following table which shows the index numbers of wholesale prices compiled by the office of the Economic Adviser, Ministry of Commerce and Industry, Government of India (revised series; base: 1952-53=100). The index for January 1959 for all commodities stood at 112.3.

TABLE 86

The Government continued their efforts during 1957-58 to achieve price stability, which is vital to the success of the Plan. Fiscal and credit policies were further reinforced to restrain demand, particularly of a speculative character, from traders. While the import policy has been in general restrictive, special arrangements have been made to obtain from abroad supplies of foodgrains. Arrangements were also made to distribute the imported grains through a large number of fair price shops all over the country. Sizeable quantities of imports under P. L. 480 and some quantities on concessional terms from Canada and under a five-year agreement with Burma were received. The quantity of foodgrains thus imported in 1957 was 35.8 lakh tons as compared to 14.2 lakh tons in 1956. Various other measures such as the formation of zones for wheat and rice, fixation of maximum prices, procurement in selected areas, issue of identity cards and registration of wholesalers in some States were undertaken in order to hold in check prices of foodgrains and to prevent their hoarding. Because of the foreign exchange situation, the imports of foodgrains have to be kept down to a feasible minimum, and the needs of the country met more from increased domestic production. An increase in marketable surpluses, curbs on hoarding or wasteful consumption and suitable controls on distribution constitute the main elements of the food policy. A scheme for the introduction of state trading in foodgrains is now under consideration.

In the case of certain industrial raw materials like cotton and oilseeds, price restraint was also brought about by the Forward Markets Commission. In the case of jute goods, however, the problem was one of arresting the decline in prices and action in this behalf was taken by the trade body, namely, the Indian Jute Mills Association, which advised its member mills, towards the end of February 1958, not to sell their goods below certain specified minimum prices.

Consumer Prices*

As a consequence of the rise in prices during the period, the all-India working class consumer price index rose by 5.3 per cent between December 1957 and December 1958. The following table shows the working class consumer price indices between 1950-51 and 1957-58 as well as for the months of December 1957 and March, June, September and December 1958.

TABLE 87

The term "cost of living index" was recently replaced by the term "consumer price index" in conformity with international nomenclature.

†Provisional.

CHAPTER XVII

PLANNING

In his pioneering work, Planned Economy for India (1934), M. Visvesvaraya advocated the necessity for planning and also laid down a ten-year programme of planned economic development for the whole of India. In 1938 a National Planning Committee was set up by the Indian National Congress to inquire into the possibilities of planned economic development in India and to suggest practicable schemes for this purpose. The Committee issued a questionnaire and, at the end of World War II, produced a series of studies on the subject.

In June 1941, a number of Reconstruction Committees were set up by the Government of India to deal with various aspects of post-war reconstruction, and a Department of Planning and Development was created in July 1944. The Provincial Governments were also instructed in the same

year to prepare their plans for post-war development.

Among the non-official plans formulated during World War II were: (i) the Bombay Plan, drafted by a group of economists and industrialists, mostly from Bombay; (ii) the People's Plan, drafted by M. N. Roy on behalf of the Post-War Reconstruction Committee of the Indian Federation

of Labour; and (iii) the Gandhian Plan, drafted by S. N. Agarwal.

After independence, the Planning Commission was set up by the Government of India in March 1950 to prepare a plan for the "most effective and balanced utilisation of the country's resources." In July 1950, the Commission was called upon to prepare a six-year plan for the economic development of the country, which was later incorporated in the Colombo Plan. In July 1951, the Planning Commission issued a draft outline of the First Five-Year Plan covering the period April 1951 to March 1956 for the "widest possible public discussion". In December 1952, the final version of India's First Five-Year Plan was submitted to Parliament.

Objectives

The central objective of planning was defined as initiating "a process of development which will raise living standards and open out to the people new opportunities for a richer and more varied life". Economic planning has to be viewed as "an integral part of a wider process aiming not merely at the development of resources in a narrow technical sense, but at the development of human faculties and the building up of an institutional framework adequate to the needs and aspirations of the people".

The long-term objective is to double the per capita income and to raise comsumption standards by a little over 70 per cent by 1977.* During the First Plan period between 1951 and 1956, the national income was to go up from about Rs. 9,000 crores to about Rs. 10,000 crores, a rise of about 11 per cent. It was visualised that the rate of saving as a proportion of the national income would have to go up from 5 per cent in 1950-51 to 63 per

cent in 1955-56, 11 per cent in 1960-61 and 20 per cent in 1967-68.

FIRST FIVE-YEAR PLAN

The First Plan being essentially one of preparation or laying the

^{*}On certain more optimistic assumptions it was later calculated that the national income might be doubled by 1967-08 and the per capita income doubled by 1973-74. (Second Five-Tear Plan, May 1956). The investment coefficient, it was assumed in this later model, would go up from about 7 per cent in 1955-56 to about 11 per cent in 1960-61, 14 per cent by 1965-66, 16 per cent by 1970-71 and a maximum level of 17 per cent by 1975-76.

foundation for more rapid development in the future, its targets of investment and of increases in production were modest compared with what will have to be achieved within the next twenty years or so. Initially, an outlay of Rs. 2,069 crores was proposed; it was later raised to Rs. 2,356 crores. The distribution of expenditure proposed for the development programme in the public sector during the First Plan period is shown in table 90.

Agricultural development, along with irrigation and the generation of electric power, had the highest priority during the First Plan period. The development of transport and communications also received high priority. This inevitably limited the investment by public authorities in industries. Industrial expansion in the First Plan period was, therefore, left largely to

private initiative and resources.

period, was as follows: TABLE 88

The distribution of actual outlay by major heads during the First Plan

ACTUAL OUTLAY (FIRST PLAN): DISTRIBUTION BY MAJOR HEADS

		Actual outlay (in crores of rupees)	Percentage of outlay
Agriculture and Community Development		299	14.8
Irrigation and Power		585	29.1
Industries and Mining		100	5.0
Transport and Communications		532	26.4
Social Services		423	21.0
Miscellaneous	• •	74	3.7
Total		2,013	100.0

The actual outlay has since been computed at Rs. 1,960 crores, the figure of Rs. 2,013 crores given in the above table being based on revised estimates for the fifth year.

Financial Resources

The position in regard to the financing of the outlay of Rs. 1,960 crores was as follows:

	(In crores	of rupees)
(i)	Resources made available out of revenue account	
` '	(inclusive of railways' contribution)	752
(ii)	Loans from the public	205
(iii)	Small savings and unfunded debt	304
(iv)	Other miscellaneous receipts on capital account	91
(v)	Resources raised from domestic budgetary	
` '	sources (i to iv)	1,352
(vi)	External assistance	188
	Resources raised through deficit financing	420
	Total	1,960
	4 **	

Targets and Achievements

Both the short-term and long-term objectives of the First Plan were by and large achieved. There was an increase in domestic production and the economy was strengthened. Inflationary pressures were practically eliminated. The price-level at the end of the Plan period was 15 per cent lower than at its commencement.

National income (at constant prices) increased by 18.4 per cent from about Rs. 8,850 crores in 1950-51 to about Rs. 10,480 crores* in 1955-56, showing a larger rate of increase than was originally anticipated. The per capita income over the same period, also at constant prices, recorded an

^{*} Revised figure.

increase of 10.8 per cent from Rs. 246 to Rs. 274(a); while per capita consumption increased by about 8 per cent. The rate of investment in the economy as a percentage of national income is estimated to have risen from about 5 per cent in 1950-51 to over 7 per cent in the last year of the Plan.

The targets and achievements in different sectors of the economy

are shown in the following table.

TABLE 89 TARGETS AND ACHIEVEMENTS UNDER FIRST PLAN*

⁽a) Revised figure.
*Table 93 gives the targets and achievements during the First Plan (alongside the targets for the Second Plan) in greater detail. The figures for achievements in this latter table, being based on an earlier estimate (Second Five Year Plan, May 1956), in some cases differ from those given above.

[†]Base 1949-50.

^{**1954-55} figures (figures for 1955-56 are not available).

SECOND FIVE-YEAR PLAN

Objectives

The Second Five-Year Plan was submitted to Parliament on May 15, 1956. The main objectives are: (i) an increase of 25 per cent in the national income; (ii) rapid industrialisation with particular emphasis on the development of basic and heavy industries; (iii) a large expansion of employment opportunities; and (iv) a reduction of inequalities in income and wealth and a more even distribution of economic power.

Outlay and Allocations

The proposed development outlay of the Central and State Governments amounted to Rs. 4,800 crores as compared with the target of Rs. 2,356 crores and actual outlay of Rs. 1,960 crores under the First Plan. (The figures are exclusive of the contributions in cash or kind made by the people towards the execution of local development works.) The distribution of the outlay by major heads of development is shown in the table below.

The distribution of the outlay under major heads of development is shown for the Centre and the States separately in the following table.

TABLE 91
DISTRIBUTION OF PLAN OUTLAY

(In crores of rupees)

	Centre	States*	Total	Invest- ment out- lay	Current outlay
Agriculture and Community Development Irrigation and Power Industry and Mining Transport and Communications Social Services Miscellaneous	65 105 747 1,203 396 43	502 808 143 182 549 56	568† 913 890 1,385 945 99	338 863 790 1,335 455 19	230 50 100 50 490 80
TOTAL	2,559	2,240	4,800†	3,800	1,000

Of the total outlay, roughly Rs. 3,800 crores represent investment, that is, expenditure on the building up of productive assets, and Rs.

^{*}Including Andaman and Nicobar Islands, NEFA and Pondicherry.

fincludes the unallocated portion of Rs. 1 crore for NES and Community Projects in the States.

1,000 crores represent what may broadly be called current developmental expenditure.

The likely level of private investment over the Second Plan period was placed at Rs. 2,400 crores distributed as follows.

TABLE 92
PRIVATE INVESTMENT (SECOND PLAN)

(In crores of rupees)

In the First Plan, the total investment in the economy was estimated roughly at about Rs. 3,100 crores, the ratio of public to private investment being 50:50. In the Second Plan, the target of investment in the two sectors combined is Rs. 6,200 crores, the ratio of public to private investment being 61:39.

Targets

The targets of production and development, in physical terms, in respect of some important items are shown below.

TABLE 93

MAIN TARGETS OF PRODUCTION AND DEVELOPMENT

Since the above targets of agricultural production were considered inadequate for meeting the increasing demand for food and raw materials expected to be generated by the implementation of the Second Plan, these targets were subsequently revised upwards (as shown below), although the allocation of resources remained unchanged.

TABLE 94

The full-time employment likely to be created over the Second Plan period in sectors other than agriculture was estimated at 80 lakhs. Besides, schemes of development such as irrigation and land reclamation would reduce under-employment and also absorb new persons to some extent. Altogether the Plan envisaged a sufficient increase in the demand for labour to match the increase in the labour force estimated at 100 lakhs during the Second Plan period.†

Financial Resources

Table 96 indicates how the Second Plan was to be financed.

^{*} The figures in this table are as given in Second Five-Tear Plan (May 1956).

†The revised target of full-time additional employment in non-agricultural sectors is 65 lakhs. Together with additional employment in agriculture estimated at 15 lakhs, this would not be enough to absorb the growth of labour force during the Plan period.

TABLE 96 ESTIMATES OF RESOURCES (SECOND PLAN)

(In crores of supees)

800

1,200

400

4,800

In arriving at the figure of Rs. 450 crores under additional taxation, the recommendations of the Taxation Enquiry Commission were taken into account and it was assumed that steps would be taken to implement these as early as possible after the commencement of the Plan. The Central and State Governments were expected to raise this amount between them in equal amounts.

The estimate of Rs. 700 crores of borrowing from the public assumed that the annual receipts from this source would, on an average, be considerably higher than they had been so far. Similarly there will have to

be a substantial stepping up of small savings collections.

Gap to be covered by additional measures to raise domestic

The railways were expected to contribute Rs. 150 crores to their Rs. 900-crore programme, both through selective adjustments in rates and freights and the growth of traffic. In addition, the railways have to make, in the Plan period, a contribution of Rs. 225 crores for current depreciation, which has not been included in the Plan.

The Plan also took credit for Rs. 800 crores of external resources. the First Plan period, external finance amounting to Rs. 298 crores was made available to India for programmes of development in the public sector, of which less than Rs. 200 crores was utilised. The balance of about Rs. 100 crores was thus available for utilisation in the Second Plan period. In addition, arrangements had been made for credits from the USSR and UK Governments and British bankers for a net amount of Rs. 76 crores* to finance the steel projects. As for the private sector, Rs. 22 crores were already available as the undisbursed portion of the loans made by the World Bank to the Indian Iron and Steel Company, the Tata Hydroelectric Company and the Industrial Credit and Investment Corporation of India.

Rs. 1,200 crores represent the outside limit of deficit financing. Against this must be set off the drawing down of sterling balances by Rs. 200 crores. The remaining Rs. 1,000 crores represent the net addition to currency in response to the Government's budgetary operations, which may be expected also to result in a secondary expansion of bank credit. Any adverse repercussions of deficit financing will have to be dealt with by an appropriate

After allowing for repayment of Rs. 20 crores of the USSR's credit of Rs. 63 crores.

central banking policy, through judicious recourse to quantitative and qualitative controls on credit including variation in reserve ratios, by the building up of adequate stocks of essential goods like food and clothing, through taxes on excess profits, windfall gains, and on excess consumption and physical controls including allocations and rationing of scarce resources.

Investment in the Private Sector

The investment requirements of the private sector were estimated at Rs. 2,400 crores. Of this, a sum of Rs. 720 crores was proposed to be utilised for industrial development (excluding mining, electricity generation and distribution, plantations and small-scale industries), Rs. 570 crores on new investments and Rs. 150 crores on replacements and modernisation. This, however, includes Rs. 55 crores provided for the National Industrial Development Corporation's programme. Against the balance of Rs. 665 crores the resources of the private sector were estimated at Rs. 620 crores as follows:

TABLE 97

EPT refunds, etc. 61-64TOTAL 340 620

Foreign Exchange Position

The external payments position of the country has been under strain since the beginning of the Second Plan,* owing mainly to a rise in imports both on private and public account. The increase in imports during 1956-57 mainly arose out of the requirements of development projects under the Second Plan, although the following other factors were also responsible: (i) increased defence expenditure, (ii) larger imports of foodgrains, (iii) increased requirements of raw materials, components, etc., (iv) higher imports of consumer goods, and (v) increase in freight rates and prices. To reduce the strain on the foreign payments position, a progressively restrictive policy on imports has been adopted and steps taken to expand exports. The foreign exchange costs of projects in the Second Plan have also increased as a result of higher prices abroad of developmental commodities.

^{*}The foreign assets of the Reserve Bank declined by Rs. 221 crores during 1956-57 and Rs. 260 crores during 1957-58. The rate of drawal on these reserves declined considerably in the first half of 1958-59, whereas in the following quarter there was a small increase. Between April 1956 and February 1959 the reserves dropped by Rs. 535 crores in all, from Rs. 746 crores to Rs. 211 crores.

Gore Projects

To meet the situation, the provision of foreign exchange for various uses is being regulated according to a strict order of priority. Besides making foreign exchange available for the maintenance of the economy and for defence, the first priority is being accorded to the execution of the 'core' of the Plan, that is, steel plants, coal, railways, ports and specified power projects.† Priority is also being given to projects which have progressed substantially towards completion. Outside these, no new commitments in terms of foreign exchange are being undertaken except on deferred payment terms or on the basis of new foreign investment or loans. It was calculated towards the end of 1957 that fresh external assistance of the order of Rs. 700 crores would be needed on Government and private account to see through the 'core' projects as well as the projects in an advanced stage of completion.

Reappraisal

The substantial rise in commodity prices since the Second Plan went into operation would have meant a marked stepping up of the outlay on the Plan in financial terms. However, in view of the strain on the resources, both external and domestic, imposed by the Plan, the National Development Council at its meeting held in May 1958 decided that the ceiling for total outlay, in financial terms, should remain unaltered at Rs. 4,800 crores. Further, on a reassessment of resources, it was decided to split the Plan outlay into two parts. Part A of the Plan, involving an outlay of Rs. 4,500 crores, "would represent the level of outlay up to which, on the present assessment of resources, commitments might be entered into". It would comprise, besides projects and programmes directly related to increase in agricultural production, 'core projects' and projects which had reached an advance stage. The remaining schemes were to be included in Part B of the Plan, which will be undertaken to the extent resources became available. But even the implementation of Part A would require an intensified effort to mobilise resources by additional taxation and loans.

The revised Plan allocations corresponding to this final ceiling are as follows:

TABLE 98

REVISED ALLOCATION OF OUTLAY (SECOND PLAN)

(In crores of rubees)

				(In crore:	of supees)	
	Revised allocation (to accommodate higher cost of some projects within the ceiling of Rs. 4,800 crores)	allocation (to accom- modate Percentage of total outlay			Part A	Percentage of total outlay

Resources During Next Two Years

Table 101 gives estimates of resources for the Centre and the States for the periods 1956-59 and 1959-61 and the total available resources, on present estimation, during the Second Plan period.

Thus, on present expectations, the Centre and the States are likely to be able to provide in the next two years resources of the order of Rs. 1,754 crores, whereas the requirements for reaching a total of Rs. 4,500 crores

over the two years amount to Rs. 2,034 crores. There is thus a shortfall of Rs. 280 crores—Rs. 198 crores at the Centre and Rs. 82 crores in the States.

After considering the question of the gap in resources in relation to wider issues affecting the economy, the National Development Council decided in November 1958 (i) that the State should take over the wholesale trade in foodgrains; (ii) that emphasis should be placed on the organisation of village co-operatives in all States to shoulder the task of rebuilding the rural economy; (iii) that determined efforts should be made both at the Centre and in the States to achieve economies in construction costs and to raise additional resources; and, finally, (iv) that the conclusion reached in May 1958 to work up to a level of outlay of Rs. 4,500 crores during the Second Plan period should be maintained.

Deficit Financing

In the above estimate of resources, the limit for deficit financing for the next two years has been taken at Rs. 100 crores a year. With prices at the present level and with the growing pressures for increases in wages and salaries to compensate for the rise in cost of living, there is not much scope for further deficit financing. Hitherto, the inflationary impact of deficit financing has been offset by the large balance of payments deficits financed by a draft on foreign exchange resources. Since that "cushion" is no longer available, it is now felt that the less deficit financing there is, the better. It is only if food production increases substantially and food prices register a distinctly downward trend that deficit financing on any significant scale could be contemplated.

The balance of payments deficit over the Plan period was expected to be of the order of Rs. 2,000 crores. Roughly, one-half of this deficit has been incurred so far. With sterling balances held by the Reserve Bank at about Rs. 200 crores, it is necessary to avoid drawing them down any further. For bridging the estimated foreign exchange gap for the period October to March 1959, external assistance totalling \$350 million was promised. Further assistance required for the rest of the Plan period is estimated at \$ 650 million. By the end of the Second Plan period, the country will also have substantial debt liabilities abroad. In estimating the aforesaid foreign exchange gap it was assumed that no food imports over and above the 'normal' purchases and existing commitments would

be undertaken unless covered by separate aid programmes.

CHAPTER XVIII

COMMUNITY DEVELOPMENT

The Community Development Programme, which aims at the individual and collective welfare of India's vast rural population, was launched on October 2, 1952, in 55 selected projects, each project covering an area of about 500 sq. miles with about 300 villages and a population of about 2 lakhs. It is a programme of aided self-help to be planned and implemented by the villagers themselves, Government offering only technical guidance and financial assistance. Its objectives are to develop self-reliance in the individual and initiative in the community and to make the villages self-governing units. Community thinking and collective action are encouraged through people's institutions like the panchayats, co-operative societies, Vikas Mandals, etc.

Agriculture receives the highest priority in the programme, it being the mainstay of about seventy per cent of the rural population. Among other activities included are provision of better communications, improvement in health and sanitation, better housing, wider education, measures for women's and children's welfare, and development of cottage and small-scale

industries, etc.

The programme is implemented in units of blocks, each comprising generally 100 villages with an area of 150 sq. miles and a population ranging between sixty and seventy thousand. Until recently, the programme was being carried out in three distinct phases. Initially, the block used to be worked for three years under a supplementary programme of somewhat less comprehensive character called the National Extension Service. This was followed by another period of three years of intensive development. Finally, the block reached the post-intensive stage.

In April 1958, this was substituted by a two-stage pattern. On completion of a period of intensive development lasting for five years, a block enters into the second stage during which development work is continued with relatively reduced budget provision for another five years. Before it enters the first stage every block undergoes a "pre-extension phase" of one year during which the programme is exclusively confined to agricultural development. Simple norms like keeping the village clean or digging compost pits are laid down for a test of the self-reliance of the people before the programme is taken up in an area.

By December 31, 1958, the programme covered 2,405 blocks comprising 3,02,947 villages and nearly 16.5 crores of people (or about 56 per cent of India's rural population). Under the revised pattern of implementation, the entire country will be covered by October 1963.

FINANCE

Resources

Resources for the programme are drawn both from the people and the Government. For each block area, development schemes are conditioned by a qualifying scale of voluntary contribution from people in cash or kind or labour. When State assistance is offered for execution of such projects, expenses are shared by the Central and the State Governments equally in respect of recurring items and in the proportion of 3:1 in the case of non-recurring items. For productive works like irrigation, reclamation of land,

etc., necessary funds are advanced by the Central Government to State Governments in the shape of loans. The Central Government also bear half of the expenditure on personnel employed by the States in blocks.

People's Contribution

People's contribution till the end of September 1958 amounted to Rs. 65.98 crores forming nearly 64 per cent of the total Government expenditure which was Rs. 103.4 crores.

Expenditure under the Plans

Expenditure incurred during the First Plan period was Rs. 52.4 crores against an allotment of Rs. 96.5 crores. The spill-over of Rs. 44.1 crores has been carried over to the Second Plan period, the allotment for which is Rs. 200 crores.

Expenditure in Blocks

Funds are allotted block-wise in the State Plans, the block being the basic unit of development. A schematic budget, however, exists for the blocks to serve as nucleus finance which is supplemented by funds from development departments. The provision for a stage I block is Rs. 12 lakhs for a period of five years. The stage II block, with a similar duration of five years, has an allocation of Rs. 5 lakhs. The amount available for the pre-extension period for agricultural development is Rs. 18,000.

External Assistance

The programme received 14.24 million dollars from the Government of the U.S.A. under a T.C.M. Operational Agreement for import of equipment. Assistance from the Ford Foundation was also received for training of project personnel.

ORGANISATION

At the Centre

The Ministry of Community Development (now Ministry of Community Development and Co-operation) is in overall charge of the programme. Matters of basic policy, however, go before the Central Committee consisting of members of the Planning Commission and the Ministers for Food and Agriculture and Community Development and Co-operation with the Prime Minister as Chairman. Co-ordination with the allied Ministries is secured through special committees.

In the States

The execution of the programme is the responsibility of the State Governments which act through the State Development Committees consisting of the Chief Minister (Chairman), the Ministers of Development Departments and the Development Commissioner as Secretary. The executive head of the programme is the Development Commissioner who co-ordinates activities of all development departments. The Collector as Chairman of the District Planning and Development Committee is responsible for the implementation of the schemes in the district.

At the Block

At the block level, the Block Development Officer is assisted by a team of eight Extension Officers, who are experts in agriculture, co-operation, animal husbandry, cottage industry, etc.

The Gram Sevak at the village level acts as a multi-purpose extension agent having ten villages in his charge.

Extension Organisation

The role of the Extension Organisation at the block and village level is two-fold. It carries proved knowledge or research of practical utility to the villagers and also makes available to them facilities—financial or otherwise—provided by the Government. It transmits the problems of the villagers back to research organisations for special study and solution. It is also charged with the task of promoting useful corporate life through co-operatives, better farming societies, Mahila Mandals, etc.

Community Organisations

The responsibility for planning and implementation rests with people's organisations. The elected panchayat collects basic data, ascertains needs, assesses resources and fixes priorities of schemes for the village. Voluntary organisations like the youth club, farmers' forum and Mahila Mandal supplement the activities of the panchayat. The primary cooperative society and the village school are the two other institutions dealing with the economic and educational aspects of rural life.

Block Development Committee

The Block Development Committee (above the primary unit) is composed of the representatives of the panchayats, co-operative societies, a few progressive farmers, social workers, women M.P.s and M.I..A.s representing the area. By convention, the Committee enjoys and exercises necessary powers and is responsible for planning, initiation, sanction and execution of development schemes for the area concerned. Action has already been initiated in some States to set up a statutory organisation called the "Block Panchayat Samiti" in accordance with the recommendation of the study team of the Committee on Plan Projects which examined the operation of the Community Development Programme and suggested improvements.

TRAINING

There are 75 Extension Training Centres where the Gram Sevaks receive two years' training. More than 33,000 Gram Sevaks were trained by the end of December 1958. Gram Sevikas are trained in 27 training centres which have Home Economics Wings attached to them. There are 14 training centres for Social Education Organisers and 6 for Block Development Officers. Mukhya Sevikas (Women Social Education Organisers) receive training in 10 centres.

The Block Level Extension Officers for Co-operation are trained in 8 and those for industries in 11 training centres. For the training of health personnel, there are 3 training centres. There are, in addition, over 66 institutions for the training of auxiliary nurse-midwives, 9 centres for training of lady health visitors and 6 others for training of midwives.

A Central Institute on Community Development was set up in 1958 at Mussoorie for providing training, particularly in group methods and the sociological aspects of the programme, to key personnel—both administrative and technical.

Short duration camps are held in rural areas to train non-officials. More than ten lakh Gram Sahayaks (functional village leaders) have been trained to supplement the work of Gram Sevaks. Similar training is being arranged for members of the Block Development Committees, panchayats and co-operative societies.

ACHIEVEMENTS

The following are the achievements in some of the aspects covered by the programme up to September 30, 1958:

Agriculture			
Improved seeds distributed (maunds)	• •	1,57,98,000
Chemical fertilisers distributed (may	inds)		3,90,39,000
Improved implements supplied (No.			11,75,000
Agricultural demonstrations held (N	o.)		48,51,000
Area under green manuring (acres)	• •		41,50,000
Compost pits dug (No.)	• •	• •	50,15,000
Animal Husbandry			
Improved animals supplied (No.)			45,600
Improved birds supplied (No.)			6,27,000
Health and Sanitation			
Rural latrines in use (No.)			5,07,000
Drains constructed (Yds.)			1,86,15,000
Smokeless chullahs constructed (No.)		1,97,800
Village lanes paved (sq. yds.)			84,50,000
Drinking water wells constructed (N	(o.)		1,29,0 00
Drinking water wells renovated (No.	.)		1,95,000
Social Education			1
Adult literacy centres functioning (N	No.)		87,000
Adults made literate (No.)		• •	29,68,000
Reading rooms opened (No.)			45,100
Information centres at Block Hd. Qu	uarters (No.)		1,669
Community centres started (No.)		• •	1,03,000
Community Organisations			
Youth & Farmers' clubs started (No	.,		84,700
Mahila Samitis started (No.)			19,100
Gram Sahayaks trained (No.)	• •	• •	10,14,000
Communications			
Kachcha roads constructed (miles) .		• •	78,600
Existing kachcha roads improved (n			91,400
No. of culverts constructed (No.)			51,100
Co-operation			
Co-operative Societies established (N	No.)		1,27,125
Members enrolled (No.)	* *	• •	87.8 lakhs

Tribal Blocks:

Forty-three multipurpose Tribal Blocks have been established with special programmes for intensive development of selected tribal areas. An expenditure of about Rs. 27 lakhs has been provided for each block for 5 years,

CHAPTER XIX

FINANCE

PUBLIC FINANCE

In India there is no single authority for raising and disbursing public funds. Under the Constitution, the power to raise funds has been divided between the Centre and the States. The sources of revenue for the Centre and the States are, by and large, mutually exclusive. There is thus more than one budget and more than one public treasury in the country.

The Constitution provides that (i) no tax can be levied or collected except by the authority of law, (ii) no expenditure can be incurred from public funds except in the manner provided in the Constitution, and (iii) the executive authorities must spend public money only in the manner

sanctioned by Parliament.

All receipts and disbursements of the Union Government are kept in two separate parts, namely, the Consolidated Fund and the Public Account. All revenues received, loans raised and money received in repayment of loans by the Union Government go together to form the Consolidated Fund of India. No money, except to the extent to which an expenditure is charged upon the Consolidated Fund in accordance with the Constitution, can be withdrawn from this Fund except under the authority of an Act of Parliament. All other receipts and disbursements, such as deposits, service funds, remittances, etc., go into the Public Account which is not subject to the vote of Parliament. To meet unforeseen needs, not provided in the Annual Appropriation Act, a Contingency Fund of India has also been established under Article 267 of the Constitution.

The Constitution also provides for the establishment of a Consolidated Fund and a Public Account for each State. Similarly the States also have Contingency Funds to meet unforeseen needs pending legislative

authorisation.

The Railways, the largest nationalised industry, have their own funds and accounts and their budget is presented separately to Parliament. The appropriations and disbursements under the Railway Budget are subject to the same forms of parliamentary and audit control as the other appropriations and disbursements.

Allocation of Revenue

The main sources of Central revenue are customs duties, excise duties levied by the Union Government, the corporation and income taxes (excluding taxes on agricultural income), estate and succession duty on non-agricultural assets and property and the earnings of the Mints. The revenue from the two new taxes—wealth tax and expenditure tax—also accrues to the Centre. Besides, the railways and posts and telegraphs contribute to the general revenue of the Centre.

The main heads of revenue in the States are the taxes and duties levied by the State Governments; the share of taxes levied by the Central Government; civil administration, civil works and State undertakings; and grants received from the Centre. Land revenue, sales tax, State excise duties, registration and stamp duties and shares of income tax and Central excise duties constitute about 84 per cent of the tax revenue and more than half of the total revenue receipts of the States. Property taxes and octroi and terminal taxes are the mainstay of local finance.

Second Finance Commission

The second Finance Commission set up under Article 280 of the Constitution, in June 1956, submitted its final Report in September 1957. The recommendations of the Commission provide for a devolution of about Rs. 140 crores per year (not including the proceeds of the tax on railway fares amounting to Rs. 15 crores in a full year) as against an average sum of Rs. 93 crores, received by the States under the first Finance Commission's recommendations.

The table below shows what each State may expect to receive under the recommendations taken together in each of the five years beginning on April 1, 1957. The figures shown against shares of taxes are only estimates and indicate the order of the sums to be received; the actuals will vary from year to year.

Annual Financial Statement or Budget

An estimate of all anticipated revenue and expenditure of the Union Government for the coming financial year is laid before Parliament towards the end of February every year. This is known as the "Annual Financial Statement" or the "Budget." Apart from giving estimates of revenue and expenditure, this statement also contains(i) a review of the financial

Note 1. Assam will receive, in addition, a grant-in-sid of Rs.40 lakhs under clause
(a) of the second provise to Article 275(1).

Note 2. Under Section 74 of the States Reorganisation Act, the States of Bombay,

Note 2. Under Section 74 of the States Reorganisation Act, the States of Bombay, Kerala, Madras and Mysore are entitled to receive during the three years ending 31-3-1960 the sums by which a prescribed percentage of their share of divisible Central Taxes may fall short of the former Part B States of Saurashtra, Travancore-Cochin and Mysore now merged in them. On the estimate of divisible Central Taxes adopted by the Commission, the sums due to Kerala and Madras will be marginal while Bombay and Mysore may receive sums of the order of Rs. 34 crores and Rs. 1 crore respectively for all the three years.

^{*}This is an average for five years of payments which will actually be made to the States in the three years ending March 31, 1960. Grants-in-aid under Article 273 cease on the expiry of ten years from the commencement of the Constitution.

position of the preceding year, (ii) proposals for fresh taxation, if additional money is needed to cover a deficit, and (iii) proposals for financing

capital expenditure.

The presentation of the Annual Financial Statement is followed by a general discussion in both Houses of Parliament. The estimates of expenditure, other than that charged, are then placed before the House of the People in the form of "Demands for Grants." Ordinarily, a separate Demand is made for each Ministry. All drawal of money from the Consolidated Fund is thus authorised by an Appropriation Act passed by Parliament every year. The tax proposals of the Budget are embodied in another Bill which is passed as the "Finance Act" of the year. Estimates of receipts and expenditure are similarly presented by State Governments to their legislatures before the beginning of the financial year in April and legislative sanction for financial expenditure is secured through similar procedure.

Audit

The Constitution requires that the audit authorities, who are independent of the executive, should scrutinise the expenditure of the Central and State Governments and ensure that this is strictly within the limits of their competence. It further enjoins that an account of the expenditure of each Government should be approved by its legislature.

BUDGET ESTIMATES (1959-60)

The budget estimates for 1959-60, as presented in the Lok Sabha on February 28, 1959, placed expenditure at Rs. 839.18 crores as compared to Rs. 788.15 crores (revised) in 1958-59 and revenue (at existing level of taxation) at Rs. 757.51 crores as compared to Rs. 728.20 crores (revised) in the previous year, leaving a deficit of Rs. 81.67 crores. New taxation proposals were expected to yield an additional revenue of Rs. 23.35 crores. This would reduce the deficit on revenue account to Rs. 58.32 crores which

was proposed to be left uncovered.

Apart from readjustments of rates and concessions in some of the existing excise duties the new tax proposals included the abolition of the wealth tax on companies and the excess dividend tax as part of the scheme of simplification of company taxation. It was proposed to combine in the income-tax and super tax rates of companies the net incidence of the current taxes on income, excess dividends and wealth. Important changes proposed in the existing rates and concessions of excise duties were: (a) increase in the duty on refined diesel oils and vapourising oil from 40 naye paise per imperial gallon to 80 nave paise and increase in the duty on low-speed diesel oil from Rs. 40 per ton to Rs. 50 per ton; (b) increase from 6 pies to 6 naye paise per sq. yard in the duty on art silk fabrics and restriction of the exemption to the products of the first four looms instead of nine; (c) increase of 60 per cent in the effective rates of duty on rayon yarn and staple fibre; (d) increase from 30 to 40 per cent ad valorem in the duty on motor vehicle tyres; (e) increase in the duty on vegetable products from Rs. 7 per cwt. to Rs. 8.75 per cwt. with corresponding adjustment in the exemptions in favour of the small producers; (f) withdrawal of exemptions from all power-driven units in respect of the duty on vegetable non-essential oils and restriction of concessions levy to only the first 75 tons of production; (g) levy of a basic duty of Rs. 5.60 per cwt. on khandsari sugar with an additional duty of 70 naye paise in replacement of the sales taxes. Other adjustments proposed were in respect of the duty on cigarettes and certain types of tobacco. It was also proposed to readjust the rate of excise duties on teas grown in certain areas and to reduce, at the same time, the effective rate of export duties from 26 to 24 nave paise per lb. A small increase in the duty on unexposed cinema films, expected to yield Rs. 5 lakhs a year, was

proposed for the benefit of the Film Finance Corporation which was being set up

Tables 103 and 104 show the budget of the Central Government for 1959-60 on revenue and capital accounts.

BUDGETARY POSITION

Tables 105 to 110 (pages 234 to 240) show the budgetary position of the Central Government and Tables 111 to 115 (pages 241 to 246) show the combined budgetary position of the Centre and the States, on both revenue and capital accounts, since 1951-52.

PUBLIC DEBT

The interest-bearing obligations of the Government of India continued to rise, from Rs. 3,676 crores at the end of 1956-57 to Rs. 4,216 crores at the end of 1957-58 and stood at Rs. 4,964 crores by the end of 1958-59. These include public debt, both internal and external, unfunded debt and interest-bearing deposits. The internal obligations aggregated Rs. 3,514 crores at the end of 1956-57 and Rs. 4,005 crores at the end of 1957-58 and stood at Rs. 4,593 crores at the end of March 1959.

Closing balance	214,26	161,33	124,72	124,07	107,69	31,17	49,03	40,17

Note:—The discrepancy noticed in opening and closing balances figures for the years 1956-57 and 1957-58 is due to the non-availability of actuals for the States for the year 1956-1957 on account of reorganisation of States.

As against these liabilities, interest-yielding assets of the Government of India amounted to Rs. 3,396 crores at the end of March 1958, representing an increase of Rs. 489 crores over the previous year and constituting four-fifths of the total interest-bearing obligations of the Government of India. During 1958-59, the interest-yielding assets showed a further rise of Rs. 603 crores to Rs. 3,999 crores.

Table 116 shows the interest-bearing obligations and interest-yielding

assets of the Central Government.

Note:—The figures in this statement are based on actual returns furnished by the States except in certain cases where they are based on the Budget papers. The data exclude Part C States which had a separate capital account only from 1954-55; figures for the years 1956-57 and 1957-58 relate to reorganised States and exclude Jammu & Kashmir.

*This is a new item to show loans from National Agricultural Credit (Long-Term Operations) Fund of the Reserve Bank of India, Loans from National Cooperation Department and Warehousing Board, loans from Khadi and Village Industries Board, Employee's State Insurance Corporation etc.

MONEY SUPPLY AND CURRENCY

During 1958, money supply with the public recorded a rise of Rs. 77.2 crores as against Rs. 96.2 crores recorded in 1957. The annual rate of increase in money supply has fallen progressively from 11.7 per cent in 1955 to 6.4 per cent in 1956, 4.4 per cent in 1957 and 3.4 per cent in 1958. The expansion of Rs. 77.2 crores in money supply during 1958 was the net result of (1) a rise of Rs. 81.9 crores in currency with the public

and (2) a decline of Rs. 4.7 crores in deposit money.

As in the preceding year, the advances to Government were the major factor underlying the expansion in money supply in 1958. The effect of this expansion was slightly offset by a small rise in Government balances with the Reserve Bank. Bank credit to Government amounted to Rs. 415 crores* in 1958 as compared to Rs. 478 crores in 1957 while Government balances with the Reserve Bank rose by Rs. 6.5 crores during the year. The expansionist influence of extension of bank credit to the public was small, the rise in this item in 1958 being only Rs. 20.8 crores as compared to Rs. 78.8 crores in 1957. On the contractionist side, the impact of the balance of payments deficit was also substantially smaller. As measured by the decline in foreign assets held by the Reserve Bank, the balance of payments deficit amounted to Rs. 108, 8 crores as against Rs. 327, 4 crores (net of dollar purchases of Rs. 895.2 crores from the I.M.F.) in the previous The phenomenal growth in banks' time liabilities, noticed in 1957, continued, the rise in this item in 1958 (Rs. 215.8 crores) being larger than in 1957 (Rs. 198.8 crores).

In the financial year 1958-59 (up to December 26, 1958), money supply with the public declined by Rs. 36.7 crores as compared to Rs.

38 crores in the corresponding period of 1957-58.

The following table shows the movements in money supply with the public and its components for the years 1951 to 1958.

TABLE 119

Currency †

In 1958, currency in circulation (excluding small coin) recorded a further rise of Rs. 86.2 crores to Rs. 1,661.8 crores, which was more than

^{*}This was made up of (1) an increase of Rs. 21.4 crores in rupee investments of the Reserve Bank, (ii) a rise of Rs. 206.2 crores in banks' investments in Government securities and (iii) a decline of Rs. 11.1 crores in the Reserve Bank's loans and advances to Governments.

^{**}Figures are provisional and do not include small coin in circulation.
†Figures for 1958 are provisional.

twice the rise in 1957 (Rs. 38.2 crores). Since 1953, currency in circulation has shown a continuous rise, amounting to as much as Rs. 500 crores—a rise of 43 per cent. The rise in 1958 occurred mainly under notes in circulation which rose by Rs. 82.6 crores as compared to Rs. 40.7 crores in 1957, Rs. 104.1 crores in 1956 and Rs. 161.5 crores in 1955. Total notes in circulation amounted to Rs. 1,546.3 crores at the end of 1958.

During the year, the circulation of rupee coin (including one-rupee notes) moved up by Rs. 3.5 crores to Rs. 115.6 crores; this followed a

decline of Rs. 4 crores in the preceding two years.

Decimal coins

Considerable progress was made in putting into circulation the new decimal coins of the denomination of 10, 5, 2 and 1 naye paise, first introduced in April 1957. The aggregate amount of decimal coins put into circulation since that date up to October 1958 was Rs. 3.91 crores* as shown below.

TABLE 120

1 nP.	64.55
2 nP.	59.71
5 nP.	98.39
10 nP.	1,68.39
Total	3,91.04

Demonetisation of Certain Denominations of Coins

In terms of the Government of India's Notification No. S.O. 1437 dated July 18, 1958, the nickel-brass two anna, half pice and pie piece coins ceased to be legal tender with effect from January 1, 1959. However, they will continue to be legal tender at all the offices of the Reserve Bank of India, all agency banks of the Reserve Bank conducting Government business and all Government treasuries and sub-treasuries up to June 30, 1959, but, thereafter, only at the offices of the Issue Department of the Bank until further notice.

Conversion of Hyderabad currency into India Government currency

The facilities offered by the Government of India for the conversion of Hyderabad Currency into Indian Currency which were discontinued on December 31, 1956, were revived on a selective basis for a further limited period (December 1, 1958 to June 30, 1959) in response to numerous applications received from the public.

BANKING

A substantial increase in the resources position of scheduled banks in 1958 on top of a sharp rise in their deposit liabilities in the previous year and a slackness of demand for credit in the greater part of the year posed a problem for banks of the profitable employment of the surfeit of funds. Deposit liabilities (net) of scheduled banks in 1958 increased by Rs. 206.8 crores through a rise of Rs. 214.0 crores in time liabilities less a small contraction in demand liabilities of Rs. 7.2 crores. Within two years

^{*} Provisional.

(1957 and 1958) deposits swelled by 43 per cent, most of it due to a near doubling of time deposits. The major contributory factors towards the expansion of deposits were the same as in the previous year viz., deficit financed development expenditure, the placement, by the U.S. authorities, in India of the cost of foodgrains imported under the U.S. P.L. 480, which was initially reimbursed to them by the Union Government, and a marked increase in the number of branches of scheduled banks. The high level of call money interest rates in the first half of the year (which fell in the second half) and a fall in import payments on private account, following restrictions on imports imposed last year, also enhanced the deposits. The upward trend in scheduled bank credit, which began in 1953, continued, though the rise of Rs. 8.7 crores in 1958 was nominal as compared with the years preceding immediately. The smaller increase in credit may be ascribed to the slowing down of the tempo of economic activity, partly arising out of import restrictions and partly due to the continuation and intensification of selective credit control measures. Consequently, banks had to go in for investment in government securities. Such investments (including Treasury bills), therefore, rose by Rs. 204.1 crores or by 47 per cent. Advantage was taken of the comfortable resources position of banks to resume sales of Union Government Treasury bills to the public in July 1958. These had remained suspended since April 1956. The easy resources position of banks was reflected in a reduction in borrowings from the Reserve Bank and a rise in their cash balances. The variations in the principal items of liabilities and assets of scheduled banks during 1957-58 are given in the following table:

TABLE 121

^{*} Provisional

During the year the total number of scheduled banks increased from 91 to 93 as a result of the inclusion of five banks in the Second Schedule and the exclusion therefrom of three banks (two of them due to amalgamation and merger). The net increase in the number of their branches (after adjustment for the branches of scheduled banks included in the Schedule during 1958) till October 1958 came to 208, the share of the State Bank of India being 69. Consequently, the total number of offices of scheduled banks at the end of October stood at 3,570.

A banking landmark during the year was the conclusion of an agreement among some important scheduled banks on interest rates on deposits which came into force on October 1, 1958. The rapid expansion in deposits and lack of avenues for profitable deployment of funds elsewhere weakened the scramble among banks for attracting deposits from customers by offering higher rates of interest. This fact was partly responsible for a voluntary agreement among the Indian and foreign banks, with deposits of Rs. 5 crores or more, for placing a ceiling on interest rates payable on

various forms of deposits excepting inter-bank transactions.

An important development in institutional arrangements for the provision of credit to sectors whose development is retarded in the absence of such facilities was the establishment of the Re-finance Corporation for Industry Private Ltd. This Corporation was established on June 5, 1958 for providing re-lending facilities, against medium-term loans given by selected scheduled banks, to medium-sized industrial concerns. The facilities of the Corporation are available to industrial concerns whose paid-up capital and reserves do not exceed Rs. 2.5 crores in any particular case.

Monetary and Credit Policy of the Reserve Bank

The overall credit policy of the Reserve Bank of India continued to be one of restraint in the face of an underlying inflationary trend in the economy as witnessed in a continuous rise in the prices of food articles since February. Though the level of bank advances against foodgrains was within the permissible limits laid down by the Reserve Bank and was smaller than a year earlier, the decline in food production was a major factor behind the increase in food prices. As a result, it was felt that selective credit restriction on advances against foodgrains should be continued throughout the year. In fact, in the second half of the year, when there was some evidence of advances against wheat, in particular, tending to rise in certain areas of the country, restrictions were tightened on the advances against wheat, particularly in the Punjab. The position with regard to sugar also disclosed the same trend. Consequently, advances against sugar were also tightened. The restrictive measures were, however, worked out in such a fashion as not to hinder the expansion of branch banking and the increasing use of warehousing facilities, by exempting from the operation of the controls, advances made by newly opened branches, and advances against warehouses' receipts.

Another feature during the year was the extension of the Bill Market Scheme so as to include export bills within its scope. This facility was intended to help small exporters by enabling them to obtain finance from

banks on the surety of export bills.

CORPORATE FINANCE

The total number of joint stock companies at work in India as on March 31, 1958 was 28,877 accounting for a total paid-up capital of Rs. 11,60.9 crores. Of these, the number of public and private companies was 9,096 and 19,781 with a paid-up capital of Rs. 768.2 crores and Rs. 392.7 crores respectively. The total number of associations (not for profit),

and companies limited by guarantee was 1,282. The following table shows the number and paid-up capital of the companies at work between 1947-48 and 1957-58.

New Registrations

Between April and October, 1958, 591 new companies with a total authorised capital of Rs. 1,14,42 lakhs were registered. Of these, 33 companies were public and 558 private, having an authorised capital of Rs. 26.15 lakhs and Rs. 88.27 lakhs respectively.

Government Companies

Ninety-two Government companies, (i.e. companies in which Central or a State or both Governments own 51 per cent or more of share capital) had been incorporated within Indian Union up to the end of October 1958. Of these, 6 were registered during the period April to October 1958.

Distribution

The following table shows the State-wise distribution of companies for the year 1957-58 and the period April to October 1958.

Foreign Companies

During the first ten months of the year 1958 (i.e. January to October), 14 joint stock companies incorporated elsewhere than in India (8 in U.K., 2 in U.S.A. and one each in West Germany, Japan, Sweden and Hongkong) established their principal places of business in this country. Of these, four each were concerned with wholesale trade and manufacture of machinery, two each with community and business services and construction and utilities and one each with insurance and transport.

INSURANCE

Public and Private Insurance

Since September 1, 1956, when the Life Insurance Corporation of India was established, life insurance business in India is transacted by the Corporation and, in a restricted sphere, by the Posts and Telegraphs Department** of the Government of India and by certain State Governments.

Fire, Marine and Miscellaneous classes of insurance business are transacted both by the Indian insurance companies and by foreign insurance companies operating in India. In addition, certain State Governments are also transacting such business.

^{*}Provisional and corrected upto August, 1958.

^{**}For information and statistics relating to Postal Insurance see Chapter XXVII.

State-run Insurance Schemes

The Governments of Andhra Pradesh, Kerala, Madhya Pradesh, Mysore, Rajasthan and Uttar Pradesh are transacting life insurance business, the benefits of which are restricted to their employees. With effect from September 1, 1956, the Life Isurance Corporation of India acquired the exclusive privilege of carrying on life insurance business in India. But, in terms of clause (f) of section 44 of the Life Insurance Corporation Act, the State Governments are enabled to carry on compulsory life insurance of their employees. The Government of Bombay has an Insurance Fund for the insurance of all types of Government property in its commercial and industrial undertakings. The Government of Kerala is transacting Fire and Miscellaneous (Motor) insurance business while the Government of Mysore is transacting Miscellaneous (Motor) insurance business.

Insurance Association of India

With the nationalisation of Life insurance business in India, the Life Insurance Council of the Insurance Association of India and its Executive Committee have ceased to function. The membership of the General Insurance Council of the Insurance Association of India is confined to insurers carrying on general insurance business. The Executive Committee of the Council has evolved a Code of Conduct for observance by general insurers with the object of eliminating various alleged malpractices of rebating and payment of excessive commission. With a view to tightening control over general insurance business, the Executive Committee has recommended inter alia certain standards of solvency and minimum departmental reserves to be maintained by insurers on a voluntary basis.

The Committee has set up an administrative machinery to administer the Code of Conduct. The Controller of Insurance, in his capacity as a

member of the Committee, is the head of the organisation.

Another wing of the association is entrusted with the task of regulation and control of the tariff structure in this business. The authority for this purpose is the Tariff Committee, which functions through four Regional Councils.

GENERAL INSURANCE

Insurance Companies

On December 31, 1958 there were 91 Indian insurers and 93 non-Indian insurers registered under the Insurance Act, 1938 for transacting various classes of general insurance business as shown below:

TABLE 124

NUMBER OF INSURANCE COMPANIES

LIFE INSURANCE

Life Insurance Corporation

According to the Life Insurance Corporation Act, the Life Insurance Corporation of India consists of not more than 15 members who have the authority to manage the affairs of the Corporation on business principles subject to such directives on matters of policy as the Central Government might give from time to time. The Corporation is charged with the duty of ensuring that life insurance business is developed to the best advantage of the community. The Corporation also has an Executive Committee, an Investment Committee, Managing Directors and Zonal Managers. In addition to the Central Office to be located at a place to be notified by the Central Government, there are zonal offices at Bombay, Calcutta, Delhi, Kanpur and Madras as also Divisional and Branch offices.

When the Corporation was constituted on September 1, 1956, it took over the controlled business of 245 different units (both insurance companies and provident societies) which were engaged in the transaction of life insurance business in India. The total assets of these units on August 31, 1956 were about Rs. 411 crores and the total number of policies in force was over 50 lakhs assuring a sum of more than Rs. 1,250 crores. The total number of salaried employees was nearly 27,000.

New Business

During the first eight months of the year 1956, when insurance companies were being managed by the Central Government, each unit was canvassing business more or less in the same manner as before, except for certain measures of uniformity in premium rates, agency commission, etc. From September 1, 1956, canvassing new business became the responsibility of the various Divisional Offices of the Corporation. The following table shows figures of new life insurance business completed during the years 1953 to 1958.

In India Outside India Total Number Sum Number Sum Number Sum of Assured of of Assured Assured Policies **Policies Policies** (Rs. crores) (Rs. crores) (Rs. crores) 5,91,777 7,57,047 1953 5,61,336 155.20 30,441 14.66 169.86 32,682 35,461 17,956 5,055 17.65 20.33 12.59 253.99 258.63 200.28 236.34 238.30 7,24,365 1954 . . 8,06,142 5,67,608 7,94,585 8,67,114 1955 7,70,681 187.69 1956 5,49,652 . . 281.90 1957 7,89,530 276.50 5.40 4,887 4.80 313.84 8,62,227 309.04 1958*

The table below shows the distribution of the investments of the Life Insurance Corporation as on December 31, 1957 and October 31, 1958. Of the total investments 95.5 per cent on December 31, 1957 and 97.3 per cent on October 31, 1958 were in India.

CHAPTER XX

AGRICULTURE

About 70 per cent of the people in India are dependent on land for their living. Agriculture and allied activities account for nearly a half of the country's national income. It supplies raw materials for some of the country's exports. India enjoys a virtual monopoly in lac, and ranks first in the world in the production of groundnuts and tea. It is the second largest producer of rice, jute, raw sugar, rape-seed, sesamum and castor-seed.

LAND UTILISATION

The total geographical area of the country is 80.63 crore acres. Land utilisation statistics are available for 71.97 crore acres or 89 per cent of the total area. The following table gives details of land utilisation in India for 1950-51 and 1955-56 and provisional figures for 1956-57:

TABLE 129

LAND UTILISATION

(In crore acres)

	1950-51	1955-56	1956-57
Total geographical area Total reporting area Not available for cultivation (!) Land put to non-agricultural uses (ii) Barren and unculturable land	80.63	80.63	80.63

	32.59	36.26	36.66
	3.25	4.44	4.59

Irrigated Area

Of the total area under cultivation nearly 18 per cent is irrigated. During the eight years ending 1955-56, the net irrigated area increased by 96 lakh acres as shown in the following table:

^{*}Provisional

TABLE 130

AREA UNDER IRRIGATION

(In lakh acres)

Source	1947-48	1955-56	Increase or De- crease
Canals Tanks Wells Other sources	198 80 125 63	232 109 166 55	+34 +29 +41 — B
Total	466	562	+96

The two outstanding features of agricultural production in India are the wide variety of crops and the preponderance of food over non-food crops. Table 131 shows the area of major crops during the six years ending 1957-58.

Seasons

There are two well-defined crop seasons: (i) kharif and (ii) rabi. The major kharif crops are rice, jowar, bajra, maize, cotton, sugarcane, sesamum and groundnut. The major rabi crops are wheat, barley, gram, linseed, rape and mustard. The seasons and duration of principal crops are shown below.

Production

The overall production of food-grains in 1956-57 exceeded the previous year's outturn by 4.5 per cent and touched the peak level of 687 lakh tons in 1953-54. But in 1957-58, due to extremely adverse climatic conditions experienced in different States, it declined by 9.8

The index number of agricultural production (all commodities) rose from 116.9 in 1955-56 to a new high of 123.8 in 1956-57, thereby registering an increase of more than 6 per cent over the previous year. The index, however, came down to 113.4 during 1957-58. The all-India index numbers of production of the various agricultural commodities and groups of commodities for the six years ending 1957-58 are given in table 134.

Imports of Foodgrains

During 1958, agreements were entered into with the Government of the U.S.A. for imports of wheat, sorghum and corn and with the Government of Canada for imports of wheat only. The Government of Burma supplied rice under a long-term agreement. A shipload of gift wheat was received from Australia under the Colombo Plan. The following table shows the imports of cereals into India since 1948:

- (1) Includes jowar, bajra, maize, ragi, small millets and barley besides rice and wheat.
- (2) Includes gram, tur and other pulses.
- (3) Includes groundnut, sesamum, rape and mustard, linseed and castor-seed.
- (4) Includes mesta
- (5) Comprises sugarcane, tobacco, potato, pepper, chillies and ginger.

Distribution of Foodgrains

In addition to regulatory measures such as creation of zones, restriction of movement and direct supply of imported wheat from Government stocks to flour mills, large quantities of foodgrains were released from central stocks for issue through fair price shops to meet the difficult food supply position during 1958. While imports amounted to about 32 lakh tons, Government releases through its depots and fair price shops amounted to about 39 lakh tons. The number of fair price shops during 1958 reached the peak figure of about 50,000.

DEVELOPMENT PROGRAMMES

The development programmes cover two types of schemes, viz., work schemes and supply schemes. The former include the construction and repair of wells, tanks, small dams, channels and tubewells, the installation of water lifting appliances such as pumps, etc., schemes of contourbunding and the clearance and reclamation of wasteland. The supply schemes cover the distribution of fertilisers, organic manures and improved seeds.

During 1958-59, a ceiling of Rs. 26·1 crores had been intimated to the State Governments by way of Central assistance. An allotment of Rs. 11·87 crores was also made for short-term loans to State Governments for the purchase and distribution of fertilisers and improved seeds. A special provision of Rs. 3·4 crores was made for the expansion of minor irrigation facilities.

Minor Irrigation

Under the project for the construction of tubewells sponsored by the Government of India under the Indo-American Technical Assistance Programme, 2,998 tubewells were drilled, 2,976 completed with pumping sets and 2,952 energised and put into commission during 1958 till the end of November. These include 350 tubewells of the project of 700 tubewells taken up in 1954 with GMF assistance, which were to be financed partly from TCM funds. Out of the remaining tube-wells of the 1954 GMF Project, 270 were drilled and energised up to November 30, 1958.

^{*}Excludes 6,050 tons of Australian wheat diverted to Pakistan.

[†]Includes 1,030 tons of damaged U.S. wheat ex. s.s. 'Philippine Bear' discharged at Yokohama and 5,822 tons of Canadian wheat ex. s.s. 'Theodora' lost on high seas.

Under the project for the construction of tubewells with GMF assistance in North Gujarat, taken up during the First Plan period, 400 tubewells were

drilled, while 358 were energised and put into commission.

Out of the total Second Plan programme for the construction of 1,500 tubewells in U.P., 587 tubewells were drilled, 419 completed with pumping sets and 320 energised upto November 30, 1958. In Bombay, 31 tubewells were drilled, while in Assam 9 tubewells were drilled and 2 completed with pumping sets and 2 energised. For technical reasons, the target in Bombay was reduced from 400 to 270 tubewells.

Under the Ground-water Exploration Project, exploratory drillings were completed in Bihar, Kerala, Kutch, Madras, Andhra Pradesh and Punjab. Of the exploratory bores drilled, 6 wells in Bihar, 1 in Kerala, 4 in Kutch, 27 in Madras, 11 in Andhra Pradesh and 11 in Punjab yielded sufficient quantities of water and were converted into production tubewells. Similarly, of the exploratory wells drilled, 13 in U.P., 16 in West Bengal and 3 in Orissa were converted into production tubewells.

Land Reclamation

During 1958, the Central Tractor Organisation (C.T.O.) reclaimed 39,000 acres of kans land and 3,000 acres of jungle land, besides carrying out levelling and terracing work over an area of 4,000 acres, bringing the progressive total of area reclaimed by it since its inception to 16.67 lakh acres.

Five Units of the Central Tractor Organisation were transferred

to Dandakaranya Administration on October 31, 1958.

At the Tractor Training Centre, Budni, Madhya Pradesh, set up with the assistance of T.C.M., 60 students completed their training, bringing the total number of persons trained at the Centre since its inception in July 1956 to 261.

Multiplication and Distribution of Improved Seeds

In pursuance of the recommendations made by the F.A.O. Conference at its 9th session, an ad hoc Committee was appointed in October 1953, for organising and conducting the National Seed Campaign, with a view to further intensifying the programme for the production and distribution of high quality seeds.

As a part of the Rabi Campaign, supplies of 7.85 lakh maunds of wheat seed were arranged from surplus areas for the States of Rajasthan, Madhya Pradesh, Bihar, Uttar Pradesh and West Bengal. Arrangements were also made for the supply of paddy seeds from Andhra Pradesh and Madras to meet the requirements of the Andaman and Nicobar Islands Administration. 1,390 seed farms were expected to be set up during 1958-59.

Manures and Fertilisers

A quantity of about 22.2 lakh tons of compost manure was prepared from refuse materials during 1957-58; for 1958-59 the target was 26.40 lakh tons. The quantity of compost manure distributed during 1957-58 amounted to 19.25 lakh tons. The Sewage Utilization Schemes in important cities and towns were continued in order to use about 1,530 lakh gallons of manurial water per day. For the development of local manurial resources, 4 schemes were put into operation with the object of (i) larger and better utilization of local manurial resources for production of manure in N.E.S. Blocks; (ii) production of compost manure in village panchayats; (iii) night-soil composting on pilot basis in smaller villages; and (iv) popularisation of green manuring practices. Sanction was given to take up work under scheme (i) in 1,519 N.E.S. Blocks and under scheme (ii) in 792 Panchayats in different States. A number of State Governments

adopted measures to propagate green manuring practices by arranging distribution of green manure seeds and organising special campaigns. In Bihar, a pilot project for composting night soil and village refuse was

taken up in 50 villages.

The consumption of nitrogenous fertilisers in terms of ammonium sulphate was likely to rise to about 9 lakh tons during 1958-59. The availability is likely to be of the order of 6.02 lakh tons of ammonium sulphate (made up of 3.35 lakh tons from the Sindri Factory, 0.65 lakh tons from other indigenous sources and 2.02 lakh tons from imports) and 2.80 lakh tons (in terms of ammonium sulphate) of other nitrogenous fertilisers, namely, urea, ammonium sulphate nitrate and calcium ammonium nitrate.

The system of granting short-term loans to the States for the purchase of nitrogenous fertilisers from the Pool and other fertilisers from the open market, and for their sale to cultivators on credit basis, as far as possible, was continued. Ammonium sulphate for distribution to cultivators was being made available to States at a uniform rate of Rs. 350/- per ton. The system of subsidising the sale of phosphatic manures and fertilisers was continued.

The Fertiliser (Control) Order, 1957, which controls quality and price of fertiliser materials, was enforced in 11 States and 3 Union Territories.

Plant Protection and Locust Control

The Directorate of Plant Protection, Quarantine and Storage continued to assist the States with technical advice, equipment and personnel in controlling crop pests and diseases through its 14 Central Plant Protection Stations. Assistance was sought to control a serious outbreak of gundhy bug pests of paddy crop in several States in north India and some pests of groundnut, jowar and cotton in Andhra Pradesh, Madras, Mysore, and Orissa. Assistance was given also for fumigating 15 lakh maunds of wheat in Bihar. Intensive plant protection work in selected gram panchayat areas was also carried out by the Central Stations. Aerial pests control operations were undertaken over a total area of about 19,000 acres.

The Quarantine stations at the sea and air ports continued to carry quarantine inspection and treatment of plants and plant materials imported

from foreign countries by sea and air.

Crop Campaigns

An intensive Rabi Production campaign was launched in 9 States viz., Andhra Pradesh, Bihar, Bombay, Madhya Pradesh, Mysore, Punjab, Rajasthan, Uttar Pradesh and Delhi for mobilising and co-ordinating all available resources and agencies in the task of raising the production of four major foodcrops namely wheat, barley, gram and jowar. The outstanding scature of the campaign was the emphasis on non-official participation, the creation of enthusiasm among farmers, and the mobilisation of farmers' efforts—the Government agencies mainly providing technical guidance and concrete assistance in managing timely supplies of the wherewithals of production. Under the campaign, the States concentrated their efforts on certain selected items of work, such as, timely supply of improved seeds and fertilizers, treatment of seeds against seed-borne diseases, provision of irrigation facilities, supply of improved agricultural implements, insecticides, pesticides and agricultural credit. Steps were taken to organise "teams of helpers" to augment the efforts of the normal extension agency. Other important aspects of the campaign included the production and distribution of agricultural information material, award of community prizes and demonstrations of results accruing from the introduction of improved varieties of seeds and of improved agricultural practices.

AGRICULTURAL MARKETING

The development of agricultural marketing aims at securing to the farmer his due share of the price paid by the consumer and at subserving the needs of planned development. This object is sought to be achieved through the regulation of market practices, standardisation and grading of agricultural commodities and other allied development activities.

Grading and Standardisation

Grading of agricultural commodities is carried out under the Agricultural Produce (Grading and Marking) Act, 1937. The Act covers 38 commodities and grade standards have been prescribed for 117 varieties. The Act is permissive and over 380 grading centres for ghee, vegetable oils, creamery butter, rice, wheat, atta, gur, eggs, fruits, etc., have been organised. In respect of sunn-hemp fibre, cigarette tobacco leaf, wool, bristles, lemon-grass oil and sandalwood oil, there is a provision for compulsory grading under 'Agmark' before export. Demand for these commodities in foreign markets is gradually increasing. During 1957-58, the export value of these commodities amounted to Rs. 27.53 crores and in 1958-59 (five months) to Rs. 12.65 crores.

Regulated Markets

Regulation of markets aims at eliminating unhealthy market practices and reducing marketing charges with a view to benefiting the producer. The regulated markets are managed by market committees comprising nominees of growers, traders, local bodies and the State Government. Market charges are fixed, correct weighment is ensured and unauthorised deductions are disallowed. So far, 550 regulated markets have been set up in seven States.

Development of the Fruit Preservation Industry

Under the Fruit Products Order, 1955, control is being exercised on the fruit and vegetable preservation industry so as to ensure minimum quality standards in regard to the hygiene and sanitation of factories, quality of products, marking, proper labelling and packing of different fruit products. In 1957, the production of various fruit products amounted to 25,000 tons as against 23,000 tons in 1956; during the same period, the exports increased from 13,000 tons to 18,000 tons.

Marketable Surplus

A pilot survey for determining the marketable surplus of major foodgrains, viz., wheat, rice, jowar and barra is in progress.

Co-operative Marketing and Processing

An integrated programme of co-operative development embracing credit, marketing, processing, warehousing and storage was formulated on the basis of the recommendations of the Rural Credit Survey Committee of the Reserve Bank. In the sphere of marketing, it was envisaged that about 10 per cent of the marketable surpluses, disposed of by the cultivators, should be sold through co-operative marketing institutions by 1960-61. In 1956, the Agricultural Produce (Development and Warehousing) Corporation Act was enacted for facilitating the implementation of the above programme. A National Co-operative Development and Warehousing Board was set up to plan and promote programmes for the production, processing, marketing, storage, warehousing, etc., of agricultural produce through co-operative societies. During the first two years of the Second Plan, assistance was given to marketing co-operatives and large-sized co-operative societies for the construction of 1,983 godowns. Construction of 1,090 godowns at a total cost of Rs. 1 59 crores is envisaged by these societies in 1958-59.

Out of 35 new co-operative sugar factories envisaged in the Second Plan, 23 have been licensed. Loans advanced to State Governments to enable them to participate in the share capital of co-operative sugar factories amounted to about Rs. 3.08 crores. The Industrial Finance Corporation also sanctioned loans of the order Rs. 13.54 crores to these factories for meeting their block capital requirements. As against 166 other processing units, such as cotton gins, oil mills, jute baling plants, etc., envisaged in the Second Plan, 25 co-operative processing units were set up in 1956-57 and 37 units in 1957-58.

The Central Warehousing Corporation has so far started 9 warehouses in hired accommodation. State Warehousing Corporations have been

established in 12 States.

FORESTRY

India's forests cover 2.81 lakh sq. miles, that is, about 22.3 per cent of the total geographical area of the country. The per capita forest area is 3.5 hectares in the U.S.S.R., 1.8 hectares in the U.S.A., whereas it is only 0.2 hectares in India. Not only is the forest area proportionately smaller in India but it is also unevenly distributed and the productivity per acre per annum is 2.5 cft., which is substantially below the average yield of forests in other countries, such as, France: 56.8 cft., Japan: 37.0 cft., and U.S.A.: 18.0 cft. In view of these facts, the National Forest Policy Resolution of 1952 proposed that the area under forests be steadily raised to 33.3 per cent of the total land area; the proportion to be aimed at being 60 per cent in hilly regions and 20 per cent in the plains. The table given below shows the area under forests in the five years ending 1954-55.

Apart from providing the raw materials for paper, matchwood and plywood industries, forests are also the source of a number of minor forest products like gum, resins, tanning materials, medicinal herbs, etc., which are essential for certain industries or serve as valuable articles of export. Table 138 shows the value of minor forest produce during the years 1950-51 to 1954-55.

Development Schemes

Forestry schemes for which Rs. 24.73 crores have been provided in the Second Plan aim at the rehabilitation of about 3.80 lakh acres of degraded forests and the plantation of 50,000 acres with commercially important species like teak, 13,000 acres with wattle and blue-gum and 2,000 acres with medicinal plants. Another 50,000 acres are to be brought under matchwood plantations. It is also proposed to undertake plantations along canal banks and roads, on village waste lands and as shelter-belts. The programme also provides for the development of forest roads, adoption of better techniques of timber extraction, establishment of timber treating and seasoning plants and organisation for survey of forest resources. Steps were initiated to set up a Forest Research Centre for the southern region and for that purpose the Mysore Government's research laboratory at Bangalore was taken over by the Central Government.

Extraction of Andamans timber is now being increasingly done to meet home demands; exports to foreign countries being confined only to meeting past commitments. Nearly 38,410 tons of timber was extracted by Government in middle and south islands and 10,072 tons by a private company in north islands during the first nine months of 1958. Exports to mainland during the same period were 22,375 tons by Government and 10,563 tons by the private company.

Soil Conservation

Excessive de-forestation, over-stocking of grazing lands and unsuitable methods of agriculture have been the major causes of erosion. Soil conservation work on systematic lines was started during the First Five Year Plan. The work is co-ordinated under the Central Soil Conservation Board. There are nine regional research-cum-demonstration centres at Dehra Dun, Kotah, Vasad, Agra, Chandigarh, Jaipur, Bellary, Ootacamund and Chhatra to investigate the specific soil conservation problems. The important programmes of soil conservation include a pasture development scheme, which envisages the setting up of 100 demonstration blocks of 200

acres each during the Second Plan period; training of soil conversation officers and assistants; and an all-India soil and land use survey with particular reference to the catchment areas of six major river valley projects, viz., Kosi, Damodar, Chambal, Bhakra, Hirakud and Machkund. During the first two years of the Second Plan, an area of 4.9 lakh acres was protected through soil conservation measures. During 1958-59, 171 soil conservation schemes involving an outlay of about Rs. 4.5 crores were approved.

ANIMAL HUSBANDRY AND FISHERIES

Table 139 shows the number of livestock, poultry and agricultural machinery according to the quinquennial censuses of 1951 and 1956.

The object of Government policy in regard to the development of animal husbandry in the country is to develop the milking capacity of well-defined milk breeds by selective breeding and upgrading of the non-descript cattle, and improvement of draught breeds in milk yield without impairing the quality of the bullocks. The above objects are sought to be achieved through Key Village Scheme, Gaushala Development Scheme and Gosadan Scheme.

Key Village Scheme

This scheme represents a comprehensive effort for increasing the productive capacity of the cattle in the country—both in regard to milk production and draught capacity. Intensive development measures are being undertaken in selected suitable centres called the Key Village Blocks through controlled breeding, proper feeding and management, disease control and improvement of marketing arrangements. During the First Plan, 555 Key Village Units and 146 artificial insemination centres were established in the country. In 1957-58, 72 new Key Village Blocks, each with artificial insemination centres, 23 artificial insemination centres in urban areas and 23 Key Village Extension Centres were set up. Development of pastures, popularisation of the growing of fodder crops, especially the legumes, balanced feeding of cattle and conservation of fodder are also being encouraged in the Key Village areas.

Gosadan Scheme

The object of the scheme is to remove old, infirm and unproductive cattle from the areas of active development work and to maintain them economically in gosadans established in the interior forest areas and other waste lands which are not fully utilised at present. The scheme also envisages the scientific and economic utilisation of the remains of dead animals in these centres. During the First Plan period, 25 gosadans were established in different States. The Second Plan envisages the establishment of 60 go adans. Up to the end of 1957-58, 21 new gosadans and 5 charamalay as had been established.

Gaushala Development Scheme

This scheme envisages the utilisation of the resources available with the gaushalas and the organisation of their working on scientific basis so as to supplement governmental efforts for cattle development. Under this scheme, financial and technical assistance is provided to gaushalas. Against a total target of the development of 350 gaushalas in the Second Plan, 132 gaushalas were extended assistance up to the end of 1957-58.

Poultry Development

The development of poultry is considered important for improving the nutritional content of the country's food supplies and for improving the incomes of village population. The Second Plan which has made a provision of Rs. 2.6 crores for poultry development envisages the establishment of 5 regional poultry farms at Delhi, Bombay (Aarey Milk Colony), Bangalore, Bhubaneshwar and Simla and of 300 demonstration and extension centres. The object of the regional farms will be to develop and distribute improved breeds of poultry for further development. The extension centres will also promote the same objectives and also demonstrate scientific methods of poultry husbandry to the public.

Dairy Schemes

The dairy development schemes in the Second Plan include 36 urban milk supply schemes, 12 co-operative creameries and 7 milk drying plants. During 1958-59, a provision of Rs. 2.9 crores was made for dairy develop-

ment programmes.

The construction of buildings for the central dairy and three milk collection and chilling centres for the Delhi Milk Scheme is nearing completion. Work on the construction of new dairy at Calcutta is progressing. The expansion of Aarey Milk Colony continued and experimental work on the preparation of sterilized milk was carried out with UNICEF assistance amounting to Rs. 1.5 lakhs. Under the Madras Milk Project.

construction of units for housing cattle has started. Progress was also made in the implementation of milk supply schemes at Chandigarh, Hissar, Bangalore, Gaya, Trivandrum, Agartala and Sholapur. Schemes for the supply of milk in Patna, Jaipur, Bhopal, Coimbatore, Cuttack, Hyderabad and Nagpur were also taken up. A scheme for supplying about 400 maunds of milk to Ahmedabad was started. It was proposed to expand the scheme to a capacity of about 1,500 maunds of milk daily with the assistance of Rs. 15.84 lakhs from the UNICEF.

The Kaira Co-operative Milk Union, Anand, increased its production of butter and skimmed milk powder and also started the production of condensed milk. Work was also started on the establishment of a milk powder factory at Madras as also on creameries at Barauni, Aligarh and

Junagadh.

Development of Fisheries

Out of the total outlay of about Rs. 12 crores allocated for the development of fisheries during the Second Plan, about Rs. 3.98 crores were set apart for the Central fisheries schemes relating to marine and inland fisheries research, technological research, development of fishing harbours, exploratory fishing stations, extension and training. Financial and technical assistance to State Governments is being given for the survey, production, preservation, storage, marketing and transport of fish and for

the organisation of fishermen's co-operatives.

The total production of fish was about 12:33 lakh tons in 1957, while the total marine fish landings showed an increase of 22 per cent over the 1956 figures. The foreign experts available under the assistance extended by FAO, TCM and Norway for fishery development programmes continued to assist in the development of fishing harbours, introduction of new types of fishing gear and use of mechanised aids by fishermen. Under the Colombo Plan, the services of four Master Fishermen were obtained from Japan. The number of fisheries extension units, which render technical advice and assistance to State fisheries departments, fishermen and fish farmers, rose from 7 to 9 during 1957-58.

The Central Board of Fisheries has been established to co-ordinate and integrate the activities in the field of fisheries development and research throughout India. An Expert Committee for higher fisheries training programme has also been set up. The research activities of the Central Inland Fisheries Research Station, Calcutta, and Central Marine Fisheries Research Station, Mandapam, were expanded during the year. The latter station established three additional centres during the year. The Deep Sea Fishing Station, Bombay, continued its programme of training Indian

officers in deep sea fishing methods.

AGRICULTURAL WORKERS

According to the 1951 census, the number of cultivating labourers in the country was 4.9 crores, constituting about 20 per cent of the total agricultural population. According to the reports of the first All-India Agricultural Labour Enquiry conducted during 1950-51, about 30.4 per cent of rural families were agricultural labourers, half of them possessing

no land whatever and the other half owning some land.

The inquiry further revealed that 85 per cent of the agricultural labourers had only casual work, mostly in connection with harvesting, weeding, ploughing, etc. The average annual income per family from all sources was Rs. 447 and the average per capita income amounted to Rs. 104 compared with the national average of Rs. 264 in that year. The extent of employment varied under different conditions in different parts of the

country, the average being 218 days in the year—189 days in agricultural work and 29 days in non-agricultural work. There was work with wages for about seven months in the year, total unemployment for about three months and some kind of self-employment for less than two months. Nearly 15 per cent of agricultural labourers were "attached" to landowners and worked for them on an average for 326 days while casual labourers had work only for 200 days in the year. About 16 per cent of agricultural workers had no wage-earning employment at all during the year.

The problem of the amelioration of agricultural labourers is intimately related to the basic problem of poverty. The solution does not lie merely in the distribution of land. Thus apart from the general measures of economic development, especially more intensive and diversified occupational structure in rural areas, specific measures such as resettlement schemes, formation of labour co-operatives, allotment of house-sites and

enforcement of minimum wages are being implemented.

Minimum Wages

During the First Plan period, minimum wages were fixed throughout the Punjab, Rajasthan, Orissa, Ajmer, Coorg, Delhi, Himachal Pradesh, Kutch and Tripura. In seven other States, minimum wages have been fixed in certain specified areas. The Second Plan has recommended that minimum wages be prescribed in all the States and for all the areas.

Second Agricultural Labour Enquiry

The field work of the second All-India Agricultural Labour Enquiry integrated with the eleventh and twelfth rounds of the National Sample Survey for a period of 12 months from September 1956 to the end of August 1957, was completed in about 3,600 villages selected on the principle of stratified random sampling. Information was collected on wages and earnings, employment and unemployment, income and consumption expenditure and indebtedness for about 28,000 sample agricultural labour households. The main tabulations have been completed by the Indian Statistical Institute, Calcutta, and furnished to the Ministry of Labour and Employment. Before a comprehensive all-India report on agricultural labour is prepared, a brochure on the subject will be brought out by the Ministry of Labour and Employment.

Rural Consumer Price Index Scheme

Compilation is in progress of consumer price index numbers for agricultural labourers on the basis of the current rural retail prices for selected commodities supplied by the National Sample Survey Directorate and the weights provided by the first all-India Agricultural Labour Enquiry (1950-51).

Tata-Fison are the biggest formulators in India of pesticides for use in agriculture and public health pest control measures. Manufactured in modern factories which are the largest of their kind in India, these products have a nation-wide distribution, backed by a Technical Extension Service available to the individual farmer and to Government and

Municipal authorities.

Of significance is the increasing awareness of the immense benefits of chemical control of pests, commencing with the discovery of DDT in 1942 in Switzerland by Geigys—and now, as never before, available in India in plenty through the splendid achievement of large scale manufacture of DDT by Hindusthan Insecticides Private Ltd., a Government of India undertaking.

DDT is the active ingredient of the majority of the formulated products.

The range of Tata-Fison products includes:

TATA-FISON - A SOLUTION FOR EVERY PEST

CHAPTER XXI

LAND REFORM*

The framework of a national land policy set out in the First Five-Year Plan recognised that the pattern of land ownership and cultivation was a fundamental issue in national development. It made certain recommendations for bringing about a gradual transition from a land system based on the exploitation of the cultivator to one in which the actual tiller would receive the maximum return from his labour and have the requisite incentive to raise productivity in agriculture. The policy was restated in the Second Plan with certain shifts in emphasis and direction necessitated by the experience gained during the First Plan period. The objectives of the land policy in the Plan are firstly, to remove such impediments in the way of agricultural production as arise from the character of the agrarian structure and to create conditions for evolving as speedily as possible an agrarian economy with high levels of efficiency and productivity and, secondly, to establish an egalitarian society and eliminate social inequalities.

ABOLITION OF INTERMEDIARIES

Most of the work relating to the enactment of laws and the acquisition of intermediary areas has been undertaken and intermediaries have almost entirely been abolished; the occupants have been brought in direct contact with the State and uncultivated lands, forests etc. have been acquired and are being administered directly by the State or through local agencies such as the village panchayats.

The progress made in the implementation of the programme of abolition of intermediaries in the States is shown below:

State	Present position				
Andhra Pradesh	Intermediaries have been abolished in the area covered by the former State of Andhra. In 1958, certain categories of inam estates, such as post—1936 inam estates which had earlier been left out of the purview of the Madras Estates (Abolition and Conversion into Ryotwari) Act, as applicable to Andhra area were brought within its purview. In the Telangana area, jagirs have been abolished. Though legislation for abolition of inams was enacted in 1954, its implementation has been held up.				
Assam	The rights of the higher class of intermediaries (zamindars) have been acquired throughout Goalpara district with an area of about 18.2 lakh acres. Tenures of the second class of intermediaries (Jotedars) have been acquired in respect of about				
Bihar	 44,000 acres. Intermediaries have been abolished. Legislation has been amended to remove difficulties in the management of vested estates and to expedite payment of compensation. 				
Bombay	The abolition of non-ryotwari tenures has been completed with the exception of certain inans.				

For a brief account of the genesis and growth of the agrarian problem see Chapter XXI of 'INDIA 1958'

State	Present position
	In the area covered by the former Bombay State and Marathwada area, legislation was passed in 1958 for abolition of the inferior village watans. Legislation for abolition of inams in the Kutch area
Jammu and Kashmir	has also been enacted. Legislation for abolition of intermediary interests in land held by occupancy tenants and inferior owners is under consideration of the State Government. A ceiling has, however, been imposed and no intermediary holds more than 22½ acres.
Kerala	The Bills for abolition of Jemmi tenure in the Tranvan- core-area and for abolition of intermediary rights in respect of temple lands are awaiting enactment. Edawagai tenure has been abolished.
Madhya Pradesh	Intermediary tenures have generally been abolished. A Bill has been introduced to abolish musis and inams in the former Madhya Bharat area.
Madras	Intermediaries have been abolished with the exception of post-1936 inams and minor inams.
Mysore	In the area of the former Mysore State, legislation for the abolition of personal and miscellaneous inams has been enacted. In the Karnataka area, jagirs have been resumed. Legislation enacted for
Orissa	abolition of inams is yet to be implemented. Superior rights in permanently settled and temporarily settled zamindari estates have been abolished. Some inams and subordinate tenures of intermediary nature remain to be abolished.
Punjab	Intermediary tenures like superior owners and landlords of lands held by occupancy tenants have been abolished and inferior owners and occupancy tenants have been made owners of their lands.
Rajasthan	In the former Rajasthan area, jagirs with rental income of Rs. 2.98 crores have been resumed. The Rajasthan Land Reforms and Resumption of Jagirs Act has been amended so as to provide for resumption of jagirs held by charitable institutions, or those for the performance of religious services as well. A Bill for abolition of zamindari and biswedari tenures has been enacted. In the Ajmer area, estates with a total rental income of Rs. 14.69 lakhs have been resumed.
Uttar Pradesh	Intermediaries have been abolished except in the Kumaon Hills in regard to which a Bill has been promoted. Legislation for abolition of the Thekedari system in Government estates has been enacted.
West Bengal	All intermediary interests were acquired by April 1955.

The table below broadly indicates the position in regard to abolition of intermediaries for the country as a whole:

TABLE 140

AREA UNDER INTERMEDIARIES

	Percentage of total area
Area in which intermediary tenures existed Area in which legislation for abolition of intermediaries has been adopted Area in which abolition of intermediaries has been carried out Area in which intermediaries still remain	43 40 38 5

The following table gives the State-wise break-up of the estimates of the compensation payable and amount already paid to intermediaries, at the end of 1957:

TENANCY REFORM

The principal objectives of tenancy reform recommended by the Planning Commission are: (i) reduction of rents, (ii) security of tenure and (iii) ownership for tenants. The progress made in these directions is outlined below:

Andhra Pradesh

In the former Andhra area, tenants in possession on June 1, 1956, have been given a minimum term of four years and tenants admitted after this date a minimum term of six years. The rent is not to exceed 50 per cent of the gross produce for lands under Government irrigation sources, 45 per cent in case of dry lands and 28 1/3 per cent in case of irrigation by baling.

In the Telangana area, tenants are classified into (i) protected tenants (all tenants of persons owning an area of more than 3 family holdings and tenants in continuous possession for six years on prescribed dates), and (ii) ordinary tenants. Protected tenants have fixity of tenure subject to owner's right to resume land for personal cultivation up to 3 family holdings. Protected tenants have an optional right to acquire ownership up to one family holding provided the owner's holding is not reduced below two family holdings. The purchase price varies between 6 to 15 times the rent and is payable in half-yearly instalments not exceeding 16. The rent is not to exceed one-fourth of the gross produce in case of irrigated lands and one-fifth in other cases.

Up to February 1958.
 Up to July 1958.

[†] Including the former Madhya Bharat, Vindhya Pradesh and Bhopal areas.

Assam

A landlord may resume land from tenants for personal cultivation up to 33 1/3 acres subject to a minimum of 3 1/3 acres until alternative land is provided by Government. The right of resumption is permitted to owners whose principal source of income for maintenance is from cultivation of land. The crop-share rent is not to exceed one-fourth where the cost of cultivation is met by the landlord, and one-fifth in other cases. The cash rent payable by a tenant in permanently settled areas is not to exceed 100 per cent of rent payable by his landlord; it is 50 per cent in temporarily settled areas.

Bihar

Right of occupancy accrues after 12 years of continuous possession. Cash rent is not to exceed by more than 50 per cent of the rental value, if the land is held under a registered lease, and 25 per cent in other cases. The produce rent is not to exceed 7/20ths of the gross produce excluding chaff.

The Bihar Land Commission has set up four teams for visiting various States to study the progress of land reforms. Comprehensive land reform legislation is expected to be undertaken after these teams have reported.

Bombay

In the area of the former State of Bombay a landlord can resume one-half of the area provided that together with the land held under his personal cultivation it does not exceed three economic holdings (12 to 48 acres). In the non-resumable area tenants are deemed to have acquired ownership except where the landlord has less than an economic holding (3 to 12 acres). The maximum rent is not to exceed one-sixth of the gross produce or five times the land revenue, whichever is less. In the Marathwada area, the position is the same as that obtaining in the Telangana area of Andhra Pradesh. Legislation has been amended providing for reduction of rent to one-sixth of the produce and conferring right of purchase on ordinary tenants.

The Bombay Tenancy and Agricultural Lands (Vidarbha region and Kutch area) Act, 1958 provides for fixity of tenure subject to landlord's right to resume land up to 3 family holdings for personal cultivation. Provision has been made for enabling the State Government to transfer ownership to tenants with effect from April 1, 1961. Tenants have meanwhile an optional right to purchase provided the landlord is left with one family holding.

Jammu and Kashmir

The limit of resumption of land for personal cultivation is 2 acres of wet land or 4 acres of dry land in Kashmir Province and 4 acres of wet land or 6 acres of dry land in Jammu Province. The rent payable by tenants of owners of more than 12½ acres is not to exceed 1/4 of the gross produce for wet land and 1/3 for dry land.

Kerala

In Cochin area, the tenants have fixity of tenure and the landowners have no right of resumption. The ejectment of crop sharers (who are not treated as tenants) has been stayed. In Travancore area also, the ejectment of tenants (including crop sharers) has been stayed.

The Kerala Agrarian Relations Bill which includes provisions for comprehensive land reforms has been referred to the Select Committee.

Madhya Pradesh

In the former Madhya Pradesh area, the law provides for conferment of occupancy right on tenants of lands which are let out for a period of three years in any consecutive period of five years. In the former Vindhya Pradesh area, there is provision for security of tenure for a minimum term of 7 years for all tenants, resumption being permitted at the end of this term for personal cultivation. The 7-year protection will expire in April 1962. In the former Madhya Bharat and Bhopal areas, ejectment of tenants has been stayed.

The State Government have published the Land Revenue Code Bill which is modelled largely on the lines of similar legislation in old Madhya Pradesh. It seeks to achieve uniformity in the land revenue system in the entire reorganised State and also provides for a further measure of tenancy

reform and a ceiling on future acquisition.

Madras

An interim measure for protection of tenants from eviction has been adopted. Landowners owning less than 13 1/3 acres of wet land are, however, entitled to resume for personal cultivation half the area held by a tenant, subject to a maximum of 5 acres of wet land. Rent is not to exceed 40 per cent of produce for irrigated lands (35 per cent where irrigation is supplemented by lift irrigation) and 33 1/3 per cent in other cases.

Mysore

In the former Mysore State area, fixity of tenure has been provided for tenants in continuous possession for 12 years prior to April 1, 1951, subject to the landlord's right to resume for personal cultivation an area ranging from 50 to 75 per cent of the tenancy, varying according to the extent of land held by the tenant from the landlord.

A comprehensive Land Reforms Bill has recently been introduced. This will be applicable to the entire reorganised State of Mysore. Pending enactment of this legislation ejectment of tenants has been stayed.

Orissa

Ejectment of all tenants has been stayed up to June 30, 1959. A landowner holding less than 33 acres can, however, resume for personal cultivation an area up to 7 acres of wet land or 14 acres of dry land. The maximum rent has been fixed at one-fourth of the gross produce but not exceeding 4 to 6 maunds of paddy per acre. The State Government have prepared a draft Land Reforms Bill.

Punjab

In the former Punjab area, tenants have been given fixity of tenure subject to landlords' right to resume up to 30 standard acres. In the former PEPSU area, tenants in continuous possession of land for 12 years on December 3, 1953, will have complete security of tenure in an area not exceeding 15 standard acres. The rent is not to exceed one-third of the gross produce or value thereof.

Punjab and Pepsu Laws have been amended to provide safeguards for tenants from devices adopted by landlords to evade the provisions of

tenancy laws.

Rajasthan

A tenant is entitled to retain an area which yields a net annual income of Rs. 1,200 and the rent is not to exceed one-sixth of the gross produce. With a view to securing uniformity of land laws throughout the reorganised State, the Rajasthan tenancy and revenue laws have been

extended to the Ajmer area, Abu area (of former Bombay) and Sunel area (of former Madhya Bharat).

Uttar Pradesh

All tenants and sub-tenants have been brought into direct relationship with the State. They will continue to pay rents to the State at the existing rates and the State will pay compensation to the landlords out of its increased revenues.

West Bengal

All rent-receiving interests have been acquired by the State and the under-ryots and their subordinate tenants have been brought into direct relationship with the State. Crop sharers (Bargadars) do not get tenancy status. Crop share is not to exceed 50 per cent of the produce if the landlord contributes the cost of cultivation, and 40 per cent if he does not.

Union Territories

In Delhi, all tenants have been made owners of land on payment of a price ranging between 4 to 48 times the land revenue. The law has been already implemented in 131 out 306 villages and 7,800 tenants have been declared owners.

In Himachal Pradesh, occupancy tenants have optional rights to acquire ownership on payment of compensation, while in regard to non-occupancy tenancy the landlord can resume for personal cultivation one-fourth of his tenancy subject to a maximum limit of 5 acres. The rent is not to exceed one-fourth of the gross produce. One thousand tenants were granted ownership rights in 1957-58.

In Manipur, ejectment of tenants has been stayed while in Tripura

fixity of tenure for mots as well as under-nots has been provided.

CEILING ON HOLDINGS

The principle that there should be a ceiling on land holdings was accepted in the First Plan. It was suggested that a census of land holdings and cultivation should be held to make available the data relevant to the determination of the ceiling limit. The census was held in most of the States (see later in the chapter). The Second Plan reiterates the recommendation that there should be a ceiling at three family holdings and recommends that steps should be taken in each State to impose ceilings at existing holdings during the Second Plan period.

Ceiling has two aspects, namely, (i) ceiling on future acquisition, and (ii) ceiling on existing holdings. Ceiling on future acquisition has been

imposed in the following States:

Andhra Pradesh Assam	Telangana area Plain districts	12 to 180 acres. 50 acres.
Bombay	Bombay area (former)	12 to 48 acres.
	Marathwada area	12 to 180 acres.
	Saurashtra area	60 to 120 acres
	Vidarbha and Kutch areas	3 family holdings (area to be determined by tribunal)
Jammu and Kashmir		22½ acres.
Madhya Pradesh	Madhya Bharat area	50 acres.
·	Rajasthan area	30 to 90 acres (varying according to the class of soil).
Mysore	Bombay area Hyderabad area	12 to 48 acres 12 to 180 acres.
Punjab	,	30 standard acres. 30 irrigated acres or 90 dry
Rajasthan (including		acres.
Ajmer area) Uttar Pradesh		12½ acres.

West Bengal Delhi

25 acres. 30 standard acres.

Legislation has been enacted in the following States on existing holdings:

Andhra Pradesh Assam Bombay

Telangana area Plain districts Marathwada arca Vidarbha and Kutch areas

18 to 270 acres. 50 acres. 18 to 270 acres.

Jammu and Kashmir Mysore

Hyderabad area

5 family holdings. 221 acres. 18 to 270 acres.

Punjab

Pepsu area

30 standard acres (in case o. displaced persons 40 stan-dard acres)

Rajasthan

Ajmer area

50 acres (in case of land held by intermediaries).

West Bengal Himachal Pradesh 25 acres.

30 acres in Chamba district and area assessed at Rs. 125 in other areas.

In the Punjab, Government have been authorised to settle tenants on land under personal cultivation by landlords in excess of 30 standard acres. In Kerala, the Agrarian Relations Bill which is before the Select Committee provides for fixation of ceiling on future acquisition and existing holdings varying from 15 to 30 acres. The Madhya Pradesh Land Revenue Code Bill, 1958, also provides for a ceiling on future acquisition, the limit being left to be prescribed by Rules. In Mysore a Bill has been introduced providing ceiling on existing holdings as well as on future acquisition at an area yielding a net annual income of Rs. 3,600. The Andhra Pradesh Ceiling on Agricultural Holdings Bill, 1958, seeks to fix the ceiling on existing holdings at an area yielding a net annual income of Rs. 5,400 and ceiling on future acquisition at Rs. 3,600 income level. The implementation of legislation for imposition of ceiling on existing holdings has been completed in Jammu and Kashmir. In the Pepsu area of Punjab and Assam rules have been framed and declarations by the land-owners as to the extent of land held by them are being submitted. In West Bengal, the State Government have come into possession of surplus area in respect of Khas lands of the ex-intermediaries. It is being allotted to landless workers at present on a year to year basis.

CONSOLIDATION OF HOLDINGS

Both the First and Second Plans have emphasised the need for the consolidation of holdings. The Planning Commission recommended that the consolidation of holdings should be undertaken in Community Project areas as a task of primary importance to the agricultural programme. They have now completed a study of the methods evolved so far with a view to making available the best existing experience in tackling the problem.

During the First Plan period, about 21 lakh acres were consolidated in Bombay, 29 lakh acres in Madhya Pradesh, 48 lakh acres in Punjab, 13 lakh acres in Pepsu and 44 lakh acres in U.P. Work is in progress in one tehsil each in 21 districts in U.P. State plans for the Second Plan period include a provision for Rs. 450 lakhs for the purpose. The target (excepting some States for which figures are not available) is 360 lakh acres. In Bombay, legislation has been enacted for unification of the law relating to consolidation of holdings in the entire State. The Uttar Pradesh Consolidation of Holdings (Amendment) Act 1958, aims at removing delays in consolidation operations and other shortcomings. The following table shows the progress of consolidation of holdings in different States upto December 31, 1957.

TABLE 142 CONSOLIDATION OF HOLDINGS

SUB-DIVISION AND FRAGMENTATION

The operation of the laws of inheritance has resulted in the sub-division and fragmentation of holdings to the detriment of agricultural

production. The policy is to restrain this tendency.

Legislation for the prevention of fragmentation was undertaken in Bombay, Delhi, Punjab and PEPSU before the commencement of the First Plan. During the Plan period, Bihar, Hyderabad, Orissa, Rajasthan and Saurashtra enacted legislation regulating transfers and partitions with a view to preventing break up of a holding or diminution in the size of a plot below a certain minimum. In 15 States, legislative measures were adopted in order to prevent excessive fragmentation or sub-division. In Madhya Pradesh, a minimum limit of 15 acres has been fixed in the Madhya Bharat area and 5 acres in the Bhopal area. In the former Vindhya Pradesh

*The expression "work completed" in the above table refers to areas where after finalising the consolidation schemes, the possession of new holdings has actually been transferred.

†In the Review of the First Five-Year Plan, the area consolidated in Bombay has been shown as 21.2 lakh acres. This related to the area reported by the Bombay Govt. who have since informed that completed schemes mean schemes published under Section 19 of the Bombay Prevention of Fragmentation & Consolidation of Holdings Act. Out of 21.2 lakh acres under completed schemes possession has actually been transferred by December 31, 1957, in respect of 12.46 lakh acres in pre-reorganisation Bombay area and 3.88 lakh acres in the former Bombay areas transferred to Mysore State. In addition to 12.46 lakh acres, 19,068 acres have been consolidated in Vidarbha region now in Bombay State. in Bombay State where the work has been completed comes to 12.65 lakh acres.

(a) for Telangana area only. Old Andhra area—no target fixed.
(b) Target for Mahakosal region has been fixed. For other areas it is under consideration.

Target for 4 districts of the former Bombay State.

(d) Consolidation scheme was outside the Plan; now it is being included in Annual

(e) Proposed to be taken up after survey is finalised, N.F.—Not fixed.

N.A.-Not available.

area, 5 acres have been prescribed as the minimum limit for irrigated land and 10 acres for dry land. The minimum in the former Hydrabad State area of Andhra Pradesh is 4 to 60 acres, 3\frac{1}{6} acres in Uttar Pradesh and 8 standard acres in Delhi.

CENSUS OF LAND HOLDINGS

Census of land holdings and cultivation has been carried out in the former 22 States. Except Bihar, the census results for other States are available. In Andhra Pradesh, Bombay, Madhya Pradesh and Madras, it was a complete enumeration of holdings. In Punjab, Mysore, Delhi and Himachal Pradesh, the census was restricted to holdings of 10 acres or above. In Uttar Pradesh, Bihar, Orissa, Rajasthan and Kerala, the census was based on sample surveys. In Assam, West Bengal and Jammu and Kashmir, no fresh census was taken as decisions relating to ceilings were taken on the basis of data already available.

CO-OPERATIVE FARMING

The ultimate solution of the land problem, as envisaged in the First and Second Plans, is co-operative village management. In the First Plan, co-operative farming was viewed as a method by which small and middle farmers could bring into existence sizeable farm units which would facilitate the application on a wider scale of scientific knowledge, increase in capital investment and rise in the productivity of land. During this period, almost all States issued bye-laws for co-operative farming societies and framed rules for assisting them.

The main task visualised for the Second Plan period is to take such essential steps as will provide a sound foundation for the development of

co-operative farming.

The Standing Committee of the National Development Council considered the programme of co-operative farming at its meeting in September 1957, and decided that 3,000 co-operative farming experiments should be carried out during the rest of the Second Plan period.

At the end of December 1958, there were 2,020 co-operative farming societies. The following table shows the State-wise break-up of the societies.

TABLE 143

BHOODAN

The Bhoodan or voluntary land gift movement owes its inspiration to Acharya Vinoba Bhave. Describing the aims of the movement, Acharya Bhave says: "In a just and equitable order of society, land must belong to all. That is why we do not beg for gifts but demand a share to which the

poor are rightly entitled." The main objective is to "propagate the right thought by which social and economic maladjustments can be corrected without serious conflicts".

In its practical application, it takes the shape of asking for voluntary donations of one-sixth of the land for redistribution among the landless. In the non-agricultural sector, the movement assumes various forms such as Sampattidan (donations of money or other resources), Buddhidan and Jivandan (dedication of one's mental abilities and life to the achievement of the Bhoodan ideals), Sadhandan and Grihdan.

The movement which began on a modest scale on April 18, 1951, now covers the length and breadth of India. The target is to obtain 500 lakh acres of land so that it may be possible to provide some land for cultivation to every rural family. The movement has now widened out into Grandan, i.e., donations of entire villages, the ideal being that all land

should belong to the village community as a whole.

The Second Plan recognises that the practical success which is achieved in the development of Gramdan villages will have great significance for co-operative village development. At a conference convened by the Akhil Bharat Sarva Seva Sangh in September 1957 at Yelwal (Mysore State), the desirability of the closest co-operation between the Community Development Programme and the Gramdan movement was emphasised. The matter was discussed by a working group in the Ministry of Community Development and after further consideration at the Development Commissioners' conference held at Mt. Abu in May 1958, certain decisions were arrived at for closer co-operation between Bhoodan and Gramdan. Gramdan villages will now receive preference in the matter of opening Community Development blocks and starting of other community development activities.

Legislation has been adopted for facilitating donation and distribution of *Bhoodan* lands in Andhra Pradesh, Bihar, Bombay (Saurashtra area), Madhya Pradesh, Madras, Orissa, Punjab, Rajasthan, Uttar Pradesh, Delhi and Himachal Pradesh. Administrative instructions have been issued in

Bombay.

Financial assistance given by the State Governments to the movement since 1954-55 is shown below.

TABLE 144
ASSISTANCE TO BHOODAN

(In thousand rupees)

[†] Included in former Madhya Pradesh area.

Rupees 11.92 lakhs in 1956-57 and Rs. 10 lakhs in 1957-58 were sanctioned by the Government of India. They would also contribute Rs. 68 lakhs to a scheme drawn up by the All-India Sarva Seva Sangh. A scheme for resettlement of landless workers in Bhoodan lands on a co-operative basis costing Rs. 2.50 lakhs was also sanctioned in 1957-58.

The region-wise break-up of land collection and distribution under

the Bhoodan movement up to June 1958 is as follows:

TABLE 145

BHOODAN DONATIONS AND DISTRIBUTION

		Total	4,570

Rs. 14,42,160 were donated as Sampattidan up to the end of December 1956. During 1958 a sum of Rs. 55,468 was donated. A further sum of Rs. 59,492 in the form of Danapatras and another Rs. 19,000 as Sadhandan were also donated.

CHAPTER XXII

CO-OPERATIVE MOVEMENT

The idea of co-operation took concrete shape in India for the first time in 1904 when the Co-operative Credit Societies Act—a measure designed to combat rural indebtedness and provide for credit societies—was passed. In 1912 another Act was passed to provide for non-credit forms of co-operation in such activities as production, purchase, sale, insurance, housing, etc., and for the creation of unions of primary co-operative societies for mutual control and audit and of central and provincial banks to help the primary societies with credit. The Maclagan Committee, appointed by the Government of India in 1914, recommended greater non-official participation in the movement.

Although co-operation became a Provincial subject under the 1919 Act, the Government of India continued to take interest in the growth of the movement and established the Agricultural Credit Department in the Reserve Bank of India in 1935. The Co-operative Planning Committee appointed in 1945 recommended that primary societies should be converted into multi-purpose societies and that efforts should be made to bring 50 per cent of the villages and 30 per cent of the rural population within the ambit of the reorganised societies within a period of 10 years. It was also urged that the Reserve Bank should provide greater assistance to co-

operatives.

The Committee of Direction appointed by the Reserve Bank of India in 1951 surveyed the rural credit structure of the country and its report was published in December 1954. The survey revealed that co-operatives supplied only 3 per cent of the total borrowings of the agriculturists, and the Government an equally insignificant proportion. The Committee recommended an "integrated scheme of rural credit," the salient features of which are: (a) State partnership in co-operative institutions at all levels; (b) full co-ordination between credit and other allied economic activities, especially marketing and processing; (c) development, at the base, of primary agricultural credit societies; (d) establishment of a network of warehousing organisations; and (e) facilities for the training of co-operative personnel at all levels. The Committee also recommended the nationalisation of the Imperial Bank which through its branches should provide vastly extended remittance facilities for co-operative and other banks and endeavour to be responsive to the needs of co-operative institutions connected with credit, marketing and processing. Suitable amendment of the Reserve Bank of India Act and the establishment at the Centre of a National Cooperative Development and Warehousing Board were also recommended. While financial help for the reorganisation of the credit structure by such means as State particiption in the share capital of co-operative credit institutions was to be given by the Reserve Bank, the planned development of co-operative activities in the spheres of production, processing, marketing, and storage was to be the responsibility of the Central and State Governments.

The National Agricultural Credit (Long-term Operations) Fund set up in February 1956 (by an amendment of the Reserve Bank of India Act carried out earlier in May 1955) with an initial contribution of Rs. 10 crores was augmented by further annual contributions of Rs. 5 crores each in the years 1955-56, 1956-57 and 1957-58. This Fund is to be used for: (a) grant of long-term loans to State Governments to enable them to contribute to the

share capital of co-operative credit institutions; (b) provision of medium-term agricultural loans; (c) grant of long-term loans to central land mortgage banks; and (d) purchase of debentures of central land mortgage banks. The National Agricultural Credit (Stabilisation) Fund set up at the same time with an initial allotment of Rs. 1 crore during 1955-56 received a further contribution of Rs. 1 crore during 1956-57 and 1957-58. The Fund can be drawn upon for the purpose of giving medium-term loans and advances to State Co-operative Banks to enable them to convert short-term credit into medium-term credit, wherever necessary, because of drought, famine or similar calamities. Loans amounting to Rs. 6.04 crores were sanctioned from the Long-term Operations Fund of the Reserve Bank to the fourteen State Governments to enable them to contribute to the share capital of co-operative credit institutions, of which Rs. 5.83 crores were availed of by thirteen State Governments by the end of June 1958. No occasion has so far arisen for operating upon the Stabilisation Fund.

A National Co-operative Development and Warehousing Board was constituted on September 1, 1956, under the Agricultural Produce (Development and Warehousing) Corporations Act which came into force on August 1, 1956. The Board financed by the Government of India is intended to promote the development of co-operative activities in general and particularly to assist the progress of warehousing, processing and marketing.

The Agricultural Produce (Development and Warehousing) Corporations Act envisages the setting up of a Central Warehousing Corporation and a State Warehousing Corporation for each State. The Central Warehousing Corporation—to erect warehouses in strategic centres such as ports and railway junctions—has already been established with an issued share capital of Rs. 10 crores and it has set up nine warehouses so far; eleven State Warehousing Corporations—to build warehouses at other important centres—have also been formed and these are going to set up warehouses of their own.

The State Bank of India came into existence on July 1, 1955, as the result of the taking over, under an Act of Parliament, of the Imperial Bank of India. In pursuance of a statutory obligation requiring it to open not less than 400 branches within five years, the Bank opened 244 branches

up to the end of November 1958.

The Central Committee for Co-operative Training, jointly constituted by the Reserve Bank of India and the Government of India, has drawn up a comprehensive scheme of co-operative training covering all ranks of co-operative staff. There is an All-India Co-operative Training College at Poona for the training of senior officers of the co-operative departments and institutions; there are five Regional Training Centres for the training of the intermediate grade personnel; and eight institutions for the training of block level co-operative officers working in the Community Development Blocks. Special courses on co-operative marketing are organised at the five regional training centres and a special course in land mortgage banking at one of them. Training schools also exist in each State for the training of junior co-operative officers.

An integrated programme of co-operative development has been drawn up for the Second Five-Year Plan period, incorporating the important recommendations of the Rural Credit Survey Committee. Hitherto virtually restricted to the provision of credit, the movement will now encompass spheres of economic activity such as marketing, processing, warehousing, storage, etc. A target of Rs. 150 crores for short-term co-operative credit, Rs. 50 crores for medium-term credit and Rs. 25 crores for long-term credit to be made available to the agriculturists through co-operative channels by the end of 1960-61 has been aimed at. The organisation of 10,400 large-sized societies, 1,800 primary marketing societies, 35 co-operative sugar factories, 48 co-operative cotton gins and 118 other co-operative processing societies

is also provided for. It also envisages the construction of 350 warehouses by the Central and State Warehousing Corporations, 1,500 godowns for marketing societies and 4,000 godowns for large-sized primary agricultural credit societies.

During the year 1957-58, the credit limits sanctioned to State Co-operative Banks for seasonal agricultural operations and marketing of crops amounted to Rs. 48.24 crores, as against the preceding year's total of Rs. 35.25 crores. The level of borrowing (i.e. outstandings) at the end of 1957-58 stood at Rs. 40.47 crores as compared to Rs. 23.32 crores at the end of 1956-57 and Rs. 12.98 crores at the end of 1955-56. For financing the production and marketing activities of weavers' co-operatives, additional credit limits aggregating Rs. 205.78 lakhs at 11 per cent below bank rate were sanctioned during the year to 8 State Co-operative Banks on behalf of 102 co-operative institutions. A total credit limit of Rs. 3 crores was sanctioned at the Bank rate for meeting the working capital requirements of co-operative sugar factories. Medium-term loans amounting to Rs. 7.72 crores were sanctioned to 12 State Co-operative Banks as against Rs. 1.67 crores sanctioned to 6 State Co-operative Banks last year; the outstandings at the end of the year in this regard amounted to Rs. 3.42 crores as compared to Rs. 1.58 crores at the end of last year.

CO-OPERATIVE STRUCTURE

The structure of the co-operative movement is three-tiered, consisting of apex societies at the State level, Central societies at the district level and

primary societies at the village level.

Taking the average size of an Indian family as five, it may roughly be estimated that 9.69 crores or 25 per cent of the population had been brought within the co-operative movement by the end of 1956-57, allowance being made for some individuals being members of more than one society. In the table below the main operations of the societies in 1951-52 and 1956-57 are indicated.

TABLE 147

Agricultural Credit Societies

At the end of June 1957 the working capital of agricultural credit societies stood at Rs. 98.30 crores, loans advanced amounted to Rs. 67.33 crores, loans outstanding Rs. 76.82 crores and loans overdue Rs. 16.82 crores. Loans from central financing agencies and Government stood at Rs. 56.94 crores, while owned funds and deposits stood at Rs. 33.31 crores and Rs. 8.05 crores respectively. A State-wise analysis of the working capital reveals that the ratio of deposits to working capital is less than 6 per cent in the case of as many as 11 States. The following table shows the average membership, share capital, deposits and working capital of agricultural credit societies.

TABLE 151

AVERAGE MEMBERSHIP, SHARE CAPITAL, DEPOSITS AND WORKING
CAPITAL OF AGRICULTURAL CREDIT SOCIETIES

Particulars	1951-52	1956-57			
Average membership per society	• •	• •	•••	44	56 (In rupees)

Average deposits per society			;	408	498
Average deposits per member				9	9
Average working capital per society				4,190	6,086
Average working capital per member				95	107

The rates of interest continued to be high, in some cases as high as 12½ per cent or even 21 per cent as in Manipur. In States where the cooperative movement was well developed, the rates of interest ranged generally between 4 and 12 per cent.

Agricultural Non-Credit Societies

Agricultural non-credit societies are concerned with agricultural operations such as purchase of seed, manure, implements and machinery, provision of minor irrigation facilities, consolidation of holdings, co-operative farming and co-operative marketing. The principal types of such societies and their membership are shown below:

TABLE 152

⁽b) Unlimited Liability

Non-Agricultural Credit Societies

These societies include, among others, employee's credit societies and urban banks. Deposits which stood at Rs. 64.59 crores at the end of 1956-57 accounted for 64.31 per cent of the working capital. Some of these societies also did non-credit business. Goods worth Rs. 3.02 crores were received while sales amounted to Rs. 3.56 crores. The table below provides an analysis of their financial transactions in 1951-52 and 1956-57.

Primary Land Mortgage Banks

Of 326 primary land mortgage banks in the country at the end of 1956-57, as many as 240 or 73.61 per cent were concentrated in Andhra Pradesh, Madras and Mysore. Their membership stood at 3,33,586. Loans advanced by these banks amounted to Rs. 2.05 crores, while the working capital stood at Rs. 12.70 crores. The rates of interest charged to the ultimate borrower ranged between 5½ and 10 per cent (except in Bombay where loans for certain purposes were made at rates as low as 3½ per cent).

CENTRAL SOCIETIES

Central societies may be classified into two categories: (i) central banks and banking unions, and (ii) central non-credit societies. The composition and activities of these institutions are shown below.

Central Banks and Banking Unions

The principal function of central co-operative banks is to act as a balancing centre to their affiliates and to channel funds to the primary societies. The following table gives details about the central banks and banking unions.

TABLE 156
CENTRAL BANKS AND BANKING UNIONS

*			1951-52	1956-57

Other borrowings	 	• •	 20.1	30.2

The outstandings at the end of June 1957, against individuals and against banks and societies, totalled Rs. 3.86 crores and Rs. 68.04 crores

respectively. The percentage of overdues to outstandings was 21.3 in respect of individuals and 12.5 in respect of banks and societies. The total investment of central co-operative banks amounted to Rs. 29.05 crores at the end of 1956-57, of which Rs. 15.65 crores represented investments in Government and other trustee securities.

Central Non-credit Societies

The principal types of Central non-credit societies and their membership are given below:

TABLE 158

CENTRAL NON-CREDIT SOCIETIES

APEX SOCIETIES

Apex societies act as the balancing centres of their affiliated societies at the district level. Three categories of apex societies can be distinguished:
(i) State banks, (ii) State non-credit societies, and (iii) Central land mortgage banks.

State Co-operative Banks

The number of State Co-operative Banks, their membership and financial transactions during 1951-52 and 1956-57 are given below:

Central Land Mortgage Banks

The central land mortgage banks, which are the pivot of the structure of long-term finance to agriculturists through the primary land mortgage banks in the States, raise their funds mainly by the issue of debentures. These debentures are guaranteed by the State Government in respect of the repayment of principal and the payment of interest. Out of 12 banks only 3 banks viz. (1) Saurashtra Central Co-operative Land Mortgage Bank (2) Orissa Provincial Co-operative Land Mortgage Bank and (3) Madras Co-operative Central Land Mortgage Bank, floated debentures of the value of Rs. 150.00 lakhs, Rs. 10.00 lakhs and Rs. 50.00 lakhs respectively during 1956-57. The Reserve Bank of India contributed Rs. 1.50 lakhs to the debentures floated by the Orissa Provincial Co-operative Land Mortgage Bank. Debentures of the value of Rs. 16.95 crores were in circulation at the close of 1956-57. The Andhra and Madras Central Land Mortgage Banks jointly accounted for nearly 54 per cent of the total debentures. Table below indicates their development between 1951-52 and 1956-57.

OTHER ASPECTS

Supervising Unions

In 1956-57, there were 650 supervising unions comprising 31,136 affiliated societies with a membership of 33,01,510. Working capital of the affiliated societies stood at Rs. 121.81 crores. The income of the unions was drawn from (i) subscriptions from affiliated societies (Rs. 3.69 lakhs), (ii) contributions from central institutions (Rs. 5.62 lakhs), (iii) Government grants (Rs. 2.62 lakhs), and (iv) other sources (Rs. 1.88 lakhs). The expenditure incurred by the unions stood at Rs. 13.56 lakhs.

State Unions and State Institutes

There were 26 such unions with 38,677 primary and 495 central affiliated societies and 1,299 individual members at the end of June 1957. Their total income stood at Rs. 47.70 lakhs and total expenditure Rs. 45.25 lakhs. Contributions to their income came from (i) fees or subscriptions from affiliated societies (Rs. 1.00 lakh), (ii) contributions from Central and State banks (Rs. 0.31 lakh), (iii) Government grants (Rs. 39.08 lakhs), and (iv) other sources (Rs. 7.31 lakhs).

Insurance Societies

Four fire and general insurance co-operative societies handled business of Rs. 39.20 crores in respect of fire insurance, Rs. 7.03 crores in respect of godowns and buildings, Rs. 3.45 crores in respect of cotton mills and Rs. 6.53 crores in respect of factories.

Policies totalling 1,892 were issued in the year 1956-57 by two cooperative motor insurance societies. The types of risks insured were (i) comprehensive (Rs. 0.51 lakh), (ii) liability to public (Rs. 0.47 lakh) and (iii) 'Act' liability (Rs. 0.95 lakh).

Societies Under Liquidation

At the beginning of 1956-57, there were 13,372 co-operative societies under liquidation, while 2,258 societies were brought into liquidation during the course of the year. The value of assets realised and liabilities paid off during 1956-57 amounted to Rs. 64.46 lakhs and Rs. 49.37 lakhs respectively.

CHAPTER XXIII

IRRIGATION AND POWER IRRIGATION

India's water resources have been provisionally estimated at 13,560 lakh acre-feet of which approximately 4,500 lakh acre-feet are believed to be utilisable for irrigation. Only 880 lakh acre-feet representing about 6.5 per cent of the total and about 19.5 per cent of the utilisable water had been made use of up to 1951. The table below gives the approximate position of the total resources in the different basins and their utilisation upto 1951 and during the First and Second Plans.

TABLE 162
WATER RESOURCES AND THEIR UTILISATION

(In lakh acre-feet)

River System	Estimated average flow	Utilisation upto 1951	Additional utilisation by projects in the 1st Plan (on full devel- opment)	Additional utilisation by projects in the 2nd Plan (on full deve- lopment)
Indus Ganga Brahmaputra Godavari Mahanadi Krishna Narbada Tapti Kaveri	 1,680 4,000 3,000 840 840 500 320 170 120	80 380 23 120 31 90 2 2 2 80	110.0 215.0 Nil 10.0 105.0 156.0 Nil 7.0	12.0 145.0 Nil 15.0 2.0 26.0 101.0 35.0 6.0

The possibilities of diverting the normal flow of rivers into irrigation canals have almost been exhausted. The plans for the future development of irrigation, therefore, aim at impounding by dams the surplus river-flow during the monsoon for use during the dry weather. In areas unsuitable for flow-irrigation, the construction of minor irrigation works, such as tanks and wells, and the installation of water-lifting devices have been planned.

The Central Board of Irrigation and Power, constituted in 1927, is responsible for the initiation of fundamental research in the country in the field of irrigation and power and the co-ordination of the work of sixteen

research stations established in different parts of the country.

The Central Water and Power Commission is charged with the responsibility of initiating, co-ordinating and furthering, in consultation with the State Governments concerned, schemes for the control, conservation and utilisation of water resources throughout the country for the purpose of flood control, irrigation, navigation and water power generation; it is also responsible for schemes of thermal power development and of transmission and utilisation of electrical energy throughout the country. The Commission has three wings, viz., Water Wing, Power Wing and Flood Wing.

FLOOD CONTROL

Following the succession of unprecedented floods during the 1954 monsoon season, the Government of India formulated a comprehensive programme of flood control in September 1954. Divided into three phases the programme was devoted during the first two years mainly to intensive investigation and collection of data. During the second phase, covering the next four or five years, roughly corresponding to the Second Plan period, flood protection measures such as the improvement of embankments and channels are being undertaken. Construction of storage reservoirs and necessary additional embankments on the tributaries of certain rivers is envisaged in the third phase.

Flood Control Boards, assisted in technical matters by Advisory Committees, have been formed in twelve States in addition to the Central Flood Control Board. Four River Commissions (Floods) have also been set up by the Centre to assist the Central Flood Control Board in technical matters. A Flood Wing has been added to the Central Water and Power Commission. Sixty schemes, each estimated to cost Rs. 10 lakhs and above and involving a total expenditure of Rs. 27·28 crores have been approved by the Central Board. Another 509 schemes, each costing less than Rs. 10 lakhs and involving a total outlay of Rs. 11·27 crores have been approved or sanctioned in the different States and Union Territories. 249 more schemes estimated to cost Rs. 12·45 crores are under consideration.

The level of over 4,200 villages in the flood zones in the U.P. has been raised and 2,443 miles of embankments, exclusive of 135 miles of the Kosi embankments, have been completed in the various States since the inception of the flood control programme in 1954-55. The earthwork done in the embankments is of the order of 390 crore cft., exclusive of 78 crore cft., in the

Kosi embankments.

A High Level Committee on Floods, which was set up by the Government of India in April 1957 in order to assess the flood problem in the country and advise on the measures that should be taken to tackle it, submitted its second and final report in November 1958. The recommendations contained in the first report submitted in December 1957 were accepted by the Central Flood Control Board in May 1958.

INLAND NAVIGATION

Some of the multi-purpose schemes completed or under construction include inland navigation as one of the objectives. The Damodar Valley Corporation envisages the construction of a navigation canal 85 miles long, linking up the lower Raniganj coal-fields with the Hoogly at Tribeni, 30 miles above Calcutta. After the completion of the Hirakud Dam Project, inland navigation from Dholpur to Cuttack (a distance of 106 miles) will be possible. The Tungabhadra Project includes a navigation-cum-irrigation canal on the Andhra Pradesh side. Proposals for provision of navigation facilities on the Rajasthan Canal are under active consideration.

POWER

The progress of power production was very slow up to the midtwenties; the aggregate installed capacity in 1925 was only 1,62,341 kw. By 1945, the installed capacity had increased more than five-fold to 9,00,402 kw. The installed capacity of power plants in the public utilities in March 1958 was 32,23,111 kw.—an increase of nearly 136 per cent over the past ten years. During the same period, the generation of electricity increased from 40,733 lakh kwh. to 1,13,219 lakh kwh., showing an increase of 178 per cent. The growth in steam, diesel and hydro plant capacity during the period was 133, 151 and 139 per cent respectively. The progress of electri-

city supply in India during the period from 1939 to March 1958 is illustrated below in terms of index numbers:

TABLE 163

Index of total sale		* *		\	165.0	457.4

Table 164 indicates the progress of electricity supply during 1939-58.

Resources

The annual per capita generation of electricity in India is only 35 kwh. compared to Norway's 7,250 kwh., Canada's 5,450 kwh., the U.K.'s 2,000 kwh., Japan's 850 kwh., U.S.S.R.'s 960 kwh. and the world average of 670 kwh.

Studies of the west-flowing rivers of the Western Ghats, the east-flowing rivers of South India and the rivers of the Central Indian Plateau, by the Central Water and Power Commission, indicate an aggregate power potential of 147 lakh kw. in 115 major schemes outlined in the reports published by it. Similar studies are in hand for other areas. At present, the estimated total potential of the country is over 410 lakh kw.

The pattern of power development in India, at present, is as follows:

Mysore, Kerala, Punjab, Orissa, Jammu & Kashmir

Mainly hydro.

Madhya Pradesh, Rajasthan, Bihar and West Bengal

Mainly thermal.

Bombay, Madras, Andhra Pradesh, Uttar Pradesh and Assam

Partly thermal, Partly hydro.

As at present visualised, power development in India will eventually be one of inter-connected hydro-electric and thermal power stations in various regions. It is conceivable that the regional systems will, in due

* Figures are for the year ending March 1958.

course, be inter-connected so as to form an all-India grid, alongside the development of some of the large power resources which are capable of providing adequate capacity to meet the needs of outlying areas.

Organisation for Power Development

The generation and distribution of electricity in India was for a long time governed by the Indian Electricity Act of 1910. The Electricity (Supply) Act passed in 1948 provided for the setting up of a Central Electricity Authority for the entire country as well as regional organisations known as State Electricity Boards. Accordingly, the Central Electricity Authority was constituted in 1950 and State Electricity Boards have been set up in West Bengal, Madhya Pradesh, Bombay, Kerala, Madras, Rajasthan, Mysore, Assam, Bihar and the Punjab.

Ownership

Until 1925, the development of electric power was confined mainly to private companies that took out licences under the Indian Electricity Act of 1910. It was only in the la e twenties that schemes for the development of power were launched by some of the States. In March 1958, private companies owned 34.4 per cent of the public utility installations and 39.9 per cent of the total installed capacity, as shown in the following table.

TABLE 165

OWNERSHIP: PUBLIC UTILITY INSTALLATIONS (MARCH 1958)

Light and small power

[†] Includes electric traction and public water works.

Rural Electrification

A few large power systems serve the needs of rural areas. Rural electrification has so far made headway only in Andhra Pradesh, Bihar, Bombay, Kerala, Madras, Mysore, Punjab, Uttar Pradesh and West Bengal. The following table shows the number of electrified towns and villages at the end of March 1958.

TABLE 167

TOWNS AND VILLAGES WITH ELECTRICITY SUPPLY
(March 1958)

Population	Towns and villages in this group	Towns and villages with public electricity supply	Percentage of towns & villages with public electricity supply	
Over 1,00,000	73	73	100.00

Power Schemes under the Plans

There were 142 power development schemes in the public sector in the First Plan. Of these, the major multi-purpose river valley projects were Bhakra Nangal, Hirakud, Damodar Valley Corporation, Chambal, Rihand, Koyna and Kosi.

The principal power schemes completed and brought into service during the First Plan were:

		Installed capacity (kw.)
1.	Nangal (Punjab)	48,000
2.	Bokaro (Bihar)	1,50,000
3.	Chola (Kalyan, Bombay)	54,000
4.	Khaperkheda (Madhya Pradesh)	30,000
5.	Moyar (Madras)	36,000
6.	Madras City Plant Extensions (Madras)	30,000
7.	Machkund (Andhra Pradesh-Orissa)	34,000
8.	Pathri (Uttar Pradesh)	20,000
9.	Sarda (Uttar Pradesh)	41,400
10.	Sengulam (Kerala)	48,000
11.	Jog (Mysore)	72,000

The following table shows the progress of installed capacity and generation of electricity during the First Plan and the development envisaged during the Second Plan.

TABLE 168

RIVER VALLEY PROJECTS

India's natural waterways are more or less evenly distributed over the entire country. The ultimate goal of the development of irrigation is the doubling of the irrigated area within 15 to 20 years. The additional food production resulting from this extension of irrigation will not only cover the present deficit but also provide, to some extent, for the future growth of the population.

The First Five-Year Plan provided for the execution of nearly 300 big and small schemes to extend irrigation facilities to nearly 220 lakh

acres of land on full development.

Particulars of the principal irrigation works in the country and the principal irrigation schemes included in the Second Plan are given at the end of this chapter in tables 171 and 172. The major river valley projects are described briefly in the following paragraphs.

Bhakra-Nangal Project

The Bhakra Nangal project, the largest multi-purpose project in India, estimated to cost Rs. 170 crores, consists of a 740-ft. high dam, which is the highest straight gravity dam in the world, with about 650 miles of canals and over 2,000 miles of distributaries. The Bhakra dam is being constructed across the Sutlej river in a mountain gorge just before the river enters the plains. The Nangal dam is located 8 miles down-stream and will serve as a balancing reservoir to take up the diurnal variations of water released from Bhakra and thus ensure steady supplies. The construction of the project was started in 1946. All works, except the Bhakra dam and its power houses, which are in progress, have almost been completed.

In 1957-58, an area of about 15 lakh acres was irrigated by the Bhakra canal system in the Punjab and Rajasthan. The canal system commands a gross area of about 66.7 lakh acres. Of this, the cultivable commanded area will be 58 lakh acres and 36 lakh acres will be annually irrigated on full development. In addition, an area of 37 lakh acres will get increased water supply. It is anticipated that, on full development, there will be an additional outturn of 8.5 lakh tons of wheat and other foodgrains, 5.9 lakh bales of cotton, 1.5 lakh tons of sugarcane and 0.3 lakh

tons of pulses and oilseeds.

There will eventually be two power houses at Bhakra, one on each side of the dam. In addition, there are two other power houses on the

Nangal hydel channel. The power house at Ganguwal with two units of 24,000 kw. each was commissioned in January 1955. The power house at Kotla, having the same capacity, was put into operation in July 1956. It is proposed to instal an additional unit of 29,000 kw. in each of these power houses. The left bank power house at Bhakra will have 5 generating sets of 90,000 kw. each. With the addition of these units and one unit each of 29,000 kw. at Ganguwal and Kotla, there will be an installed capacity of 6,04,000 kw. and firm capacity of 3,32,000 kw.

Partial storage of water above the Bhakra dam started in mid-1958

when a limited supply of water for perennial irrigation was released.

Hirakud Dam Project

The Project harnesses the river Mahanadi and will provide irrigation to 6.7 lakh acres of land in Sambalpur and Bolangir districts. The power house at the base of the dam will have an installed capacity of 1,23,000 kw. The main dam—the world's longest main stream dam—is 15,748 feet long; it is flanked by 13 miles of dykes on both sides and impounds 66 lakh acrefect of water. The revised estimated cost of the project is Rs. 70.78 crores.

The main dam and dykes have been completed in all reaches. Upto the end of October 1958, irrigation facilities had been provided for 2,41,983 acres of land. The entire network of canal distribution system is expected to be completed by the end of September 1959. In the power house, all the four generating units, with an installed capacity of 1,23,000 kw. have been commissioned and power is being supplied at present to the cement factory at Rajgangpur, the steel works at Rourkela, the ferromanganese plant at Joda, the paper mills at Brajarajnagar and the textile and other industries in and around Chowdwar. The towns of Cuttack, Puri, Sambalpur, Sundergarh, Bargarh and several other places are also getting power from Hirakud.

A scheme costing Rs. 14.92 crores has been sanctioned for delta irrigation and when completed in 1960, it will supply perennial irrigation

to 18.7 lakh acres annually in the Cuttack and Puri districts.

To meet the increasing load demand, the Chiplima power house project, (with an installed capacity of 1,09,000 kw.) costing Rs. 14.32 crores, was sanctioned in July 1956. Work on the project is progressing according to schedule.

Rajasthan Canal Project

The Rajasthan canal project estimated to cost Rs. 66.47 crores was sanctioned in July 1957 and envisages the construction of a canal taking off from the Harike barrage across the river Sutlej and has been divided into two parts:—

(a) the head reach, 110 miles long, which lies in the Punjab territory (Rajasthan feeder); and

(b) the lower reach, 315 miles long, which lies in Rajasthan territory (Rajasthan canal).

The areas to be benefited in Rajasthan are in the districts of Bikaner, Jaisalmer and Sri Ganganagar.

Damodar Valley Project

The project will comprise, on completion, four storage dams at Tilaiya, Konar, Maithon and Panchet Hill with hydel power houses of a total capacity of 1,04,000 kw. attached to all the dams except Konar; three thermal power stations at Bokaro, Durgapur and Chandrapura with a total capacity of 5,00,000 kw., an extensive power transmission grid and an irrigation barrage at Durgapur with canals and distributaries.

The all-concrete Tilaiya dam on the river Barakar, with earthen extensions, on either side, was completed in 1955. The Maithon dam on the river Barakar stores 12 lakh acre-feet of water, and the underground hydroelectric station near the dam has a capacity of 60,000 kw. The dam was completed in September 1957; in the power house two generating units of 20,000 kw. each have been commissioned while the third unit of the same capacity has been practically completed.

Designed primarily for flood control, the Panchet Hill dam will impound 12 14 lakh acre-feet of water. A 40,000-kw. hydro-electric

station is also being built near the dam.

The 2,271-ft. long and 38-ft. high barrage at Durgapur in West Bengal was opened in August 1955. It will irrigate over 10.44 lakh acres of land through a network of canals (to be completed by June 1959) and distributaries. Nearly 85 miles of the main left bank canal will be navigable and provide an alternative means of communication between Calcutta and

the coalfields of Ranigani.

The Bokaro thermal power station with an installed capacity of 1,50,000 kw. was commissioned in February 1953. An additional unit of 75,000 kw. at this station is expected to be commissioned by the end of 1959. At about the same time the Durgapur thermal power station with an installed capacity of 1,50,000 kw. will be commissioned. Work has also started on the third thermal station at Chandrapura with an installed capacity of 1,25,000 kw. which will mainly supply power for railway electrification.

Tungabhadra Project

This joint undertaking of the Governments of Andhra Pradesh and Mysore comprises a 7,942-foot long and 162-foot high dam on the Tungabhadra river and a system of canals and power stations on either side.

The dam was inaugurated in July 1953. The reservoir, which has a waterspread of 146 square miles, will ultimately store 30 lakh acre-feet of water. The two canals on either side will irrigate nearly 8.23 lakh acres in Andhra Pradesh and Mysore States. There will be two power stations on the right side, one below the dam and the other at the end of a 15 mile long canal at Bukhasagaram. Two generating units of 9,000 kw. each, in the dam power house and two units of the same capacity out of three units contemplated in the canal power house have been commissioned. A power station will also be constructed below the dam on the left side where three generators of 9,000 kw. each will be installed in the first instance.

Kosi Project

The three-unit Kosi scheme, estimated to cost Rs. 44.76 crores, will, besides giving protection from flood, irrigate about 13.97 lakh acres annually in Bihar. Unit I of the scheme includes a barrage (scheduled for completion by June 1962) across the river Kosi about 3 miles above Hanumannagar, in Nepal. Unit II consists of embankments (completed), about 152 miles in length, along both the banks of the river. Unit III comprises the Eastern Kosi Canal (work in progress) which will take off from Hanumannagar Barrage. It will have four branches, viz., Murliganj Branch, Janakinagar Branch, Banmankhi Branch, and Araria Branch.

Chambal Project

The first phase of the project, which is being jointly executed by the Madhya Pradesh and Rajasthan Governments, consists of the Gandhi Sagar dam, Gandhi Sagar power station, transmission lines, Kotah barrage and canals on either side of the barrage. The reservoir to be formed by the Gandhi Sagar dam will have a gross storage capacity of 68.5 lakh acre-

feet. The canal system will irrigate 11 lakh acres in Rajasthan and Madhya Pradesh. Besides, 92,000 kw. of power at 60 per cent load factor will be generated from the four generating sets which are being installed at the Gandhi Sagar power station. Though the project as a whole is expected to be completed by 1962, generation of power and irrigation are expected to start in 1959-60.

The project (Stage I) is estimated to cost Rs. 63.59 crores.

Nagarjunasagar Project

The Nagarjunasagar project, which is a scheme of the Andhra Pradesh Government, as sanctioned is scheduled to be completed by the year 1963-64 and is expected to yield annually about 18 lakh tons of food grains. The reservoir will have an impounding capacity of 54.4 lakh acre-feet.

The project, which is estimated to cost Rs. 86.57 crores, envisages the construction of a masonry dam on the Krishna river near Nandikonda village, 290 feet high (spillway) above foundation level, with 5 feet falling shutters. The dam will be built of stone masonry and provided with 8 penstocks of 16 ft. dia. and 2 of 25 ft. dia. for eventual generation of power in the second stage of the project

The Right Bank Canal, 135 miles long, will irrigate an area of 9.70 lakh acres, while the Left Bank Canal, 108 miles long, will irrigate 7.9 lakh acres. Besides this, an additional 3 lakh acres in the Krishna delta will be irrigated.

Koyna Project

The first stage of the project estimated to cost Rs. 38.28 crores and inaugurated in January 1954, involves the construction of a 208-ft. high dam across the river Koyna and a tunnel which will divert the waters of the river to ensure a drop of about 1,570 feet. The underground power house will have four units of 60,000 kw. each. About 2.3 lakh kw. of power will be supplied to Bombay and Poona and the remaining 10,000 kw. to the adjoining areas in Maharashtra.

Rihand Dam Project

The project, estimated to cost Rs. 46.05 crores and scheduled for completion by 1961, envisages the construction of a concrete gravity dam, 3,254-ft. long and 300-ft. high, across the river Rihand near village Pipri in District Mirzapur, about 29 miles south of the confluence of the Rihand and the Sone rivers. The reservoir, 180 square miles in area, to be created by the dam will store 86 lakh acre-feet of water. A power station with an initial installed capacity of 2.5 lakh kw. and ultimate installed capacity of 3 lakh kw. will be constructed at the toe of the dam. Power from the project will be used for large-scale industrial and agricultural development of an economically backward region of Uttar Pradesh, with a population of over 2.5 crores, by providing cheap power for cottage industries as well as for medium and major industries. Power from the project will also be supplied to operate tubewells capable of irrigating about 14 lakh acres of land in U.P. and about 5 lakh acres in Bihar.

Bhadra Reservoir Project

The multi-purpose project, estimated to cost Rs. 24.42 crores and scheduled for completion by 1961, across the river Bhadra in Mysore State will irrigate 2.34 lakh acres of land in Shimoga, Chickmaglur, Chitaldurg and Bellary Districts and will have a power station with an installed capacity of 33,200 kw.

Kakrapara Project

This project, financed by the Bombay Government, may be regarded as the first phase of the development of the Tapi valley. The weir, 2,038-ft. long and 45-ft. high, on the rocky river-bed near Kakrapara, 50 miles upstream of Surat, was completed in June 1953. Canals are scheduled to be completed in 1963. The scheme will irrigate 6.53 lakh acres in the Surat district.

Machkund Project

A joint venture of the Governments of Andhra Pradesh and Orissa, this hydro-electric project harnesses the river Machkund which forms the boundary between the two States. A dam 176-ft. high above foundations and 1,345-ft. long has been constructed at Jalaput across the Machkund river to store 6,25,000 acre-feet of water. Three generating units, each with a capacity of 17,000 kw., are already operating; three more units of 21,250 kw. each are under installation. The total installed capacity on completion will be 1,14,750 kw.

Mayurakshi Project

This project of the West Bengal Government is mainly an irrigation scheme though it also provides for the installations of a 4,000 kw. hydroelectric plant. Power from the project will be supplied to the Birbhum and Murshidabad districts in West Bengal and Santhal Paraganas in Bihar. The first stage of the project was completed in 1951 with the construction of a diversion barrage at Tilpara near Suri in West Bengal. The 155-ft. high and 2,170-ft. long Massanjore dam, now named Canada dam, was completed in June 1955. The canals will irrigate 7.2 lakh acres annually. The Canada dam will have a capacity of 5 lakh acre-feet of water and will provide rabi irrigation for nearly one lakh acres. The first 2,000 kw. generating set was commissioned in December 1956 and the second in February 1957.

DEVELOPMENT PROGRAMME

About 30 lakh acres of land were brought under irrigation by large and medium-sized projects in the First Plan. During the Second Plan, an additional area of 100 lakh acres will receive irrigation benefits, 90 lakh acres from projects undertaken during the First Plan and 10 lakh acres from new projects. These new projects will eventually irrigate an area of 168 lakh acres. Taking into account 100 lakh acres brought under irrigation by minor schemes in the First Plan and the target of 90 lakh acres from such schemes in the Second Plan, the total irrigated area in the country by 1961 will be 835 lakh acres. This will mean about 62 per cent more irrigated area than at the commencement of the First Plan (515 lakh acres).

At the beginning of the First Plan, the total installed capacity of power-generating plants amounted only to 23 lakh kw. Half of this was in the electricity companies in the bigger towns. About a quarter of the installed capacity was in the public sector, the balance being in industrial establishments which generated their own power. In the First Plan period, installed capacity increased by about 11 lakh kw. bringing the total installed capacity to 34 lakh kw. In this, the share of the public sector increased from 6 lakh kw. to 14 lakh kw.

It has been estimated that over the next 10 years, installed capacity will need to be expanded by 20 per cent annually. This means that the target for 1966 should be about 1.5 crore kw. Accordingly, a programme to raise the installed capacity to 69 lakh kw. has been included in the Second Plan. Of the increase of 35 lakh kw. between 1955-56 and 1960-61, 29 lakh

kw. will be in the public sector, 3 lakh kw. in electricity supply companies and 3 lakh kw. in industrial establishments which generate their own power. In the public sector, hydel power will account for the addition of 21 lakh kw. and thermal power for 8 lakh kw. In all, 42 power-generating schemes (new schemes and extensions to existing power stations) will be undertaken during the Second Plan. These will include 23 hydro-electric and 19 steampower stations. During this period the per capita comsumption of electricity is expected to double, from 25 to 50 units.

The National Projects Construction Corporation Private Ltd.

In order to ensure the best utilisation of the available trained personnel and equipment rendered surplus on projects nearing completion, and to assist State Governments which do not possess adequate organisation for the execution of large projects, the National Projects Construction Corporation Private Ltd., incorporated under the Companies Act was set up on January 9, 1957.

The Central Government and the State Governments of Rajasthan, Madhya Pradesh, Kerala, Bihar and Jammu and Kashmir have contributed towards the share capital. The Punjab and Assam Governments have also agreed to participate in the scheme.

[†] The Second Plan expenditure shown in the column 3 is according to original provisions. These figures are under revision by the Planning Commission.

CHAPTER XXIV

INDUSTRY

According to the 1954 Census of Indian Manufactures,* India had 7,067 registered factories†. Of these 6,637 or 94 per cent of the total, which submitted returns, employed in all Rs. 787.8 crores worth of capital, consisting of Rs. 355.6 crores fixed capital and Rs. 432.6 crores working capital. The total number of persons employed in these factories was 17,14,770 including 15,33,686 workers. The total value of the products of these manufacturing industries was Rs. 1,288 crores, the net value added by manufacture amounting to Rs. 373 crores. Salaries and wages (including the money value of other benefits) paid to employees amounted to Rs. 218.6 crores.

The total profits earned by 318 joint-stock companies during 1955, according to another estimate,** amounted to Rs. 41.81 crores as against Rs. 40.13 crores in the previous year. The index number of industrial profits during 1955 for all industries, with 1939 as the base year, was 334.3 compared to 320.8, 261.2 and 190.6 during 1954, 1953 and 1952 respectively. The index numbers of industrial profits during 1955 for certain important industries were as follows: jute 277.5; cotton 535.0; tea 183.1; sugar 413.5; paper 747.8; iron and steel 307.9; coal 200.0; and cement 409.7. The revised index† of industrial profits for 1956 (base 1950=100) stood at 149.1. The indices for certain industries was as follows: tea 114.5; coal 103.2; sugar 178.7; cotton 133.1; jute 55.3; iron and steel 120.8; engineering 368.2; cement 128.2; and paper 209.0.

INDUSTRIAL POLICY

Independent India's industrial policy was first announced in 1948. This envisaged a mixed economy with an overall responsibility of the Government for the planned development of industries and their regulation in national interest. While it reiterated the right of the State to acquire an industrial undertaking in the public interest, it reserved

an appropriate sphere for private enterprise. †††

A fresh statement of industrial policy, necessitated by the acceptance of a socialistic pattern of society as the national objective, was announced on April 30, 1956. Under this, industries specified in Schedule A (enumerated below) will be the exclusive responsibility of the State, while Schedule B industries (also enumerated below) will be progressively State-owned, but at the same time private enterprise will be expected to supplement the efforts of the State in these fields. Future development of industries falling outside these Schedules will, in general, be left to private enterprise. Notwithstanding this demarcation, it will always be open to the State to undertake any type of industrial production.

Schedule A Industries: Arms and ammunition and allied items of

††† See 'INDIA 1957' p 289.

^{*}The following States and Union Territories were not covered by the Census: Jammu and Kashmir, Madhya Bharat, Hyderabad, Bhopal, Bilaspur, Manipur, Tripura and the Andaman and Nicobar Islands.

[†]Those employing 20 or more workers on any day and using power.

**By the Ministry of Finance, Department of Company Law Administration.

††Source: Reserve Bank of India in collaboration with the Department of Company Law Administration.

defence equipment; atomic energy; iron and steel; heavy castings and forgings of iron and steel; heavy plant and machinery required for iron and steel production, for mining, for machine tool manufacture and for such other basic industries as may be specified by the Central Government; heavy electrical plants, including large hydraulic and steam turbines; coal and lignite; mineral oils; mining of iron ore, manganese ore, chrome ore, gypsum, sulphur, gold and diamonds; mining and processing of copper, lead, zinc, tin, molybdenum and wolfram; minerals specified in the Schedule to the Atomic Energy (Control of Production and Use) Order, 1953; aircraft; air transport; railway transport; shipbuilding; telephones and telephone cables; telegraph and wireless apparatus (excluding radio receiving sets); generation and distribution of electricity.

Schedule B Industries: All other minerals except "minor minerals" as defined in Section 3 of the Minerals Concession Rules, 1949; aluminium and other non-ferrous metals not included in Schedule A; machine tools; ferro-alloys and tool steels; basic and intermediate products required by chemical industries such as the manufacture of drugs, dyestuffs and plastics; antibiotics and other essential drugs; fertilisers; synthetic rubber; carbonisation of coal; chemical

pulp; road transport; sea transport.

REGULATION OF INDUSTRY

Consistently with the policy first announced in 1948, the Constitution was amended and the Industries (Development and Regulation) Act, 1951, was enacted. Under the Act, all new and existing undertakings were required to be licensed. The Government were authorised to examine the working of any industrial undertaking and to issue such directions as they considered necessary. If the undertaking continued to be mismanaged, the Government were empowered to take over its management or control. A Central Advisory Council consisting of the representatives of industry, labour, consumers and primary producers was to be constituted to advise the Government on all matters concerning the development and regulation of industries. Development Councils for individual industries were also

to be set up.

By exercising these powers, the Government aim at securing a proper utilisation of the country's resources, a balanced development of large and small industries, and a proper regional distribution of the various industries. At present 162 industries come within the scope of the Act. Besides the Central Advisory Council of Industries, Development Councils have been set up for the following industries: (i) heavy chemicals (acids and fertilisers), (ii) internal combustion engines and power-driven pumps, (iii) bicycles, sewing machines and instruments, (iv) sugar, (v) light electrical, (vi) heavy electrical, (vii) drugs, dyes and intermediates, (viii) alkalis and allied industries, (ix) woollen textiles, (x) art silk textiles, (xi) machine tools, (xii) non-ferrous metals, (xiii) oil-based and plastics industries, (xiv) food processing, and (xv) alcohol and fermentation. A number of panels and expert committees have been appointed from time to time to study various industries. During January-September 1958, 554 new licences were approved under the Act (as against 589 in 1957); many of the licences concerned the production of machinery and allied items.

For the development of important industries for which sufficient capital has not been forthcoming in the private sector, the Government give financial assistance either by granting loans on special terms or by participating in equity capital. Industries which have received such assistance include the manufacture of explosives for civil purposes, intermediates for certain types of dyestuffs, textile machinery and steel. In order to promote decentralisation of industry, the Government have decided to pool and equate the prices of steel and cement at all railheads in India.

PRODUCTIVITY

Following the recommendations of a Productivity Delegation, which visited Japan in October-November 1956, a National Productivity Council was set up in February 1958 as an autonomous body with representatives of Government, employers, labour and others. The object is to inculcate productivity consciousness in the country and apply the latest techniques of increasing productivity in industry, by promoting the setting up of local productivity councils in industrial centres and of five Regional Productivity Directorates manned by specialists.

INDUSTRIAL FINANCE

The Industrial Finance Corporation of India, established in July 1948, has been giving assistance in the form of advances and long-term loans to industrial concerns. Up to March 1958, the loans sanctioned by the Corporation amounted to Rs. 57.42 crores including Rs. 9.06 crores during 1957-58. Loans worth Rs. 32.03 crores were actually disbursed, A sum of Rs. 13.5 crores was provided in the Second Plan for Central Government loans to the Corporation; the amount has now been raised to Rs. 22.25 crores.

The Industrial Finance Corporation (Amendment) Act, 1957 seeks further to strengthen the resources position of the Corporation and widen the scope of its activities. A larger number of industries, including new concerns, which are not in a position to offer adequate security, but deserve encouragement from the point of view of the national economy, may now receive loans from the Corporation if some guarantees are given by the Central Government or a State Government, a scheduled bank or a State co-operative bank. The State Financial Corporations* assist medium and small-scale industries which do not fall within the scope of the all-India corporation. The total amount of their outstanding loans and advances stood at Rs. 9.51 crores at the end of 1957-58.

By the end of 1957 the Industrial Credit and Investment Corporation of India, set up in January 1955 to assist industrial enterprises in the private sector, approved financial assistance for a total amount of Rs. 11.65 crores covering a wide range of industries: paper, chemicals and pharmaceuticals, electrical equipment, textiles, sugar, metal ores, lime and cement works, glass manufacture, etc. Actual disbursements amounted to Rs. 1.95 crores.

The Refinance Corporation for Industry Private Ltd. was set up in June 1958 to provide re-lending facilities against loans given by banks to industrial concerns for the purpose of increased production primarily in industries included in the Plan. Loans to be eligible for rediscount must be for periods between 3 and 7 years and of a medium-sized amount, not exceeding Rs. 50 lakhs. These facilities will be available only to those industrial concerns whose paid-up capital and reserves do not exceed Rs. 2.5 crores.

The National Industrial Development Corporation, set up in 1954,

^{*}Their number declined by two, from I3 to 11, through amalgamations following the Reorganisation of States in November 1956. The jurisdiction of the Punjab corporation has been extended to the Union Territory of Delhi in terms of an agreement entered into in October 1957.

also acts as an agency of the Government for the grant of special loans for the rehabilitation and modernisation of the cotton textile and jute industries. Rs. 2.26 crores have so far been advanced to the NIDC for this

purpose.

The Government assist the private sector by facilitating the import of essential raw materials and basic intermediates, offering tax concessions and protecting new industries in the first few years. The statutory Tariff Commission, established in January 1952 in place of the previous non-statutory Tariff Board, have been reviewing the progress of protected industries and examining new cases for protection.

Efforts have been made to secure technical help from the industrially advanced countries either under the international technical assistance

schemes or through direct negotiations.

Foreign Capital

In order to supplement the capital resources for rapid industrial development, the Government have invited foreign assistance in cases where sufficient capacity for the manufacture of a particular item does not exist in the country and where it is desirable to secure the know-how from leading foreign firms. The policy in regard to foreign capital was enunciated in the Industrial Policy Resolution of April 1948, and in the Prime Minister's statement in the Constituent Assembly in 1949, which laid down that:

- (i) the participation of foreign capital and enterprise should be carefully regulated in the national interest by ensuring that major interest in ownership and effective control should, save in exceptional cases, always be in Indian hands and that the training of suitable Indian personnel for the purpose of eventually replacing foreign experts will be insisted upon in all such cases;
- (ii) there will be no discrimination between foreign and Indian undertakings in the application of the general industrial policy;
- (iii) reasonable facilities will be given for the remittance of profits and repatriation of capital consistent with the foreign exchange position of the country;
- (iv) in the event of nationalisation, fair and equitable compensation will be paid.

DEVELOPMENT OF INDUSTRIES

Early Stages

Although the first cotton mill in India was built at Calcutta in 1818, the real beginnings of the industry were made in Bombay in the year 1854, with predominantly Indian capital and enterprise. The foundations of the jute industry were laid near Calcutta in 1855, mostly with foreign capital and enterprise. These, along with coal mining, were the only major industries which had developed substantially before World War I. The War gave a further impetus to industrial development. The policy of discriminating protection, adopted in 1922 on the recommendation of the Indian Fiscal Commission, did much to help the growth of Indian industries. Between 1922 and 1939, the production of cotton piecegoods more than doubled, that of steel ingots increased 8 times and of paper 2½ times. The protected sugar industry progressed so speedily between 1932 and 1936 that the country became self-sufficient in sugar. About the same time the cement industry also began to grow, and by 1935-36, it was able to meet about 95 per cent of the total needs of the country.

The production of matches, glass, vanaspati, soap and several engineering industries recorded large increases during this period. An electrical goods

industry came into being.

World War II created conditions favourable for the maximum utilisation of capacity in Indian industries. Several new industries came into existence such as ferro-alloys, non-ferrous metals, diesel engines, pumps, bicycles, sewing machines, soda ash, caustic soda, chlorine and superphosphate. The manufacture of machine tools and simple machinery, cutlery and pharmaceuticals also commenced.

In the immediate post-war period a new range of industries grew up: ball and roller bearings, carding engines, ring frames and locomotives. The fertiliser, cement, sheet glass, caustic soda and sulphuric acid industries

expanded.

During First Plan

The emphasis in the First Five-Year Plan was on agriculture, irrigation and power; only about 8 per cent of the total investment was allocated for industries and minerals. It set comparatively modest targets for new investment in the industrial field, the emphasis being on the fuller utilisation of existing capacity. This objective was more or less achieved. Some idle capacity, however, still existed in the superphosphate, soap, vegetable oils, vanaspati and paint industries and in some engineering industries, such as the diesel engine and radio, and in the re-rolling sector of steel and non-ferrous metals industries.

New investment in industries in the public sector during the First Plan was of the order of Rs. 60 crores as against the target of Rs. 94 crores. The investment, installed capacity and the level of production of the industries in the public sector under the First Plan are shown in Table 174. Investment in the private sector on new projects and expansion programmes during the First Plan was expected to be about Rs. 233 crores and this target was attained. Expenditure on the replacement and modernisation of plant and machinery in the private sector was, however, considerably lower than anticipated—about Rs. 105 crores as against Rs. 230 crores. In all, new investment on industries (excluding investment on replacement and modernisation) amounted to about Rs. 293 crores as against the projected outlay of Rs. 327 crores.

Targets of production, as distinct from capacity, were more or less reached in the case of cotton textiles, sugar, vegetable oils, cement, paper, soda ash, caustic soda, rayon, electric transformers, bicycles, sewing machines and petroleum refining. The expected levels of production were not reached in the case of iron and steel, aluminium, machine tools, fertilisers, diesel engines and pumps, automobiles, radios, batteries, electric motors, electric lamps, electric fans, jute textiles, paints and varnishes,

plywood, superphosphate, power alcohol and glass.

Appreciable diversification of production was achieved. Among the new products manufactured for the first time were: staple fibre and cellulose acetate filament, calcium carbide, hydrogen peroxide, rare earth compounds, caustic soda and ammonium chloride, penicillin, DDT, newsprint, carding engines, automatic looms, steel wire ropes, jute spinning frames, deep well turbine pumps and motors and transformers of higher ratings.

The industry-wise break-up of the total outlay of Rs. 293 crores on industrial expansion in the public and private sectors during the First Plan, compared to the original estimate of Rs. 327 crores, is shown in Table 173.

Capacity and level of production in different industries at the end of the First Plan are given in Table 177 along with the targets for the Second Plan.

TABLE 173
OUTLAY ON INDUSTRIES (FIRST PLAN)

(In crores of rupees)

		Estimate under First Plan	Investment ac- tually incurred

(in the private sector)	• •	16.0	32.6
Others	* *	32.3	18.9
Total		327.0	293.0

During Second Plan

New investment in the organised industries during the Second Plan (original allocation)** would amount to Rs. 1,094 crores, Rs. 524 crores in the public sector (besides Rs. 35 crores to be invested by the National Industrial Development Corporation) and Rs. 535 crores in the private sector. The proposed outlay in the public sector was mainly accounted for by iron and steel (Rs. 350 crores), fertilisers (Rs. 37 crorest), the heavy electrical plant (Rs. 20 crores), besides the South Arcot Lignite Project (Rs. 52 crores) and the expansion of the Hindustan Shipyard (Rs. 9.8 crores). The programme of the National Industrial Development Corporation provides for assistance to the cotton and jute textile industries in modernisation and also includes projects for heavy foundries and forgeshops, structural fabrication, refractories, chemical pulp for rayon and newsprint and intermediates for dyestuffs and drugs. The NIDC would also foster the establishment of a new unit for aluminium and the manufacture of heavy machinery and equipment for earth moving, mining etc., and also of rollers and rolling equipment required in ferrous and non-ferrous metals industries.

The programme of development under the Second Plan in the public sector of industry in terms of investment, capacity and estimated production is shown in Table 174. More details about the State-owned industrial undertakings appear under relevant heads in the section on 'Principal Industries'.

^{*}Overall outlay inclusive of minor expansions, replacements and modernisation, is estimated at Rs. 80 crores.

^{**}The increased costs of some of the projects in the public sector, owing to rise in pricelevels, internal as well as external, are shown in table 174 along with the original

[†]This is exclusive of expenditure on the fertiliser plant under the South Arcot Lignite
Project and on capacity for by-product ammonium sulphate in connection
with the new steel plants.

The main emphasis in the Second Plan is on the expansion of capital and producer goods industries with a view to laying firm foundations of industrial progress. The following order of priorities was laid down:

(i) increased production of iron and steel and of heavy chemicals, including nitrogenous fertilisers, and development of the heavy engineering and machine-building industries;

(ii) expansion of capacity in respect of other developmental commodities and producer goods such as aluminium, cement, chemical pulp, dyestuffs and phosphatic fertilisers, and of essential drugs;

(iii) modernisation and re-equipment of important national industries such as jute and cotton textiles and sugar;

(iv) fuller utilisation of the existing installed capacity in industries where there are wide gaps between capacity and production; and

(v) expansion of capacity for consumer goods industries keeping in view the requirements of common production programmes and the production targets for the decentralised sector of industry.

The industry-wise break-up of the total outlay of Rs. 1,094 crores in the public and private sectors during the Second Plan is shown below:

TABLE 175
OUTLAY ON INDUSTRIES (SECOND PLAN)

		Amount (In crores of rupees)	Percentage of total investment

TABLE 177—(contd.)

INDUSTRIAL PRODUCTION

Industrial production during 1956 and 1957 and the index numbers of industrial production (base 1951=100) for the year 1957 and for the months of October 1957 and October 1958 are given in Table 178. For November 1958 the general index was 137.6 compared to 144.2 in November 1957. Some new engineering and chemical industries, not included in the index, have also been recording considerable progress. Shortage of foreign exchange has been impeding the pace of industrial progress.

TABLE 178

- (a) Figures relate to the production by mills which are members of the Indian Jute Mills Association and also to one non-member mill.
- (b) Figures relate to the crop year (November to October) and are in respect of cane sugar only.
- (c) Figures refer to the production of organised factories.
- (d) Include figures for Jammu and Kashmir.
- (e) 50 gross boxes of 60 sticks each.
- (f) Figures are in respect of automobile and cycle tyres only.
- (g) Includes figures for Jammu and Kashmir and covers all power stations owned by industrial concerns.

PRINCIPAL INDUSTRIES

Cotton Textiles

The growth of the cotton textile industry in the pre-independence period is shown in table 179.

TABLE 179

GROWTH OF COTTON TEXTILE INDUSTRY (1879-1947)

¥		mills sp	Number of spindles	Number of looms	Production (lakh lbs)	
Year			(thousand)	(thousand)	Yarn	Piecegoods

1931		314	9,078	175.2	9,660	6,720
1941		396	10,026	200.2	15,770	10,930
1947	• •	423	10,354	203.0	12,960	37,620 (lakh yards

The production of cotton yarn and cloth since 1947 is shown in table 180. Output in 1958 fell owing to a fall in consumer offtake and accumulation of stocks with mills. Substantial reduction in excise duties, in several instalments since December 1957, was allowed to give relief to the industry.

At the beginning of 1958 there were 470 cotton textile (175 spinning and 295 composite) mills in India, with 130.5 lakh spindles and 2.01 lakh looms. The number of mills rose to 482 (188 spinning and 294 composite) at the beginning of 1959. Nearly Rs. 120 crores were invested in the industry which employed about 9 lakh workers.

TABLE 180
PRODUCTION OF COTTON YARN AND CLOTH

Year			Cotton yarn (lakh lbs.)	Cotton cloth (lakh yds.)
1947	 		 12,960	37,620
1950	 		 11,748	36,670
1955	 		16,308	50,940
1956	 	• •	16,712	53,066
1957	 ••	•	17,801	53,174
1958*	 ••	• •	 16,800	49,270

The Government have been carrying out since 1955 a survey of the industry in order to find out the requirements of modern equipment and machinery. The assistance of the National Industrial Development Corporation to the industry is based on these data. Loans amounting to about Rs. 3.71 crores were approved till 1958 by the NIDC. Following an interim recommendation of a Committee appointed to enquire into the problems facing the industry, excise duties on all categories of cloth were reduced and rationalised in July 1958.

^{*}Previsional

Jule

The early development of the jute industry is shown in the following table.

TABLE 181

GROWTH OF JUTE INDUSTRY (1879-1947)

Year	:	Number of mills	Authorised capital (Rs., crores)	Number of looms (thousand)	Number of spindles (thousand)
1879-80 to 1883-84 (average) 1899-1900 to 1903-04 (average)		21 36	2·71 6·80	5·5 16·2	88 335
1909-10 to 1913-14 (average)		60	12:09	33.5	692
1005 96		90	21.35	50.5	1,064
1930-31	!	100	23.61	61.8	1,225
1937-38	!	105	24 · 89	52 . 4	1,108
1946-47		106		66.0	1,295

According to the 1954 Census of Indian Manufactures, there were 108 jute mills in India which employed capital worth Rs. 65.3 crores (Rs. 31.3 crores fixed capital). 271,415 persons (including 254,930 workers) were employed in the industry. The following table shows the production of jute goods since 1947.

TABLE 182
PRODUCTION OF JUTE MANUFACTURES

(In thousand tons)

Year*				Production†
	 		 	
1947	 	• •	 	1,052
1950	 		 [836
1955	 		 	1,027
1956	 		 	1,093
1957	 		 	1,030

To encourage modernisation, licences for the import of machinery have been liberally granted to the jute mills and a start made in the manufacture of jute mill machinery in the country. Loans are also being offered through the National Industrial Development Corporation for modernisation of equipment; loans worth Rs. 3.47 crores have been approved so far. Over 50 per cent of the spindles have been modernised.

Sugar

The rapid development of the sugar industry under protection in the early thirties and thereafter is shown below.

^{*}The figures relate to the period July-June, which is the jute year. †Figures for 1950 onwards relate to the production of mills in the membership of the Indian Jute Mills Association and one non-member mill,

Paper

The production of machine-made paper in India dates back to 1870, when the Bally Mills were established near Calcutta. During World War II, the number of mills increased to 15 and production reached 103,884 tons (1944). Since 1950, rapid progress has been made. Production rose to 210,132 tons in 1957.

TABLE 185 .

PRODUCTION OF PAPER AND PAPER BOARDS

Year		Production -(thousand tons)
1950		109
1955		185
1956		193
1957		210

The first newsprint mill in India went into production in January 1955. It has an installed capacity of 30,000 tons, while the present internal demand is 70,000 tons a year. Output in April-June 1958 amounted to 77.19 tons per day.

Iron and Steel

The earliest attempt at the manufacture of iron and steel by modern methods, made in 1830 in South Arcot, failed. In 1874 the Barakar Iron Works started work on the Jharia coalfields; the works were acquired by the Bengal Iron and Steel Company in 1889. Production amounted to 35,000 tons in 1900. The Tata Iron and Steel Company, established by the late Jamsedji Tata in 1907 at Sakchi, Bihar, first produced pig iron in 1911 and steel in 1913. The two other important manufacturers were the Indian Iron and Steel Company (formed in 1908 at Hirapur near Asansol, Bengal) and the Mysore State Iron Works (now Mysore Iron and Steel Works), started at Bhadravati in 1923. By 1939, the production of steel was over 8 lakh tons. World War II gave an impetus to the industry. By 1957 steel output rose to 13.46 lakh tons. Output slightly delclined to 12.95 lakh tons in 1958 owing to labour unrest in the Tata Works and dislocation caused by expansion programmes. Imports of iron and steel amounted to 11.6 lakh tons in 1958 against 17.3 lakh tons in 1957.

According to the 1954 Census of Indian Manufactures, there were in that year 126 large and small iron and steel works in India, in which about Rs. 35.9 crores of fixed capital and Rs. 34.3 crores of working capital and 85,634 persons (including 69,566 workers) were employed.

The table below shows the progress of the industry since 1900:

TABLE 186
PRODUCTION OF IRON AND STEEL

(In thousand tons)

car				Pig iron	Finished steel
900	 	, ,		35	
1916	 				99.0
1939	 			1,835	842.9
941	 				1,137.7
947	 			1,320	893.3
950	 			1,562,4	1,004.4
955	 			1,756.8	1,260.0
956	 • •			1,807.2	1,338.0
957	 			1,789.2	1,346.4
958	 		1	***	1,295.0

To meet the increasing demand for steel, the Government have been helping the existing units to expand their capacity and simultaneously setting up new steel plants on their own. The output of the Tata Iron and Steel Company is to be raised during the Second Plan period from 8 lakh tons (of finished saleable steel) to 15 lakh tons (capital cost Rs. 84.9 crores); and that of the Indian Iron and Steel Company from 3 lakh tons to 8 lakh tons (capital cost Rs. 42.5 crores).

The Second Plan envisages the construction in the public sector of three steel plants each of about 10 lakh tons ingot capacity and the provision of facilities in one of these for the production of 450,000 tons of foundry grade pig iron. The plant at Rourkela which is being set up at a cost of about Rs. 170 crores* is designed to produce 720,000 tons of steel products per annum. The second plant at Bhilai in Madhya Pradesh, estimated

^{*} Revised estimate.

to cost about Rs. 131 crores,* is expected to provide 770,000 tons of saleable steel, heavy and medium products, including 140,000 tons of billets for the re-rolling industry. The third plant at Durgapur in West Bengal is expected to cost about Rs. 138 crores* and to produce light and "medium sections of steel and billets amounting to 790,000 tons per annum. Provision has also been made for the expansion of steel production by the Mysore Iron and Steel Works to 100,000 tons by 1960-61. On completion of all these projects in the private and public sectors, the annual output of steel ingot in the country will rise to 60 lakh tons, to be converted into 46.8 lakh tons of finished steel. Also, 4 lakh tons of saleable pig iron will be produced at the Indian Iron and Steel Works, 3.6 lakh tons at Durgapur and 3.5 lakh tons at Bhilai. Besides the above expenditure, Rs. 120 crores will be required for construction of the steel townships, ore mines and quarries, water and power supply and other ancillary facilities, and Rs. 6 crores for the expansion of the Mysore Iron and Steel Works. The first blast furnace at Rourkela was commissioned on February 3, 1959 and that at Bhilai the next day. The management of all the three steel projects vests in the Hindustan Steel Ltd. (originally set up in 1953 to implement the Rourkela project), now wholly owned by the Central Government. The authorised capital of the company amounts to Rs. 300 crores. A coke oven plant set up by the West Bengal Government, for supply of high grade metallurgical coal to the Durgapur plant, was inaugurated in March 1959.

Engineering

Since 1947 the Government have been trying to foster the growth of the engineering industry; and India has become self-sufficient in a variety of articles such as electric motors, motor car batteries, ceiling fans, conduit pipes and metal sheets for utensils. Some of the new items manufactured for the first time in recent years are: 1955-alternators, cycle dynamo lighting sets, complete typewriters, self-doffing jute silver spinning frames, tea dryers, clinker coolers and clinker breakers, delivery valves and pump elements for fuel injection equipment, vertical multi-cylinder diesel engines, certain sizes of drilling machines, all-geared head bench lathes and hypodermic needles; 1956-Lambretta scooters and scooterettes, autorickshaws, shock absorbers, radiators and brake linings; 1957hypodermic needles used in syringes and sewing machine needles; 1958heavy industrial sewing machines, mercury vapour lamps, and P.V.R. insulated aluminium cables.

There was a considerable rise in 1957 in the output of heavy and light industrial machinery and machine tools. In the first 11 months of 1957, the textile machinery industry produced 883 carding engines, 1,255 ring frames and 282 automatic looms as compared with 726, 1,110 and 161 respectively in the corresponding period of 1956. In these lines indigenous output can now meet a large part of the country's demand. The output of machine tools almost doubled in 1957. Nineteen new items in the mechanical engineering group and 17 new items in the chemical engineering group were manufactured for the first time in 1957. The output of diesel engines, power driven pumps, electric motors, machine tools, bicycles and sewing machines rose in 1958 whereas that of automobiles, power transformers and electric lamps went down.

The Nahan Foundry Ltd. was inaugurated in October 1952 and the Government transferred the control of the Nahan Foundry (originally established in 1872 as a private organisation) to the company in January 1953. It is now managed by a board of directors appointed by the

President, who holds all shares.

^{*} Revised estimate.

The foundry manufactures agricultural implements such as cane-crushers. Owing to competition from private enterprise, the production of cane-crushers was curtailed after 1952-53 and the manufacture of cast iron anchor plates and certain non-ferrous articles for the Railways and cast iron saddles for the Posts and Telegraphs Department were taken up instead. In 1957-58, 2,453 tons of goods were produced compared to 1,331 tons in 1956. Following the recommendation of an Expert Committee, steps are being taken to modernise the foundry and diversify production.

The first batch of predominantly Indian lathes were produced in May 1956 in the machine tool factory at Jalahali near Bangalore, now owned by a Government of India undertaking, the Hindustan Machine Tools (Private) Limited. The factory produced in 1957-58 402 machines (313 lathes and 89 milling machines) thus exceeding the Plan target for 1960-61 (400 machines). It is also taking up the production of other machine tools such as radial drills and grinding machines as part of a programme to diversify production. The aim now is to produce 865

machines per annum by 1960-61.

To meet the requirements of the Posts and Telegraphs Department in telephone cables, the Hindustan Cables Factory, established at Rupnarainpur, West Bengal, began production in 1954. It has already exceeded its planned annual capacity of 470 miles and manufactured 591 miles and 538 miles of cables in 1956-57 and 1957-58 respectively. The factory is being expanded to produce 1,000 miles of cables a year. It is also proposed to manufacture 300 miles of coaxial trunk telephone cables; work on this is progressing and production might commence in 1960.

The history of the National Instruments Factory, Calcutta dates from 1830. During World War II, it was converted into a full-fledged instruments factory. In June 1957, it was converted into a Government company called the National Instruments (Private) Ltd. It produces 250 types of scientific and precision instruments, including hydrometers, measuring cylinders, barometers and monometers. The factory is shortly to undertake the production of optical and ophthalmic glass, as part of a programme to produce 50 tons of optical glass and 250 tons of ophthalmic glass annually. Rs. 30 lakhs worth of instruments were produced in the factory in 1957-58.

The development programme of the Chittaranjan Locomotive Factory includes the establishment of a heavy steel foundry, so that the requirements of heavy castings for the railways might be secured entirely from within the country. A 7,000 ton capacity foundry is being set up accordingly. Similarly the programme of the NIDC included a provision of Rs. 15 crores for heavy foundries and forgeshops and for heavy structural shops. The heavy machinery industries provided in the public sector in the Second Plan were: manufacture of electrical equipment (Rs. 20 crores), expansion of Hindustan Machine Tools (Rs. 2 crores) and manufacture of industrial machinery and machine tools (NIDC Rs. 10 crores).

For the manufacture of heavy electrical equipment, a Consultant's Agreement was reached with a British firm. A wholly Government company, the Heavy Electricals (Private) Ltd., was formed in August 1956. The plant is being erected at Bhopal. Investment in about seven to eight years (first phase) is estimated at Rs. 21 crores, and may eventually go up to Rs. 45.5 crores (excluding the cost of township). Certain sections of the plant, on which work has started, are expected to go into production by 1960. While heavy transformers, industrial motors, traction motors and switch-gears are likely to be produced

before the end of the Second Plan, more basic items of equipment like hydraulic turbines and generators, and generators for diesel sets will be

produced in the early years of the Third Plan.

The production of heavy industrial machinery is being specially fostered by the National Industrial Development Corporation (set up in October 1954 as a Government-owned company). The Corporation has completed preliminary examination of a number of projects relating to primary intermediates, and basic organic chemicals, cinema and X-ray film, newsprint and so on. An agreement was reached in 1957 with the Government of USSR for assistance in establishing a heavy machine-building plant (at Hatia near Ranchi in Bihar), a coal mining machinery plant and an optical glass factory (both to be located at Durgapur in West Bengal). The project reports are expected during 1959. Adjacent to the heavy machine-building plant will be set up a foundry forge plant, to serve as its metallurgical base. A body called the Heavy Engineering Corporation was formed to administer these projects.

Locomotives and Coaches

As part of a plan to achieve self-sufficiency in locomotives, the Government in the Ministry of Railways have established a locomotive factory at Chittaranjan in West Bengal. Originally designed to produce 120 locomotives and 50 spare boilers a year, the Chittaranjan Locomotive Works have been expanded and now produce 168 W.G. type locomotives a year, which is the equivalent of over 200 standard-type locomotives. Eventually, the aim is to manufacture 300 standard-size locomotives a year. Besides, the Government-assisted Tata Engineering and Locomotive Works delivered 85 locomotives in 1957-58 and about 100 in 1958-59.

The State-owned Integral Coach Factory at Perambur went into production in October 1955. In 1957-58, 222 unfurnished coaches were produced and 295 such were expected to be delivered during 1958-59. From 1959 onwards 350 coaches will be manufactured annually, with single shift working.

Shipbuilding

The Visakhapatnam Shipyard was acquired by the Government from the Scindia Steamship Navigation Company in March 1952. The management was entrusted to the Hindustan Shipyard Ltd., with two-thirds of the capital owned by the Government and the remainder by the Scindias. Seventy-eight per cent of the shares are now held by the Government. The

shipyard can build four modern diesel-propelled ships a year.

So far, 20 ocean-going ships and 3 small craft (aggregate g.r.t. 101,372) have been built here. The first phase of a Rs. 2.60-crore development programme of the shipyard is almost complete. During the Second Plan period, 75,000 to 90,000 g.r.t. were proposed to be produced (investment Rs. 9.8 crores) against 50,000 g.r.t. during the First Plan period (investment Rs. 6 crores). A second shipyard is now proposed to be built. A Technical Mission from U.K. visited the country in this connection in 1957 and submitted a project report in April 1958.

Aircraft

In December 1940, the Hindustan Aircraft (now Private) Ltd., a joint-stock company, was established at Bangalore with an authorised capital of Rs. 4 crores. The total subscribed capital of the company in March 1951 was Rs. 3.8 crores. The Government held shares worth Rs. 3.2 crores.

In addition to the repair and maintenance of I.A.F. aircraft, the company has undertaken the assembly and manufacture of Vampire jet

aircraft for the I.A.F. It also builds a trainer aircraft known as H.T. 2, and manufactures all-steel rail coaches for the Indian Railways and bus bodies for various State and private transport authorities.

Chemicals and Drugs

World War I gave a considerable stimulus to the chemical industry in India. Yet India was largely dependent on imports of chemicals on the eve of World War II, which gave the industry further impetus. Since Independence, steady progress has been made in the development of the chemical industry. The establishment of the Sindri Factory in the public sector was a significant development in this direction. In the private sector, 60 companies dealing with chemical industries came into existence during 1946-50. In 1954, 134 items were produced in the country. Among the products manufactured for the first time in India were sheet glass, penicillin, DDT, chloromycetin, glacial acetic acid and acetic anhydride, bismuth salts, ammonium chloride and hydrogen peroxide.

The production of soda ash, caustic soda, liquid chlorine, ammonium sulphate, sulphuric acid and soap has risen considerably in recent years. During 1956, the output of caustic soda, super phosphate, soap, bleaching powder, chlorine and salt increased, whereas that of sulphuric acid, ammonium sulphate and matches went down slightly. 1957 saw a considerable rise in the output of superphosphate, sulphuric acid, caustic soda, all drugs and pharmaceuticals, insecticides and so on. Production of compounded electro-plating salt, activated carbon, sodium perborate and heat treatment salts commenced for the first time in 1958. A team of Soviet experts visited India in August 1958 and later submitted a report regarding the development of the drugs and chemicals industry.

The Government of India has set up a DDT factory in Delhi with the assistance of UNICEF and WHO (now UNTAA). The factory, which is managed by the Hindustan Insecticides (Private) Ltd. (authorised capital Rs. 1 crore), commenced production in April 1955 and produced 623 tons of technical DDT and 647 tons of formulated DDT during 1957. Capacity of the plant was doubled in 1958 and now amounts to 1,400 tons per annum. A second DDT factory (capital cost Rs. 79 lakhs), set up at Alwaye in Kerala (capacity 1,400 tons technical DDT), went into production in April 1958.

The Government has set up a penicillin factory at Pimpri near Poona with the help of UNICEF and UNTAA. Production began in August 1955. The management of the factory vests in the Hindustan Antibiotics (Private) Ltd., a State enterprise, with an authorised capital of Rs. 4 crores. During 1957-58, a rate of production of 214.3 lakh mega units of penicillin (in finished form for clinical use) a year was achieved, including penicillin processed from imported crystals. The capacity of the present plant is being expanded to produce 400 lakh mega units per annum. The company is also planning to produce by 1960-61 40 to 45 thousand kgs per annum of streptomycin and dihydrostreptomycin.

Fertilisers.

The Sindri Fertiliser Factory, built by the state at a cost of about Rs. 28 crores is under the management of the Sindri Fertilisers and Chemicals (Private) Ltd. It went into production in October 1951. In 1957-58, it produced 3,32,031 tons of ammonium sulphate. A scheme to raise the output by about 60 per cent by utilising more gas from the Coke Oven Plant is under way. The project was expected to be completed in 1958 and to result in the production of 70 tons of urea and 400 tons of ammonium sulphate nitrate (double salt) per day. In 1957-58, 2.29 lakh tons of coke and 96,144 tons of ammonium were produced.

To meet the anticipated demand for nitrogenous fertilisers, additional

units are to be set up at Nangal, Neyveli and Rourkela with annual production capacities of 70,000 tons, 70,000 tons and 80,000 tons respectively. The factory at Nangal, under the management of the Nangal Fertilisers and Chemicals (Private) Ltd., will be an integrated unit for the production of 2 lakh tons of ammonium nitrate fertiliser per annum and about 14 tons of heavy water for use by the Department of Atomic Energy. It is expected to go into production in 1960. The factory at Neyveli will produce urea and that at Rourkela nitrolimestone.

Oil

At the beginning of the Second Plan, the country's oil resources were still poorly developed, about 66 lakh tons out of her total annual requirement of 70 lakh tons being met from imports. The only producing oilfield is in Assam, around Digboi. Oil has, however, been found in the neighbouring areas of Naharkatiya and Moran and a number of wells been drilled. The latter are expected to provide 25 lakh tons of crude oil annually rising to 45 to 50 lakh tons when full production is established. When this materialises, about 40 per cent of the country's oil requirements will be met from domestic sources.

An agreement was signed in January 1958 for the formation of a rupee company, the Oil India (Private) Limited (with one-third participation by the Government of India), for exploration and production of petroleum and crude oil (including natural gas) and for the construction of pipelines to the two refineries proposed to be set up in the public sector.

Test drilling is in progress at Jwalamukhi in the Punjab, directly under the auspices of the Oil and Natural Gas Commission, and in the West Bengal basin where the Standard Vacuum Oil Company is executing the work with financial participation by the Government. Geological and geophysical surveys are being carried out in the Punjab, Kashmir, Himachal Pradesh, Rajasthan, Bombay, West Bengal, Uttar Pradesh and Assam. The search for oil is being carried out with assistance from certain foreign countries.

At the commencement of the First Plan, practically the entire demand of the country for petroleum products was met by imports, the output of the Assam Oil Company's refinery at Digboi having been a little more than 5 per cent of the total requirements. The establishment of three refineries was accepted as part of the First Plan: two were set up at Trombay (near Bombay) by the Standard Vacuum Oil Company of New York and the Burmah Shell Group of London respectively and the third by the Caltex Company at Visakhapatnam. The annual production capacity of all the refineries by the end of 1957 was expected to be about 43 lakh tons in terms of crude processed petroleum. The pattern of production of these refineries was revised in 1958 to increase the output of kerosene and diesel oils to meet the country's urgent requirements.

A Government company, the Indian Refineries Private Ltd., (authorised capital Rs. 30 crores), was incorporated in August 1958 to operate two new refineries, one in Assam (capacity 7½ lakh tons of crude petroleum) and the other in Bihar (20 lakh tons of crude petroleum). By an agreement (October 1958), the Rumanian Government has offered to erect the refinery in Assam on long term credit basis.

Coal and Lignite

Coal mining was first started at Raniganj, Bengal in 1814. The construction of railways gave the industry a great impetus and a number of joint-stock companies, mostly European owned and managed, came into the field. Production of coal showed rapid increase after 1868, as shown below.

TABLE 187
PRODUCTION OF COAL

Year		•			Production (lakh tons)
1868					5
1880		• •		• •	10
1890					. 22
1900					61
1910			••		120
1920			- 4		180
1930	• •				238
1940	• •		• •		251
1946		• •		• •	260
1950	• •				320
1955	• •	• •			382
1956					394
1957	••		• •		435
1958	• •				452

The target for coal output at the end of the Second Plan is 600 lakh tons; of the additional output of 220 lakh tons, 100 lakh tons will be in the private sector. The National Coal Development Corporation (Private) Ltd., set up in October 1956 to look after the production of coal in the public sector, succeeded in raising 7 lakh tons more from the existing 11 State collieries (excluding Singareni Collieries in Andhra Pradesh). Production at Singareni rose from 15.3 lakh tons in 1955 to 21.2 lakh tons in 1958. Production has also started at several new collieries. For supply of coking coal for the Bhilai and Rourkela steel plants a coal washery (cost Rs. 2.38 crores, capacity 22 lakh tons of raw coal per year) was set up at Kargali in November 1958 with help from a Japanese firm. The Durgapur coke oven plant (cost Rs. 7.5 crores; capacity 1,000 tons of top quality hard coke per day), set up by the Government of West Bengal with the help of a West German firm and opened in March 1959, will supply coking coal for the Durgapur steel plant. Production from private collieries rose by more than 50 lakh tons over 1955 to 395 lakh tons in 1958.

Having regard to the paucity of coal deposits in South India, high priority has been given to the development of the multi-purpose South Arcot Lignite Project at Neyveli (investment Rs. 68.8 crores—Rs. 52 crores during the Second Plan). The development programme envisages the mining of 35 lakh tons per annum of lignite which is to be used for (i) generation of power (2.5 lakh KW), (ii) production of carbonised briquettes (3.8 lakh tons), and (iii) production of fixed nitrogen (70,000 tons). The Neyveli Lignite Corporation took over the project in December 1956. Mining work (estimated cost Rs. 16.9 crores) is progressing. For the power station a credit of 500 million roubles has been obtained under the Indo-Soviet Agreement of November 1957.

Other Minerals

In 1958, nearly 647,000 persons were engaged in mining (including coal mining) and there were more than 3,300 working mines. The more important mining centres are in Bihar, Orissa, West Bengal, Rajasthan, Mysore and Andhra and the more extensively worked minerals are coal (832 mines), mica (800 mines), manganese ore (700 mines), iron ore (200 mines) and limestone (more than 150 mines). The total value of mineral production (including coal) in India since 1901 is given in the following table.

TABLE 188

VALUE OF MINERAL PRODUCTION IN INDIA (1901-1957)

Year	Value (Rs., lakhs)	Year	Value (Rs., lakhs)
1901	670	1948*	6,400
1911	1,140	1950	7,160
1921	3,290	1955	9,430
1931	2,390	1956	10,870
1939	2,020	1957	12,720

The quantity index in 1956 stood at 116.5 (base 1951=100) compared to 112.6 in 1955. Table 191 shows the output and value of the principal minerals in 1956 and 1957.

PLANTATION INDUSTRIES

Between 1834 and 1865 tea was cultivated in Government plantations. Since 1865 tea plantations have been mainly financed and managed by European business firms. Some data regarding in the extent of tea plantation are given below.

TABLE 189

TEA-AREA AND PRODUCTION (1885-1936)

Year	Area under tea (acres)	Production (million lbs.)
1885	284,000	
1896	433,133	
1910	564,000	263
1935-36	781,230	395

Systematic cultivation of coffee dates from 1830 and the industry reached its peak in 1862. Progress was hampered at this stage owing to the appearance of a destructive beetle and later by competition from Brazilian coffee. Some figures of the extent of coffee cultivation are given below.

TABLE 190

COFFEE—AREA AND PRODUCTION (18961-939)

Year	Area under coffee (acres)	
1896	228,000	
1903	104,800	
1913-14	203,677	
1935-39 (average)	186,000	

Plantation of rubber is of comparatively recent origin. The output amounted 10,000 tons in 1931 and 12,000 tons in 1940. The area under rubber in 1940-41 amounted to 138,000 acres.

Tea, coffee and rubber plantations together cover about 0.4

From 1948 onwards the value of mineral production is calculated on the pits' mouth value.

per cent of the cropped area and are concentrated mainly in the north-east and along the south-west coast. They provide employment to over 12 lakh persons and India earns a large amount of foreign exchange from their export, tea alone accounting for over Rs. 100 crores. Coffee and rubber, which used to be important export commodities, are now largely consumed within the country. The cropped area and the production of each of the three plantation industries in recent years are given in the table below.

In 1954, Rs. 113 crores were invested in the tea industry which employed 9,93,594 persons (including 64,371 temporarily employed). There were in 1955-56, 13,443 coffee estates employing 222,793 persons (including 85,924 temporarily employed). At the end of 1955 there were 14,417 rubber estates which employed on an average 57,812 persons

(including 18,252 temporarily employed).

The Plantation Inquiry Commission, appointed in April 1954 to conduct a comprehensive inquiry into the economic conditions and problems of the tea, coffee and rubber industries, submitted their reports in 1956 and made various recommendations.* It was decided in September 1958 to reduce the export duty on tea and to fix excise duty at different rates for different zones. An expert committee was set up in August 1958 to review the system of marketing of coffee. A replanting subsidy scheme was put into operation by the Rubber Board in 1957; 2,772 acres were replanted under the scheme in that year. Conditions for the grant of subsidy to small estates were liberalised in 1958. A report, submitted by the Rubber Production Commissioner, for extension of rubber cultivation in the Andaman and Nicobar islands is under consideration of the Government.

(a) In terms of cured coffee.

 ⁽b) A large portion of the acreage was reported for the first time.
 See 'INDIA 1958' p. 345.

SMALL-SCALE AND COTTAGE INDUSTRIES

Although there has been considerable development of large-scale industries, India remains mainly a country of small-scale production. It is estimated that there are about 2 crore persons engaged in cottage industrics. The handloom industry alone employs 50 lakh people or nearly as many as are employed in all other organised industries, including large-scale industries, mines and plantations.

The work of organising these small industries is primarily the responsibility of the State Governments. To supplement their effort, the Central Government has set up the following bodies: the All-India Khadi and Village Industries Commission; the All-India Handicrafts Board; the All-India Handloom Board; the Small-scale Industries Board; the

Coir Board; and the Central Silk Board.

Financial assistance to small industries is given both by the Government and banking institutions. Recently, measures were taken to make this assistance more effective. During 1957-58 loans to the extent of Rs. 3.3 crores and grants totalling Rs. 1.1 crores were sanctioned to State Governments for the development of small-scale industries. Sanction has been given so far for the establishment of 72 industrial estates, which seek to remove small industrial units from urban areas and provide them at the new sites with factory space and common facilities for efficient working. By September 1958, 17 industrial estates had been completed. The entire cost of starting these estates is advanced as loans by the Centre to the State Governments. Rs. 3.68 crores had been spent on this till September 1958. Two estates, out of the 16 sanctioned in Community Development Blocks in the Second Plan period are under construction. The Plan ceiling for industrial estates has been increased from Rs. 10 crores to Rs. 15 crores.

A programme of technical assistance to small industries, known as the Industrial Extension Service, has been undertaken directly by the Central Government. Four regional institutes at Bombay, Calcutta, New Delhi and Madras, twelve major institutes, five branch institutes and 62 extension centres are also working. The service was re-organised in December 1958 to provide each State with an institute. Experts are also brought in from abroad to help these industries in technical matters and Indian technicians sent for training abroad, both with assistance from the Ford Foundation.

Another significant development was the establishment of the National Small Industries Corporation in February 1955. Its Contract Division has established liaison with Government purchase departments and has evolved a workable arrangement for giving contracts to small units. The number of small units so enlisted is 3,160. Central Government purchases of cottage and small-scale industries products in 1955-56 amounted to Rs. 3.4 crores. The Corporation has introduced a scheme for hire-purchase of machinery and equipment needed by small units; machinery worth Rs. 1.43 lakhs has already been delivered under this scheme. Decentralisation has been achieved through four subsidisary corporations set up in 1957 at Bombay, Calcutta, Madras and Delhi. The activities of the Corporation are financed by loans and grants by the Central Government. Rs. 1.30 crores have been sanctioned so far.

For the development of small industries, the Community Projects Administration has appointed block level industrial officers in a number of Community Projects and National Extension Service blocks. An intensive development programme has been introduced in 26 selected areas.

Special attention has been paid by the All India Handicrafts Board, set up in 1952, to the improvement of production and marketing of handi-

crafts in India and abroad. The Indian Handicrafts Development Corporation has now been set up to take over some of the functions of the Board in respect of export promotion. Mobile exhibition units have been sent round the country and funds allocated for the exhibition of metal ware, bambooware, etc. 'Handicrafts weeks' are frequently held in different States. Production of handicrafts has gone up and is now estimated at about Rs 100 crores anaually. Exports amount to nearly Rs. 7 crores a year.

Rs 100 crores anaually. Exports amount to nearly Rs. 7 crores a year.

The coir industry is mainly carried on on a cottage industry basis, though some factories employ wooden looms worked by manual labour. Of an estimated annual production of 1,20,000 tons of coir yarn, more than 90 per cent is produced in Kerala. Almost the entire production of about 23,000 tons of manufactured articles comes from that State.

On an average, about 50,000 tons of coir yarn and 21,000 tons of coir products are exported. The Coir Board is engaged in popularising and promoting coir products in India. In view of the importance of coir products as foreign exchange earner, the overall provision for coir industry under the Second Plan has now been raised to Rs. 2.3 crores: Rs. 2 crores for State schemes and Rs. 30 lakhs for Central schemes to be implemented by the Coir Board (including research and marketing). A research institute at Kalavoor, near Alleppey (Kerala), and a branch research institute and model factory, at Uluberia in Howrah district (W. Bengal), are being set up.

In 1957, the production of raw silk in India (mulberry and non-mulberry) amounted to 31.7 lakh pounds; nearly half the amount was produced in Mysore State followed (in order of importance) by the States of Assam, West Bengal, Madras and Jammu and Kashmir. The Central Silk Board, first established in 1949 and reconstituted in April 1958, looks after the promotion of sericulture and the silk industry. The Central Sericultural Research Station, Berhampore (West Bengal), with its sub-station at Kalimpong (West Bengal), was established in 1943. The station is Centrally administered and deals with the problems of research. The station will be expanded during Second Plan. The Board has set up an All-India Sericultural Training Institute at Mysore and a Central Foreign Race Seed Station at Srinagar. An eminent geneticist from Japan conducted a survey of the problems of research in Indian sericulture in 1957. The services of two other sericulture experts have since been obtained from Japan under the Colombo Plan for a period of one year.

Central expenditure on the development of village and small industries incurred through the various Boards during the First Plan period is given in Table 193.

TABLE 193

General schemes (administration, research, etc.)	15.0
TOTAL	200.0

Expenditure on village and small industries during the first two years of the Second Plan amounted to Rs. 59 crores.

Khadi Industry

Financial assistance to the khadi industry is given by the All-India Khadi and Village Industries Commission through co-operatives, registered institutions, State Governments and the Boards set up by the State Governments. To encourage the production of khadi, a subsidy of three annas in the rupee is allowed to the consumer, while a subsidy of five annas per square yard is given to those who produce khadi for their own use and of six pies a rupee to centres engaged in the production and sale of khadi.

These measures have led to a significant improvement in the production and sale of khadi, as the following figures will indicate.

TABLE 195

PRODUCTION AND SALE OF KHADI

(In lakhs of rupees)

1955-56	479	426
1956-57	729	595
1957-58	1,015	772

Ambar Charkha

A decision was taken during 1956-57 to introduce an improved type of spinning unit called Ambar charkha. It has four spindles and enables a spinner to produce about six hanks a day a eight working hours. The Karve Committee on Village and Small-scale Industries (1955) recommended that the additional requirements of cloth during the period of the Second Plan should be met from the decentralised sector. Some 3,000 lakh yards of cloth are to be produced by the handlooms from hand-spun Ambar yarn.

The Ambar Charkha Enquiry Committee, appointed by the Government in March 1956, held that the Ambar charkha could be recommended as a most suitable spinning unit. The Government accordingly sanctioned the introduction of 75,000 Ambar charkhas during 1956-57, involving about Rs. 4 crores as grants and loans. Production of cloth from Ambar yarn amounted to 18.8 lakh square yards in 1956-57

and 111.5 lakh square vards in 1957-58.

The main purpose of decentralised spinning on an extensive scale is to provide the requirements of handlooms which are otherwise completely dependent upon mill yarn and also to offer propsects of part-time and full-time employment to several lakhs of unemployed and under-employed persons in the country. As many as 57,270 persons during 1956-57, and 1,10,153 persons during 1957-58, obtained employment under the Ambar charkha programme. Altogether, during 1956-57, 21.18 lakh full-time and part-time jobs were created through the development of khadi and village industries.

ASSISTANCE TO SMALL INDUSTRIES

---:00:---

THE NATIONAL SMALL INDUSTRIES CORPORATION has been set up by the Government of India to provide assistance to small industrial units. The Corporation has undertaken various schemes for the promotion of Small Scale Industry.

THE CORPORATION assists the Small Units in securing Central Government contracts for supply of Stores. To avail of this assistance, it is necessary for the small units to get themselves enlisted with the SMALL INDUSTRIES SERVICE INSTITUTE of their area. Free supply of Tender Sets issued by the D.G.S. & D. is arranged to such registered units and the State Bank of India advances loans on the security of Raw Material required for the contract under a scheme of the Corporation. Technical assistance is also available from the SMALL INDUSTRIES SERVICE INSTITUTES.

THE CORPORATION also supplies Industrial Machinery and machine tools on easy instalment payment basis to existing small units as well as to new units proposed to be set up.

THE CORPORATION markets under the Trade Mark 'JANSEVAK' leather footwear, cotton & woollen hosiery, glass-beads, paints & varnishes etc. 'JANSEVAK' products are manufactured by skilled industrial workers, are fair priced and Quality-Marked by Technical Exports.

CHAPTER XXV

TRADE

EXTERNAL TRADE

The total value of India's foreign trade (imports and exports including re-exports) during 1957-58 amounted to Rs. 1,565 crores—imports Rs. 927 crores and exports Rs. 637 crores. The value of India's imports and exports and the total value of her foreign trade since 1951-52 are given below.

TABLE 196

FOREIGN TRADE OF INDIA*

(By sea, air and land)

(In crores of rupees)

		Imports**			Exports†		
Year	Sea and air	Land	Total (less tran- sit trade)	Sea and	Land	Total (less tran- sit trade)	value of foreign trade

Current balance of payments deficit	306.8	451.1	210.8

Imports

During 1957-58, despite efforts to conserve foreign exchange, imports amounted to Rs. 1,175 crores (Rs. 79 crores higher than previous year and the highest on record). The high rate was due mainly to past commitments. The entire increase was due to government imports which rose by Rs. 201 crores; private imports dropped by Rs. 122 crores. Prices of imports rose by about 10 per cent; at the same time there was an increase in volume. Imports on private account were held down by vigorous control measures, particularly in respect of non-essential items, but imports of machinery on private account alone rose from Rs. 156 crores to Rs. 164 crores. Private imports of iron and steel fell but aggregate imports on public and private account were slightly higher at Rs. 134 crores. Imports of raw materials fell sharply despite rather liberal licensing policy. Imports of oil, raw cotton and chemicals fell by Rs. 18 crores, Rs. 30 crores and Rs. 7 crores respectively, showing increased dependence on indigenous sources of supply. decline in principal consumer goods amounted to about Rs. 30 crores. decline in imports on private account of consumer goods and of intermediate goods and raw materials continued during the first half of 1958-59.

the Foreign (Sea, Air and Land) Trade of India. For an explanation of the differences, please see India's Balance of Payments 1948-49—1955-56, (Reserve Bank of India, Bombay, pp. 7 and 27-28.

^{*}Excludes repatriation to the USA of lend-lease silver valued at Rs. 74.4 crores.

During 1957-58, there was nearly 70 per cent increase in imports on Government account, from Rs. 291 crores to Rs. 493 crores. Imports of foodgrains accounted for a rise of Rs. 47 crores, the balance of Rs. 155 crores being shared by machinery and equipment, iron and steel, defence stores and other items. In the first half of 1958-59 Government imports constituted 48 per cent of the total.

Imports on Government Account

The following table shows the particulars of Government imports since 1955-56.

TABLE 201

IMPORTS OF DEVELOPMENTAL AND NON-DEVELOPMENTAL COMMODITIES

(In grores of tubees)

1955-56 1956-57 1957-58 1958-59 (April-September) 334.4 203.6 Non-developmental commodities 445.0 171.4 101.6 147.5 152.6 117.8 28.9 Food 53.8 122.7 Other consumer goods 38.8 Other non-developmental items 52.0 85.3 174.6 78.8 413.0 Raw materials and intermediate goods 322.5 364.0 156.7 Capital goods 219.8 329.2 366.0 197.8 153.4 211.0 Private 204,9 74,1 Government 66.4 118.2 161.1 123.7 745.9 1.076.5** TOTAL 1.174.8 526.0

Exports

Export receipts in 1957-58 totalled Rs. 595 crores, Rs. 40 crores less than in 1956-57. A general weakening of foreign demand as also the bank and dock workers' strikes in Calcutta adversely affected exports in the first six months of the year. The value of exports of staple commodities like tea, jute manufactures, cotton manufactures, raw cotton and vegetable oils recorded appreciable declines. Exports of tea declined to Rs. 119 crores

**Revised total Rs. 1,095.6 crores.

^{*}Revised data show total Government imports at Rs. 291.3 crores,

from the unusually high level of Rs. 149 crores in 1956-57. Exports to the dollar area recorded a slight decrease, but those to the sterling area fell sharply by Rs. 27 crores, mainly on account of reduced offtake by the UK following recession in demand for stockpiling as well as curbs on consumer expenditures there. Export of jute manufactures recorded a decline of Rs. 8 crores and vegetable oils exports fell by Rs. 11 crores. Increased utilisation by Indian mills of indigenous raw cotton as also the inability of Japan and France to lift Indian cotton (owing to sterling shortage) resulted in a fall of Rs. 8 crores in raw cotton exports.

TRADE POLICY

A rapid depletion of foreign exchange reserves, brought about largely by heavy imports of machinery and iron and steel, made it necessary to adopt a more restrictive import policy for the first half of 1957.* The restrictive policy was further intensified and drastic cuts in imports of non-essential consumer goods were announced for the licensing periods July-September 1957 and October 1957 to March 1958.

During April-September 1958, quotas were increased mainly for items required for such industries as textile chemicals and accessories, spare parts for machinery, chemicals not otherwise specified, industrial gums and resins and certain abrasives. Quotas were introduced for printing machinery and agricultural tractors, increased for a few essential consumer goods like photographic sensitised material and paper items and reduced for items for which the indigenous industry was expected to make good the shortage, such as coal tar dyes, a few types of motor vehicle parts, steel files, etc. Quotas were drastically reduced for fish, fruits, and milk food. Provision was made for granting licences on a restricted basis to actual users of studio lamps, copra and selenium. A somewhat higher foreign exchange ceiling was allocated for raw materials for industries. Import licences were to be issued in approved cases of capital goods where the import values had been covered by long-term overseas investment. In other cases it was necessary for the importer to satisfy Government that the terms of payment were such that it would be possible to meet them out of the savings in foreign exchange earning from the project.

During the period October 1958-March 1959, it was decided to issue special licences to exporting textile mills, up to a certain percentage of their export earnings, for import of dyes and chemicals. Import of modern machinery on deferred payments would also be allowed to them, where it would

be paid for from increased export earnings.

Quotas were reduced, owing to greater availability from indigenous sources, for such items as ball bearings, electric motor starters, certain chemicals and engineering items. Quotas for textile dyes and chemicals were reduced on account of additional direct licensing to exporting mills. The quota for camphor was dropped and those for betelnuts and cloves further reduced. Quotas were increased for spares of earth-moving equipment, refrigeration and air-conditioning machinery, etc., certain types of tools and chemicals. Small quotas were now allowed for packing and wrapping papers, artificial silk yarn, sheets and plate glass, whereas imports of milk foods for infants, time-pieces, liquid paraffin, photographic goods and X-ray films were somewhat liberalised.

Export Promotion

To stimulate exports, Government have in recent years established Export Promotion Councils for different commodities including cotton textiles, silk and rayon textiles, plastics, and linoleum, engineering goods,

^{*} See 'INDIA 1958', p. 355.

cashewnut, pepper, tobacco, leather and leather goods, shellac, mica, sports goods, chemicals and allied products. Other measures to encourage exports include: the removal of export control from over 200 commodities; reduction in the number of items subject to quota restrictions; liberal licensing of commodities still under control; reduction or abolition of export duties; and more liberal refund of excise duties on export commodities.

To promote exports, a scheme was introduced for the grant of draw-backs on customs duty on imported goods used for the manufacture of articles for export. The procedure for the refund of excise duties on certain exportable commodities has been sought to be simplified. To ensure quality control, compulsory grading before export has been introduced under the Agricultural Produce (Grading and Marketing Act) in respect of certain agricultural commodities such as tobacco, sann hemp, raw wool and bristles, lemon grass oil and sandalwood oil. Special rail and shipping facilities are also provided for the movement of export commodities.

Following the recommendation of an expert committee, a State-owned Export Risks Insurance Corporation (authorised capital Rs. 5 crores) was set up in July 1957. The Corporation offers facilities for insuring risks not normally covered by commercial insurance companies. To coordinate all work relating to the development of India's foreign trade, particularly promotion of exports, a Foreign Trade Board and a Directorate of Export Promotion (as the Board's executive agency in the matter of export promotion) were created in June 1957. The Directorate of Exhibition looks after visual commercial publicity for Indian goods. India has been participating in exhibitions and trade fairs abroad. A national exhibition called "India 1958" was organised in New Delhi in October 1958 which continued till January 1959.

The Export Promotion Committee, appointed to make a comprehensive study of all aspects of export promotion, in its report (August 1957) laid down the following essential prerequisites of policy: (i) a sustained increase in production in all sectors, particularly agriculture; (ii) maintenance of prices at competitive levels; (iii) that export should be encouraged even at the cost of domestic consumption; (iv) diversification of exports and of export markets; and (v) research into new uses for the traditional export commodities and adaptation of internal production to such new lines. With appropriate steps taken, the Committee thinks, India's exports could be increased to Rs. 700 to Rs. 750 crores a year immediately as against the target of Rs. 615 crores at the end of the Second Plan. The Committee recommended that export duties should not only be kept low but should not be changed too often and that goods for export should be given refund at a flat rate of excise duty and sales tax. The other important recommendations were: canalisation of exports through single agencies, private or public, in certain cases; encouraging the entrepot trade of India; provision of better export credit facilities by the Reserve Bank and the State Bank of India through commercial banks; trade agreements with foreign countries with provision for a part of the payments to be made in rupees; specialised training in business and commercial practice for India's trade commissioners and other trade officials posted abroad; better publicity for Indian goods abroad (publication by Government of a weekly journal of foreign commerce and by a private agency of an exhaustive and up-to-date directory of Indian importers and exporters); increasing participation by Indian shipping companies in carrying the trade of India so as to increase the invisible exports; effective quality control of export commodities; and elimination of malpractices on the part of Indian exporters by introducing a system of compulsory registration for them.

Apart from the delegations sponsored by the Export Promotion Councils, an industrial-cum-commercial goodwill mission was sent in May

1956 by the Government of India to Sweden, Finland and Denmark. A trade delegation from India visited the Federal Republic of Germany in 1957. A survey team of technical experts was sent to Cambodia. In 1958, three trade delegations visited Afghanistan, Japan and the USSR (and East European countries). India also received such delegations during the year from Ghana, Saudi Arabia, United Arab Republic, Zanzibar, Ceylon and Uganda.

TRADE AGREEMENTS

Since April 1957 existing trade agreements with twelve countries were renewed, while new agreements were signed with Czechoslovakia, Afghanistan, Ceylon, Japan and Greece. Trade agreements were concluded for the first time with Japan, Greece and Ethiopia. The total number of countries with whom India had trade agreements rose to 26. The agreements in general were directed at promoting diversification of exports and obtaining required imports without causing strain on foreign exchange reserves. Opportunity was taken while revising the import schedules to omit items in which India has reached self-sufficiency, and to include in export schedules

items in which an export surplus has since emerged.

The Indo-U.S. Agreement of August 1956 provided for the import into India of surplus U.S. agricultural commodities under P.L.480, valued at \$360 million, equivalent to Rs. 172 crores (inclusive of the payment of half the estimated shipping cost, namely, Rs. 26 crores), distributed as follows: wheat Rs. 95 crores, rice Rs. 13 crores, cotton Rs. 33 crores, tobacco Rs. 3 crores and dairy products Rs. 2 crores. Of the sale proceeds, Rs. 137 crores would be transferred to the Government of India (Rs. 111.4 crores as loan and Rs. 25.7 crores as grant) and the rest would be left free for use in India by the U.S. Government. Of the loan component of Rs. 111.4 crores, about Rs. 26 crores have been earmarked for re-lending to the private sector. The agreement will go a long way in meeting possible food shortages and will assist in conservation of India's foreign exchange resources.

Under the Tripartite Agreement between India, the U.S.A. and Burma, signed in July 1956, India was to export to Burma cotton textiles worth approximately Rs. 185 lakhs. The payment for these textiles would be made in raw cotton purchased by Burma from the U.S.A. under the

P.L.480 programme.

TARIFF

During 1957-58, the Tariff Commission conducted twenty-two tariff inquiries and one price inquiry relating to steel. All the tariff inquiries related to continuance of protection. Tariff protection in respect of the preserved fruits, oil pressure lamps, non-ferrous metals, and cotton textile machinery industries was either withdrawn or confined to only a part of the output, as the products of these industries were no longer at a disadvantage as compared with imported products.

Industries in respect of which protection and alteration of the existing rates of protective duties were recommended by the Commission were antimony and automobile hand tyre inflators. The Government accepted the recommendation for a higher duty on the former but rejected that for a

lower duty on the latter commodity.

DIRECTION OF TRADE

The U.K. and the U.S.A. continued to be India's principal buyers as well as suppliers. During 1957, their shares in India's export trade were 25.1 per cent and 20.6 per cent respectively. The share of the U.K. in the imports was 23.2 per cent and that of the U.S.A. 16.6 per cent.

The principal countries to which India exported during 1952-57 and

the values of the exports to each are shown in Table 202.

PATTERN OF TRADE

The principal commodities imported into India during 1952-56 and the the values of the imports are shown in Table 204. Values of the principal commodities imported during 1957 are shown in Table 205. Owing to adoption of the revised trade classification from January 1957, the grouping of articles in many cases differ from the earlier pattern.

STATE TRADING CORPORATION

In May 1956, the State Trading Corporation, an entirely State-owned organisation (authorised capital Rs. 1 crore), was established. Its aim is to stimulate trade, mainly exports and also imports, by filling up the many gaps in India's foreign trade structure. Since its inception, the Corporation has been striving to increase India's exports to countries with controlled economies in order to secure from them such items as steel, cement and industrial equipment without straining the country's foreign exchange reserves. The Corporation has already purchased at reasonably low prices such items as cement, soda ash, caustic soda, raw silk, fertilisers, gypsum, powder milk and newsprint. The quantum and timing of the imports have been so fixed as to avoid recurring disruption in supply and also to create and maintain conditions favourable for a larger production of these commodities in India. Among the goods for which exports have been arranged by the Corporation are mineral ores, shoes, handicrafts, salt, tea, coffee, and woollen goods. The Corporation's business transactions, including contracts entered into with foreign countries since inception, amounted to about Rs. 126.8 crores (imports Rs. 52 crores and exports Rs. 74 crores).

The Government entrusted to the Corporation in July 1956 the task of acquiring cement from Indian manufacturers, importing it from abroad, and distributing the commodity at an equalised price at all railheads in India. For this the Corporation is given a service fee on the gross turnover. Following improved internal supply position the Corporation was authorised in 1958 to export two lakh tons of Indian cement. With effect from July 1957 the task of canalising all exports of iron ore from the country was entrusted to the Corporation.

INTERNAL TRADE

COASTAL TRADE

For purposes of statistics, the Indian coast has been divided into the following maritime blocks: (i) West Bengal, (ii) Orissa, (iii) Madras (including Andhra), (iv) Travancore Cochin, (v) Cochin Port, (vi) Bombay, (vii) Saurashtra, Okha and Kutch. Trade between ports in the same maritime block is classed as "internal trade" and that between one maritime block and another as "external trade".

In 1956-57, the total coastwise trade was valued at Rs. 343 crores, consisting of Rs. 180 crores (imports) and Rs. 163 crores (exports). Of Rs. 180 crores worth of imports, over Rs. 169 crores constituted external trade as among the blocks and about Rs. 10 crores internal trade within the blocks themselves. The Rs. 169 crores of external trade in the coastal

^{*}Ratio of export price index to import price index.

sector again consisted of Rs. 158 crores worth of Indian merchandise and Rs. 11 crores worth of foreign merchandise. Table below shows the values of the coast-wise trade of India.

INLAND TRADE

30,585

33,802

34,267

23,725

(In thousand maunds)

Considering the vastness of the country, its varied climate and diverse natural resources, it is not unnatural that the inland trade of India is many times larger than its external trade. According to an estimate in the report of the National Planning Committee's sub-committee on trade, the value of the country's internal trade in 1940 was about Rs. 7,000 crores as compared to the figure of Rs. 500 crores for external trade. Precise data about the internal trade are, however, not available. It is difficult to keep track of the large valume of goods carried by bullock earts and country boats. Statistics of the trade carried by rail and inland steamer are, however, available.

The following table shows the movement of selected articles by rail and river between the States and the chief port towns (in terms of imports).

TOTAL TRADE

^{*}Twelve months ending August 1955.

For purposes of these statistics, again, India has been divided into 36 trade blocks, roughly representing the former states of the Indian Union with the addition of the chief port towns of Bombay, Madras, Calcutta and Cochin. The Andhra ports, the Saurashtra ports and the ports in Madras other than Madras port have also been treated separately. Only the figures of actual imports into these blocks are represented here. Thus, the internal trade within each of these trade blocks is excluded from the scope of these statistics.

Metric Weights and Measures

The metric system of weights and measures was made permissive from October 1958 in selected fields by notifications under the Standards of Weights and Measures Act, 1956. The use of metric weights was introduced in trade in all regulated markets and specified areas in all States and Union Territories in consultation with the State Governments and representative associations of trade and industry. Metric weights and measures may also be used by major industries like cotton and jute textiles, iron and steel, engineering, chemicals and cement in the purchase of raw materials or sale of products. Government departments will adopt the metric system in purchase of stores, land surveys and maps and technical and marketing statistics. For two years ending October 1960 the continued use of prevailing units will be permitted. The State Governments are taking steps to enforce the new system by enacting legislation and setting up agencies for enforcement. The intention is to extend the area of the application of metric weights to the whole of India for general trade purposes by the middle of 1960. Metric capacity measures and length measures will also be introduced gradually.

Design for Living

For centuries India's mastercraftsmen have created beautiful handicrafts, drawing inspiration from local tradition and nature.

Modern needs demand new designs. To help craftsmen, the Handicrafts Board has set up Design Centres at Delhi, Bombay, Bangalore and Calcutta. These centres revive old designs and constantly evolve new ones - in metal, wood, terracotta, horn, ivery, clay and fabrics. The creative urge of our people thus finds expression in ever new forms, best adapted to present needs.

CHAPTER XXVI

TRANSPORT

RAILWAYS

The Indian railway system with a route mileage of 34,889 is the largest in Asia and the fourth largest in the world. About 40 lakh persons and 3.7 lakh tons of goods were carried, on an average, by the railways daily in 1958. The capital-at-charge of the railways, the country's biggest nationalised undertaking, at the end of 1957-58, stood at Rs. 1,228 crores and the gross earnings Rs. 383 crores. They employed 11,11,026 persons and paid them Rs. 173 crores in wages and salaries.

Progress Since 1853

The first railway line in India was opened on April 16, 1853. The progress made by the railways during the past hundred and five years can be seen from Tables 213 and 214.

TABLE 213

Railway Zones

The 37 railway systems, which existed in India before August 1949, have been grouped into eight Zones with a view to effecting economy and efficiency in administration. These Zones are shown in Table 215.

Certain narrow gauge feeder railways (total length 427 miles), owned and operated by private companies, were not included in the reorganisation scheme, although under the Railway Companies (Emergency Provisions) Act, 1951, Government assumed powers to ensure their efficient operation in the public interest.

⁽a) Burma Railways separated in 1937.

⁽b) Following the Partition on August 15, 1947.

Railway Finances

Railway finances were separated from general finances in 1925, the railways contributing to the general revenues according to a fixed formula. In December 1949, it was decided that during the quinquennium beginning 1950-51, the railways should pay a guaranteed dividend of four per cent on the capital-at-charge at the end of each penultimate year. The revised Financial Convention, which became applicable after 1955-56, prescribes the same rate of payment except that on new lines a moratorium is to be granted during construction and for the five years to follow.

The following table gives an outline of the financial results of working Government Railways since 1955-56.

TABLE 216
RAILWAY FINANCES

(In crores of rupees)

	1955-56	1956-57	1957-58	1958-59 (Revised)	1959-60 (Budget)

Operating ratio	81.6%	80.3%			
Capital at charge	968.98	1,071.71	1,222.44		

DEVELOPMENT UNDER PLANS

The main problem of the railways in recent years has been that of rehabilitation and replacements. First created by the economic depression, it was later accentuated by the severe strain of war and Partition. Under the First Five-Year Plan, Rs. 423.73 crores were spent on rehabilitation and expansion of railways.

Out of a total proposed Second Plan outlay of Rs. 4,800 crores in the public sector, the railways have been allotted Rs. 900 crores, of which they will themselves find Rs. 150 crores. An additional sum of Rs. 225 crores will be spent as their contribution to the Railway Depreciation Fund. The principal items of expenditure in the total Railway Plan of Rs. 1,125 crores are as follows:

TABLE 217
EXPENDITURE ON RAILWAYS (SECOND PLAN)

		rate strangen in Wegen commercial	(1	n croses of supees

Railways' share in road transport u	ndertaki	ngs		10
Other projects, stores depots, etc.				115

The progress achieved at the end of the First Plan period and the targets aimed at under the Second Plan are dealt with in the following paragraphs.

New Construction and Works

Four hundred and thirty miles of dismantled lines were restored, 380 miles of new lines constructed and 46 miles of narrow gauge lines converted into metre gauge during the First Plan period. 454 miles of new lines were also under construction, 52 miles were being converted into broad gauge and surveys for over 2,000 miles of new lines were in progress. Construction of 842 miles of new lines, doubling of 1,607 miles, conversion of 265 miles from metre gauge to broad gauge and renewal of 8,000 miles of existing track are to be undertaken during the Second Plan period.

The following lines representing an addition of 168.14 miles were opened during 1957-58.

TABLE 218
NEW LINE CONSTRUCTION (1957-58)

Railway	New Lines	Mileage
Central	Khandwa-Takal Khandwa-Ajmer	18.39 0.39

Western	Kottayam-Quilon Bhildi-Raniwara	43.61
,	Total	168.14

Rolling Stock

During the First Plan period, 496 locomotives, 4,351 coaches and 41,192 wagons were produced in the country.

The programme of development and rehabilitation during the Second Plan period is as follows:

TABLE 219
ROLLING STOCK (SECOND PLAN)

	Lo	Locomotives		Wagons			Coaches		
,	Broad gauge	Metre gauge		Broad gauge	Metre gauge	Nar- row gauge	gauge	Metre gauge	Nar- row gauge

TOTAL	1,430	853	18	81,454	21,772	4,021	6,156	4,786	633

The following new rolling stock was placed on line during 1957-58.

TABLE 220

ROLLING STOCK PLACED ON LINE (1957-58)

	Broad gauge	Metre gauge	Narrow gauge
Locomotives Coaches	 225 915	378 424	69
Wagons	 19,894	9,674	66

Self-sufficiency has been attained in regard to the normal requirements of steam locomotives, coaches and wagons. The State-owned Chittaranjan Locomotive Works are turning out 168 broad gauge locomotives per year on an average. Till the end of December 1958, 790 engines were turned out.

Till the end of December 1958, the Tata Engineering & Locomotive Works Co. Ltd., turned out 371 metre gauge locomotives. By the end of the Second Plan period an annual average of 100 locomotives is expected to be attained.

Import of coaches, excepting electric multiple unit coaches, has ceased. The State-owned Integral Coach Factory at Perambur, near Madras, was originally scheduled to reach the target of production of 350 coaches per annum in single shift by 1960-61. This has now been achieved. Five hundred and ninety seven coaches were produced by the factory till the end of December 1958. Messrs. Hindustan Aircraft, Ltd., Bangalore, another State-owned undertaking, produced 1,285 broad gauge furnished steel body coaches on conventional underframes supplied to them till the end of December 1958.

The total production of the wagon-building industry in India, entirely privately owned, rose from 3,707 wagons in the first year of the First Plan to 15,445 in its last year. Arrangements have already been completed to raise the total installed capacity to 25,000 wagons by the end of the Second Plan period. The output during 1957-58 was about 17,300 wagons.

Workshops, Plant and Machinery

The Second Plan provides for six new workshops, a new metre gauge coach-building factory, a new furnishing unit for the Integral Coach Factory and expansion of the Chittaranjan Locomotive Works. As a result, the annual capacity in respect of periodical overhaul of rolling stock is expected to increase by 23 per cent and 71 per cent respectively for

broad gauge and metre gauge locomotives, 69 per cent for broad gauge and 125 per cent for metre gauge coaches and 89 per cent for broad gauge and 92 per cent for metre gauge wagons.

Electrification

Electric traction, first introduced in 1925, is confined to a few lines near Bombay, Madras and Calcutta. Electrification on the Howrah-Burdwan Main Line on the Eastern Railway was completed and the first train inaugurated in August 1958. The total electrified route mileage on March 31, 1958 was 306.24—Central Railway 184.85 (BG) miles, Western 37.25 (BG) miles, Southern 18.14 (MG) miles and Eastern 66 (BG) miles. A further 1,442 miles will be electrified during the Second Plan period—730 (BG) miles on the Eastern Railway, 420 (BG) miles on the South-Eastern, 192 (BG) miles on the Central and 100 (MG) miles on the Southern.

Dieselisation

Diesel traction has been adopted on a few selected routes. A route mileage of 1,293 will be dieselised by 1960-61.

Bridges

Work on the Ganga Bridge near Mokameh Ghat has been completed. Out of Rs. 33 crores provided for bridges under the Second Plan, Rs. 18 crores are to be devoted to rehabilitation, Rs. 9 crores to the Ganga Bridge and Rs. 6 crores to 6 new bridges.

Amenities for Railway Users

Of the improvements carried out during the period 1951-52 to 1957-58 to offer better travel conditions to passengers, particularly third class passengers, mention may be made of the following:

(i) safe and relaxed travel—at a cost which is perhaps the lowest

in the world-in all-steel light-weight coaches;

(ii) reservation of coaches for long distance travel in important trains and reservation of accommodation in accordance with distances in certain trains;

(iii) introduction of 903 trains and extension of the runs of 630

trains up to December 1958;

(iv) sleeping accommodation with pliofoam in certain trains;

(v) all-third class 'Janata' trains, vestibuled air-conditioned trains:

(vi) improvement of catering facilities;

(vii) improvement of drinking water facilities, provision of fans, waiting halls, new or improved over-bridges and new or improved platforms.

Staff Welfare

As against an annual average of a little over Rs. 4 crores spent on the construction of new quarters and staff welfare measures during the First Plan period, it is proposed to spend, on an average, Rs. 10 crores per annum during the Second Plan period.

While 40,000 staff quarters were constructed during the First Plan period, 64,500 are proposed to be built during the Second Plan period.

About 25,000 of them were built during 1957-58.

At the end of 1957-58, there were 83 hospitals and 440 dispensaries. A number of chest clinics for domicilliary and out-door treatment of T.B. patients have been established in addition to expansion of facilities by way of additional beds. It is proposed to open during the Second Plan period

13 new railway hospitals and 75 new dispensaries, add 1,600 beds in existing railway hospitals, double the present number of beds for railway staff in various T.B. sanatoria, and increase the number of railway schools. Steps to increase educational facilities for the children of railwaymen are

also being taken.

In December 1957, it was decided to offer the choice of a pension scheme to all the 10 lakh or more railway employees. A scheme of large-scale upward re-distribution of posts calculated eventually to benefit 1,70,000 railwaymen in non-gazetted cadres was announced in February 1957. Steps are also being taken to explore avenues for quicker promotion of class IV staff.

For the benefit of children of railway workers studying in places away from their parents, 12 subsidised hostels are being set up. Mobile libraries are being formed for the use of staff posted at wayside stations. The first mobile library was inaugurated on the North-Eastern Railway in

December 1958.

OPERATING STATISTICS

Passenger Traffic and Earnings

The salient features of passenger traffic and earnings therefrom on all Indian railways during 1955-56, 1956-57 and 1957-58 are shown below.

TABLE 221
PASSENGER TRAFFIC AND EARNINGS

		1955-56	1956-57	1957-58
Number of passengers (in hu	ndreds)	1,29,73,550	1,38,25,490	1,43,10,595

Third Class		4.97	9.48	4.97

Ticketless Travel

A bill to amend the Indian Railways Act was introduced in December 1958 to provide inter alia for more stringent punishment for ticketless travel.

Among the other steps taken for intensifying the effort against ticketless travel are raids on selected sections and at frequent intervals, continuity checks from starting to terminal stations, surprise inspections of booking offices and the establishment of a temporary central ticket-

checking organisation with four squads of travelling examiners for conducting cross-country and surprise checks. The results of the checks made by the organisation during 1955-56, 1956-57 and 1957-58 are summarised below.

TABLE 222
TICKETLESS TRAVEL

March Company of the	1955-56	1956-57	1957-58
Number of passengers detected travelling without tickets Amount of fare and excess charges realised	69,02,114 Rs. 1,40,29,656	73,53,340 Rs. 1,58,02,951	62,79,507 Rs. 1,42,90,595

Accidents and Safety of Passenger Trains

The number of fatalities and casualties in train accidents expressed as a ratio of ten lakh passengers carried, excluding those resulting from unlawful tampering of track, for 1955-56, 1956-57 and 1957-58 were as follows:

TABLE 223

^{*}Sugar, Khandsarî sugar, Gur, Molasses."

The traffic and earnings in respect of other commodities during 1957-58 were: (i) products of animals like livestock, hides, skins and leather (7.08 lakh tons fetching earnings of Rs. 3.0 crores); (ii) products of forests like firewood, wood unwrought, lac (57.8 lakh tons fetching earnings of Rs. 7.90 crores); (iii) miscellaneous items like manure and fodder (265.0 lakh tons fetching earnings of Rs. 52.0 crores); and (iv) military traffic (12.86 lakh tons fetching earnings of Rs. 3.1 crores).

Punctuality Ratio

The punctuality ratio* for the years 1955-56, 1956-57 and 1957-58 on Government railways are shown below:

TABLE 226
PUNCTUALITY RATIO

Export Traffic

Priorities for rail movement of goods to ports for export have been upgraded. The balance of iron and manganese ore in the ports awaiting shipment at the end of 1955-56, 1956-57 and 1957-58 is shown below:

TABLE 227

EXPORT TRAFFIC

(In tons)

	M	Manganese Ore			Iron Ore		
	1955-56	1956-57	1957-58	1955-56	1956-57	1957-58

services) Engine on line	111 84	110 83	111 84	103 77	102 76	102 74

The productive service of engines on Government railways in freight service in terms of volume of freight transportation per engine hour for the same period is as indicated below:

TABLE 229
NET TON MILES PER ENGINE HOUR

	Broad Gauge	Metre Gauge
1955-56	2,124	915
1956-57	2,176	958
1957-58	2,231	994

Wagon Usage

The use of wagons on Government railways during 1955-56, 1956-57 and 1957-58 is shown below.

TABLE 230
WAGON MILES PER WAGON DAY

	Broad Gauge	Metre Gauge
1955-56 1956-57	46.3 47.7	28.5 28.7
1957-58	47.3	30.1

The productive work performed by wagons in terms of net ton miles per wagon day is as follows:

TABLE 231
NET TON MULES PER WAGON DAY

	Broad Gauge	Metre Gauge
1955-56	541	203
1956-57	570	210
1957-58	586	225

FARES AND PREIGHT

The fare and freight rates were rationalised in 1948. The following rates, involving the introduction of telescopic rates of passenger fares (rates diminishing with increase in distance travelled), came into force from April 1, 1955:

TABLE 232 RATES OF PASSENGER FARES

Class	Before April 1955 (flat rates per	Since April 1955 (tele	scopic rates)		
Ciaas	mile)	Distance in miles	Rates per mile		
Air-conditioned	30 pies	1-300 301 and above	34 pies 32 ,,		
Pirst*	16 "	1—150 151—300	18 ,, 16 ,,		
Second**		301 and above	15 "		
Mail/Express	101	1150 (Mail/Exp.) (Ordinary)	11 " 91 "		
Ordinary	9 "	151—300 (Mail/Exp.) (Ordinary) 301 and above	101		
		(Mail/Exp.) (Ordinary)	91 81		
Third			-		
Mail/Express	6. "	1—150 (Mail/Exp.) (Ordinary)	61 51		
Ordinary	5 "	151—300 (Mail/Exp.) (Ordinary)	61 51 6 5		
		301 and above (Mail/Exp.)	5. "		
1		(Ordinary)	41 11		

For vestibuled air-conditioned third-class trains running between Delhi-Howrah, Delhi-Bombay and Delhi-Madras, an additional charge of 4 pies per mile is collected.

The Railway Passengers Fares Act came into force on September 15, 1957. The rate of tax is 5 per cent of the fare for distances between 16 and 30 miles, 15 per cent for 31 and 500 miles and 10 per cent for over 500 miles. Distances upto 15 miles are exempt from the tax.

Following the recommendations made by the Railway Freight Structure Inquiry Committee, the revised railway freight structure came into force with effect from October 1, 1958. The anticipated annual increase in revenue on account of the revised freight structure is expected to be of the order of Rs. 9.6 crores on freight and Rs. 2 crores on parcel traffic. The Committee recommended an average increase of 12.9 per cent in freight revenue, amounting to about Rs. 32 crores per annum.

ADMINISTRATION

The responsibility for the overall control and administration of the railways vests in the Railway Board, which was first set up in 1905. The Board now consists of a Chairman, who is ex-officio Secretary-General to the Union Railway Ministry, the Financial Commissioner and three Members, each in charge of Staff, Transportation and Engineering, who are of the status of Secretaries to the Union Railway Ministry.

Was known as 'Second' before April 1955.
 Was known as 'Intermediate' before April 1955.

With a view to ensuring constant and close consultation between the public and the railway administration, the following committees have been created; (i) Regional Railway Users' Consultative Committees, (ii) Zonal Railway Users' Consultative Committees at the headquarters of each railway zone; and (iii) the National Railway Users' Consultative Council at the Centre. From January 1, 1958, Divisional Consultative Committees have been set up for each division of the railways on which divisionalisation has already been brought about.

ROADS

The Central Government assumed responsibility for the construction and maintenance of the national highways in 1947. Under the new Constitution, the national highways have become a Central subject, while other roads, namely, the State highways and district and village roads remain the responsibility of the State Governments.

Progress

The progress in road development during recent years as compared to the targets laid down in the Nagpur Plan (1943), as revised to apply to the Indian Union, is shown in the following table.

TABLE 233

ROAD DEVELOPMENT

			and the second second	Surfaced roads	Unsurfaced roads

National Highways

On April 1, 1947, when the Centre took over the liability for the national highways, approximately 1,600 miles of road and thousands of culverts and bridges (including about 150 major bridges) did not exist and 9,000 miles of the existing roads had a low-grade surface. In the table below is shown the progress made since then.

^{*}Proposed

The national highway mileage in the States and Territories of the Indian Union after reorganisation of States was as follows:

TABLE 235
NATIONAL HIGHWAYS (STATE/TERRITORY-WISE)

State/Union Territory				Miles
Andhra Pradesh	 			1,395
Assam	 • •			796
Bihar	 	• •		1,113

Uttar Pradesh	 			1,395
West Bengal	 			782
Delhi	 			44
Himachal Pradesh	 	• •		222
Manipur	 			98

The national highway system is at present about 13,900 miles and includes inter alia the following roads:

- 1. Amritsar to Calcutta
- 2. Agra to Bombay
- 3. Bombay to Madras via Bangalore
- 4. Madras to Calcutta
- 5. Calcutta to Bombay via Nagpur
- 6. Banaras to Cape Comorin via Nagpur, Hyderabad, Kurnool and Bangalore
- 7. Delhi to Bombay via Ahmedabad
- 8. Ahmedabad to Kandla Port (under construction) with branch to Porbandar
- 9. Ambala to Tibet border via Simla
- 10. Delhi to Lucknow via Moradabad
- 11. Lucknow to Barauni via Muzaffarpur with a branch road to the Nepal border
- 12. Assam Access Road
- Assam Trunk Road with a branch to the Burma border through Manipur.

Among the important works in progress on national highways, mention may be made of the Jawahar (Banihal) Tunnel, which is under construction at a height of about 7,250 ft. across the Pir Panjal range on the Jammu-Srinagar-Uri national highway. This is one of the longest tunnels in the world and, when completed, will provide all-weather communication facilities between the Kashmir Valley and the rest of India. The tunnel has two tubes, one of which has been thrown open to traffic.

Other Roads

The Government of India also finance the development of certain other arterial roads in the States. These include, inter alia, the Passi-Badarpur Road in Assam, and the West Coast Road in the States of Bombay, Mysore and Kerala.

Under a special programme approved in May 1954 for the development of certain selected State roads of inter-State or of economic importance, 125 miles of new roads were constructed and 500 miles of existing roads improved during the First Plan period. The programme which has been carried over to the Second Plan period provides for the construction of 1,000 miles of new roads and 9 major bridges and improvement of about 2,000 miles of existing roads.

Roads in the States' Sector

Under the programmes drawn up by the States and Union Territories for the Second Plan period, about 21,000 miles of surfaced roads and 37,000 miles of unsurfaced roads will be constructed.

ROAD TRANSPORT

Motor Vehicles

The number of motor vehicles on the road in India since 1947 is as follows:

TABLE 236

MOTOR VEHICLES

Year ending March 31	Number of Motor Vehicles
1947	2,11,949
1948	2,25,227
1949	2,69,669
1950	2,94,727

1955	3,76,477
1956	4.22.041

The vehicles at the end of March 1956 comprised 40,727 motor cycles and auto-rickshaws, 1,88,165 private cars and jeeps, 61,018 public service vehicles and motor cabs, 1,18,144 goods vehicles and 13,987 miscellaneous vehicles.

Import of Motor Vehicles and Spare Parts

The number of vehicles imported since 1947 and the value of such vehicles and spare parts were as follows:

TABLE 237

IMPORT OF MOTOR VEHICLES

Year ending March 31	Number of vehicles	Value of vehicles and spare parts (in lakhs of rupees)
1947	33,407	922 51
1948	40,392	1.924 22
1949	44,205	2,220 49
1950	21,080	1,413 31
1951	15,533	1.661 87
1952	18,287	2.322 17
1953	11,204	1.421 91
1954	14,106	1.338 72
1955	17,850	2,122 00
1956	25,542	3.312.49

Administration

Passenger road transport has been nationalised in many States and Union Territories. These services are being operated by statutory Road Transport Corporations, joint stock companies and State departments. Goods transport, however, is still largely in the hands of private operators and its nationalisation is not contemplated till the end of the Third Plan period.

An Inter-State Transport Commission has been set up for the purpose of development, co-ordination and regulation of road transport services on

inter-State routes.

To ensure proper co-ordination between the different modes of transport on the one hand and Central and State policies on the other, Government of India have set up the Transport Development Council, Road and Inland Water Transport Advisory Committee and the Central Transport Co-ordination Committee. An Ad-Hoc Committee has been set up to advise on the reorganisation of transport administration in the States.

INLAND WATERWAYS

The length of navigable waterways is over 5,000 miles. The important ones are the Ganga and the Brahmaputra and their tributaries, the Godavari and the Krishna, the backwaters and canals of Kerala, the Buckingham Canal in the Madras and Andhra States, the West Coast Canals and the Mahanadi Canals in Orissa.

To co-ordinate the development of water transport on the Ganga, the Brahmaputra and their tributaries, a body known as the Ganga-Brahmaputra Water Transport Board was set up in 1952 by the voluntary

co-operation of the Central and State Governments.

At present, 1,557 miles of rivers are navigable by mechanically-propelled vessels and 3,587 miles by large country boats. Navigation can be developed on shallow stretches to some extent by deepening the channels, by regulation works, dredging and by the use of craft specially designed to negotiate such stretches. Deepening by dredging entails heavy outlay. Attention has, therefore, been focussed on the use of specially designed shallow craft. The Ganga-Brahmaputra Board has taken up an experimental project for this purpose on the Upper Ganga.

Planned development works in the Ganga-Brahmaputra region include the dredging of important waterways, provision of aids to navigation such as radio-telephone and automatic beacons, and the development of inland port facilities at selected places. The Plan also provides for the development of the Buckingham Canal and the development of the

West Coast Canals.

The Inland Water Transport Committee has made interim recommendations pertaining to immediate improvements to existing waterways, traffic surveys, hydrographic surveys of selected reaches, setting up of technical organisations and utilisation of miltipurpose river valley projects, reservoirs and canals for navigational purposes.

SHIPPING

Progress During the Plans

In 1947, the Shipping Policy Committee had recommended a target of 20 lakh tons GRT within the next five to seven years. Though accepting the recommendation, Government realised that this could be achieved only in stages. To enable shipping companies to secure a rapid expansion of their fleet, a scheme of loan assistance was devised in 1951.

The progress achieved during the First Plan period and the targets aimed at in the Second Plan are shown below:

TABLE 238
PROGRESS OF SHIPPING

(Gross registered tons)

Type of vessels		Before the First Plan	At the end of the First Plan	At the end of the Second Plan
Coastal and adjacent Overseas Tramps Tankers Salvage Tugs		2,17,202 1,73,505	3,12,202 2,83,505 5,000	4,12,202 4,05,505 60,000 23,000 1,000
	Total	3,90,707	6,00,707	9,01,707

At the end of November 1958, 141 ships totalling 6,39,708 GRT were on the Indian Register—85 vessels of 2,57,945 GRT on the coastal trade and 56 vessels of 3,71,763 GRT on the overseas trade.

Another 1,28,000 GRT is under construction and will be delivered progressively before the end of the Second Plan period. The reduction from 3,00,000 GRT proposed under the Second Plan is due to scarcity of foreign exchange and difficult internal financial position.

Merchant Shipping Act

The new Merchant Shipping Act enacted in 1958 provides inter alia for the establishment of the National Shipping Board to advise the Government and a non-lapsable Shipping Development Fund. The Fund will be made up of loans and grants from the Centre and will provide a perennial source of rupee finance for shipping development.

Shipping Corporations

A Government-sponsored shipping corporation known as the Eastern Shipping Corporation Limited, was set up in 1950 with an authorised capital of Rs. 10 crores. The management of the Corporation was taken over by the Government from the Scindias in August 1956. It has now a fleet of eight ships for cargo and passengers and runs a regular cargo service on the India-Japan and the India-Australia routes and passenger cum cargo service on the India-Singapore and India-East Africa routes. The Corporation also runs the India-Andamans service.

The Western Shipping Corporation, registered in June 1956 with an authorised capital of Rs. 10 crores, will operate on the India-Persian Gulf, India-Red Sea, India-Poland and India-Soviet routes. The ships ordered by the Corporation are still under construction and the operations of the Corporation have so far been confined to the chartering of the tanker Desh Sewak to Messrs. Shell Tankers Ltd.

A beginning has been made in acquiring a tanker fleet by the acquisition of two tankers—one in the public sector and the other in the private. A third will be acquired for the public sector soon.

Hindustan Shipyard

The Visakhapatnam Shipyard was purchased from the Scindias by the Government in March 1952 and its management entrusted to the Hindustan Shipyard Ltd., in which two-thirds of the capital is held by the Government. The first vessel to be built at the Yard was launched in March 1948. The Shipyard has so far delivered 20 ocean-going ships and 3 small craft of an aggregate gross tonnage of 1,01,372. Nine more vessels are expected to be delivered by 1960-61.

Second Shipyard

The Government of the United Kingdom provided, under the Technical Co-operation Scheme of the Colombo Plan, a technical mission to survey possible sites and collect data for the establishment of a second shipvard. The mission, which reported in April 1958, recommended that although none of the sites examined is ideally suited, Cochin (Ernakulam), Mazgaon Dock, Kandla, Trombay and Geonkhali are worthy of further consideration.

Training Institutions

Sixty-one cadets passed out of T.S. Dufferin during 1958 and have all

been employed on board ships.

Three thousand one hundred and two candidates took advantage of the training facilities available at the Nautical and Engineering College, Rombay, till the end of March 1958. Fifty cadets representing the sixth batch of trainees passed out of the Marine Engineering College, Calcutta

The three ratings training establishments—T.S. Bhadra, T.S. Mekhala and T.S. Nau Lakshi-together trained 2,485 boys-1,281 for the deck department and 1,204 for the engine room department—till the end of

September 1958.

PORTS

Major Ports

India has six major ports, namely, Calcutta, Bombay, Madras, Cochin, Visakhapatnam and Kandla. During 1957-58, these ports handled 310 lakh tons of cargo.

The ports of Bombay, Calcutta and Madras are administered by statutory port authorities, subject to the overall control of the Central Government. The ports of Cochin, Visakhapatnam and Kandla are administered directly by the Central Government.

The traffic handled by, and the financial results of the working of the

major ports during 1957-58 are as follows:

TABLE 239 TRAFFIC AND EARNINGS OF MAJOR PORTS

		Ships entered		Imports	Exports	Surplus (+) or deficit ()	
Port		No.	Gross tonnage (lakhs)	(lakh (lakh tons) tons)	in carnings (Rs. lakhs)		
Calcutta Bombay Madras Cochin Visakhapatnam Kandla		1,593 2,840 950 1,039 521 207	101.04 159.42 60.25 51.99 36.24 12.00	55.16 93.02 20.03 14.04 11.46 6.09	46.41 38.08 6.73 3.96 13.47 2.35	(+) 155.64 (+) 322.23 (+) 76.78 (-) 1.50 (+) 50.84 (+) 12.20	

The projects for the modernization and augmentation of the facilities at the major ports already completed are the following:

> (i) four new cargo berths with warehouses and transit sheds, bulk oil discharge facilities, bunder, passenger landing stages, etc. at Kandla:

(ii) two marine oil terminals, one in Bombay and the other in

Visakhapatnam;

(iii) installation of 34 electric cranes in the Alexandra docks and the reconstruction of 11 out of 12 transit sheds destroyed in the explosion of 1944 in Bombay;

(iv) a mechanical ore berth, a heavy lift yard equipped with a 200-ton crane and a mechanical coal loading plant at Calcutta;

(v) the work designed to counteract the sand drift menace and a new marshalling yard at Madras;

(vi) two oil tanker berths with pipeline connections, a black oil berth and a coal berth at Cochin; and

(vii) acquisition of several items of port equipment and harbour craft at all the ports;

The important works which are in progress are:

(i) two additional cargo berths at Kandla;

- (ii) the development of two berths at King George's Dock as general cargo berths and dredging work at Fulta-Hooghly Point at Calcutta;
- (iii) the acquisition of an additional 54 electric cranes at Bombay;

(iv) construction of a six-berth wet dock at Madras;

(v) four cargo berths at Cochin; and

(vi) dredging work preliminary to the construction of additional berths at Visakhapatnam.

Minor Ports

The Indian coastline is also served by a large number of minor ports (about 225, of which 150 are working ports) which together handle a coastal and overseas traffic of about 50 lakh tons per annum. The administration of these ports is the responsibility of the State Governments. Various works of improvement have been undertaken under the First and Second Five-Year Plans. The Second Plan includes a provision of Rs. 5 crores for the purpose and includes Rs. 1 crore for the establishment of a pool of dredgers required to improve depths in port approaches.

National Harbour Board

For advising the Central and State Governments on the co-ordinated development of ports with special attention to minor ports, the National Harbour Board was constituted in 1950, consisting of representatives of Government of India, the maritime States, major port authorities, and non-official members representing trade, industry and labour. A subcommittee of the Board meets every year to screen and approve schemes for hydrographic surveys.

TOURIST TRAFFIC

Administrative Set-up

A Tourist Traffic Branch was set up under the Ministry of Transport in 1949 and a chain of regional tourist offices has since been established in important cities like Delhi, Calcutta, Bombay and Madras. Tourist information offices have also been set up at Agra, Aurangabad, Banaras, Bangalore, Bhopal, Cochin, Darjeeling and Jaipur. These offices work in close collaboration with the State Governments, travel agents, hoteliers and carriers. Abroad, India has tourist offices in New York, San Francisco, London, Melbourne, Paris, Colombo and Frankfurt.

A separate Department of Tourism in the Ministry of Transport and Communications has been set up. A Tourist Development Council, including representatives of the public, the travel trade and the State Governments,

advises the Government on tourist problems. There are regional advisory

committees for the different regions in the country.

In order to encourage the promotion of tourist traffic on a large scale and to exploit this source of foreign exchange to the fullest extent possible, a high-level committee consisting of the Secretaries and heads of Departments concerned and presided over by the Secretary to the Cabinet, has been set up.

Hotel Standards and Rate Structure Committee

The major recommendations of the Hotel Standards and Rate Structure Committee, constituted in 1957 to advise the Government on the question of laying down the criteria for standardisation and gradation of hotels in India and the question of presenting a suitable rate structure, are being implemented.

Relaxation in Tourist Regulations

Regulations relating to police, registration, currency, exchange control and customs have been relaxed to promote tourist traffic. A special inter-departmental committee makes periodic inspection of the various ports of entry with a view to ascertaining the possibility of further simplification of such formalities. Concessional tickets are offered by the railways for round trip journeys and circular tours. Special concessions are given to students and pilgrims as well as to tourists visiting hill resorts fluring summer. At present, there are 26 officially recognised travel agencies, 13 shikar (big game) agencies and 5 recognised excursion agents which serve tourists. The services of an increasing number of educated, specially trained and approved travel guides are also available.

Information

Tourist information material in the form of guide books, pamphlets, folders, maps, posters and picture cards are being brought out. More than sixty lakh items of travel literature in English, French, Spanish, German and in the Indian languages are being annually produced and widely distributed. An illustrated monthly magazine entitled *Traveller in India* is issued to attract tourists. Travel films are also made for distribution and exhibition abroad. A cultural programme of festivals is being organised.

Number of Tourists

The number of foreign tourists visiting India since 1951, is shown below:

TABLE 240
TOURIST TRAFFIC

Year	Year			Number of Foreign Tourists		
1951				20,000●		
1952		4.4		25,448		
1953	• •		••	28,060		
1954		• •	• •	39,333		
1955		• •		43,645		
1956				68,880†		
1957	••	• •	• •	80,544†		
1958	•••		• • •	92,1931		

Tourist Revenue

The revenue from tourist traffic during 1955 was estimated at Rs. 10.1 crores. The earnings during 1956 and 1957 as estimated by the Reserve Bank of India are Rs. 15.5 crores and Rs. 16.0 crores respectively.

Development Plans ...

The Central and some of the State Governments have formulated plans to provide for the development of tourism. The programme envisages additional accommodation, transport and recreational facilities at important tourist centres, especially those situated in out-of-the-way places. Broadly, these are of three kinds: (i) schemes for the development of facilities at a limited number of places visited largely by foreign tourists, (ii) facilities at places mainly for home tourists, and (iii) schemes for places of regional and local importance which are visited by home tourists of low and middle-income groups. The schemes in the first category are being undertaken by the Central Government. Schemes in the second group are being implemented by the States with assistance from the Centre and those in the third group exclusively by the States.

CIVIL AVIATION

Indian aircraft flew about 290 lakh miles carrying about 8 lakh passengers and nearly 1,942 lakh pounds of cargo and mail on scheduled and non-scheduled services taken together during 1958. Under the 'all up' air mail scheme and night air mail services approximately 48,000 passengers, 29,86,000 lbs. of cargo and 40,18,000 lbs. of mail were carried during 1958.

Progress Since 1947

The table below shows the progress made by civil aviation in India since 1947 (for scheduled services only):

TABLE 241
CIVIL AVIATION (SCHEDULED SERVICES)

Year	Miles flown (in thousands)	Passengers (in thousands)	Freight (in thousand lbs.)	Mails (in thousand lbs.	
1947	9,362	255	5,648	1,405	
1948	12,649	341	11,975	1,583	
1949	15,098	357	22,500	5,032	
1950	18,896	453	80,007	8,356	
1951	19,498	449	87,665	7,182	
1952	19,562	434	86,038	8,377	
1953	19,202	404	84,820	8,846	
1954	19,798	432	86,415	10,673	
1955	21,267	469	98,200	11,478	
1956	23,481	559	96,231	12,686	
1957	23,496	615	85,691	13,081	
1958	24,086	683	98,494	13,180	

Since 1947, the passenger traffic has more than doubled, the cargo loads have gone up more than 17 times, mail loads more than 9 times and miles flown more than 2½ times.

Air Corporations

The Indian Airlines Corporation, whose fleet consisted of 10 Viscounts, 6 Skymasters, 5 Herons, and 61 Dakotas at the end of 1958, links up most of the principal centres in the country. The Corporation, carried 5,99,573 passengers on its services and its aircraft flew a total of 1,83,18,552 miles during 1957-58.

The Air-India International Corporation with its fleet of 10 Superconstellations and 1 Dakota provides services reaching out to 19 countries. During 1957-58, it carried 88,312 passengers on its services and its air-

craft flow over 67,19,000 miles.

Training

Pilots, Aircraft Maintenance Engineers, Aerodrome Officers, Control Operators, Fire Operators, Radio Operators, Radio Technicians and Pilot Instructors are trained in the Training Centre of the Civil Aviation Department at Allahabad. During 1958, the Centre trained 312 candidates in various courses, while 177 trainees were undergoing training at the end of November.

Flying Clubs

India has 14 subsidised flying clubs with head-quarters at Delhi, Bombay, Madras, Patna, Barrackpore, Bhubaneswar, Lucknow, (with satellite centres at Kanpur, Allahabad and Banaras) Juliundur, Hyderabad, Nagpur, Jaipur, Indore, Bangalore and Gauhati. There are three Government Gliding Centres at Poona, Bangalore and Allahabad and a subsidised Gliding Club at New Delhi. During 1958, the flying clubs trained 198 'A' Licence and 3 'B' Licence pilots till the end of November. On December 1, 1958, there were 541 persons undergoing training at these flying clubs.

Aerodromes

Eighty-four aerodromes* are controlled and operated by the Civil Aviation Department of the Government of India. Three of these viz., Bombay (Santa Cruz), Calcutta (Dum Dum), Delhi (Palam) are international airports. The aerodromes at Agartala, Ahmedabad, Patna, Bombay (Santa Cruz), Calcutta (Dum Dum), Delhi (Palam), Delhi (Safdarjung), Madras (St. Thomas Mt.), Tiruchirappalli, Jodhpur, Bhuj and Amritsar have been declared customs aerodromes.

Six new aerodromes at Haldwani (U.P.), Kandla (Bombay), Tulihal (Manipur), Raxaul (Bihar), Jogbani (Bihar) and Behala (West Bengal) are under construction. Subject to availability of funds, three more new aerodromes and a gliderdrome are expected to be completed in the remaining period of the Second Plan. The main runways at the three international airports are being extended and strengthened to meet the needs of jet

transport aircraft.

The programme for the development of civil aviation during the Second Five-Year Plan period aims at meeting the new demands which have arisen from recent technical advancements and from India's obligations under the Convention on International Civil Aviation to provide facilities at aerodromes in conformity with the standards laid down by the International Civil Aviation Organisation.

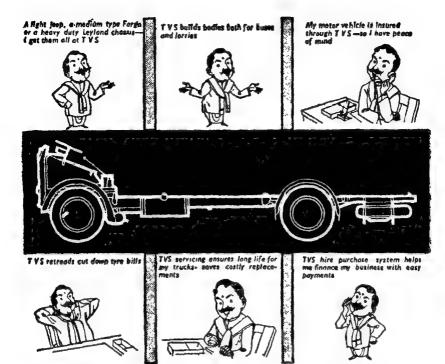

Aircraft

On December 1, 1958, 522 aircraft held current certificates of Registration and 209 aircraft held current certificates of airworthiness.

Air Transport Agreements

During 1958, agreements between the Government of India and the Governments of the Union of Soviet Socialist Republics, the Republic of Lebanon and the Republic of Italy were entered into. Air transport agreements have already been concluded with Afghanistan, Australia, Ceylon, Egypt, France, Japan, Netherlands, Pakistan, Phillippines, Sweden, Switzerland, Thailand, Iraq, the United States of America and the United Kingdom.

^{*}For a list of aerodromes see Appendices.

I buy chassis from TVS because I get all I need under one roof

Today, the rising tempo of production demands speedy transport of men and materials. Road transport, therefore, offers excellent opportunities for expansion and progress.

TVS, with its several units, meets the increasing demands of the automotive industry in all its aspects in South India.

Units include

-11

T. V. SUNDRAM IYENGAR & SONS PRIVATE LIMITED, MADURAL

CHAPTER XXVII

COMMUNICATIONS

The Posts and Telegraphs services constitute the second largest State undertaking in India, next only to the railways. The number of persons employed on March 31, 1958, was 3,16,617, while the capital outlay was Rs. 111 crores.

The Department of Posts and Telegraphs functions through 13 territorial units —12 post and telegraph circles and 1 postal circle for Delhi only. There are four telephone districts for the cities of Calcutta, Bombay, Madras and Delhi and 21 other administrative units on a functional basis. The Department works as a commercial-cum-utility service and makes over a part of its surplus earnings as a contribution to the general revenues; the rest accrues to the credit of the Department. The accumulated surplus on April 1, 1958, stood at Rs. 23.9 crores.

POSTAL SERVICES

The postal traffic and postal revenue since 1921 are shown below:

POSTAL TRAFFIC AND REVENUE

1951

1957-58

The following table shows the number of post offices and letter boxes in the urban and rural areas in India:

TABLE 244

URBAN AND RURAL POST OFFICES AND LETTER BOXES

		On March 31, 1957		On March 31, 1958	
		Urban	Rural	Urban	Rural
Post Offices					
Permanent	• •	 5,582	34,677	5,786	36,950
Temporary	• •	 1,112	17,500	1,178	17,972
Letter Boxes	• •	 31,376	86,205	32,403	90,851

The number of new post offices opened between April 1, 1958, and December 31, 1958, was 1,492. 19,712 post offices were opened during he First Plan period while the opening of 20,000 post offices is aimed at during the Second Plan period.

Urban Mobile Post Offices

The Urban Mobile Post Office Scheme is in operation at Nagpur, Madras, Delhi, Bombay and Calcutta. The mobile post office visits important centres of the city at specified hours after the ordinary post offices have closed for the day. It works on all days of the year, including Sundays and postal holidays. Money orders are not accepted at the mobile post office, nor is savings bank business transacted.

Air Mail and All-up Schemes

An inland night air mail service links up the principal cities of India, namely, Bombay, Calcutta, Madras, Delhi and Nagpur. Under the 'Allup Scheme' all inland letters, letter cards, post cards and money orders are normally carried by air without any air surcharge.

Air Parcel Service with Foreign Countries

Direct air parcel service is in operation from India to Aden, Afghanistan, Australia, Bahrein, Burma, Belgium, Canada, Ceylon, Czechoslovakia, Denmark, East Africa (Uganda, Kenya and Tanganyika), Egypt, Ethiopia, Fiji, France, Germany (Federal Republic), Germany (Democratic Republic), Ghana, Holland, Hong Kong, Indonesia, Iran, Iraq, Ireland, Italy, Japan, Malaya, Mauritius, New Zealand, Pakistan, South Rhodesia, Sudan, Sweden, Switzerland, Thailand, United Kingdom, United States of America and Zanzibar.

Postal Savings Bank

Facilities are available at most post offices in the country for depositing savings, the maximum limit of deposit for an individual depositer being Rs. 15,000 and for a joint account Rs. 30,000. The interest rate on these savings accounts are $2\frac{1}{2}$ per cent per annum on any sum not exceeding Rs. 10,000 in the case of an individual account and Rs. 20,000 in the case of a joint account and 2 per cent per annum on the remainder of the balance.

Bi-weekly withdrawal facilities, subject to a maximum of Rs. 1,000, are now available in respect of individual accounts at all post offices doing savings bank work.

Postal Insurance

Postal insurance business during the last two years was as follows:

TABLE 245

POSTAL INSURANCE

			New busin	ess effected	Total business in force		
			No. of policies	Sum assured (in crores of rupees)	No. of policies	Sum assured (in crores of rupees)

TELEGRAPH SERVICES

Some salient statistics regarding the telegraph services are given below:

TABLE 247
TELEGRAPH STATISTICS

		1955-56	1956-57	1957-58
Number of telegraph offices (including licensed offices) Number of telegrams excluding P & T service telegrams (in lakhs) Mileage of overhead wires Mileage of underground cable conductors Carrier and VFT Channels Telegraph revenue (in crores of rupees)	•••	9,893 335 8,67,199 10,03,437 4,79,210 6.7	10,052 345 9,09,798 12,36,340 5,58,363 7.7	10,723 332 9,53,785 13,65,236 5,97,604 8.2

Between April 1, 1958, and December 30, 1958, 163 telegraph offices were opened. The telegraph channel mileage also increased from 3,30,110

to 3,58,010 during the same period.

Out of 332 lakh telegrams (excluding the P&T service telegrams) transmitted during 1957-58, 292 lakhs were inland and 40 lakhs foreign telegrams. The revenue derived from these telegrams amounted to Rs. 6.81 crores (Rs. 5.49 crores from inland and Rs. 1.32 crores from foreign telegrams). Out of 292 lakh inland telegrams, about 249 lakhs were private and the rest State and Press telegrams. The number of Press telegrams during 1957-58 was 2.27 lakhs. Twenty-three stations have been connected to a tape relay exchange installed at Bombay through which messages are transmitted automatically to the destination stations connected with the exchange by push button system.

Telegraph Service in Hindi and other Indian Languages

Hindi telegraph service is now available at about 1,400 offices (including 50 Railway telegraph offices) in the country. The service is available in all the P.& T. circles. Training classes in Hindi Morse have been opened at eleven places and about 2,400 operators have hitherto been trained.

Telegrams can be sent in any Indian language provided they are written in Devanagari script. In addition, the following special facilities are available in the Hindi telegraph system:

(i) Greetings telegrams on festive occasions;

(ii) Emergent telegrams to call relatives and friends in case of serious illness or death;

(iii) Local telegrams;

(iv) Tendering of telegrams in Hindi on Phonogram System where such a facility exists;

(v) Telegraphic money orders; and

(vi) Registration of telegraphic abbreviated addresses at concessional rates.

Telegraph traffic in Hindi between 1949-50, when the service was introduced, and 1957-58 was as shown below:

TABLE 248
TELEGRAPH TRAFFIC IN HINDI

TELEPHONE SERVICES

The following table shows the number of telephones, telephone exchanges, trunk calls and the amount of telephone revenue during the period 1955-56 to 1957-58.

TABLE 249

TELEPHONE STATISTICS

		1955-56	1956-57	1957-58
Number of telephones Number of telephone exchanges (including	••	2,78,000	3,09,000	3,35,000
P.B. Xs & P. Xs)		5,817	6,188	6,457
Number of trunk calls (in lakhs)		186	208	231
Telephone revenue (in crores of rupees)		14.4	16.3	18.4

During the period from April 1, 1958, to December 31, 1958, 151 long distance public call offices and 29,000 additional telephones were provided. The equipped capacity of the exchanges stood at 3,23,600 and the telephone channel mileage at 2,61,400 at the end of 1958.

Own Your Telephone Scheme

The scheme is now in operation at Ahmedabad, Bombay (except 24 and 26 exchange areas), Calcutta (only in Barrackpore and Serampore exchange areas), Madras (except Mount Road, Kilpauk and Mylapore exchange areas) and New Delhi. Over 33,000 connections have so far been given under this scheme. It is, however, being gradually withdrawn in view of the progress of new telephone exchange installations.

Message Rate System

Under the message rate system, a subscriber pays for every call that he makes plus a fixed monthly rental. This system is in operation at 40 exchanges.

Telephone Industry

In 1957-58 the Indian Telephone Industries (Private) Limited, Bangalore, manufactured 60,241 telephones, 42,305 exchange lines, 246 small exchanges (totalling 8,005 lines), 31 single channel carrier systems, 52 three channel carrier systems, 2 twelve channel carrier systems apart from a large number of smaller equipment and components. Most of the components are manufactured in the country. Out of 539 parts, only 3 are imported, the value of the imported parts being less than 25% of the total value of the equipment manufactured.

OVERSEAS COMMUNICATIONS

The Overseas' Communications Service, which was nationalised on January 1, 1947, has now fifty-seven direct radio services which link India with foreign countries. During the last seven years, the Service handled about 190 lakh telegrams consisting of about 4,922 lakh words; 1,35,300 radio telephone calls of 7,82,000 paid minutes; 1,400 radio pictures totalling 4,64,000 sq. cms. in area and about 149 lakh multipress words. Four international radio teleprinter channels have been leased to civil aviation companies.

Radio Telephone Service

India has direct radio telephone service with the following countries: Aden, Australia, Bahrein, Burma, China, East Africa, Egypt, Ethiopia, France, Germany (Federal Republic), Hong Kong, Indonesia, Iran, Italy, Japan, Malaya, Poland, Saudi Arabia, Switzerland, the United Kingdom, USSR and Viet Nam (South).

Radio telephone service via London is available between India and Algeria, Argentina, Austria, Barbados, Belgium, Bermuda, Brazil, Canada, Ceuta, Costa Rica, Cuba, Czechoslovakia, Denmark, Finland, Gibraltar, Greece, Guatemala, Hawaii, Honduras, Hungary, Iceland, Irish Republic, Israel, Lebanon, Luxembourg, Mexico, Morocco, Netherlands, New Foundland, Nicaragua, Norway, Panama, Rhodesia, South Africa, South-West Africa, Sudan, Spain, Sweden, Tangier, Tunisia, the United States of America and the Vatican City.

Radio telephone service is also available for Yugoslavia via Berne; for Doha, Kuwait and Muscat via Bahrein; for Sudan via Cairo; for New Zealand via Australia; and for Asmara via Ethiopia. 35 ships at

sea make use of the radio telephone facilities.

Radio Telegraph Service

Radio telegraph service is available for Afghanistan, Australia, Burma, China, Egypt, France, Germany (Federal Republic), Indonesia, Iran, Italy, Japan, Poland, Switzerland, Thailand, U.K., U.S.A., U.S.S.R., Vietnam (South), Vietnam (North) and Yugoslavia.

Radio Photo Service

Direct Radio photo service operates between India and China, France, Germany (Federal Republic), Japan, Poland, U.K., U.S.A., and U.S.S.R. In addition, the service is available via London to Australia, Belgium, Canada, Czechoslovakia, Denmark, Egypt, Finland, Ghana, Greece, Italy, Jamaica, Norway, Portugal, South Africa, Sweden, Switzerland and Yugoslavia.

Other Services

The Service also handles news transmissions on behalf of the Government of India for the benefit of Indian Consular posts abroad and on behalf of certain press agencies to different areas outside India. Leased circuits have been made available to British Overseas Airways Corporation, Pan American World Airways, Air India International and Trans World Airlines.

CHAPTER XXVIII

LABOUR

In the organised sector of India's economy, the largest number of workers are employed in factories. In 1957, the average daily employment in factories for which figures are available stood at 30,87,864*. Plantations provided (in 1955) average daily employment to 12,12,636 workers, while the Railways employed 11,11,026 workers daily in 1957-58. 6,28,587 workers were employed daily in the mines in 1956 and 30,626 in major ports other than Calcutta and Cochin.

The following table gives the State-wise break-up of average daily employment figures in factories subject to the Factories Act for the period

1954 to 1957, on the basis of the returns submitted by them.

TABLE 250

Productivity

Studies on the productivity of labour were initiated in India only recently. On the basis of the census of manufacturing industries for the year 1950, labour productivity figures were compiled in 1952 for different industries and also for small, medium and large establishments in each industry. The following table shows the findings in respect of certain selected industries:

TABLE 253

PROBUCTIVITY OF LABOUR (1950)

(Value added per man-hour)

(In rupees)

Industries		All sizes	Small size	Medium size	Large size
Sugar	,.	1.5	1.4	1.5	1.4
Cement		1.4	1.3	1.4	1.5
Cotton textiles	1	0.7	0.7	0.8	0.7
Woollen textiles		1.2	0.4	1.2	1.4
Jute textiles	1	0.5	0.5	0.7	0.6
Iron and steel		1.4	0.4	0.8	1.5
Chemicals		1.9	1.5	1.7	2.6
All industries		0.8	0.6	0.8	1.0

A study of the changes in the productivity and earnings in certain industries in India, published in 1955, revealed that:

(i) in coal mining industry, the overall rate of increase in productivity for miners and loaders during the period 1951 to 1954 was 0.076 per month as against 0.26 in the average weekly cash earnings;

(ii) in paper industry, the average earnings of workers increased during the period 1948-53, but there was no evidence of an

increase in productivity;

(iii) in jute textile industry, the rate of increase in productivity during the period 1948 to 1953 was 2.9 per year as against 3.7 in earnings; and

(io) in the case of the cotton textile industry, the annual rate of increase in productivity during the period 1948 to 1953 was 2.28 as against 1.14 in earnings.

In 1955 the relation of the trend in index of productivity of factory workers to that of real earnings was studied with the following results.

TABLE 254
PRODUCTIVITY AND REAL EARNINGS OF FACTORY WORKERS

Year			ĺ	Index (Base 19	1939=100) of		
1 Car				Real earnings	Productivity		
1940				108.6	104.2		
1941	• •	• •		103.7	94.8		
1942				89.0	85.3		
1943		• •		67.0	84.5		
1944				75.1	86.3		
1945		• •		74.9	79.5		
1946				73.2	74.7		
1947		• •		78.4	72.5		
1948		• • •		84.4	79.4		
1949		• •		91.7	75.6		
1950		• •		90.1	78 B		
1951	• •	• •		92.2	88.7		
1952		• •		101.8	97.4		
1953		• •		99.9	105.8		
1954		• •		102.7	113 D		

On the basis of the monthly statistics published by the Chief Inspector of Mines in India, the productivity of workers employed in coal mines was as follows:

TABLE 255
PRODUCTIVITY OF WORKERS IN COAL MINES

			Output (in tons) per man-shift for					
Period			Miners and loaders	All persons em- ployed under- ground and in open workings	All persons em- ployed above and underground			
1953 (Average) 1954 1955 " 1956 " 1957 " 1958 August		* * * * * * * * * * * * * * * * * * *	1.05 1.09 1.10 1.12 1.14 1.14	0.57 0.58 0.54 0.59 0.61 0.58	0.35 0.37 0.37 0.38 0.41 0.40			

The Labour Bureau has taken up a project for compiling interim productivity indices based mainly on the annual census of manufactures for nine selected industries, viz. Jute Textiles, Iron and Steel, Sugar, Cotton Textiles, Glass, Cement, Paper, Matches and Woollen Textiles. The annual indices are proposed to be compiled from 1948 with 1947 as base.

NATIONAL EMPLOYMENT SERVICE

The Employment Service, started in 1945, consists of a network of Employment Exchanges, each staffed by personnel trained in a carefully devised procedure. The Employment Exchange renders employment

assistance to all employment seekers. It also discharges certain special responsibilities, such as the provision of employment assistance to displaced persons, discharged Government employees and those belonging to the Scheduled Castes and Tribes.

At the end of November 1958 there were 211 Exchanges in the country. Table below gives figures relating to the activities of the Exchanges during the period 1954-58.

TABLE 256
EMPLOYMENT EXCHANGE STATISTICS

Period	No. of Ex- changes at the end of the period	registra- tions dur- ing the	No. of applicants placed in employ- ment dur- ing the period	No. of applicants on the Live Reg- ister at the end of the period	Monthly average number of employers using the Exchan- ges	No. of vacancies notified during the period	No. of vacancies being dealt with at the end of the period
1954	128	14,65,497	1,62,451	6,09,780	4.751	2,39,875	29,295
1955	136	15,84,024	1,69,735	6.91,958	4,880	2,80,523	42.248
1956	143	16,69,895	1,89,855	7,58,503	5,346	2.96.618	42,805
1957 1958	181	17,74,668	1,92,831	9,22,099	5,632	2,97,188	45.156
(Nov.)	211	21,35,113	2,31,985	11,59,031	6,471	3,34,294	64,687

The day-to-day administrative control over the employment exchanges was transferred to the State Governments with effect from November 1, 1956. The Central Government now limits its responsibilities to policy-making, co-ordination of procedure and standards and to rendering of assistance, whenever needed.

assistance, whenever needed.

Several schemes, such as (i) the collection of employment market information, (ii) occupational research and analysis, (iii) the publication of career pamphlets and handbooks on training facilities, (iv) vocational guidance and employment counselling and (v) the development of oral testing, are under implementation to improve the quality of service being rendered by the exchanges.

Craftsmen Training

There are more than a hundred training centres functioning under the Craftsmen Training Scheme. The other schemes scheduled for implementation during the Second Plan period are the National Apprenticeship Training Scheme and the scheme for the Training of Industrial Workers (Evening Classes). With a view to meeting the increased demand for trained craft instructors, the Central Training Institute at Koni-Bilaspur (Madhya Pradesh) was re-organised and a second centre started functioning on a temporary basis at Aundh (Bombay).

A National Council for Training in Vocational Trades has been set up to advise the Government of India on all questions of training policy, to co-ordinate vocational training and to lay down uniform standards. It also awards national certificates of proficiency to craftsmen.

WAGES AND EARNINGS

Annual Earnings

The following table gives the average annual earnings of factory workers during 1954-57.

TABLE 257

AVERAGE ANNUAL EARNINGS OF FACTORY WORKERS DRAWING LESS THAN Rs. 200 PER MONTH

(Eucludes, besides railway workshops, the food, beverages, tobacco and gins and presses groups)

price index	116 131	110 145	121 135

Working Class Consumer Price Index

Tables 259 and 260 show the different series of consumer price indices.

Regulation of Wages

The regulation of wages is governed by the Payment of Wages Act, 1936, and the Minimum Wages Act, 1948, as amended subsequently. The former extends to the whole of India except Jammu and Kashmir and applies to persons employed in any factory and upon any railway in respect of wages and salaries which average below Rs. 400 a month. Under authority vested by the Act, the provisions of the Act have been extended to mines, plantations, and the construction industry.

The Minimum Wages Act empowers the appropriate Government to fix minimum rates of wages payable to employees in industries specified in the Schedule. Such rates have been notified and enforced in most of the scheduled industries and, under an amendment of 1957, all categories of workers, including those employed in agriculture, are required to be

brought within the purview of the Act by the end of 1959.

[†]Gudalur, Kullakamby, Vayithiri and Valparai

The function of Wage Boards is to fix a wage structure on the principle of fair wages. As the decisions of the Wage Board for Working Journalists were set aside by the Supreme Court as "illegal and void," a Working Journalists Wage Committee was set up to make recommendations for enabling the Central Government to fix rates of wages in respect of working journalists. Central Wage Boards for the cotton textile, cement and sugar industries have also been set up.

Wage Census Scheme

The Scheme envisages collection of occupational wage rates and earnings data in respect of workers employed in major factories, mining and plantation industries. Approximately 3,000 sampled establishments in 44 industries would be covered in course of the enquiry now in hand.

Steering Group on Wages

The Steering Group, consisting of nominees of the Union and State Governments and representatives of workers and employers, will study the trends in relation to wages, production and prices, and plan the collection of material for drawing up a wage map of India, industry-wise and regionwise, for the guidance of wage-fixing authorities.

Coal Mines Bonus Schemes

The Coal Mines Bonus Schemes framed under the Coal Mines Provident Fund and Bonus Schemes Act, 1948, are in operation in the coal mines of West Bengal, Bihar, Madhya Pradesh, Orissa, Andhra Pradesh, Rajasthan, Assam and Bombay. Under these schemes, colliery workers, other than those in Assam, are entitled to receive a third of their basic earnings as bonus by virtue of a minimum qualifying attendance during the quarter. In Assam, bonus is paid on a weekly basis to those employed on a weekly wage and on a quarterly basis to those employed on a monthly basis.

INDUSTRIAL RELATIONS

Industrial Distutes

The table below shows the number of disputes, workers involved and man-days lost during 1951-57:

TABLE 261
INDUSTRIAL DISPUTES

Year			•	Number of disputes	Number of workers involved (in thousands)	Total number of man-days lost during the period (in thousands)

^{*}These figures exclude figures for Kerala, Mysore and Rajasthan which were previously included.

[†]These figures relate to all States and Union Territories whereas figures for early years relate to the former Part 'A' States, Delhi and Ajmer.

Industrial Employment Standing Orders

Under the Industrial Employment (Standing Orders) Act, 1946, the Central and State Governments have framed model rules for adoption by industrial establishments employing 100 workers or more. The measure has been extended to all establishments in Bombay and West Bengal employing 50 workers or more. Irrespective of the number of workers employed, the U.P. Government have extended the measure to all member establishments of the Employers' Association of Northern India and of the Uttar Pradesh Oil Millowners' Association, electric supply undertakings, water works and glass industry. In Assam, it applies to all industrial establishments (except mines, quarries, oilfields and railways) which employ 10 workers or more.

Discipline in Industry

A Code of Discipline has been evolved with the approval of the Indian Labour Conference and the Standing Labour Committee. A tripartite Committee will examine breaches of the code and non-implementation of awards and will publish cases of flagrant violation. A code of conduct to govern inter-union relations was adopted at a meeting of the representatives of the four central labour organisations held at Nainital in May 1958.

Works Committees

Under the Industrial Disputes Act, 1947, 701 Works Committees in central undertakings were functioning at the end of the third quarter of 1958.

Tripartite Machinery

The machinery at the centre mainly consists of the Indian Labour Conference, the Standing Labour Committee, the Industrial Committees and a few others. There is also the Labour Ministers' Conference which is closely associated with the machinery though not tripartite in character. The subjects discussed at the annual session of these bodies in 1958 included industrial relations, implementation of awards and agreements, discipline in industry, social security schemes, rationalisation and grievance procedure. Industrial Committees on Mines, other than Coal Mines, and Jute also met for the first time in 1958.

Conciliation Machinery

The administration of industrial 'relations in the Central sphere undertakings rests with the Chief Labour Commissioner. To assist the Chief Labour Commissioner, there is a field organisation consisting of Regional Labour Commissioners, Conciliation Officers and Labour Inspectors. Similarly, the State Governments have their own conciliation machineries, headed by the Labour Commissioners.

Adjudication Machinery

There is a three-tier machinery for adjudication of industrial disputes—Labour Courts, Tribunals and National Tribunals—all with original jurisdiction. Two ad hoc National Tribunals were set up. There are two Industrial Tribunals—one at Dhanbad and the other at Nagpur, the latter also acting as a labour court. In addition, there is a Central Industrial Tribunal at Delhi. The States have their own Tribunals and Labour courts.

Workers' Participation in Management

The recommendations of the study group, which made a first hand study of the working of the scheme in certain Western countries, were

considered by the Indian Labour Conference in July 1957. The Conference decided to experiment with management councils on a voluntary basis and appointed a tripartite committee to examine and consider further details of the scheme. The Committee has drawn up a list of establishments which agreed to co-operate and defined the scope and functions of the councils. At a seminar of a representative character organised in January-February 1958, a model agreement for the setting up of these councils was approved. In 16 undertakings the scheme for labour participation in management is in operation, while about twenty more have agreed to give the scheme a fair trial.

Workers' Education

The Central Board for Workers' Education consisting of representatives of Government, both Central and State, organisations of employers and educationists was registered as a society. The training of teacher—administrators, which forms the first phase of the education programme, was completed in November 1958. Forty-three candidates received training, of which 14 were nominated by three All-India Workers' Organisations. The training of worker-teachers and through them the training of the rank and file will begin next. About 4 lakh workers are expected to be trained by the end of the Second Plan period.

TRADE UNIONS

Tables 262 and 263 show the number and membership of registered trade unions in India and of those affiliated to each of the four national federations:

SOCIAL SECURITY

Employees' State Insurance Scheme

The provisions of the Employees' State Insurance Act, 1948, apply to all perennial factories using power and employing 20 or more persons and cover labourers and clerical staff with monthly earnings up to Rs. 400. Thirteen lakh fifty-six thousand and five hundred persons are covered by the scheme in areas where it has been implemented. At the end of 1957-58, employees' contribution stood at Rs. 3.52 crores and the employers' contribution at Rs. 2.83 crores. A sum of Rs. 2.13 crores was given to insured persons by way of benefits (Rs. 1.73 crores towards sickness, Rs. 5.17 lakhs towards maternity, Rs. 29.75 lakhs towards disablement and Rs. 5.44 lakhs towards dependants). Medical care was extended in 1958 to families of insured persons under the scheme in Assam, Bihar, Mysore, Punjab, and Rajasthan.

Employees' Provident Fund

The Employees' Provident Funds Act, 1952, applies to all units employing 50 or more workers and all workers with monthly earnings of Rs. 500 or less are required to make a minimum contribution of 6½ per cent of their income. As amended, the Act now applies to the establishments owned by Government or a local authority. At the end of September, 1958, it was operative in 7,189 establishments, having about 24.04 lakhs of subscribers out of an employment strength of 29.5 lakhs. The amount of provident fund contributions aggregated Rs. 121.5 crores.

Coal Mines Provident Fund Schemes

Workers are required under these schemes to contribute 6½ per cent of their basic wage and dearness allowance, inclusive of food concessions in cash or kind, the employer contributing a similar amount. The total assets of the Fund amounted to over Rs. 14 crores at the end of October 1958.

Workmen's Compensation

The Workmen's Compensation Act, 1923, provides for the payment of compensation for injuries received during employment, occupational diseases and deaths resulting from such injuries and diseases. Employees earning up to Rs. 400 a month are covered.

Maternity Benefits

Legislation concerning the payment of maternity benefits is in operation in almost all the States. Some of the State Acts apply to all regulated factories within their jurisdiction, while others apply to non-seasonal factories only. The qualifying period and the rates of benefit vary from State to State. Three Central Acts—the Mines Maternity Benefit Act, 1941; the Employees' State Insurance Act, 1948; and the Plantation Labour Act, 1951,—also regulate payment of maternity benefits. In order to prescribe uniform standards for maternity protection central legislation on the subject is proposed to be taken up.

LABOUR WELFARE

Provision for amenities such as canteens, creches, rest shelters, washing facilities, medical aid and for the appointment of welfare officers has been made in respect of industries and establishments covered by the Factories Act, 1948, the Mines Act, 1952, and the Plantations Labour Act, 1951. In addition, legislative measures for the constitution of funds for financing welfare schemes have been enacted and are in force.

Coal Mines Labour Welfare Fund

The Fund maintains 2 central hospitals, 6 regional hospitals-cummaternity and child welfare centres, 2 dispensaries and 2 T.B. clinics. Steps have been taken to increase their number. Anti-malaria measures and B.C.G. campaigns are also in operation. An Infectious Diseases Hospital at Chandkuiya has been sanctioned by the Jharia Mines Board of Health.

The Fund is also running adult education centres, women's welfare centres, children's parks and a family counselling service. A scheme for imparting elementary education to miners' children is also in operation.

Under the subsidy-cum-loan scheme 1,759 houses were constructed and 394 are under construction. Allocation of 10,000 houses amongst collieries was nearly completed and construction work on 2,494 houses has started. The earnings of the Fund during the year are estimated to be Rs. 1,64,97,351. The expected expenditure on general welfare measures is Rs. 96,56,350 and that on housing is Rs. 1,56,40,950

Mica Mines Labour Welfare Fund

The Fund provides medical, educational and recreational facilities for mica mine workers. One hospital has been established by the Fund at Karma (Bihar), two are under construction at Tisri (Bihar) and Kalichedu (Andhra Pradesh) and another is to be established at Gangapur (Rajasthan). Several dispensaries with maternity and child welfare centres are attending to the medical needs of mica miners. Nine mobile dispensaries are also in operation in certain areas. The Fund maintains several primary schools, awards scholarships and distributes books and stationery free of cost. During 1958-59, the sums provided to the mica producing States were Rs. 12.47 lakhs to Bihar, Rs. 3.12 lakhs to Andhra Pradesh and Rs. 2.43 lakhs to Rajasthan.

Welfare of Plantation Labour

Under the Plantation Labour Act, 1951, all plantations are required to provide housing accommodation to their resident workers and their families and to maintain hospitals or dispensaries. Some of them also maintain elementary schools for the education of the labourer's children. Recreational facilities and training in useful handicrafts such as tailoring, knitting, weaving and basket-making, are being provided in some of the tea estate centres with the help of donations from the Tea Board. The Coffee and Rubber Boards have also agreed to allocate funds for the welfare of workers employed in coffee and rubber plantations.

Labour Welfare Funds in Central Government Industrial Undertakings

These welfare funds were created on a voluntary basis in 1946 for financing welfare activities among workers. Pending the enactment of Labour Welfare Fund Act for industrial undertakings, welfare activities under the scheme will continue up to the year 1958-59.

Labour Welfare Centres

Most of the Governments of the States and Union Territories are running a number of welfare centres. These centres cater to the recreational, educational, vocational and cultural needs of the workers and their children. All private industrial establishments of some standing also maintain welfare centres for the benefit of their workers.

INDUSTRIAL HOUSING

The Subsidised Industrial Housing Scheme, which came into operation in September 1952, envisages the construction of houses for

industrial workers governed by the Factories Act, 1948, and mine workers covered by the Mines Act, 1952, except those employed in coal and mica mines. Under the scheme, loans and subsidies are given by the Central Government to State Governments, statutory Housing Boards, industrial employers and registered co-operative societies of industrial workers. The following table indicates the financial assistance given by the Centre till the end of October 1958.

TABLE 264
FINANCIAL AID FOR INDUSTRIAL HOUSING

(In crores of rupees)

Agency	Loan	Subsidy	Total	No. of houses sanctioned
State Governments Employers Workers' Co-operatives	 14.54 1.13 0.27	13.83 1.15 0.14	28.37 2.28 0.41	86,819 15,279 1,862
TOTAL	 15.94	15.12	31.06	1,03,960

The number of houses completed till the end of August 1958, is about 77,000, the rest being at various stages of construction.

Plantation Labour Housing Scheme

The Plantation Labour Act, 1951 makes it obligatory for every planter to provide housing accommodation for all his workers. As most of the planters, especially the smaller ones, were not in a position to fulfil this obligation, a scheme known as the Plantation Labour Housing Scheme was formulated in April 1956 and communicated to the State Governments. The Scheme envisages the grant of assistance in the form of interest-bearing loans (to the extent of 80 per cent of the cost of houses) to the planters through the State Governments. There is a provision of Rs. 2 crores for the construction of 11,000 tenements during the Second Plan. During 1956-57, the Kerala Government withdrew a sum of Rs. 1.50 lakhs for disbursement among the planters in the State for constructing houses for their employees. The Government of Madras also have since drawn Rs. 83,500 for disbursement on this account.

The **acbi** approach is forthright ... but accepable to both parties!

has an objective approach to all problems including those relating to labour-management mediation. Our findings have been frank, forthright, often critical. But we have successfully ironed out "bugs"... have made a tangible contribution to harmonious employer-employee relationships. The absolute impartiality with which we speak out, we have found to our pleasant surprise, has been welcome—both to management and labour!

In our work, we associate all those who may have either a direct or an indirect relation with our assignment and the implementation of our recommendations, so that when we submit our report, nearly all concerned are for it!

The North-East Frontier Agency is administered by the Governor of Assam, acting as the agent of the President. The Governor is assisted by an Adviser in Shillong and the ultimate responsibility for the area vests in the Government of India. The Agency consists of the following five administrative divisions, each under a Political Officer: Kameng Frontier Division previously known as Se La Sub-Agency (headquarters: Bomdilla); Subansiri Frontier Division (Ziro); Siang Frontier Division, previously known as Abor Hills District (Along); Lohit Frontier Division (Tezu); and Tirap Frontier Division previously known as Tirap Frontier Tract (Margherita).

NAGA HILLS-TUENSANG AREA

Area: 6,236 sq. miles Headquarters: Kohima

The Naga Hills-Tuensang Area was constituted as a Centrally Administered Area under the Ministry of External Affairs with effect from December 1957. It has a population of about 3,69,000 people of Naga groups, living in 718 villages. It has been divided into three districts with headquarters at Kohima, Mokokchung and Tuensang and covers the former Naga Hills District of Assam and the Tuensang Frontier Division formerly under the N.E.F. Agency. The new area is administered by the President through the Governor of Assam acting as his Agent, while the Commissioner is the immediate administrative head of the area.

PONDICHERRY

Area: 186 sq. miles Population: 3,17,163 Capital: Pondicherry

Principal languages: French and Tamil

Following an agreement with the Government of France, the Government of India took over on November 1, 1954, the administration of the territories formerly known as the "French Establishments in India". The territories comprise Pondicherry and Karaikal on the Coromandal Coast; Yanam, on the Andhra Coast; and Mahe, on the Coast of Kerala. A Treaty ceding these territories to India was signed at New Delhi on May 28, 1956, between the representatives of the Governments of India and France. This Treaty is yet to be ratified formally by the French Parliament. Meanwhile, the administration of the State is being carried on by the Government of India through a Chief Commissioner. Normally there is an advisory body of six elected Councillors. The previous Council as also the State Representative Assembly have been dissolved and fresh elections are expected to be held shortly.

CHAPTER XXX

INDIA AND INTERNATIONAL ORGANISATIONS

The activities of the Government of India in the international sphere have been guided since Independence by the ideals of conduct embodied in one of the directive principles of the Constitution. This directive requires the State to endeavour to promote international peace and security, to maintain just and honourable relations between nations, to foster respect for international law and treaty obligations and to encourage settlement of international disputes by arbitration.

UNITED NATIONS ORGANISATION

A founder-member of the United Nations Organisation, India is a firm adherent of the principles enshrined in the UN Charter. Her association with the United Nations has been marked by a number of significant events, the most notable being the spontaneous tribute paid in 1948 by the world organisation to Mahatma Gandhi and through him to the great traditions of the country which gave birth to him. Among others worth recalling have been India's membership of the Security Council for a twoyear term during 1950-52; India's plan for the solution of problems concerning the prisoners of war and the cease-fire in Korea; her Chairmanship of the Neutral Nations' Repatriation Commission for Korea in 1953-54; the election of Vijayalakshmi Pandit as the President of the eighth session of the UN General Assembly in 1953; India's Chairmanship of the UN-sponsored International Conference on Atoms for Peace in Geneva in 1955; and her contribution towards stabilisation of the situation in Lebanon in 1958.

The Indian delegation to the thirteenth session of the UN General Assembly in 1958 was composed as follows:

Representatives: V.K. Krishna Menon (Chairman).

R. Venkataraman, G.S. Pathak, Arthur S. Lall, M.

Chalapathi Rau.

Alternate

N.C. Kasliwal, Akbar Ali Khan, George Thomas Kottukapally, M. Gopala Menon, J.N. Sahni. Representatives ;

Advisers: Labanyaprova Dutt, Maimoona Sultan, J. Rameshwar

Rao, P. Chakravarti, M.A. Vellodi, R. Jaipal, A.K. Mitra, M. Rasgotra, R. Bhandari, N. Krishnan.

Secretary-General: T.J. Natarajan.

POLITICAL

A brief review of the part played by India in the deliberations of the UN and its specialised agencies during 1958 is given in the following pages.

Algeria

There has been no appreciable change in the position. Algerian leaders have constituted a provisional government in Cairo. India feels that, as her own experience proved, once independence is gained, co-operation with the former rulers, on a basis of equality and mutual respect, is possible; but it is possible only if that co-operation comes by free will from both sides.

Cyprus

The Indian delegation adhered to the position that it is a colonial question and that Cyprus belongs to the Cypriot people. It opposed the proposal to partition the island.

Lebanon

At the request of the Secretary-General of the United Nations and with the concurrence of the Lebanese Government, India participated in the work of the United Nations Observer Group in Lebanon. A contingent was sent to work with the group. Rajeshwar Dayal was deputed as India's Representative. The group has completed its assigned task.

Atomic Energy Agency

At the General Conference held in Vienna in September 1958, the need for close contact between the Atomic Energy Agency and the UN was stressed by Indian delegates. An Indian scientist is serving on a Committee of Experts convened by the Agency to frame a draft Manual of Practices for the safe handling of radioactive isotopes.

Trust and Non-Self-Governing Territories

India has been elected a member of the UN Committee on Information from Non-Self-Governing Territories for a three-year term till 1961. An Indian representative was elected as Chairman of the visiting mission to Western Samoa and another as a member on the visiting mission to West Africa in 1958.

At the eighth special session of the Trusteeship Council the question of the future of Togoland under French Administration was considered and resolutions moved by India and other nations were adopted. Along with certain other countries India moved a resolution inviting the Secretary-General, the Special Fund, the Technical Assistance Board and other specialised Agencies to give urgent and sympathetic consideration to any requests of assistance from the Togoland Government.

People of Indian Origin in South Africa

In 1958 the General Assembly endorsed by an overwhelming majority of votes its Special Political Committee's resolution appealing to the Government of South Africa to negotiate with India and Pakistan on the treatment of people of Indian and Pakistani origin in the Union of South Africa with a view to solving the problem in accordance with the purposes and principles of the UN Charter and the Universal Declaration of Human Rights. The parties are to report jointly or separately to the UN Assembly on the progress of the negotiations.

Kashmir

In accordance with a resolution of the Security Council, Frank Graham visited India early in 1958 and has submitted a report to the Security Council.

Co-existence

The Special Political Committee adopted by an overwhelming majority a resolution sponsored by India along with Argentina, Austria, Bolivia, Ceylon, Czechoslovakia, Ghana, Ireland and Yugoslavia calling upon all States to live together within the letter and the spirit of the Charter

and to take effective steps towards the implementation of the principles of peaceful and neighbourly relations.

Disarm ament

During the thirteenth session of the General Assembly, India sponsored resolutions (i) for immediate discontinuance of nuclear weapons tests until agreement is reached and (ii) welcoming the ensuing conference on the possibility of preventing surprise attacks. The enlargement of the Disarmament Commission to include all members of the United Nations, moved by India to break the deadlock of the previous year, was adopted by an overwhelming majority.

Election to UN Bodies

The Indian delegate was elected Rapporteur to the UN Sub-Commission on prevention of discrimination and protection of minorities.

UN Conference on the Law of the Sea

An Indian delegation led by A.K. Sen, the Union Law Minister, participated in the UN Conference on the Law of the Sea which met in Geneva in 1958. The Conference adopted four conventions and also an Optional Protocol of Signature concerning the Compulsory Settlement of Disputes.

International Law Commission

The Commission is charged with promoting the progressive development of International Law and its codification. Its 21 members, elected by the Assembly for a three-year term, do not serve as representatives of the Governments but in their individual capacity as experts. Radha Binode Pal of India was elected Chairman of the tenth session of the Commission held in Geneva in April 1958.

The second session of the Asian African Legal Consultative Committee, which met in Cairo, considered several subjects which were referred to it for its opinion by the Governments of the participating countries. These included diplomatic immunities, principles of extradition, immunity of States in respect of commercial transactions, dual citizenship, status of aliens, recognition of foreign decrees in matrimonial cases and free legal aid. The Committee had also before it for consideration the reports of the International Law Commission of its ninth and tenth sessions.

ECONOMIC AND SOCIAL

India has served on the Economic and Social Council of the United Nations since its inception, except for two spells in 1948 and 1952. She continued to be a member of several functional Commissions of the Council. She was elected to the Technical Assistance Committee on May 1, 1957, and is represented on the following other functional Commissions of the Council: Commission on International Trade; Commission on Human Rights; Commission on Narcotic Drugs; Population Commission; Social Commission; Statistical Commission and Transport and Communications Commission. India attended as an observer the Council meeting held in Geneva in July 1958 which gave general approval for the establishment of a Special UN Fund for the economic development of under-developed countries. A draft report prepared by India on discrimination in religious rights was approved by the UN Sub-Commission on prevention of discrimination and the protection of minorities.

Economic Commission for Asia and the Far East (ECAFE)

The Inland Transport Committee of ECAFE in its report to the UN recommended that India should have a separate railway inspectorate organisation for controlling safety on the railways.

During the fourteenth session of the Commission held in Kuala Lumpur in March 1958, India was elected to a drafting committee to examine a Japanese suggestion for trade talks between regional members of the Commission. The Union Minister of State for Industry led the Indian

delegation.

The FAO-ECAFE Centre on policies to support and stabilise agricultural prices and incomes in Asia and the Far East met in New Delhi in March 1958. Over 100 oil experts from 29 countries met in New Delhi in December 1958, in a symposium on 'Development of Petroleum Resources of Asia and Far East' organised by ECAFE.

Food and Agriculture Organisation (FAO)

The need for developing Assam's internal waterway system was emphasised by an FAO study team in a report submitted to the Indian Government in March 1958. The FAO report on wood production in India was published in April 1958. A Fisheries Training Centre specialist of the FAO arrived in India to open fishermen's training centres in the States of Andhra Pradesh and Mysore. Under the International Cooperative Action Programme in India, FAO agreed to provide technical experts and equipment for the Calcutta Milk Scheme and the services of two experts were made available. A cash grant of \$14,000 has been received from FAO for the scheme of nutrition survey for feeding school children in Madras.

India was represented at the fifth session of the FAO Desert Locust Control Committee held at Rome in June 1958. The Indian delegation to the fourth FAO Regional Conference for Asia and the Far East held in Tokyo in October 1958, was led by the Union Minister for Agriculture.

International Labour Organisation (ILO)

India has already ratified 25 ILO Conventions. Apart from formal ratifications, the provisions of a large number of other Conventions have also been applied in law and practice. The Conventions ratified so far relate to such subjects as regulation of hours of work and weekly rest in industry, prohibition of night work for women and young persons, abolition of forced labour and of underground work for women, regulation of minimum age for employment in industry and as trimmers and stokers on ships, payment of workmen's compensation, regulation of minimum wages, equal pay for equal work, protection against accidents in docks, proper marking of weight on packages transported by sea, medical examination of young persons employed on ships, labour inspection and inspection of emigrants, protection of tribal populations, maintenance of a national employment service, etc.

Besides attending the forty-first (Maritime) and the forty-second sessions of the International Labour Conference held at Geneva in April-June 1958, and the meetings of the Governing Body, Indian representatives participated in several ILO Committee meetings viz., the fifth session of the Chemical Industries Committee, the sixth session of the Textile Committee and the Tripartite Technical Meeting on Timber Industry held at Geneva during 1958.

The services of six experts in the fields of productivity, employment information and occupational analysis, vocational training for the blind, teaching technique, under-employment and industrial relations, were availed of by India in 1938 under the ILO's Expanded Programme of

Technical Assistance. Twenty-two Indian trainees were sent to different foreign countries for receiving training in trade unionism, labour administration, labour management and mines inspection. Four ILO fellowship holders, one each from Indonesia, Thailand, Ceylon and Peru, received training in India during 1958 in the fields of labour legislation and labour management; handicrafts, industrial arts and village industries; industrial placement of the disabled and co-operative housing, respectively.

United Nations Educational, Scientific and Cultural Organisation (UNESCO)

A founder-member of UNESCO, India has a permanent National Commission for Co-operation with UNESCO. The Commission has been implementing UNESCO programmes in India by organising seminars

and conferences on various subjects.

A regional seminar on Educational Reform in South and South-East Asia was held in New Delhi in August 1958. The leader of the Indian delegation was elected Chairman of the seminar. The seminar recommended that UNESCO adopt a major project on free, universal and compulsory education in the region on the lines of the project in Latin America. Delegates from ten South and East Asian countries participated in a regional seminar on Visual Aids in Fundamental Education and Community Development held in New Delhi in September 1958. The seminar suggested a three-phased expansion plan for organisation of visual media production centres. The newly constructed permanent headquarters of the UNESCO at Paris was inaugurated by the Vice-President of India, S. Radhakrishnan, who was the temporary President of the General Council as well the leader of the Indian delegation to the tenth session of the General Conference of the UNESCO held in Paris in November 1958. An Indian resolution proposing better geographical distribution of posts in UNESCO Secretariat, co-sponsored with five other delegations, was adopted with minor amendments at a meeting of the Administrative Commission of the UNESCO in Paris in November 1958.

A seminar on Traditional Values in Indian Life was organised jointly by the Indian National Commission for UNESCO and Delhi University in Delhi in December 1958.

World Health Organisation (WHO)

India has been a member of the World Health Organisation (WHO) since its inception in 1948. The Indian delegation was led by A.L. Mudaliar to the eleventh session of the WHO held in Minneapolis, USA,

in June 1958.

The South-East Asia Regional Committee of WHO held its eleventh session in New Delhi in September 1958 and approved a proposal to set up a South-East Asia centre for the classification and study of diseases. It decided to accord top priority to a project designed to eradicate cholera from the industrial belt of Greater Calcutta. The leader of the Indian delegation was elected Chairman of the session.

A seminar on health statistics attended by eighteen statisticians from eight countries was inaugurated in New Delhi in October 1958. A filariasis study tour at the Malaria Institute in Delhi was inaugurated in the same month. Nursing leaders of 12 South-East Asian countries met in New Delhi in November 1958 at a conference organised by the WHO.

United Nations International Children's Emergency Fund (UNICEF)

The UNICEF contributed \$1,435,000 for the mass BCG vaccination campaign and \$778,000 to the three milk plants at Anand, Ahmedahad and Rajkot till April 1958. The total aid to India by the UNICEF

Executive Board from 1948 to July 1958 amounted to nearly \$ 21,500,000. India's contribution to UNICEF in 1958 was Rs. 18 lakhs. India has two UNICEF area offices situated at New Delhi and Calcutta. The New Delhi office covers Afghanistan, Ceylon and India.

General Agreement on Tariffs and Trade (GATT)

The Indian delegate presided over the inter-sessional committee of GATT held in Geneva in May 1958. The Committee reviewed the provisions of the Rome treaty which established the Common Market or the European Economic Community. India's Minister for Commerce, who attended the Ministerial meeting convened by GATT in Geneva in October 1958, announced that India would give Japanese exports the full privileges of the GATT with immediate effect. The leader of the Indian delegation to the thirteenth session of GATT held in Geneva in November 1958 presided over the session.

United Nations Technical Assistance Programme

Up to December 1958, the programme provided India with 359 specialised experts and awarded fellowships and scholarships to 679 Indian nationals for study abroad. India contributed Rs. 25 lakhs to the Special Account and Rs. 10.7 lakhs towards the living expenses of experts. More than 80 Indian experts are working in 23 different countries.

Under the United Nations Expanded Technical Assistance Programme, the services of 339 experts and training facilities for 686 Indian nationals were provided upto June 30, 1958. The Indian Institute of Technology at Bombay was inaugurated on July 25, 1958, with the technical assistance of the UNESCO.

International Bank for Reconstruction and Development (IBRD)

Loans granted by the Bank up to September 30, 1958, amounted to Rs. 150.39 crores for the public sector and Rs. 91.08 crores for the private sector, totalling Rs. 241.47 crores. An amount of Rs. 28.97 crores was drawn during the First Plan period; of the balance of Rs. 121.42 crores left for the Second Plan, an amount of Rs. 43.25 crores was drawn up to September 30, 1958. The schemes for which the Bank has advanced loans include: (i) purchase of locomotives for the Indian Railways, (ii) purchase of agricultural machinery such as tractors and bulldozers required for reclamation of weed-infested and jungle lands, (iii) the Bokaro-Konar Project of DVC which has now been completed, (iv) the second phase of DVC Project, (v) purchase of planes by Air-India International, (vi) purchase of equipment and materials for railways, (vii) expansion and modernisation of the Indian Iron and Steel Co., Ltd., (viii) installation of thermal plants at Trombay, (ix) assistance to Industrial Credit and Investment Corporation of India to enable it to advance loans to private companies, (x) the expansion programme of the Tata Iron and Steel Company, (xi) development of Calcutta Port, and (xii) development of Madras Port.

The thirteenth annual meeting of the Board of Governors of the IBRD was inaugurated in New Delhi in October 1958. The Union Finance Minister led the Indian delegation.

International Finance Corporation (IFC)

The International Finance Corporation (Status, Immunities and Privileges) Act, 1958, gives the IFC certain immunities and privileges in India. The annual meeting of the Board of Governors of the Corporation was held in New Delhi in October 1958. India was represented on a pastel to report on the role of private enterprise in economic development.

International Monetary Fund (IMF)

The thirteenth annual meeting of the Fund was inaugurated in New Delhi in October 1958. The Indian delegation to the meeting was led by the Union Finance Minister. The Assistant Director of the Fund's Asian Department led a mission to India in December 1958 to assess the general economic situation, with special reference to fiscal and monetary policies.

From the inception of the Fund up to December 1958, India has purchased 300 million dollars from the Fund out of which 99.9 million dollars have been repurchased. Under the articles of agreement of the IMF, India is entitled to purchase back for rupees foreign currency equivalent to 400 million dollars deposited by it with the Fund.

UN Special Fund

The discussions in the UN on the SUNFED idea resulted in the adoption of a resolution by the UN General Assembly on October 15, 1958 formally establishing a Special Fund from January 1, 1959. The Fund will be a separate fund and will provide systematic and sustained assistance in fields essential to the integrated technical, economic and social development of the less developed countries. The immediate inter-governmental control of the policies and operations of the Fund will be exercised by a Governing Council consisting of representatives of eighteen States. India has been elected to the Governing Council.

Other Specialised Agencies of the UN

Among other specialised agencies of the UN with which India is actively associated are the International Civil Aviation Organisation (ICAO); the International Tele-Communication Union (ITU); the Universal Postal Union (IPU); and the World Meteorological Organisation (WMO).

The Union Minister for Agriculture led the Indian delegation to the sixth session of the International Rice Commission held in Tokyo in October 1958. India was elected to the executive committee of the International Wheat Council for the year 1958-59. India announced its accession to the new international agreement arrived at by the UN Sugar Conference held in Geneva in 1958.

OTHER INTERNATIONAL ORGANISATIONS

Commonwealth

A Commonwealth Trade and Economic Conference was held at Montreal, Canada, in September 1958. The Indian delegation was led by the Union Finance Minister. Important matters relating to the economy and trade of Commonwealth countries were discussed at this conference.

Colombo Plan

India continued to give technical and economic assistance to Nepal during 1957-58 amounting to Rs. 75 lakhs. India has agreed to assist in the construction of the Rs. 37.5 crore Trisuli hydro-electric project. Indian assistance will include the construction of a bridge over the Trisuli river.

Since the start of the Colombo Plan, India has provided training facilities under the technical co-operation scheme for 886 persons in various subjects. Of these, 220 trainees were received during the year. These trainees came from Australia 1, Burma 31, Ceylon 117, Indonesia 16, Japan 5, Malaya 8, Nepal 587, New Zealand 1, North Borneo 2, Pakistan 39, Philippines 48, Singapore 9, Thailand 16, and Viet Nam 6. Of these, 129 candidates received training at the International Statistical Education

Centre at Calcutta. Services of experts were provided in the fields of potato growing, tractor engineering, timber research, small savings, sugar

technology and use and maintenance of HT 2 aircraft.

India obtained the services of 16 Japanese experts in the fields of machinery industry, agriculture and fisheries. The total contribution to India under the economic development programme amounted to £10 million from Australia, \$101 million from Canada and £2 million from New Zealand. India was represented by the Union Deputy Finance Minister at the tenth meeting of the Colombo Plan Consultative Committee held at Seattle, USA, in November 1958.

Commonwealth Parliamentary Association

The meeting of the Executive Council of the Association was held in Bermuda, in January 1959, under the Chairmanship of Ananthasayanam Ayyangar, Speaker of the Lok Sahba. The Executive Council discussed ways and means of implementing the decisions reached at the Delhi conference of the Association on defence, external affairs and economic relations of the Commonwealth nations.

International Conference of Agricultural Economists

The tenth session of the International Conference of "Agricultural Economists was inaugurated in Mysore on August 24, 1958. About 300 delegates from 59 countries participated in the eleven-day session which discussed 'agriculture and its terms of trade'.

International Commission of Jurists

The International Commission of Jurists, established in 1952 and incorporated on June 16, 1955, under the laws of the Netherlands enjoying consultative status with the Economic and Social Council of the United Nations, held a conference on the 'Rule of Law' in New Delhi on January 5, 1959.

International Air Transport Association

A voluntary and non-political association of carriers, IATA is the means whereby the airlines link their individual routes into a single, integrated public service network. The fourteenth annual general meeting of the International Air Transport Association was inaugurated in New Delhi on October 27, 1958, which was attended by nearly 250 delegates and observers representing 86 airlines from 50 countries. The Chairman of Air-India International was elected President of IATA.

REPUBLIC DAY AWARDS

BHARAT RATNA

The award is made for exceptional work for the advancement of art, literature and science and in recognition of public service of the highest order.

The decoration is in the form of a peepal leaf, $2\frac{\pi}{16}$ inches long, $1\frac{\pi}{4}$ inches wide and $\frac{\pi}{4}$ th of an inch thick. It is of toned bronze. On its obverse is embossed a replica of the Sun, $\frac{\pi}{4}$ of an inch in diameter, below which the words "Bharat Ratna" are embossed in Hindi. On the reverse are the State Emblem and the motto, also in Hindi. The Emblem, the Sun and the rim are of platinum. The inscriptions are in burnished bronze.

No award was made in 1959.

^{*}Should a P.S.O. hold the rank of Lieutenant-General, his seniority in the Table of Precedence will continue to remain the same as laid down for officers of the rank of Lieutenant-General or equivalent rank in Article 32 of the Table.

PADMA VIBHUSHAN

The award is made for exceptional and distinguished service in any field, including ser-

vice rendered by Government servants.

The decoration is circular in design, with a geometrical pattern superimposed on the circle. The diameter of the circular portion is 13 inches and the thickness 18th of an inch. On the obverse, there is a lotus flower embossed on the circular space. The word "Padma" is embossed in Hindi above and the word "Vibhushan" below the lotus flower. On the reverse are the State Emblem and the motto in Hindi. It is of toned bronze. The inscription "Padma Vibhushan" on the obverse, the geometrical pattern on either side and the border around the periphery are in burnished bronze. All embossing on either side of the decoration is in white gold.

GALLANTRY AWARDS

PARAM VIR CHAKRA

The highest decoration for valour is the Param Vir Chakra, which is awarded for most conspictious bravery or some daring or pre-eminent act of valour or self-sacrifice in the presence of the enemy, whether on land, at sea or in the air.

This decoration is made of bronze and is circular in shape. It has, on the obverse, four replicas of "Indra's Vajra" embossed round the State emblem in the centre. On the reverse, the words "Param Vir Chakra" are embossed, both in Hindi and in English, with two lotus flowers in the middle.

The decoration is worn on the left breast with a plain purple-coloured riband, an inch and a quarter in width.

No award was made in 1959.

MAHA VIR CHAKRA

The Maha Vir Chakra is the second highest decoration and is awarded for acts of conspicuous gallantry in the presence of the enemy, whether on land, at sea or in the air.

It is made of standard silver and is circular in shape. Embossed on the obverse is a five-pointed star with a domed centre-piece bearing the gilded State emblem in the centre. The words "Maha Vir Chakra" are embossed, both in Hindi and in English, on the reverse with two lotus flowers in the middle,

The decoration is worn on the left breast with a half-white and half-orange riband, an inch and a quarter in width, the orange being nearer the left shoulder.

No award was made in 1959.

VIR CHAKRA

The Vir Chakra is third in the order of awards given for acts of gallantry in the presence of the enemy, whether on land, at sea or in the air.

The decoration is made of standard silver and is circular in shape. Embossed on the obverse is a five-pointed star which has an Ashoka Chakra in the centre. Within this Chakra is a domed centre-piece bearing the gilded State emblem. On the reverse, the words "Vir Chakra" are embossed, both in Hindi and in English, with two lotus flowers in the middle.

The Chakra is worn on the left breast with a half-blue and half-orange riband, an inch and a quarter in width, the orange being nearer the left shoulder.

No award was made in 1959.

ASHOKA CHAKRA--CLASS I

This medal is awarded for the most conspicuous bravery or some daring or pre-eminent act of valour or self-sacrifice on land, at sea or in the air.

The Chakra is made of gilt gold and is circular in shape. Embossed on the obverse is a replica of Ashoka's Chakra surrounded by a lotus wreath. Along the edge is a pattern of lotus leaves, flowers and buds. On the reverse, the words "Ashoka Chakra" are embossed, both in Hindi and in English, with lotus flowers in the intervening space.

The Chakra is worn on the left breast with a green-coloured silk riband, an inch and a

quarter in width, and divided into two equal segments by an orange vertical line.

Recipient of the Award in 1958:-

Captain Eric James Tucker (Posthumous).

ASHOKA CHAKRA-CLASS II

This decoration is awarded for conspicuous gallantry. It is made of standard silver and is circular in shape. The obverse and the reverse are exactly the same as in the Ashoka Chakra, Class I.

The Chakra is worn on the left breast with a green-coloured silk riband, an inch and a quarter in width, and divided into three equal segments by two orange vertical lines.

Recipients of the Award in 1958:

- 1. Lieutenant Colonel Jaswant Singh.
- 2. Subedar Sohan Singh.
- Naik Karnail Singh.
- 4. Lance Naik Pandit Mane.
- 5. Lance Naik Ranbahadur Gurung.
- Sepoy Ram Deva (Posthumous).
- 7.
- 8.
- 9.
- 10.
- Sepoy Suraj Singh Rifleman Jailal Adhikari Rifleman Taraprasad Gurung Rifleman Dhansingh Pun. Wing Commander Eddul Jahangir Dhatigara 11.
- Squadron Leader Nedyam Bhaskar Menon. 12.

Recipients of the Award in 1959:

- Major Dalchand Singh Pratap
- Rifleman Jaman Singh Gusain
 Rifleman Bhimbahadur Khattri
- 4. Craftsman Jaikaran
- Captain Harbans Singh
- 6. Jemadar Indra Bahadur Gurung

ASHOKA CHAKRA-CLASS III

This decoration is awarded for an act of gallantry. It is exactly like the other two Ashoka Chakras, except that it is made of bronze.

The Chakra is worn on the left breast with a green-coloured silk riband, an inch and a quarter in width, divided into four equal segments by three orange vertical lines.

Recipients of the Award in 1958:

- 2nd Lieutenant Jagdish Kumar Grover. 2nd Lieutenant Vijay Ramchandra Dani.
- 3. 2nd Lieutenant Ram Labhaya.
- 4. Jemadar Dalip Singh.
- Jemadar Bajirao Sakpal. 5.
- Havildar Ganpatrao Sardesai. 6. 7.
- Naik Neki.
- 8. Lance Naik Hardial Singh.
- 9. Lance Naik Surrendar Singh Negi.
- 10. Lance Naik Putlaji Shinde.
- Sepoy Dhani Ram. 11.
- 12. Sepoy Gurbux Singh,
- Sepoy Megh Singh. 13.
- 14. Squadron Leader Tom Lionel Anderson.
- 15. Flight Lieutenant Prakashnarain Jainarain Mehra.

Recipients of the Award in 1959:

Major Nand Lall Jamwal Lieutenant Prem Narain Kacker Havildar Trilok Singh Kathait Naik Gulab Singh Negi Naik Prem Singh Negi

Riffeman Rudra Bahadur Thapa Jemadar Balbir Singh Havildar Dewan Singh Naik Puran Chand Sepoy Beg Raj Subedar Dambar Bahadur Rana Jemadar Manbahadur Pun Naik Bilbahadur Thapa Lance Naik Narbahadur Chetri Riffeman Lok Bahadur Tamang Riffeman Salig Ram Rana

APPENDICES

RECOMMENDATIONS OF THE OFFICIAL LANGUAGE COMMISSION •

In pursuance of the provisions of Article 344 of the Constitution, the President appointed a 21-member Commission called the "Official Language Commission", with the late Shri B.G. Kher as Chairman, in June 1955. The report of the Commission was submitted to the President on August 6, 1956 and later placed before both Houses of Parliament on August 12, 1957. It is at present under examination by a Parliamentary

Committee of both Houses,†

The main views and recommendations of the Commission can be summarised as follows: (1) In the light of the fully democratic basis of Indian polity, it is not possible to envisage English as the language of India's mass medium. "The obvious linguistic envisage English as the language of India's mass medium. "The obvious linguistic medium for pan-Indian purposes is the Hindi language". (2) It is neither necessary nor possible to pronounce now whether a general change-over from English to Hindi would be practicable by 1965. This will depend on the efforts made in that direction in the meantime. (3) In view of the elastic provisions of the Constitution, it would be possible to continue the use of English even beyond the period of 15 years and to accommodate the situation as it develops without amending the Constitution. (4) Hindi will replace English only to a limited extent as it would not wholly 'step into the shoes' of English, the regional languages having been yielded their appropriate places. (5) For the present, no restriction should be placed on the use of English for any of the purposes of the Union. English should continue as an alternative medium as long as it is necessary and its discontinuance should be effected after sufficiently long notice. (6) The Devanagari script should be adopted, optionally, for the writing of other Indian languages besides the Union language. (7) The Central Government would be justified in prescribing a reasonable measure of knowledge of Hindi as a qualification for entry into the services by new entrants, provided a sufficiently long notice is given and the measure of linguistic ability is moderate. (8) When the time comes for the changeover, the Supreme Court will have to function only in the Hindi language. The lower levels of judiciary will function through the regional languages. This multiple linguistic pattern should be broken and integrated at the High Court level. (9) In the non-Hindi speaking areas, instruction in Hindi should be compulsory at the secondary stage, English to be taught hereafter in secondary schools principally as a "literary language" except where it is taken voluntarily. (10) The Commission do not accept the suggestion that there should be compensatory compulsion to Hindi-speaking students to learn another regional language other than Hindi. (11) The Commission suggest the establishment of a National Academy of Languages for the development of the Union and regional languages.

SUPREME COURT DECISIONS††

Levy of Sales-tax on Building Contracts

The question for determination in this appeal** was whether the provisions of the Madras General Sales Tax (Amendment) Act, 1947, were ultra vires insofar as they sought to impose a tax on the value of materials used in the execution of a works contract treating

the same as sale of goods by the contractor.

The Court held that the expression 'sale of goods' in Entry 48 of List II in the Government of India Act, 1935, is a nomen juris, its ingredients being an agreement to sell m vables for a price and property passing therein pursuant to that agreement. In a building contract, which is one and indivisible, there is no sale of goods as such and it is not within the competence of the Provincial Legislature under Entry 48 to impose a tax on the supply of the materials used in such a contract treating it as a sale. But where the contract was divisible into two parts, one for work done and the other for the value of materials supplied in the execution of the work, the imposition of the sales-tax on the value of the materials so supplied or used will be legal.

Levy of Income-tax under a Discriminatory Procedure

In this case††† the liability of the appellant to pay income-tax was determined under the Taxation on Income (Investigation Commission) Act, 1947 (a special Act designed to bring into light concealed incomes) and not the regular Income-Tax Act. After having taken advantage of certain concessions under the former Act and having entered into a settlement with the Government, the appellant subsequently repudiated his liability on the

^{*}Appendix to Chapter III.

[†]The Committee's report has since been presented to Parliament on April 22,1959.

^{††}Appendix to Chapter VI.

^{†††}Basheshar Nath v. the Commissioner of Income-tax, Delhi and Rajasthan.

plea that his fundamental right under Article 14 (equality before the law and equal protection of the laws) of the Constitution was violated, insofar as he was subjected to a procedure which was more drastic than the one prescribed by ordinary law. The Supreme Court upheld the appellants' contention and quashed the order of the Government for the recovery

of amounts still due under the settlement.

The Court also gave an important ruling on the question of waiver of fundamental rights. The Government's contention in the appeal was that even if there had been breach of a fundamental right, the appellant by voluntarily entering into a settlement must be taken to have waived his fundamental right and could not be permitted to set it up at a later the Supreme Court held that the nature of the fundamental right flowing from Article 14 is such that it is not for a citizen or any other person entitled to its protection to waive any breach of the obligations on the part of the State.

Double Jeopardy Cases

These cases* involved two foreigners who were trying to cross the Indian border to Pakistan with huge undisclosed sums of Indian, Pakistani and American currency hidden in a secret chamber of their car and were apprehended by the Customs Authorities. They were found guilty under the Sea Customs Act; their currency and other things were confiscated and they were punished with personal penalty of Rs. 25 lakhs each by the Customs Collector. Subsequently they were also prosecuted under the Foreign Exchange Regula-

tions Act and the Indian Penal Code and sentenced to terms of imprisonment.

These two persons ultimately moved the Supreme Court by appeal and writ application contending that since they were already prosecuted and punished by the Customs Authorities, their subsequent conviction was illegal. They pleaded that under Article 20 (no person shall be prosecuted and punished for the same offence more than once) their fundamental right has been infringed and their conviction should be set aside. The Supreme Court dismissed the appeal as also the writ application holding that the proceedings before the Sea Customs Authorities were in the nature of revenue proceedings and did not amount to a prosecution as understood under the Indian Penal Code or within the meaning of Article 20(2) of the Constitution and that the Order of the Customs Authorities could not be treated as a Judgment or Order of a Court or Judicial Tribunal for the purpose of sustaining a plea of double jeopardy.

Journalists' Wage Board Cases

A Wage Board constituted under the Working Journalists (Conditions of Service) and Miscellaneous Provisions Act, 1955, fixed the rates of wages in respect of working journalists employed in the various newspaper establishments in India. In this batch of cases** filed by the proprietors of certain newspapers in the Supreme Court, the vires of the said Act and the decisions of the Wage Board were challenged on the ground that they violated their fundamental rights guaranteed under Articles 19(1) (a) and 19 (1) (g) and 14 of the Constitution. The Supreme Court, while refusing to accept the said contention, held as follows:

(1) Article 19(1) (a) guarantees to all citizens freedom of speech and expression, which no doubt includes freedom of propagation of ideas. But as the enactment of the measure was intended to ameliorate the conditions of workmen in the newspaper industry, neither the intention nor the effect of the impugned Act was to take away the right of freedom of

speech of the petitioners.

(2) Article 19(1) (g) which guarantees the right to carry on any trade or business is also not infringed, since the restrictions imposed by the different provisions of the impugned Act, except Section 5(1)(a)(iii) thereof, cannot be said to be unreasonable within the meaning of Article 19(6) of the Constitution. But Section 5(1)(a)(iii) of the Act, which provided for the award of gratuity to an employee who resigns from service of a newspaper establishment after a service of only three years, was considered to be an unreasonable restriction and that provision was struck down as violative of Article 19(1)(g) of the Constitution.

(3) Regarding the challenge under Article 14 of the Constitution which guarantees equality before the laws, it was held that, as reasonable classification for purposes of legislation was permissible and as the classification was based on an intelligible differential which distinguished the working journalists from other employees of newspaper establishments and as the differential had a rational relation to the object sought to be attained, i.e., the amelioration of the conditions of service of working journalists, the impugned Act cannot be said to subject the Press Industry employers to discriminatory treatment vis-a-vis other industrial employers governed by the ordinary law under the Industrial Disputes Act.

The decision of the Wage Board was, however, set aside by the Supreme Court as being illegal and void on the ground that it was ultra viras the impugned Act itself. Section 9 of the impugned Act laid down the circumstances which the Wage Board was to have regard

 ⁽¹⁾ Leo Roy Frey v. the State of Punjab, and (2) Thomas Dana v. the State of Punjab.

^{**}Express Newspapers Private Ltd. and Others v. The Union of India and Others.

to in fixing the rates of wages. As the capacity of the newspaper establishments to pay was not properly considered, the Court held that the mandatory requirement of the said Section was not complied with and that the award of the Wage Board was, in the circumstances, illegal and void.

Privileges of Legislatures and Freedom of the Press

In this case* the Supreme Court considered the question whether under Articles 194(1 and (3)—conferring freedom of speech and certain powers, privileges and immunities on State Legislatures (analogous to those of the House of Commons in U.K.)—a State Legislature can claim a privilege in such a manner as to infringe an individual citizen's right to

freedom of speech guaranteed under Article 19,

The first question for decision by the Court in this case was whether the British Parliament had, at the relevant time (January 26, 1950), the power and privilege of prohibiting the publication of even a true and faithful report of the debates or proceedings that take place in the House. The Court came to the conclusion that the British Parliament has not abandoned the said power, though it might not have had the necessity or occasion to exercise it for some considerable period and that the Bihar Legislative Assembly should

be deemed to have such a power.

The Court had then to consider the further question as to whether the right of the Legislature under Article 194(3) to prohibit the publication of any reports of its debates or proceedings would prevail over the fundamental right of the petitioner under Article 19 (I) (a) to publish reports of Assembly proceedings. The Court was of the opinion that as Article 19 (I)(a) and Article 194 (3) formed part of the Constitution which was one organic whole, they have to be reconciled by applying the principle of harmonious construction. So construed, the provisions of Article 19(I)(a) which are general must yield and must give way to Article 194(I) and the latter part of its clause (3) which are special. The Court also held that as the petitioner was being asked to appear before the Committee of Privileges in accordance with procedure established by law, he cannot complain of the breach, actual or threatened, of his fundamental right to personal liberty under Article 21 of the Constitution.

Presidential Reference**

The Kerala Legislative Assembly passed the Kerala Education Bill in 1957 with a view to provide for the better organisation and development of educational institutions in the State in exercise of the legislative powers conferred upon it by Articles 245 and 246 of the Constitution read with Entry 11 of List II in the Seventh Schedule to the Constitution of India. After the said Bill was passed, it was reserved by the Governor of Kerala for the consideration of the President of India under Article 200. The said Bill contained many provisions imposing considerable State control over the management of the educational institutions in the State of Kerala, aided or recognised. The provisions in so far as they affected the aided institutions were much more stringent than those which applied only to the recognised institutions. The width of the power of control thus sought to be assumed by the State appeared to the President to be calculated to raise doubts as to the constitutional validity of some of the clauses of the said Bill on the ground of apprehended infringement of the fundamental rights guaranteed to the minority communities by the Constitution and accordingly in exercise of the powers vested in him by Article 143(1) the President formulalated four questions and referred them to the Supreme Court for consideration and report.

Article 14 of the Constitution, which guarantees the fundamental right of equality before the law, was the subject matter of questions 1 and 3 so referred. The doubt was whether the power conferred under certain provisions of the impugned Bill was not capable of being exercised in an arbitrary and discriminatory manner so as to strike at the Catholic Church, to eliminate their religion and to expropriate the properties of their schools. The Court was of the opinion that as the impugned provisions of the Bill contained the necessary safeguards against unfettered executive action and as the Legislature exercised sufficient control over executive action under the said provisions, the said provisions of the Bill cannot

be said to be violative of Article 14 of the Constitution.

The subject matter of question 2 of the Reference was Article 30 (I) which guaranteed to all minorities whether based on religion or language, the right to administer educational institutions of their choice. It was doubted whether certain provisions of the Bill, which prescribed for the excercise of control by the State, interfered with the said fundamental right. The Supreme Court was of the opinion that some of the provisions of the Bill were

violative of Article 30(1).

Question No. 4 pertained to the constitutionality of clause 33 of the Bill which excluded the jurisdiction of courts to interfere by temporary injunction or order restraining any proceeding taken under the Bill when it becomes an Act. The doubt was whether the said clause was opposed to Article 226 which conferred extensive jurisdiction on the High Courts to issue writs. The Supreme Court answered the question in the negative and observed that clause 33 was subject to the over-riding provisions of Article 226 of the Constitution.

^{*}M.S.M. Sharma v. Sri Krishna Sinha and Others. **Special Reference No. 1 of 1958 regarding the Kerala Education Bill.

The ambit and scope of the jurisdiction to be exercised by the Supreme Court under Article 143 of the Constitution also came in for consideration in this matter. The Court was of the opinion that it is not incumbent on it to express an opinion in every case placed before it and that it will be quite open to it to decline to answer the questions referred in certain circumstances. It was also contended by counsel that the reference should not be entertained by the Court, as it pertained to the provisions of a Bill and not of an Act in its actual application to specific cases, and as the reference was incomplete in that all possible doubts and objections to provisions of the Bill on the ground that they infringe certain other provisions of the Constitution have not been referred to the Court for opinion. The Court was, however, of the view that these cannot be good or cogent reasons for declining to entertain the reference.

RECOMMENDATIONS OF THE LAW COMMISSION*

A brief summary of the important recommendations of the Law Commission on the reform of judicial administration is given below:

The working of the existing judicial system is not unsatisfactory and its abandonment is not desirable, though defects noticed therein can and should be removed. Greater use can be made of simpler procedures, such as Nyaya Panchavats.

 Only the most suitable persons from the Bar or the High Courts should be appointed judges of the Supreme Court. The Chief Justice of India should have a tenure of at least five to seven years in order to familiarise himself with

and discharge properly the mainfold duties of his high office,

3. Article 217 of the Constitution should be amended to provide that a judge of a High Court should be appointed only on the recommendation of the Chief Justice of the High Court concerned and with the concurrence of the Chief Justice of India. Consultation with the State Executive is necessary, but it should be limited only to an expression of opinion on the suitability of the person proposed by the Chief Justice; it should not be open to the Executive to propose a nominee of its own and forward it to the Centre.

4. The senior-most puisne judge of a High Court should not automatically be appointed its Chief Justice unless he possesses ability and experience and is a competent administrator capable of handling complex matters.

ment should be with the concurrence of the Chief Justice of India.

5. Merit should be the sole criterion in appointing High Court judges, and for the purpose of recruitment the entire country should be treated as one unit. An ad hoc body presided over by the Chief Justice of India should be created to draw up a panel of persons suitable for such appointments.

6. In order to maintain the efficiency of the administration of justice the setting up of Benches of the High Court at different centres in a State should be

stopped,

7. In order to attract to the subordinate judiciary capable young graduates, an All-India Judicial Service, selected by means of a competitive examination on the lines of the I.A.S., should be created. Officers of this service should, as a rule, be allotted to States other than their own and should man 40 per cent of the posts in the State Judicial Service-Class I. Promotions should be only on grounds of merit and ability and not mere seniority.

8. Administration of justice being one of the primary functions of the State, it is

not proper, on principle, to charge any fees from suitors in courts. Steps should be taken to reduce court fees so that the revenue from it is sufficient to cover the cost of the civil judicial establishment. The salaries of judicial

officers should be a charge on the general tax-payer.

9. Legal aid to poor persons and persons of limited means is an obligation of a Welfare State. The State should provide the requisite funds to meet the

purpose.

10. The system of legal education has been defective. Only graduates, selected after strict tests, should be allowed to take the degree course in law. The principal method of teaching law should continue to be by lectures, supplemented by seminars or group discussions. Those wishing to practise law should complete a professional course conducted by the Bar Council in procedural and

practical subjects including professional ethics.

11. The recommendations of the All-India Bar Committee for the creation of a unified All-India Bar for the country and the establishment, composition and functions of the State and All India Bar Councils should be implemented. There should be a common roll of advocates who should have the right to practise in all the High Courts in India. There is no need for a separate Bar Council for the Supreme Court. The employment of touts by lawyers should be made a criminal offence.

Appendix to Chapter VI.

12. The system of treating judicial precedents as binding and citing them in courts makes for uniformity and certainty in the administration of laws. The system should, therefore, be continued.

13. A Law Reporting Council, consisting of the Advocate-General as the exofficio member, an academic lawyer, a representative of the Bar Council, and two or three eminent lawyers representing the Bar Association of the High Court and the mofussil Bar should be constituted in every State, on the same lines as the Council of Law Reporting in England. A similar Council may be established for the publication of the reports of the decisions of the Supreme Court.

The inter-lacing of legislative powers of the Union and the States in the concurrent field and the establishment of a single hierarchy of courts administering both Central and State laws make it necessary that the Central and State laws should be expressed in one language. The establishment of a unified Bar and the all-India judicial service cannot be implemented in the absence of a uniform language. At some convenient date in the future, therefore, Hindi should replace English as the language of our statutes and law reports and the proceedings of the Supreme Court, High Courts and the subordinate Courts at the district level. In the interim period both Hindi and English should be used. The medium of instruction in all law-teaching institutions should also be Hindi.

There should be a permanent body or Commission, consisting of full-time members, at the Centre charged with the duty of periodically revising the enactments in the light of developments in law and for consolidating, co-ordinating and re-modelling them in the context of changed conditions, modern legal concepts and fresh legislation. New legislative proposals, unless of an emergent nature, should also be submitted to this Commission for detailed examination before enactment.

The time is not yet ripe for making confessional statements made to police officers generally admissible in evidence as in England. As an experimental measure, a beginning may, however, be made by making a confession made to a superior police officer not below the rank of Deputy Superintendent in presidency towns admissible in evidence, provided the case is investigated by such officer himself.

17. The presumption of innocence of the accused is a salutary principle and is fundamental to our system of criminal jurisprudence. The prosecution of an accused person should be conducted with utmost fairness without any eagerness on the part of the prosecutor to obtain a conviction. To ensure fair and efficient prosecutions, the prosecuting agency should, therefore, be separate from the police department, and all prosecutors should be legally qualified men recruited from the Bar.

18. The Jury system is time-consuming and expensive. It is difficult to find jurors of the right type, and such jurors as are generally available are easily approachable and can be moved by extra-judicial considerations. The system, which has had a long trial in India, has been a failure and, therefore, should be abolished.

Panchayat courts are capable of doing very useful work in simple civil and criminal cases. A determined effort should be made to establish and popularise panchayat courts in States where they are not firmly established. avoid factional and partisan influences, a panchayat court may be constituted for a group of villages. The nyaya panchas should be given proper training before exercising judicial functions. To make panchayat courts live and effective institutions, special officers may be appointed to supervise their work and

collect and publish all useful information in regard to the work done by them.

20. In view of the need for a co-ordinated policy, a properly equipped Central Ministry, which could act not only as a storehouse of information but also lay down standards in the matter of judicial administration for all States, should be created. Pending the creation of such a Ministry, a Special Officer should be appointed to take up the task of speedy implementation of the Report.

SCHOLARSHIP SCHEMES*

FOR STUDIES ABROAD

Government of India Schemes

- 1. Agatha Harrison Fellowship for research work in modern or contemporary Indian history at the St. Anthony's College, Oxford.

 2. Central Overseas Scholarships' Scheme for teachers of universities, colleges and
- comparable institutions of higher education.

^{*}Appendix to Chapter VIII.

3. Union Territories Overseas Scholarships' Scheme for candidates who by birth or domicile are natives of the Union Territories.

Foreign Languages Scholarships' Scheme for specialisation in Arabic, Chinese, French, German, Italian, Japanese, Persian, Russian, Spanish and Turkish. Overseas Scholarships' Scheme for young and brilliant persons in the age group

20-25 and who are not in employment.

6. Indo-German Industrial Co-operation Scheme of scholarships for post-graduate study at West German universities/institutions and practical training in industries.

7. Overseas Scholarships' Scheme for Scheduled Castes, Scheduled Tribes and other Backward Classes.

Passage grants to Scheduled Castes, Scheduled Tribes and other Backward Classes candidates.

Programme for exchange of scholars between India and China. 9.

10. Programme for exchange of scholars between India and Czechoslovakia.

Programme for exchange of scholars between India and Iraq. 11.

Colombo Plan and Point Four Programme Scholarships and Fellowships

12. Colombo Plan Scholarships and Fellowships, for employees of the Union Ministry of Education including its attached and subordinate offices and also those who are employed in all-India integrated schemes which are co-ordinated in the Ministry, for training/study in the United Kingdom, Australia, Canada, New Zealand and Japan.

Point Four Programme Scholarships and Fellowships, for the employees of the Union Ministry of Education including its attached and subordinate offices and also those who are employed in all-India integrated schemes, for specialised training in the U.S.A.

UN and UNESCO Scholarships and Fellowships

14. U.N. Social Welfare Fellowships and Scholarships for suitably qualified social welfare personnel to gain additional knowledge and experience in their particular subjects of specialisation.

United Nations Technical Assistance Administration Programme of Scholarships and Fellowships for the employees of the Union Ministry of Education and its attached and subordinate offices for training/study in the United Kingdom, Australia, Canada, New Zealand and Japan.

16. Unesco Fellowships in the field of production of reading material for neo-literates.

17. Unesco grants for regional cultural studies—one Fellowship to an Indian national.

Foreign Governments' Scholarships and Apprenticeships

18. Austrian Government Scholarships for post-graduate research in any branch of engineering or medicine.

Belgian Government Scholarships for post-graduate research in mining, metallurgy,

chemical engineering or naval architecture.

Czech Government Scholarships for post-graduate work and practical training in botany, zoology, geology, physics, atomic science, mathematics, public health and medicine.

21. East German Government Scholarships for post-graduate study for engineering/ technical teachers.

22. French Government Scholarships for post-graduate study in engineering/technology/fine arts.

23. French Government Scholarships for specialised training in agriculture, applied scientific research, social subjects, public health, administration, architecture and town planning.

24. French Government Scholarships for post-graduate study/research in economics, history and French language and literature.

25. Federal Republic of Germany (West Germany) Scholarships for post-graduate study/training of engineering/technical teachers and teachers of humanities and basic sciences.

26. Federal Republic of Germany (West Germany) and the German Academic Exchange Service Scholarships for post graduate study/research in science, engineer-

ing and technology.

27. Federal Republic of Germany (West Germany) Government Scholarships for technical training in industries

28. Hungarian Government Scholarships for post-graduate research/training in manufacture of thermo-electric power plants, manufacture of railway rolling stock, manufacture of aluminium and manufacture of scientific instruments.

29. Italian Government Scholarships for post-graduate study in art, science, technology, museology, restoration of paintings and film technique.

Israeli Government Scholarships for post-graduate work in arid zone farming.

31. Japanese Government Scholarships for post-graduate research in any branch of agriculture, science, engineering or technology.

- 32. Netherlands Government Scholarships for post-graduate research in hydraulic engineering/fine arts.
- Norwegian Government Scholarship for post-graduate study/research in statistics. Norwegian Government Scholarships for post-graduate study in humanities.
- 34.
- Rumanian Government Scholarships for post-graduate research in oil technology, petroleum mining, geology and mining.

 36. Spanish Government Scholarships for study of sculpture, restoration of paintings
- and museology.
- 37. Swiss Government Scholarships for post-graduate study/research in any branch of science, technology or engineering.

 38. Swedish Government Scholarships for post-graduate study/research in any branch
- of science, technology or engineering.

 39. Swedish Government Scholarship for post-graduate study/research in political
- 40. United Arab Republic Government Scholarships for training and research in irrigation engineering and cotton growth and research.
- 41. U.S.S.R. Government Scholarships for post-graduate study/research in any basic science, agriculture, medicine or technology.
- 42. Yugoslav Government Scholarships for higher study/research in agriculture, medicine, painting or technology.

Foreign Institutions'/Organisations' Scholarships/Fellowships for Study/Training

- 43. British Council Scholarships for research in Commonwealth studies, social studies, public administration and English phonetics.
- 44. Brush Aboe Group Commonwealth Scholarships for training in mechanical and electrical engineering in U.K.
 45. Federation of British Industries Scholarships for practical training in different
- branches of engineering in British Industries in U.K.
- 46. Free Hanscatic City of Hamburg (West Germany) Scholarships for post-graduate study and research at the University of Hamburg.

 47. German Academic Exchange Service Scholarships for post-graduate study/research
- 48. Hamburg Chamber of Commerce Scholarships for technical training in industries.
 49. Hamburg University Students' Union Scholarships for post-graduate study for
- engineering/technical teachers.
- 50. International Association for the Exchange of Students for Technical Experience Scholarships for practical training in the member countries.
- 51. London University Institute of Education Fellowships for investigation in some line of educational problem at the London Institute of Education.
- 52. London Transport Executive Scholarships for practical training in traffic operation and engineering.
- 53. Philippines University Scholarships for post-graduate study in history and political
- 54. Ridgefield Foundation (U.S.A.) Scholarships for post-graduate study/research in
- 55. Royal Commission for the London Exhibition of 1851 and Rutherford Scholarships of the Royal Society, London, for research in pure or applied sciences.

FOR STUDIES IN INDIA

For Foreign Nationals

- 1. Colombo Plan Fellowships and Scholarships for scholars from South and South-East Asian countries.
- 2. French Fellowships' Scheme for French nationals for post-graduate study and
- 3. General Cultural Scholarships' Scheme for Indian students and students from certain Asian, African and Commonwealth countries.
- 4. Indo-German Industrial Co-operation Scheme for Fellowships for German nationals for post-graduate study and research. Programme for Exchange of Scholars between China and India.
- Programme for Exchange of Scholars between Czechoslovakia and India.
- 7. Programme for Exchange of Scholars between Poland and India.
- Reciprocal Scholarships' Scheme for students from Italy, Mexico, Netherlands, Norway, Sweden, Switzerland, Yugoslavia and Austria.
 Scholarships to Bhutanese students for school and college studies.
- 10. Scholarships to Sikkimese students for school and college studies. UNESCO Fellowships and Scholarships for nationals of other member-countries
- for study/training in educational institutions. Merit Scholarships in public schools to meritorious students.
- 13. Merit Scholarships for post-matriculation studies.

For Indian Nationals

Research Scholarships in humanities for students who have already taken a master's degree or its equivalent and wish to pursue advanced research in any branch of humanities.

Scheduled Castes, Scheduled Tribes and other Backward Classes Scholarships'

Scheme for post-matriculation studies.

16. Scholarships for higher studies for candidates from non-Hindi speaking areas where

facilities for higher studies in Hindi do not exist.

17. Scholarships for Young Workers in different cultural fields for training at recognised institutions or under approved instructors in any field of cultural activity, e.g., music (Hindustani and Karnatak, both vocal and instrumental, etc.), dancing, drawing, painting and sculpture.

18. Scholarships for blind persons over 16 years of age for higher academic education.

vocational or professional training.

19. Scholarships for deaf persons over 16 years of age for education higher than of primary or middle standard, vocational or technical training.

20. Scholarships/other educational facilities to children of political sufferers.

(1)	If the principal value of the shares or debentures does not exceed Rs.	Rate of duty
1.,	5,000	Nil
(2)	If the principal value of the shares or debentures exceeds Rs. 5,000	7½ per cent

RATES OF WEALTH TAX*

PART I

	Rate of Tax
(a) In the case of every individual:	•
(i) on the first rupees two lakhs of net wealth	Nil
(ii) on the next rupers ten lakhs of net wealth	1/2%
(iii) on the next rupees ten lakhs of net wealth	1%
(iv) on the balance of net wealth	11/2%
(b) In the case of every Hindu undivided family:	
(i) on the first rupees four lakhs of net wealth	Nil
(ii) on the next rupees nine lakhs of net wealth	1%
(iii) on the next rupees ten lakhs of net wealth	1%
(iv) on the balance of net wealth	11/2%
PART II	
In the case of every company:	
(i) on the first rupees five lakhs of net wealth	Nil

Provided that in the case of a company which has incurred a net loss in any year computed in the manner hereinafter provided and which has not declared any dividend

1%

computed in the manner hereinatter provided and which has not declared any dividend on its equity capital in respect of that year, the rate of tax for the relevant year shall be nil.

The loss referred to in the above proviso shall be computed in accordance with the provisions of sections 8,9, 10 and 12 of the Income-tax Act but without deducting the allowances referred to in paragraph (b) of the proviso to clause (vi) of sub-section (2) of section 10, sub-clause (via) and sub-clause (vib) of-section (2) of section 10 of that Act or the allowance in respect of any losses brought forward from earlier years.

Rule 1.—Where the net wealth of an assessee includes the value of any asset on which wealth-tax is not payable under sub-section (2) of section 5, the amount of tax payable by

(ii) on the balance of net wealth

^{*} Appendix to Chapter XIX.

the assessee shall be an amount bearing to the total amount of wealth-tax which would have been payable on the net wealth had no property been exempt the same proportion as the unexempted portion of net wealth bears to the net wealth.

Rule 2.—Where the net wealth of an assessee not being a company, in respect of any assessment year, includes the value of any shares in a company as defined in section 3 of the Companies Act, 1956, the wealth-tax payable by the assessee on his net wealth for that assessment year, computed in accordance with the rates specified above, shall be reduced by the amount, if any, by which the sum of the following, namely:—

(a) that portion of the wealth-tax payable by the assesser computed as aforesaid as bears to the whole amount of the tax, the same proportion as the value of the shares

aforesaid included in his net wealth bears to his net wealth,

(b) that portion of the wealth-tax, if any, paid by the company in respect of the same assessment year, as bears to the whole amount of the said tax the same proportion as the paid-up value of the shares included in the assessment of the assessee aforesaid bears to the aggregate paid-up value of the share capital of the company as on the relevant valuation date, exceeds the amount calculated at the rate of 1.5 per cent on the value of the shares included in his not wealth.

Rule 3.—Where an assessee is an individual who is not a citizen of India and who is not resident in India, the wealth-tax payable by him in respect of any assessment year computed in accordance with the rates specified in this schedule shall be reduced by an amount equal to 50 per cent thereof.

Rule 4.—Where the net wealth of an assessee, being an individual who is a citizen of India, or a Hindu undivided family, includes any assets located outside India, the wealth tax payable by the assessee in respect of any assessment year shall be reduced by an amount which bears to the amount of tax that would have been payable by the assessee if the rates of tax had been reduced to one-half of the rates specified in this Schedule the same proportion as the value of the assets located outside India as reduced by the debts located outside India bears to the net wealth of the assessee.

Rule 5.—Where the profits of a company in respect of any year, before deducting any of the allowances referred to in the second paragraph of the proviso to Part II, are less than the amount of wealth -tax payable by it in respect of the relevant assessment year, the wealth-tax payable by the company for such assessment year shall be limited to the amount of such profits:

Provided that the company has not declared any dividend on its equity capital in respect of that year.

RATES OF EXPENDITURE TAX*

In the case of every individual and Hindu undivided family, on that portion of the taxable expenditure:

(i)	which does not exceed Rs. 10,000;	10%
(ii)	which exceeds Rs. 10,000 but does not exceed Rs. 20,000	20%
	which exceeds Rs. 20,000 but does not exceed Rs. 30,000	40%
	which exceeds Rs. 30,000 but does not exceed Rs. 40,000	60%
	which exceeds Rs. 40,000 but does not exceed Rs. 50,000 which exceeds Rs. 50,000	80%
1 22)	Which exceeds its. 30,000	100%

AMRUTANJAN

Conqueror of Pain

Amrutanjan, the pain balm, has withstood the test of time. Since 1893, when it first made its appearance, millions of people have come to trust this balm for alleviating pain and suffering. Amrutanjan is a blend of safe and effective pain-relieving ointments. The soothing, medicinal vapours of this famous balm bring quick, comforting relief from body pains as well as coughs and colds. It is the remedy for all muscular aches, pains, sprains,

Coffee production nearly doubled in 5 years

More people drink coffee in India than ever before and yet more is available for export

COFFEE PRODUCTION in India has nearly doubled in the past 5 years. In 1958, the production reached a level of 43,200 tons against 23,565 tons in 1953.

Consumption: Consumption of Coffee in India has increased from 8,000 tons in 1940 to 26,200 tons in 1957. Efforts are being made to spread the use of coffee to the whole of India.

Export: In 1957 over 15,000 tons of Indian Coffee were exported to about 45 different countries of the world

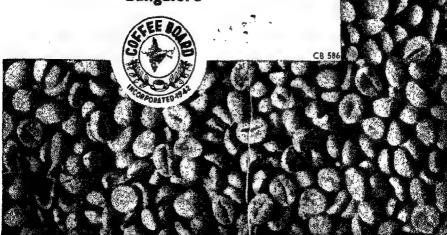

including West Germany, Netherlands, Belgium, Italy and United Kingdom in Europe and Bahrein Island and Kuwait in the Middle East. Consequently, foreign exchange earnings on coffee have also increased.

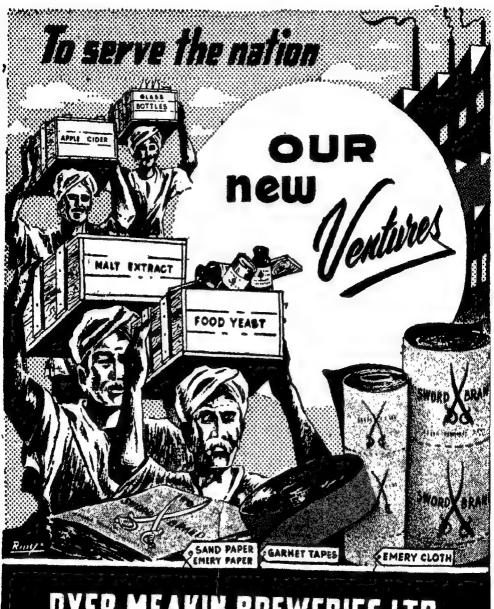

Coffee Industry in India has come a long way ahead since the 'thirties' and can now be said to be firmly established. better equipped to weather any future storms than ever before. It is a good foreign exchange earner for the country as well.

DYER MEAKIN BREWERIES LTD.

LUCKNOW DISTILLERY

MOHAN NAGAR BREWERY (U.P.)

THE ENGINEERING INDUSTRY is vitally dependent on imports of equipment and materials in order to maintain and expand production. The foreign exchange needed can be found, in part, from exports of Indian engineering products for which there is a considerable demand in neighbouring countries. Indian engineering firms can build up valuable export connections. The services of the Council are at their disposal.

PROMOTION COUNCIL

India Exchange Calcutta I

OUR SHIPS

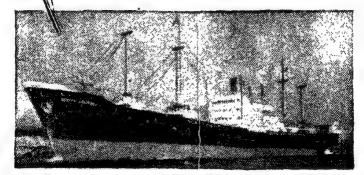

The fine, fast and modern vessels of India Steamship Co., Ltd., are promoting and protecting India's overseas trade by carrying the country's exports and imports speedily, regularly and safely.

OUR

Indian vessels contribute towards a sounder national economy by saving and earning of foreign exchange, stepping up invisible exports and securing a favourable balance of trade.

OUR A

A powerful merchant navy also serves the Nation as the country's second line of defence in times of emergency.

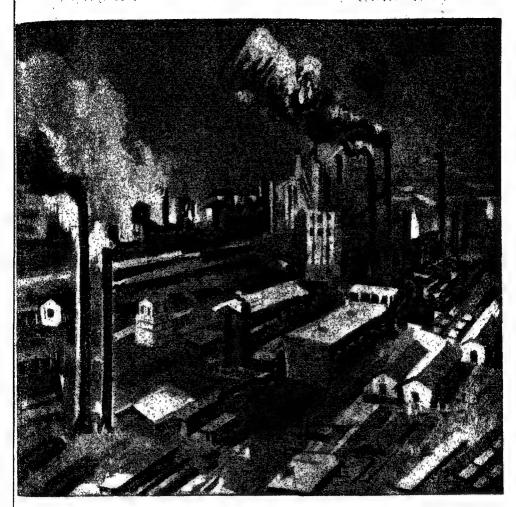

INDIA STEAMSHIP CO., LTD.

A panoramic view of the Burnpur works of The Indian Iron & Steel Company Limited

This is the town that never sleeps—the town of steel. Night and day, the vast works throb with activity as men and machines labour to feed the iron and steel-hungry industries of the nation. Using the most modern production technique the Company manufacture, under a system of rigid quality control, a wide range of products including rails, structurals, blooms, sheets, billets, slabs, pig iron, spun iron pipes, vertically-cast iron pipes and iron, steel and non-ferrous castings.

THE BACKBONE OF THE NATION

Severelyn Republican India v aconomy is now developing a new pattern, shedding its aniemic condition chanks to the farmer and the industrialist. The farmer is now free from the disquieting pressure from all sides and is determined to plough the furrow as many timea as possible in a year so that more food may be producted.

But he cannot succeed in his struggle with crude implements at his disposal. He must needs be helped

by the industrialist with finance, power, machinery, and chemical fertilisers indeed, agricultural progress must go parri passu with industrial progress. The J. K. Group of industrial combines in India are acutely conscious of this fact, and are utilizing all their wast resources to achieve the advancement of india by a progressively expanding programme of growth in every one of their varied

industrial interests, stepping up production so that dur people may enjoy a continually vising standard of living.

years of service to the nation

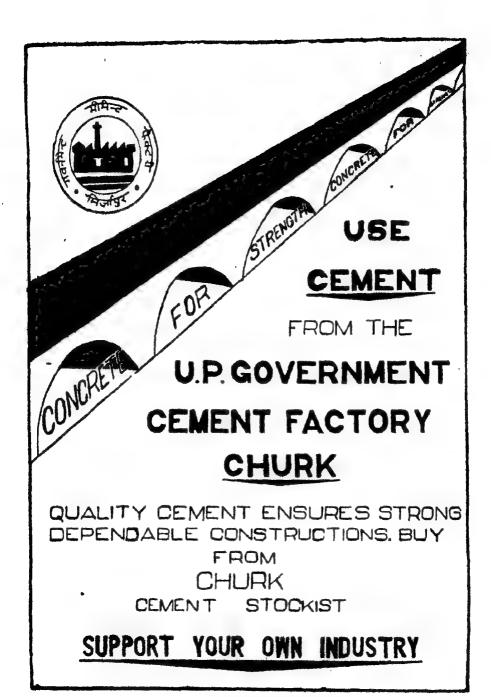

wentyfive years ago the spirit of service inspired the determination that sowed the seeds of Sulekha. From a humble beginning, the struggle began. Painstaking research guided by a missionary zeal could alone create the unchallenged quality of Sulekha Ink.

To-day, Sulekha's contribution
towards national self-sufficiency in the
ink industry is too obvious. Research continues,
as science is fastly progressing. An additional unit of
production is being built. Claiming no more than what
has been achieved, Sulekha pledges anew to serve you
better for days to come.

TWO Great BENEFITS

The change-over to the Matric System of Weights and Measures will benefit us in two important ways. At home, there will be an end to the confusion and loss arising from innumerable systems.

We will at the same time have the system which has been internationally well established. The Metric System is recognised the world-over.

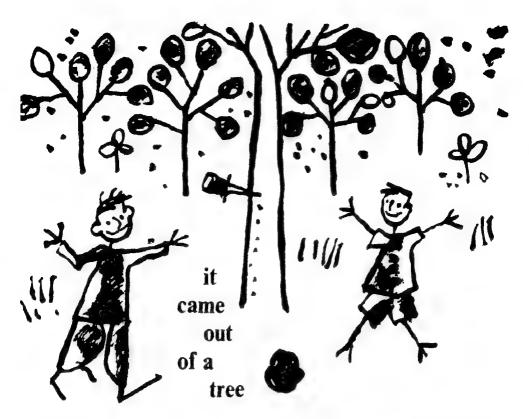

The first step in achieving this two-fold objective is the use of Metric Weights already introduced in selected areas of the States and industries.

for Simplicity and Uniformity

ISSUED BY THE GOVERNMENT OF INDIA

A school boy, writing an essay on Dunlop, said: "When Dunlop first came into being it came out of a tree. There were two men walking in the forest one day one man kept throwing his knife in the trees. He came to one tree and through his knife in it and something sticky came out. After a while it stopped coming out and at the bottom of the tree there was a big ball of rubber. After a while they started playing football with it and that is how it came into being. I will now tell you what Dunlop is used for..."

At this stage, perhaps, we should rescue our

for the best in handicrafts

Essential links in India's basic economy—
they have set the pattern of living
for millions through the agea,
Age does not wither nor
custom stale the infinite variety
of India's handloom fabrics. Their
perennial popularity is a tribute to
the incomparable skill and artistry
of India's cottage weavers in blending
traditional motifs with the
designs of today.

INDIA and ICI

From Rs. 18 crores of ICI research spring new products, new techniques, improved methods and materials.

Scientific research and investigation never cease in the ICI Laboratories in Britain. Specialists are constantly at work—studying, probing and experimenting. In 1957, for example, ICI spent more than £ 13½ million, approximately Rs. 18 crores, in employing leading specialists in every field of research.

Basically, that is 'good business'—to keep ahead of competition and abreast of the latest developments.

The outcome of this research is, of course, universally applicable. Here, these new products, processes, discoveries and techniques are speedily made available through the medium of ICI (India) and its associated companies. In India's fields, in her factories, her hospitals, her homes, the standards of

living, of health, of technical production—all are being raised by the application of ever-changing, ever-improving methods and materials.

With the establishment of new Industries, ICI gives a pledge of faith in the future.

ICI has given solid proof of its faith in the future of India. Numerous projects have been investigated and capital has been invested in schemes where local conditions promised sound development. These are mentioned below.

In addition to production, I.C.I. (India) furnishes free technical advice and service on the use of the products it sells. Specialists are available to assist customers in every way. This free service ranges from training their staff to answering technical problems and even to trying to assist in marketing.

THE ALKALI & CHEMICAL CORPORA-TION OF INDIA LIMITED, RISHRA, WEST BENGAL: Produces Caustic Soda, Chlorine, Hydrochloric Acid; 'Gammezane' brand B. H. C. Insecticides; 'Duco', 'Dulur,' 'Necol' and Stoving Enamela; 'Deoxidine', 'Granodine' and 'Alocrom' pretreatment products.

A plant for the manufacture of 'Alkathene' brand of Polythene is nearing completion. It involves an investment of nearly Rs. 4 crores.

ATIC INDUSTRIES PRIVATE LTD., BULSAR: Manufactures Vat Dyes for the Indian Textile Industry. Atic is a partnership between Atul Products Ltd., and ICL

INDIAN EXPLOSIVES LTD. is a foing venture of LC.I. and the Government of India. The factory at Gomia, Bihar, has cost over Rs. 4 crores.

I.C.I. (INDIA) PRIVATE LTD.: Makes in Calcutta, 'Alkathene' Film and 'Alkathene' Pipe for cold water and 'irrigation systems as Sewri. Bombay, dyestuffs are processed and packed to the exact requirements of the Indian market, and a comprehensive range of auxiliary products is manufactured for the bleaching, dyeing, printing and finishing of textile fibres.

STUDY and SERVE

On you depends the building of a new India. You are the future citizen.

- Your studies come first—Trained personnel are essential to the success of any Plan.
- Take active part in Planning Forums, Auxiliary Cadet Corps or the National Cadet Corps.
- · Co-operate with your teachers.
- · In your vacations make gardening or livestock-keeping a hobby.
- Join youth camps and promote social welfare.
- · Remember, dignity of labour is dignity of man.

PRECISION MEASURING INSTRUMENTS ARE ESSENTIAL REQUIRE-MENTS OF ALL INDUSTRIES BIG AND SMALL. ENGINEERING, TECH-NOLOGICAL, SCIENTIFIC & RESEARCH LABORATORIES CANNOT FUNCTION WITHOUT THE AID OF PRECISION INSTRUMENTS.

OUR EXPERT KNOWLEDGE OF INSTRUMENTATION COVERING
THE LATEST DEVELOPMENTS ACHIEVED BY U.S.A., U.K., USSR,
JAPAN, FRANCE, CZECHOSLOVAKIA, GERMANY AND OTHER
PROGRESSIVE COUNTRIES ARE PLACED AT YOUR COMPLETE
DISPOSAL.

We also Specialise in the following Lines:

- a) MAGNAFLUX Non-destructive testing equipments.
- b) FEDREX Industrial X-Ray equipments specially for aviation radiography.
- ELCONTROL Process & controlling Equipments.
- d) TELECOMMUNICATION EQUIP-MENTS including Telegraph, Telephone, Carrier current, Broadcast, Transmitting (including Radio Beacons) Television, V.H.F. & U.H.F. & Microwaye equipments.
- e) BRACKETTS Circulating Water Screens, Pumping Units & Accessories.

- Non-destructive f) Small Scale Industrial equipments.
 - g) Geological Drilling, Logging, prospecting & Seismographic equipments.
 - h) ENDEVCO Accelerometers, Transducers, Cathode Followers etc. for Measuring vibratory & Transient Accelerations.
 - i) Chemical Plant & Machinery.
 - j) Bread, Biscuit & Confectionery plant—power driven.
 - k) LAUNDRY PLANTS.
 - Electrical Generating Plants including Diesel Generating Sets, Motor Converters, Rectifiers, Transformers & Power Plants.

VISIT ANDHRA PRADESH

Land of beautiful lakes, mighty rivers and magnificent temples, such as Srisailam, Tirupathi, Kalahasti, Bhadrachalam and Lepakshi.

Do not miss to see the country's shipyard at Visakhapatnam, the Machkund Project, the Nagarjunasagar Project, the unique cottage Industries of Nakkapalli, Kondapalli, Warangal, Karimnagar and Nirmal.

Andhra Pradesh forests are a veritable paradise for Shikaris. Games of all kind, from a snipe to a tiger available in all seasons.

The bracing and salubrious climate of Araku Valley invites you for a brief sojourn.

Hyderabad City, the capital of Andhra Pradesh; 2,000 feet above sea level, has a pleasant climate from October to March. The historic fort of Golkonda, the unique Museum of Salar Jung, the Osmania University Buildings and old palaces, reminiscent of the glory that was Ind, are there for you to see.

Modern Hotels, Travellers' Bungalows and Rest Houses at all places of interest served by efficient transport service.

For particulars write to:

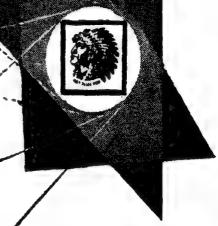

Officer-in-Charge,
Tourist Information Bureau, Department of
Information and Public Relations, Government of Andhra Pradesh, Hyderabad.

Grinding & Sanding

Only a high quality abrasive product can answer the demands of any precision job - Grinding or Sanding.

Carborundum Universal, with their vast experience and continuous research in the abrasive field, offer the finest quality abrasive products - both Bonded and Coated - which are unequalled in performance and dependability.

By efficient technical and quality control, the superiority of these products is maintained to meet the exacting demands of modern industries.

New Horizons

West Bengal the Five Year Plans have put a new

dynamism into every sphere of life-agriculture, industry,

health, education and all. The great D. V. C. and the Mayurakshi Projects have already transformed lakhs of and square miles or those that lived in fear of annual devastation by floods into smiling corn -fields. At Chittaranjan stands the giant 🖷 Flocomotive works, and the dense

Jungles of Durgapur are rapidly giving place to an industrial township of enormous

possibilities. Here the skies reverberate with the mingled sounds of countless

human voices and hammers,

cranes, rollers and what see not, all busy building a

one-million-ton Steel Mill and a Coke-Oven plant, which will have

ancillary plants for coal-tar distillation and gas to supply the needs

of a vast area.

numbers of new schools added

and new hospitals built.

Yet West Benga' never stops.

Already the Farakka Barrage

and the Calcutta Salt Lake

Lyery year new roads, bridges

Reclamation Schemes are being hammered into shape.

Ever-hopeful Bengal marches on...

showmanship

in words

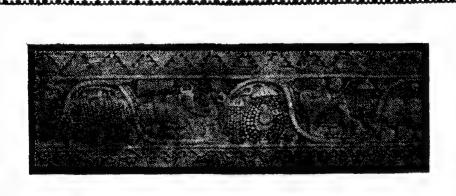

and

pictures

COLOURFUL pictures on a cave wall, graceful hieroglyphs on a crumbling pillar—ideas handed down the centuries through a variety of significant symbols and media - all express, interpret and present the thoughts of some memorable civilization.

Today, the heritage of India's tradition and culture has gained a new meaning through her own printing skill. The printed word and picture offer a wider scope of expression through an eloquent range of typography and colour reproductions, opening the minds of people to the past, present and future.

With her own words and pictures, India impresses her ideas at home and abroad through the showmanship of good printing.

TRAVEL IN COMFORT BY RAILWAYS

As Railways have to bear the brunt of carrying such essential goods as coal, foodstuffs, building materials etc., they are unable to avoid altogether overcrowding in the passenger services. Nevertheless, they are proud of the fact that they take great care to look after the millions that travel by Rail and are doing everything possible to make travel on this national undertaking comfortable. It is in the interests of the country that Rail transport is utilized to the maximum extent possible.

WANTED FOREIGN AGENTS OR INTERESTED EX-

What Alembic

means to you The dictionary defines 'alembic' as a "distilling apparatus". Originally supposed to transmute base metals into gold and silver, it became in the sixteenth century the first link between chemistry and medicine.

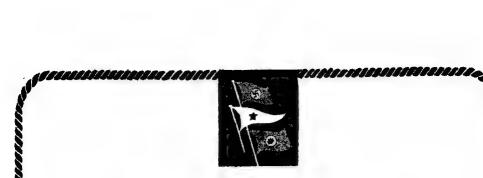

Alembic Chemical Works Co. Ltd. distil, in their well-equipped chemical laboratories, medicines known for their absolute efficacy. These medicines—checked and re-checked through every stage of manufacture—are so efficiently distributed that you can get AI EMBIC medicines anywhere.

Behind this intensive research, efficient production and systematic distribution is the ALEMBIC ideal: that you and your loved ones will lead a healthier, happier and longer life through chemistry.
